

Cisco Data Center Assurance Program (DCAP) 3.0

Version History

Version Number	Date	Notes
1	September 10, 2007	This Safe Harbor stub document was created.

Cisco Safe Harbor is an initiative emphasizing customer success through improved quality. Safe Harbor delivers customers a certified Cisco OS version of choice for critical deployment to increase overall network stability.

Safe Harbor subjects targeted releases (deployed in topologies consistent with those of identified customers) to complex levels of testing. The program offers additional benefit by serving as the conduit through which customer input influences Cisco premier testing.

Cisco Data Center Assurance Program (DCAP) 3.0 summarizes system-level and reliability testing completed for the specified release. The content of this document for Cisco customers is available from your Cisco representative.

Please ask for any associated EDCS numbers listed in [Table 1](#) for full book files or [Table 2](#) for Suite component book files.

Note

Full book files are large. The Configuration Book exceeds 6000 pages which was impractical to produce. Refer to [Table 2](#) for configuration component documents.

Cisco employees may go to the Safe Harbor website for supplemental information and related testing.

Vol. 16_Configs_WAAS.pdf						619308
Vol. 17_Configs_BladeServer.pdf						619309
Vol. 18_Configs_Exchange.pdf						619310

The following results-oriented doc types are available for DCAP 3.0.

Definitive testing documents include:

1. **CF (Customer Facing) For public consumption.**
 - Topologies, Introductions, Procedures, Results, Configurations
 - No Graphs, No Test Output
2. **CF- (Customer Facing Minus) For public consumption.**
 - Topologies, Introductions, Results, Configurations
 - No Procedures, No Graphs, No Test Output
3. **CF+ (Customer Facing Plus) For public consumption.**
 - Topologies, Introductions, Results, Graphs, Configurations
 - No Procedures, No Test Output
4. **SE (System Engineer) For internal technical use.**
 - Topologies, Introductions, Procedures, Results, Graphs, Test Output, Configurations
5. **SE- (System Engineer Minus) For public consumption.**
 - Topologies, Introductions, Procedures, Results, Graphs, Configurations
 - No Test Output

6. **Configs- (Configurations) For public consumption.**
 - Technology specific device configurations

**Note**

CF+ and SE- documents are not available if there are no output graphs for the specific testing cycle.
