

# Software for Support of -B Domain Access Points

## Contents

[Introduction](#)

[Table 1 - Software releases with -B domain AP support](#)

[Special Note Regarding the AP802](#)

## Introduction

Starting May 1, 2016, the Federal Communications Commission (FCC) restricted distribution of new -A domain access points in the United States. A new -B domain has been introduced to comply with the new FCC regulations. Cisco has released new AP SKUs for the -B domain - the following table shows in which software releases -B domain support is introduced.

For more information on the FCC change, see the [New -B Domain Product Bulletin](#).

## Table 1 - Software releases with -B domain AP support

| AP Series                      | 7.4.150<br>.0<br>(15.2(2<br>)JB6) | 8.0.13<br>2.0<br>(15.3(3<br>)JA7) | 8.2.11<br>0.0<br>(15.3(3<br>)JC1) | 8.3.10<br>2.0<br>(15.3(3<br>)JD) | IOS-XE<br>3.6.5 | IOS-<br>XE<br>3.7.4 | IOS-XE<br>3.8.2 | IOS-XE<br>3.9.0 | Polaris<br>16.1.3 | Polaris<br>16.2.2 | Pola<br>16.3 |
|--------------------------------|-----------------------------------|-----------------------------------|-----------------------------------|----------------------------------|-----------------|---------------------|-----------------|-----------------|-------------------|-------------------|--------------|
| AP-3700i/e                     |                                   |                                   |                                   |                                  |                 |                     |                 |                 |                   |                   |              |
| AP-2700i/e                     |                                   |                                   |                                   |                                  |                 |                     |                 |                 |                   |                   |              |
| AP-1700i                       |                                   |                                   |                                   |                                  |                 |                     |                 |                 |                   |                   |              |

## Special Note Regarding the AP802

The AP802 (embedded in various 800 series ISR models) is not available in a -B SKU. 800 series ISRs with -A SKU AP802s sold after May 1, 2016, are compliant with FCC regulations (and only

support the UNII-1 and UNII-3 bands.)
