## Product migration options

Cisco goes through a very rigorous process to ensure that customers receive support. However in rare occasions, due to component supplier limitations, there may be a need for customer to migrate to a part that is an upgrade of something comparable or better than what they previously bought. This may require customer to upgrade to a different Software and OS version or even the closest generation of an equivalent server that may be currently shipping at the time.

Service prices for Cisco products are subject to change after the product End-of-Sale date.
