Prefix Utilization

Prefix Utilization

This alarm monitors the capacity of a prefix and is triggered when the maximum percentage of total capacity of a single prefix on a monitored interface is exceeded. To configure this alarm, do the following:

Step 1   In the main window, click ▦ > **Configure > Policies**.

Step 2   Click **Add Policy**.

Step 3   Enter a policy name in the **Name** field.

Step 4   Under **Triggers**, click **Add Rules**.

Step 5   Click **Prefix Utilization**.

Step 6   Click **Next**.

Step 7   By default, the rule is enabled. Toggle the switch to DISABLED if you do not want to activate the rule yet.

Step 8   Use the slider to indicate the utilization range that will trigger this alarm. Crosswork Cloud will send a notification if utilization is within the range indicated by the color red and ALARM text.

Step 9   Under the **Severity** drop-down list, select the severity level you want defined for this alarm.

Step 10   Make any other necessary interface and endpoint notification configurations, then click **Save**.
