|---|---|---|---|---|---|
| SERVICE_MODULE-4-NOTREADY | 4-Warning | Unit [chars] not ready for next command | The module was waiting for the current request to be processed\n\ before sending the next request. The current request has been in progress\n\ for more than 3 seconds. | low-serial | "Copy the error message exactly as it appears and report it to your\n\ technical support representative." |
| SERVICE_MODULE-5-LOOPBACKREMOTE | 5-Notice | Unit [chars] - Remote loopback test cancelled | A hardware or software error occurred. | low-serial | "Copy the error message exactly as it appears and report it to your\n\ technical support representative for assistance." |
| SERVICE_MODULE-5-LOOPUPFAILED | 5-Notice | Unit [chars] - Loopup of remote unit failed | This notification message indicates that the loopback on the remote\n\ unit failed. The failure may indicate that the network connection is\n\ broken or that loopbacks are disabled at the other side. | low-serial | "Check that the router is connected to the network. Enable "loopbacks"\n\ on the remote unit. If the problem persists copy the error message\n\ exactly as it appears and report it to your technical support\n\ representative." |
| SERVICE_MODULE-5-LOOPREMOTE | 5-Notice | Unit [chars] - Remote unit placed in loopback | This notification message indicates that the user executed a loopback\n\ command on the remote unit. The remote unit is now in loopback. | low-serial | "No action is required." |
| SERVICE_MODULE-5-RESET | 5-Notice | Reset of Unit [chars] issued | This message indicates that the module was reset. | low-serial | "No action is required." |

|---|---|---|---|---|---|
| SFF8472-3-FLOAT_INTERNAL_ERROR | 3-Error | [chars] | The SFF8472 floating point subsystem encountered an internal\n\ software error. The error message contains text which can be used\n\ to help identify the nature of the problem. | - | LOG_STD_SH_TECH_ACTION |
| SFF8472-2-NOMEM | 2-Critical | Not enough memory available for [chars] | There has been a threshold violation as specified in the message.\n\ If the violation has occured only during bootup/OIR/link up/down\n\ you may ignore the message. Otherwise the violations in optical\n\ tx/rx power are most likely due to incompatible/defective\n\ optical components or too long/short optical cables. It may also\n\ be due to faulty transceiver. | - | LOG_STD_SH_TECH_ACTION |
| SFF8472-3-INTERNAL_ERROR | 3-Error | [chars] | The SFF8472 subsystem encountered an internal software\n\ error. The error message contains text which can be used\n\ to help identify the nature of the problem. | - | LOG_STD_SH_TECH_ACTION |
| SFF8472-3-READ_ERROR | 3-Error | [chars] | There was an error reading digital optical monitoring information\n\ from the transceiver at the specified interface. | - | "Please try removing and reinserting the transceiver.\n\ If it still does not work please replace the transceiver." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SHEDULE-3-UNEXPECTED_EVENT | 3-Error | Process received unknown event maj [hec] min [hec]. | A process can register to be notified when various events occur in the\n\ router. This message indicates that a process received an event it\n\ did not know how to handle. | - | "Copy the error message exactly as it appears and report it\n\ to your technical support representative." |
| SFP_SECURITY-4-DUPLICATE_SN | 4-Warning | SFP interface [chars] has the same serial number as another SFP interface | The SFP was identified as a Cisco SFP but its serial number matches that of another interface on the system. | firmware | "Cisco SFPs are assigned unique serial numbers. " "Verify that the SFP " "was obtained from Cisco or a supported vendor" |
| SFP_SECURITY-4-ID_MISMATCH | 4-Warning | Identification check failed for SFP interface [chars] | The SFP was identified as a Cisco SFP but the system was unable to verify its identity | firmware | "Check the list of supported SFPs for this version " "of the system software. An upgrade may be required " "for newer SFPs. Otherwise verify that the SFP " "was obtained from Cisco or a supported vendor" |
