

# SG350XG: Web Browser Freezes when SNA is Left Open for a Long Time

## Date Identified

May 23, 2017

## Date Resolved

N/A

## Product Affected

SG350XG	2.2.0.x

## Problem Description

Smart Network Application (SNA) does not release Random Access Memory (RAM) correctly when it is left open for a long period of time such as leaving it on overnight which causes a web browser to freeze due to lack of RAM.

## Current Status

There is no known workaround.
