## Introduction

This document describes the Cisco Secure Endpoint Linux connector Long Term Support (LTS) commitments.

## Cisco Secure Endpoint Connector Long Term Support

Cisco Secure Endpoint connector LTS is the time period in which a Linux distribution will only receive bug fixes and security patches, and will no longer receive any new features.

The connector LTS will only support the latest officially supported kernel on the Linux distribution. If a distribution has entered connector LTS then it is nearing its end of life as defined by the Distribution Vendor and customers will be required to update their endpoint to the latest officially supported version of the distribution and kernel available. Customers must also prepare to upgrade their endpoints to a newer distribution before connector LTS has ended.

The connector LTS will align with the Distribution Vendor policy to only support the latest version of the end of life distribution version. For example, the last minor release of Enterprise Linux 6 that the connector will support long term is 6.10. This is in accordance with the [Secure Endpoint Software Support Policy](#):

Secure Endpoint software support on all operating systems will align with the vendor's published end-of-support schedule.

The connector LTS only supports the latest patch version available in the connector LTS version family specified for a legacy distribution. For example, if the connector LTS version family is 1.20.X then X must be the largest available patch version. Customers are expected keep their connector LTS version updated to the latest patch version to continue to receive support.

A Linux distribution that is used beyond the connector LTS period will lose support from Cisco Secure Endpoint. This is true for a Linux distribution that is no longer supported:

- Cisco Engineering will no longer develop, repair, maintain, or test the Secure Endpoint connector on these distributions.
- Cisco Technical Assistance Center (TAC) will not provide support for the Secure Endpoint connector on these distributions.
- All support services for the product are unavailable, and the product becomes obsolete.

**Note:** Support continues under the terms and conditions of customers' service contract on supported operating systems and distributions for customers with active service and support contracts.

See [Linux System Requirements](#) and tables for [RPM-based](#) and [Debian-based](#) compatibility.

## LTS Announcements

Distribution	Version	LTS Announcement
Enterprise Linux (EL)	6	<b>Ends on November 7, 2024</b>
	7	Ends on June 30, 2028
	8	Starts on May 31, 2029
SUSE Enterprise / openSUSE Leap	15 SP2 / 15.2	<b>Ends on December 31, 2024</b>

	15 SP3 / 15.3	Ends on December 31, 2025
	15 SP4 / 15.4	Ends on December 31, 2026
	15 SP5 / 15.5	Starts on December 31, 2024
Debian	11	Ends on June 30, 2026
	12	Starts on June 10, 2026
Ubuntu LTS	18.04	Ends on April 1, 2028
	20.04	Starts on on April 2, 2025
Amazon Linux	<b>2</b>	<b>Ends on June 30, 2025</b>
	2023	Starts on March 15, 2025

## Legend

	<b>Supported</b>
	<b>Supported on LTS family version; Currently in Cisco Secure Endpoint connector LTS</b>
	<b>Unsupported; Past the end of Cisco Secure Endpoint connector LTS</b>

## Enterprise Linux

Cisco Secure Endpoint connector LTS for Enterprise Linux (EL) encompasses these distros:

- Rocky Linux
- Alma Linux
- Red Hat Enterprise Linux (RHEL)
- Oracle Linux (RHCK)
- CentOS Linux
- Oracle Linux

The "End of Maintenance Support" and "End of Extended Life Cycle Support" for RHEL is used to determine the connector LTS periods for EL based distributions.

