## Use Case Workshop overview

Use Case Workshops are hands-on, instructor-led courses focused on specific use case outcomes in Cisco Stealthwatch® Enterprise. The workshops are designed to help you quickly identify and investigate common threats and to provide effective workflows so that you can fully understand Stealthwatch capabilities.

In this workshop, you'll work through a series of use cases that focus on identifying indicators of compromise and mapping them to a security framework.

This workshop is intended to be interactive and engaging. You are encouraged to ask questions, respond to questions, and share best practices and ideas.

This course is for experienced Stealthwatch users. It is highly recommended that you have knowledge of the Stealthwatch product and configuring security alarms.

After taking this workshop, you should be able to:

- Define what a security framework is and what purpose they serve.
- Describe the advantages of using a security framework with Stealthwatch.
- Analyze adversary activity within your network using Stealthwatch.

## Workshop duration

Approximately 2 to 3 hours.

## Cisco Capital

### Flexible payment solutions to help you achieve your objectives

Cisco Capital makes it easier to get the right technology to achieve your objectives, enable business transformation and help you stay competitive. We can help you reduce the total cost of ownership, conserve capital, and accelerate growth. In more than 100 countries, our flexible payment solutions can help you acquire hardware, software, services and complementary third-party equipment in easy, predictable payments. [Learn more.](#)
