Feature History for Smart Licensing Using Policy

This table provides release and related information for features that are explained in this module.

These features are available on all releases after the one they were introduced in, unless noted otherwise.

Release	Feature	Feature Information
Cisco Nexus 3550-T - 10.2(3t)	Smart Licensing Using Policy (SLP)	<p>An enhanced version of Smart Licensing, with the overarching objective of providing a licensing solution that does not interrupt the operations of your network, rather, one that enables a compliance relationship to account for the hardware and software licenses you purchase and use.</p> <p>Starting with this release, SLP is automatically enabled on the device. This is also the case when you upgrade to this release.</p> <p>By default, your Smart Account and Virtual Account in CSSM is enabled for SLP.</p>

Use Cisco Feature Navigator to find information about platform and software image support. To access Cisco Feature Navigator, go to <http://www.cisco.com/go/cfn>.
