## New and Changed Information

This table summarizes the new and changed features for the *Cisco Nexus 3600 Series NX-OS System Management Configuration Guide, Release 10.5(x)* and where they are documented.

**Table 1: New and Changed Features**

| Feature                                      | Description   | Changed in Release | Where Documented  |
|--|---|--------------------|---|
| PTP Time Distribution Hold                   | Added support for holding time distribution until a BC node locks to primary time source and settles down to the target correction value. | 10.5(1)F           | <a href="#">PTP Time Distribution Hold Guidelines and Limitations for PTP</a><br><a href="#">Configuring PTP Globally</a> |
| PID-specific SMUs                            | Added support for installation of PID-specific SMUs only on the PIDs they are meant for   | 10.5(1)F           | <a href="#">Guidelines and Limitations for SMUs</a>   |
| SMU Retry/Reload Switch if SMU install Fails | Added support to reload the switch automatically when a valid and compatible SMU that needs to be activated, fails to activate            | 10.5(1)F           | <a href="#">Guidelines and Limitations for SMUs</a>   |
