

The bridge to possible

# Empowering intelligent enterprises everywhere to maximize the value of SAP

## Cisco and SAP

Through dependable infrastructure, adaptable platforms, and continuous innovation, Cisco empowers intelligent enterprises everywhere to do more with their SAP environments.

Cisco provides the foundation to connect users with applications, and the adaptable platforms to ensure that SAP environments are easily deployed, managed and optimized. Supported by world-class R&D, Cisco delivers new ways to innovate, drive business agility, and do more with data.

### Enterprise businesses are looking for ways to maximize the value of their SAP environments

Relying on traditional data centers creates siloes for SAP applications, inhibits the speed and flow of data across an organization, and reduces innovation and functionality. To remain competitive, businesses are looking to modernize and expand their infrastructure by upgrading from SAP ECC to S/4HANA, transition to the cloud, or implement new SAP modules. This transition can help lay the foundation for new innovation while maximizing the value of existing SAP environments.

### What's needed is a single partner that supports and drives value from solutions across the SAP ecosystem

Cisco is the only choice for deploying the complete SAP solution with infrastructure that is built in concert with SAP. This includes world-class hardware and software solutions. Cisco helps you maximize the value of your existing SAP investment and add valuable new cloud-native capabilities to help your business thrive now and into the future.

## Core Benefits

### Dependable infrastructure

Connect SAP applications and users across the enterprise with the best foundation for a modern, flexible, and efficient SAP environment

### Adaptable platforms

Ensure SAP environments are deployed, managed, and optimized for enhanced functionality across the entire data management suite

### Continuous innovation

Take advantage of world-class R&D that consistently finds new ways to innovate, drive business agility, and do more with your data

## Competitive Advantage

### Data center solutions for SAP: Build a modern cloud infrastructure

- Cisco's intent-based data center solution, certified by SAP, offers zero-touch deployment of S/4HANA
- Cisco Hyperflex™ hyperconverged Infrastructure and Cisco UCS® converged infrastructure for SAP HANA

### AppDynamics for SAP: Ensure systems are operating efficiently

- AppDynamics® offers code-level SAP application metrics for optimal performance, allowing deep diagnosis into every layer of SAP applications
- AppDynamics' SAP monitoring solution gives organizations complete, end-to-end visibility into their SAP landscapes along with in-depth insights into system performance, including mission-critical SAP business processes like order-to-cash

To learn how Cisco® solutions for SAP can help your business, contact your local Cisco account manager or authorized Cisco reseller.
