Introduction

This document describes common procedures for Cisco TelePresence Management Suite (TMS), Cisco TelePresence Management Suite Extension for Microsoft Exchange (TMSXE) and Cisco TelePresence Management Suite Provisioning Extension (TMSPE) with the use of video links.

Prerequisites

Requirements

There are no specific requirements for this document.

Components Used

The information in this document is based on these software versions:

- Cisco TelePresence Management Suite (TMS) 13.x, 14.x, and 15.x
- Cisco TelePresence Management Suite Extension for Microsoft Exchange(TMSXE) 2.x, 3.x, 4.x, and 5.x
- Cisco TelePresence Management Suite Provisioning Extension (TMSPE) 1.x
- TMS log collection Utility
- Structured Query Language (SQL) Management Studio

The information in this document was created from the devices in a specific lab environment. All of the devices used in this document started with a cleared (default) configuration. If your network is live, ensure that you understand the potential impact of any command.

Video Links

There are public videos that describe each procedure and can be found at <https://video.cisco.com>.

1. This video explains how to collect logs for TMS and TMSXE with the use of the TMS web interface and the TMS log collection utility.