| SFP_SECURITY-4-SFP_INIT_ERR | 4-Warning | Internal error occurred in setup for SFP interface [chars] | The system could not allocate resources or had some other problem in the setup for the specified SFP interface. | firmware | "Reload the system. If the problem persists " "contact TAC." |
| SFP_SECURITY-4-UNRECOGNIZED_VENDOR | 4-Warning | SFP interface [chars] manufactured by an unrecognized vendor | The SFP was identified as a Cisco SFP but the system was unable to match its manufacturer with one on the known list of Cisco SFP vendors | firmware | "Check the list of supported SFPs for this version " "of the system software. An upgrade may be required " "for newer SFPs." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SFP-3-SECURITY_AND_DATA_CRC_ERROR | 4-Warning | SFP interface [chars] has bad crc | The SFP was identified as a Cisco SFP but it does not have valid crc in the eeprom data. | firmware | "Check the list of supported SFPs for this version " "of the system software. An upgrade may be required " "for newer SFPs. Even if unrecognized the SFP " "may still operate properly perhaps with limited " "functionality." |
| SFP-3-EEPROM_DUP_ERR | 3-Error | SFP on ports [chars] and [chars] have duplicate serial numbers | The GBIC/SFP was identified as a Cisco GBIC but its vendor id and serial number match that of another GBIC on the system. | - | "Report to Cisco tech support." |
| SFP-3-NOT_COMPATIBLE | 3-Error | Detected for SFP module in [chars] module disabled | The SFP module for the interface specified in the error message is not compatible with the interface. As a result of the error the module is disabled. | - | "Replace the module with a compatible SFP." |
| SFP-3-NOT_SUPPORTED | 3-Error | Detected for SFP module in [chars] module disabled | The SFP module for the interface specified in the error message is not a cisco supported module. As a result of the error the module is disabled. | - | "Replace the module with a cisco supported SFP." |
| SFP-3-SFP_UNINITIALIZED | 3-Error | [chars] SFP inserted in port [dec] error status [dec] | SFP inserted initialization failed | cmts-platform | "If not expected copy the error message exactly as it " "appears and report it to your technical support" |
| SFP-3-SW_ERR | 3-Error | SFP Driver error: [chars] sfp [dec] errcode [dec] | Internal error in SFP driver | - | "Copy the error message exactly as it appears and report it to your" " technical support" |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |

|---|---|---|---|---|---|
| SGBP-1-AUTHFAILED | 1-Alert | Member [chars] failed authentication | This message is generated only when SGBP hellos or errors\n\ debugging is enabled. This indicates that an attempted\n\ peer connection ended in authentication failure. A peer may be\n\ misconfigured. Or this could indicate an attempted security\n\ breach. | - | "Check if the peer is correctly configured.\n\ If there is a chance your network is under attack obtain\n\ knowledgeable assistance. " LOG_STD_ACTION |
| SGBP-1-DIFFERENT | 1-Alert | Rcv [chars]'s addr %i is different from the hello's addr %i | The internally-configured address for an SGBP member does not\n\ match the address of the host that tried to authenticate as\n\ that member. The configuration is incorrect on either this\n\ system or the other member - they must agree. | - | "Determine which configuration is in error and fix it." |
| SGBP-1-DUPLICATE | 1-Alert | Rcv Duplicate bundle [chars] is found on member [chars] | This message is generated only when SGBP hellos or errors\n\ debugging is enabled. This indicates that a duplicate bundle\n\ was received from the same peer more than once. The duplicate\n\ was discarded. | - | LOG_SID_RECUR_ACTION |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SGBP-1-MISSCONF | 1-Alert | Possible misconfigured member [chars] using %i | This message is generated only when SGBP hellos or error\n\ debugging is enabled. This indicates a configuration error.\n\ Either this router has an incorrect IP address listed for\n\ the peer or the peer is using an incorrect IP address. | - | "Find and correct the configuraton error." |
