Cisco Accessibility Conformance Report
VPAT® Version 2.0

Name of Product/Version: Cisco Tetration Analytics v2.3

Product Description: Cisco Tetration Analytics uses rich traffic flow telemetry to address critical data center operational use cases. It uses both hardware and software agents as telemetry sources and performs advanced analytics on the data collected. Cisco Tetration Analytics provides a scalable and point-and-click web UI to search information using visual queries, and visualize statistics using variety of charts and tables. In addition all the administrative functions and cluster monitoring can be done through the same web UI.
