Release Notes for AsyncOS 11.8.1 Hot Patch 3 for Cisco Web Security Appliances

Published Date: September 11, 2020

Contents

Build Number and Release Date

Build Number: 11.8.1-510

Release Date: September 11, 2020

What's New

Support for configuring the `TCPMSS` value	A new CLI main command `setmss` is added to configure the optimum `TCPMSS` value which is applicable to all the interfaces of the appliance.
	By default, the `setmss` command is disabled and the value is set to '0'. You can set the `TCPMSS` value between 72 to 1500.
	✎ **Note** Configure `setmss` as '1420' for setting the `TCPMSS` value as '1380' in the appliance.

Upgrade Paths

✎ **Note** Before upgrading to this release, save a copy of the appliance configuration file to a location other than the appliance.

You can upgrade to the 11.8.1-510 release from the following versions:

- 10.1.3-039
- 11.8.1-023
- 11.8.1-028