| SGBP-1-NOTAUTH | 1-Alert | Rcv Connection request by non-authenticated member [chars] | - | - | - |
| SGBP-1-UNKNOWNHELLO | 1-Alert | Rcv Hello message from non-group member using %i | This message is generated only when SGBP hellos or error\n\ debugging is enabled. An SGBP Hello message was received\n\ from a host that is not a member of the SGBP group\n\ and discarded. | - | - |
| SGBP-3-INVALID | 3-Error | MQ message with [chars] | This message is generated only when SGBP error debugging is\n\ enabled. An invalid message was received and discarded. | - | "This probably indicates an error in network media or\n\ a peer which is generating erroneous packets." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SGBP-3-INVALIDADDR | 3-Error | Stack group [chars] IP address %i | The current configuration does not allow a local IP address to be \n\ configured using <cmdBold>sgbp member <address><noCmdBold>. Any\n\ local address is automatically removed fro the SGBP group. | sgbp | "Do not configure <cmdBold>sgbp member <address><noCmdBold> \n\ using a local IP address." |
| SGBP-3-INVALIDB | 3-Error | [chars] for bundle \'[chars]\' -- [chars] | An internal software error has occurred. | - | LOG_STD_ACTION |
| SGBP-3-INVFIELD | 3-Error | [chars] field type [hex] has [chars] [dec] expected [dec] | This message indicates that an SGBP request from a peer\n\ contained invalid or corrupt data. | - | "Check the peer equipment or network media for any problems." |
| SGBP-3-PEERERROR | 3-Error | Peer %i [chars] during \'PB [chars]\' state for bundle [chars] | An internal software error has occurred. | - | LOG_STD_ACTION |
| SGBP-3-UNEXP | 3-Error | MQ [chars] from %i for query [dec]:[dec] bundle [chars] bid [dec] state [chars] | This message is generated only when SGBP error debugging is\n\ enabled. The SGBP connection has entered an unexpected state\n\ possibly due to a software error. | - | LOG_STD_ACTION |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SGBP-3-UNKNOWN | 3-Error | %i not known | This message is generated only when SGBP error debugging is\n\ enabled. An SGBP connection was attempted by a host which was\n\ not recognized as a peer. The connection was not accepted. | - | "Depending on the network topology and firewalling SGBP connection\n\ attempts from a non-peer host could indicate probing and attempts to\n\ breach security. If there is a chance your network is under\n\ attack obtain knowledgeable assistance. " LOG_STD_ACTION |
| SGBP-3-UNKNOWNEVENT | 3-Error | Event [hex] from peer at %i | This message is generated only when SGBP error debugging is\n\ enabled. An invalid event occurred which probably\n\ indicates an internal software error. | - | "LOG_STD_ACTION" |
| SGBP-3-UNKNOWNPEER | 3-Error | Event [hex] from peer at %i | This message is generated only when SGBP error debugging is\n\ enabled. An SGBP event came from a network host which was not\n\ recognizable as an SGBP peer. The event was discarded. | - | "Check if a network media error could have corrupted the address\n\ or if peer equipment is malfunctioning to generate corrupted\n\ packets.\n\ Depending on the network topology and firewalling SGBP packets\n\ from a non-peer host could indicate probing and attempts to\n\ breach security. If there is a chance your network is under\n\ attack obtain knowledgeable assistance. " LOG_STD_ACTION |

|---|---|---|---|---|---|
| SIPSPA-6-ERRORRECOVER | 6-Information | A Hardware or Software error occurred on [chars]. Reason : [chars] Automatic Error recovery initiated. No further intervention required. | An error occurred in one of the devices recovery would be attempted. If recovery succeeds no further messages would be logged and no intervention would be required. | c7600-sip-common | LOG_STD_RECUR_ACTION |
| SIPSPA-6-OIR | 6-Information | Bay [dec] [chars] changed to [chars] | SPA OIR Sequence | SIP_DDTS_COMP | LOG_STD_NO_ACTION |
