

# Distinctive Ring Settings on SPA8000 Phone Adapter

## Objective

Distinctive ring settings help you customize ring tone patterns for different numbers. There are nine ring types to configure with distinctive ring patterns. These distinctive ring setups are used to distinguish different telephone numbers on the same phone line. This document outlines the procedures to set distinctive ring settings on a SPA8000.

## Applicable Device

- SPA8000

## Software Version

- 6.1.12

## Distinctive Ring Settings

Step 1. Log in to the web configuration utility and choose **Advanced > Voice > L1-L8**. The *Line* page opens:

The screenshot displays the web configuration utility interface for the SPA8000. It is divided into several sections:

- Speed Dial Settings:** Contains nine input fields for Speed Dial 2 through Speed Dial 9.
- Supplementary Service Settings:** Contains various settings with dropdown menus, such as CW Setting (yes), Block ANC Setting (no), CID Setting (yes), Dist Ring Setting (yes), Message Waiting (no), Media Loopback Mode (source), Block CID Setting (no), DND Setting (no), CWCID Setting (yes), Secure Call Setting (no), Accept Media Loopback Request (automatic), and Media Loopback Type (media).
- Distinctive Ring Settings:** This section is highlighted with a red border and contains nine input fields for Ring1 Caller through Ring9 Caller.
- Ring Settings:** Contains settings for Default Ring (1), Hold Reminder Ring (8), Cfdw Ring Splash Len (0), VMWI Ring Splash Len (0), Ring On No New VM (no), Default CWT (1), Call Back Ring (7), Cblk Ring Splash Len (0), and VMWI Ring Policy (New VM Available).

**Note:** There are 9 lines available for configuration. The user indicates which line needs to be configured for distinctive ring settings in Step 1 by the selection one of the desired line number.

### Distinctive Ring Settings

Ring1 Caller:	1112245	Ring2 Caller:	4444401
Ring3 Caller:	1188273	Ring4 Caller:	0091186
Ring5 Caller:	1234563	Ring6 Caller:	1192758
Ring7 Caller:	1222222	Ring8 Caller:	1111111

Step 2. On the *Line* page, scroll down to the *Distinctive Ring Settings* section.

Step 3. Enter a caller number pattern to play Distinctive Ring/Call Waiting Tone (CWT) 1, 2, 3, 4, 5, 6, 7, 8, or 9 in the Ring(1-9) Caller field. It is blank by default.

**Note:** To modify the distinctive rings and CWT refer to the articles, *Call Forward Settings on the SPA8000 Phone Adapter* and *Configure Ring Settings on the SPA8000 Phone Adapter*.

Step 4. Click **Submit All Changes**.
