Find Packages

Find Packages

Crosswork Cloud Trust Insights helps you quickly find installed SMU packages, which can be helpful if you want to replace a version of software or update an SMU to fix a security vulnerability.

Step 1   In the main window, click **Trust Insights > Find Package**.

Step 2   In the View field, select one of the following options:

- **Search**—Searches for all packages.

- **Committed But Not Activated**—Searches for packages that are committed but not activated.

Step 3   Enter at least 3 characters on which to search.

Step 4   Select one of the following options:

- **Include**—Searches for packages that include the characters you entered.

- **Exclude**—Searches for packages that do not include the characters you entered.

Crosswork Cloud Trust Insights displays the packages that match the criteria you specified.