| SISF_ISSU-2-GET_BUFFER | 2-Critical | Sisf ISSU client failed to get buffer for message. Error: [dec] [chars] | The Sisf ISSU client failed to get buffer space for building a negotiation message. A negotiation message cannot be sent to the standby device. If a problem occurs with the ISSU session negotiation the standby device cannot be brought up properly. | ipv6 | "show logging and show checkpoint client" |
| SISF_ISSU-2-INIT | 2-Critical | Sisf ISSU client initialization failed to [chars]. Error: [dec] [chars] | The Sisf ISSU client could not be initialized. This initialization failure must be addressed before in-service software upgrade or downgrade can be performed successfully. If you do not address this failure there will be downtime during software upgrade or downgrade. | ipv6 | LOG_STD_ACTION |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SISF_ISSU-2-SEND_NEGO_FAILED | 2-Critical | Sisf ISSU client failed to send negotiation message. Error: [dec] [chars] | The Sisf ISSU client failed to send a session negotiation message to the peer device. If a problem occurs with the ISSU session negotiation the standby device cannot be brought up properly. | ipv6 | "show logging and show checkpoint client" |
| SISF_ISSU-2-SESSION_NEGO | 2-Critical | Sisf ISSU client encountered unexpected client nego_done. Error: [dec] [chars] | An ISSU-compliant client transitions through a series of internal states. The Sisf ISSU client encountered a 'client negotiation done' state that was unexpected. If a problem occurs with the ISSU session negotiation the standby device cannot be brought up properly. | ipv6 | "show issu session <client_id> and " "show issu negotiated capability <session_id>" |
| SISF_ISSU-2-SESSION_REGISTRY | 2-Critical | Sisf ISSU client failed to register session information. Error: [dec] [chars] | The Sisf ISSU client failed to register session information. If a problem occurs with the ISSU session registration the standby device cannot be brought up properly. | ipv6 | "show issu capability entries <client_id> and " "show issu session <client_id> and " "show issu negotiated capability <session_id>" |
| SISF_ISSU-3-CAP_INVALID_SIZE | 3-Error | SISF ISSU client capability list is empty. | The SISF ISSU client capability exchange list size is invalid. | ipv6 | "show issu capability entires <Client_ID>" |
| SISF_ISSU-3-CAP_NOT_COMPATIBLE | 3-Error | Sisf ISSU client capability exchange result incompatible. | The Sisf ISSU client capability exchange have negotiated as incompatible with the peer. | ipv6 | "show issu negotiated capability <Session_ID>" |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SISF_ISSU-3-INVALID_SESSION | 3-Error | Sisf ISSU client does not have a valid registered session. | The Sisf ISSU client does not have a valid registered session. | ipv6 | "show issu capability entries <client_id> and " "show issu session <client_id> and " "show issu negotiated capability <session_id>" |
| SISF_ISSU-3-MSG_NOT_OK | 3-Error | Sisf ISSU client 'Message Type [dec]' is not compatible | The Sisf ISSU client received an incompatible message from the peer device. The message cannot be processed. | ipv6 | "show issu message group <client_id> and " "show issu session <client_id> and " "show issu negotiated version <session_id>" |
| SISF_ISSU-3-MSG_SIZE | 3-Error | Sisf ISSU client failed to get the MTU for Message Type [dec]. Error: [dec] [chars] | The Sisf ISSU client failed to calculate the MTU for the specified message. The Sisf ISSU client is not able to send the message to the standby device. | ipv6 | "show issu message group <client_id> and " "show issu session <client_id> and " "show issu negotiated version <session_id>" |
| SISF_ISSU-3-SESSION_UNREGISTRY | 3-Error | Sisf ISSU client failed to unregister session information. Error: [dec] [chars] | The Sisf ISSU client failed to unregister session information. | ipv6 | "show issu session <client_id> and " "show issu negotiated capability <session_id>" |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SISF_ISSU_TRANSFORM_FAIL | 3-Error | Sisf ISSU client [chars] transform failed for 'Message Type [dec]'. Error: [dec] [chars] | The Sisf ISSU client could not transform the specified message type. If the transmit transformation failed the checkpoint message was not sent to the standby device. If the receive transformation failed the checkpoint message was not applied on the standby device. In both cases the Sisf state between the active device and the standby device is not identical. | ipv6 | "show issu session <client_id> and " "show issu negotiated version <session_id>" |