Distro	Distribution Vendor		Cisco Secure Endpoint Connector	
	End of Maintenance Support	End of Extended Life Cycle Support	End of LTS	LTS version family
EL9	May 31, 2032	May 31, 2035	May 31, 2035	TBD
EL8	May 31, 2029	May 31, 2032	May 31, 2032	TBD
EL7	June 30, 2024	June 30, 2028	June 30, 2028	1.24.X
EL6	November 30, 2020	June 30, 2024	November 7, 2024	1.20.X

## Amazon Linux

Distro	Distribution Vendor		Cisco Secure Endpoint Connector	
	End of Standard Support	End of Security Support	End of LTS	LTS version family
Amazon Linux	March 15, 2025	March 15, 2028	March 15,	TBD

2023			2028	
Amazon Linux 2	June 30, 2025	June 30, 2025	June 30, 2025	1.24.X

## SUSE Linux Enterprise and openSUSE Leap

15 SP1 / 15.1 January 31, 2021 January 31, 2024 January 31, 2024 1.24.X 15 SP1 / 15.1 January 31, 2021 January 31, 2024 January 31, 2024 1.24.X

Distro	Version	Distribution Vendor		Cisco Secure Endpoint Connector	
		End of General Support	End of Long Term Service Pack Support	End of LTS	LTS version family
SUSE Enterprise / Leap	15 SP5 / 15.5	December 31, 2024	December 31, 2026	December 31, 2026	TBD
	15 SP4 / 15.4	December 31, 2023	December 31, 2026	December 31, 2026	1.24.X
	15 SP3 / 15.3	December 31, 2022	December 31, 2025	December 31, 2025	1.24.X
	15 SP2 / 15.2	December 31, 2021	December 31, 2024	December 31, 2024	1.24.X
	15 SP1 / 15.1	January 31, 2021	January 31, 2024	January 31, 2024	1.24.X
	15 SP0 / 15.0	December 31, 2019	December 31, 2022	January 31, 2024	1.24.X

## Ubuntu LTS

Distro	Distribution Vendor		Cisco Secure Endpoint Connector	
	End of Maintenance & Security Support	End of Extended Security Maintenance	End of LTS	LTS version family
Ubuntu LTS 24.04	April 25, 2029	April 25, 2036	April 25, 2036	TBD
Ubuntu LTS 22.04	April 1, 2027	April 9, 2032	April 9, 2032	TBD
Ubuntu LTS 20.04	April 2, 2025	April 2, 2030	April 2, 2030	TBD
Ubuntu LTS 18.04	May 31, 2023	April 1, 2028	April 1, 2028	1.24.X

## Debian

Distribution	Distribution Vendor		Cisco Secure Endpoint Connector	
	End of Security Support	End of LTS	End of LTS	LTS version family
Debian 12	June 10, 2026	June 10, 2028	June 30, 2028	TBD
Debian 11	July 1, 2024	June 30, 2026	June 30, 2026	1.24.X
Debian 10	Sept 10, 2022	June 30, 2024	June 30, 2024	1.24.X

# Configure a Connector Long Term Support Policy

The connector downloads an update (xml) seed with every policy sync if the policy for this connector is for a greater version, however the connector will not update if the update seed is for a version greater than the connector LTS family. Customers who want to avoid unnecessary update seed downloads can place their legacy distributions currently in connector LTS in a separate policy whose version is the latest in the LTS family for that legacy distribution.

If you want to continue using a legacy distribution throughout its connector LTS period then it is recommended that you create a separate policy for the legacy distribution. See the "Enable Debug Mode Using the Secure Endpoint Console" section of the [Cisco Secure Endpoint Connector for Linux Diagnostic Data Collection](#) article for step-by-step instructions on how to duplicate a policy with new settings. When editing your policy you will take a few different steps:

1. On the Edit Policy page, select the Product Updates tab.
2. From the Product Version dropdown, select the latest product version in the connector LTS version family that aligns with your the legacy distribution.

The screenshot shows the 'Edit Policy' interface for a Linux connector. The left sidebar contains tabs for 'Modes and Engines', 'Exclusions', 'Proxy', 'Outbreak Control', 'Product Updates' (which is selected), and 'Advanced Settings'. The main content area shows the following settings:

- Name: Legacy EL6 Policy
- Description: (empty text area)
- Product Version: 1.20.7.982 (highlighted with a red box)
- Update Server: (redacted)
- Date Range: 2024-01-27 18:08 to 2024-02-19 18:08

At the bottom right, there are 'Cancel' and 'Save' buttons.
