

Secure Your Enterprise With Competitive Payment Solutions

Overview

Businesses are dealing with unprecedented IT threats and challenges daily—sometimes with limited resources. On top of that, everything needs to be secure while infrastructures continue to evolve and become more complex. Cisco has solutions to protect your business and with flexible payment solutions, we can help you accelerate your projects, improve cash flow, enhance your return on investment, and lower the total cost of ownership.

Ready to get started?

Disclaimer:

Payment solutions, applicable financiers and availability of any referenced programs will vary by jurisdiction. Financing and service offerings through Cisco Systems Capital Corporation and its affiliates (collectively, "Cisco Capital") are available in certain jurisdictions and are subject to credit approval and execution of standard Cisco Capital documentation. Payment solutions not available through Cisco Capital may be offered by an independent financing source. Rates and terms are based on customer's credit rating, offering types, product types and options. Not all customers may qualify. Not all services or offers are available in all jurisdictions. Other restrictions may apply. Cisco Capital reserves the right to change or cancel the foregoing at any time without notice. In California, loans offered by Cisco Capital will be made or arranged pursuant to a California Financing Law License.

Never go it alone—choose expertise you can trust.

In the midst of these unpredictable cyberthreats and challenges, security resilience—which focuses on detection, response, and recovery—is more important than ever. And no one has done it better. Cisco has invested more than \$10 billion in advanced security technologies over its 40-year history in this space.

The Cisco Secure portfolio helps businesses see more, anticipate what's next, take the right action, and close security gaps—enabling you to withstand unpredictable threats and then emerge stronger.

How prepared is your business?

Our flexible payment solutions enable faster decision making to help you start and execute Cisco Secure projects more quickly. You can get what your business needs now—whether it is a technology refresh or upgrade—without your budget holding you back.

Put our market-leading payment solutions to work for you.

From lifecycle management and consumption models to total solution financing, we offer a variety of payment solutions you can leverage now to support your security needs and

accelerate Cisco Secure projects faster. You can also enhance your return on investment as you capture the value of security resilience for your business.

For software EA security solutions

- Lock in software costs with a predictable payment plan, aligned to the EA term, at no additional financing cost.
- Align costs to usage and structure payments to match the deployment of software licenses.

For hardware security solutions

- Leverage a lifecycle approach to maintain the latest technology and avoid the cost of obsolescent equipment.
- Support a circular IT and sustainability strategy.
- Reduce your usage costs, since the cost to use the equipment over the payment term is typically less than an outright purchase.

For bundled security solutions

- Pay no upfront costs while bundling the entire security solution together in one payment.
- Match expense to usage to use capital resources more efficiently.