| SISF_TRACKING_ENTRY_OUTSYNC | 4-Warning | Host mac-address [enet] ip-address %i interface [chars] | An inconsistency has been detected in the IP device tracking table for this host between active and standby | ipv6 | LOG_STD_NO_ACTION |
| SISF_TRACKING_ENTRY_OUTSYNC | 4-Warning | - | An error occurred during initialization | SISF_COMP_NAME | LOG_STD_ACTION |
| SISF_TRACKING_ENTRY_OUTSYNC | 4-Warning | - | An internal software error occurred. | SISF_COMP_NAME | LOG_STD_ACTION |
| SISF_TRACKING_ENTRY_OUTSYNC | 4-Warning | - | A PSS operation was performed | SISF_COMP_NAME | "This is an informationnal message" |
| SISF_TRACKING_ENTRY_OUTSYNC | 4-Warning | - | An entry was created in the binding table | SISF_COMP_NAME | "This is an informationnal message" |
| SISF_TRACKING_ENTRY_OUTSYNC | 4-Warning | - | An entry was changed in the binding table | SISF_COMP_NAME | "This is an informationnal message" |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SISF-4-ENTRY_LIMIT_SYSLOG | 4-Warning | - | Reached 75% of maximum # addresses for the target | SISF_COMP_NAME | "A client is approaching red zone and might soon \n\ be blocked. The maximum value configured may be too low \n\ and you should consider increasing it. Or some of this client addresses are \n\ stale and you could clear them" |
| SISF-4-ENTRY_LIMIT_SYSLOG | 4-Warning | - | An attempt to install an entry in the binding table was blocked. This can be due to a conflicting entry or maximum number of entries reached | SISF_COMP_NAME | "If the maximum table size is reached consider increasing it.\n\ If a conflicting entry already exist this maybe an attempt \n\ to steal address ownership. You should investigate which host\n\ is connected on the interface and wether it should be disconnected" |
| SISF-4-ENTRY_LIMIT_SYSLOG | 4-Warning | - | A duplicate IP address has been detected IP theft and blocked This can be due to a configuration error on end-device an intentional IP theft or an IP movind too quickly | sisf | "If the existing entry is REACHABLE in the binding table and it moved to a new port \n\ consider reducing the REACHABLE timer \n\ otherwise it is either an attack or a configuration issue that must be resolved" |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SISF_MAC_THEFT_DETECTED | 4-Warning | - | A duplicate MAC address has been detected MAC theft and blocked This can be due to a configuration error on end-device an intentional MAC theft or MAC moving too quickly | SISF_COMP_NAME | "If the existing entry is REACHABLE in the binding table and it moved to a new port \n\ consider reducing the REACHABLE timer \n\ otherwise it is either an attack or a configuration issue that must be resolved" |
| SISF_MAC_IP_THEFT_DETECTED | 4-Warning | - | A duplicate MAC and IP address has been detected MAC_AND_IP theft and blocked This can be due to a configuration error on end-device an intentional MAC_AND_IP theft or MAC moving too quickly | SISF_COMP_NAME | "If the existing entry is REACHABLE in the binding table and it moved to a new port \n\ consider reducing the REACHABLE timer \n\ otherwise it is either an attack or a configuration issue that must be resolved" |
| SISF_MAC_THEFT_DETECTED | 4-Warning | - | - | - | - |
| SISF-3-INTERNAL | 3-Error | Internal error [chars] | An internal software error occurred. | sisf | LOG_STD_ACTION |
| SISF-4-BT_TIMER | 4-Warning | BT Timer [chars] | Configured timer value is out of range defined for \n Wireless SISF | sisf | "Configure BT stale lifetimer between 300 and 86400 seconds \n\ and for other timers between 1 - 86400 seconds" |
