Cisco Secure Endpoint

Stop threats with a simple, unified defense

Speed and efficacy matter when it comes to endpoint security. Cisco Secure Endpoint empowers you to defend against the most advanced threats. It reduces remediation times by as much as 85 percent by expediting your ability to detect, respond to, and recover from attacks.

Powerful EDR capabilities

Stop threats with built-in or completely managed Endpoint Detection and Response (EDR), threat hunting, and integrated risk-based endpoint security from Cisco Vulnerability Management.

Benefits of a complete solution

Cisco Secure Endpoint offers cloud-delivered endpoint protection and advanced EDR across multi-domain control points. It stops threats and blocks malware then rapidly detects, contains and remediates advanced threats that evade front-line defenses.

- **Prevent:** Identify and stop threats before compromise. Reduce the attack surface with multifaceted prevention techniques, risk-based vulnerability framework, and posture assessments.

- **Detect:** Hunt for hidden threats, detect stealthy malware, perform advanced investigations with global threat intelligence from Talos, and run custom queries to gain unprecedented visibility into your endpoints.

- **Respond:** Reduce incident detection and response times with Extended Detection

and Response (XDR) capabilities from Cisco XDR. Cisco XDR collects and correlates data across email, endpoints, servers, cloud workloads, and networks, enabling visibility and context into advanced threats.

- **Maximize:** Simplify your cybersecurity and improve your security operations' effectiveness by letting Cisco security experts do the heavy lifting. Secure MDR for Endpoint offers dedicated teams of elite Cisco security experts in global Security Operations Centers (SOCs) as well as 24x7x365 protection.

Streamline investigations

Get the visibility and answers you need about your endpoints - quickly- with our Orbital Advanced search capabilities.

See more

Simplify security investigations with advanced EDR and broad context on endpoint, web, email, and network data with Cisco XDR.

Block more

Stop threats before compromise and reduce the attack surface with multifaceted prevention techniques, posture assessments, and risk-based vulnerability management.

Respond faster, completely

Reduce incident response time by as much as 97% with advanced EDR and XDR capabilities from the Cisco XDR solution. Deploy it yourself, with a partner, or completely managed by Cisco, with flexible licensing options that are customized to your needs.