| SISF-4-DATA_GLEAN_NOT_FOUND | 4-Warning | No binding for [chars] | A data packet notification has been received because a snooping policy with the data glean option is configured and the Source address of the packet is not currently in the Binding Table. | sisf | - |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SISF-4-ENTRY_BLOCKED | 4-Warning | Entry blocked [chars] | An attempt to install an entry in the mac-ip binding table was blocked. This can be due to a conflicting entry or maximum number of entries reached | sisf | "If the maximum table size is reached consider increasing it.\n\ If a conflicting entry already exist this maybe an attempt \n\ to steal address ownership. You should investigate which host\n\ is connected on the interface and wether it should be disconnected" |
| SISF-4-ENTRY_BLOCKED | 4-Warning | Entry blocked [chars] | An attempt to install an entry in the IPv6 binding table was blocked. This can be due to a conflicting entry or maximum number of entries reached | sisf | "If the maximum table size is reached consider increasing it.\n\ If a conflicting entry already exist this maybe an attempt \n\ to steal address ownership. You should investigate which host\n\ is connected on the interface and wether it should be disconnected" |
| SISF-4-EXCESS_ARP_ACTIVITY | 4-Warning | Excessive ARP activity [chars] | An excessive ARP activity detected for the client and it is brought down and added to exclusion list. This can be due to an issue in the end device software or an intentional ARP storm. | sisf | "take action to remediate the end device. If this is not done " "WLC will continue to exclude it." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SISF-4-EXCESS_ND_ACTIVITY | 4-Warning | Excessive ND activity [chars] | An excessive ND activity detected for the client and it is brought down and added to exclusion list. This can be due to an issue in the end device software or an intentional ND storm. | sisf | "take action to remediate the end device. If this is not done " "WLC will continue to exclude it." |
| SISF-4-IP_THEFT | 4-Warning | IP Theft [chars] | A duplicate IP address has been detected IP theft and blocked This can be due to a configuration error on end-device an intentional IP theft or an IP movind too quickly | sisf | "If the existing entry is REACHABLE in the binding table and it moved to a new port \n\ consider reducing the REACHABLE timer \n\ otherwise it is either an attack or a configuration issue that must be resolved" |
| SISF-4-IP_THEFT | 4-Warning | IP Theft [chars] | A duplicate IP address has been detected IP theft and blocked | sisf | "If the existing entry is REACHABLE in the binding table \n\ and it moved to a new port \n\ consider reducing the REACHABLE timer \n\ otherwise it is either an attack or a configuration \n\ issue that must be resolved" |
| SISF-4-MAC_AND_IP_THEFT | 4-Warning | MAC_AND_IP Theft [chars] | A duplicate MAC and IP address has been detected MAC_AND_IP theft and blocked This can be due to a configuration error on end-device an intentional MAC_AND_IP theft or MAC moving too quickly | sisf | "If the existing entry is REACHABLE in the binding table and it moved to a new port \n\ consider reducing the REACHABLE timer \n\ otherwise it is either an attack or a configuration issue that must be resolved" |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SISF-4-MAC_AND_IP_THEFT | 4-Warning | MAC_AND_IP Theft [chars] | A duplicate MAC and IP address has been detected MAC_AND_IP theft and blocked | sisf | "If the existing entry is REACHABLE in the binding table \n\ and it moved to a new port \n\ consider reducing the REACHABLE timer \n\ otherwise it is either an attack or a configuration \n\ issue that must be resolved" |
| SISF-4-MAC_THEFT | 4-Warning | MAC Theft [chars] | A duplicate MAC address has been detected MAC theft and blocked This can be due to a configuration error on end-device an intentional MAC theft or MAC moving too quickly | sisf | "If the existing entry is REACHABLE in the binding table and it moved to a new port \n\ consider reducing the REACHABLE timer \n\ otherwise it is either an attack or a configuration issue that must be resolved" |
| SISF-4-MAC_THEFT | 4-Warning | MAC Theft [chars] | A duplicate MAC address has been detected MAC theft and blocked | sisf | "If the existing entry is REACHABLE in the binding table \n\ and it moved to a new port \n\ consider reducing the REACHABLE timer \n\ otherwise it is either an attack or a configuration \n\ issue that must be resolved" |
| SISF-4-PAK_DROP | 4-Warning | Message dropped [chars] | - | - | - |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SISF-4-PAK_DROP | 4-Warning | Message dropped [chars] | A message was dropped because one of the IPv6 first-hop \n\ security features said so | sisf | "Look at the reason. It can either be a valid drop and the \n\ could go up to disconnect the host attached to the interface \n\ or the policy configured on this interface is too severed \n\ and should be amended" |
| SISF-4-PAK_DROP | 4-Warning | Message dropped [chars] | A message was dropped because one of the IPv6 first-hop \n\ security features said so | sisf | "Look at the reason. It can either be a valid drop and that \n\ could go up to disconnect the host attached to the interface \n\ or the policy configured on this interface is too severed \n\ and should be amended" |
| SISF-4-RANDOM_MAC_COLLISION | 4-Warning | Random MAC collision [chars] | Two devices with random MACs generated the same MAC address. \n\ The second device has been rejected. | sisf | "The second device will need to regenerate its random MAC." |
| SISF-4-RESOLUTION_VETO | 4-Warning | Resolution vetoed [chars] | - | ipv6 | "A low rate of vetoed resolutions is not serious. \n\ If there is a high rate of vetos this might suggest that \n\ the link is under attack. Investigate the source of the \n\ packets driving these resolution requests" |
| SISF-6-ENTRY_CHANGED | 6-Information | Entry changed [chars] | An entry was changed in the binding table | sisf | "This is an informationnal message" |
| SISF-6-ENTRY_CREATED | 6-Information | Entry created [chars] | An entry was created in the binding table | sisf | "This is an informationnal message" |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SISF-6-ENTRY_DELETED | 6-Information | Entry deleted [chars] | An entry was created in the binding table | sisf | "This is an informationnal message" |
| SISF-6-ENTRY_MAX_ORANGE | 6-Information | Reaching 75%% of max adr allowed per [chars] | Reached 75% of maximum # addresses for the target | sisf | "A client is approaching red zone and might soon \n\ be blocked. The maximum value configured may be too low \n\ and you should consider increasing it. Or some of this client addresses are \n\ stale and you could clear them" |
| SISF-6-ENTRY_MAX_ORANGE | 6-Information | Reaching 80%% of max adr allowed per [chars] | Reached 80% of maximum # addresses for the target | sisf | "A client is approaching red zone and might soon \n\ be blocked. The maximum value configured may be too low \n\ and you should consider increasing it. \n\ Or some of this client addresses are \n\ stale and you could clear them" |
| SKINNY-MAN-KEYPAD_FAST | 4-Warning | Keypad messages from the phone [dec] are too fast | The inter digit interval is too short. Each digit may not be processed properly | cme-callcontrol | "Please configure keypad-normalize for the phone" |
| SKINNY-SECURESRVCE-NOCNT | 3-Error | Can't initialize Secure Skinny server | Internal problems with initializing ports for the Secure Skinny server | ios-callmgr | "Make sure the Skinny secure server port is available on the local machine." |

|---|---|---|---|---|---|
| SPANTREE-3-BAD_PORT_NUM_SIZE | 3-Error | Rejected an attempt to set the port number field size to [dec] bits valid range is [dec] to [dec] bits. | The spanning tree port identifier is a 16 bit wide field that is by default divided evenly between port priority and port number each sub field being 8 bits wide. This allows the port number field to represent port numbers between 1 and 255. However on systems with greater than 255 ports the size of port number portion of the port id must be increased to support the greater number of ports. This is done by the STP subsystem at system init time since the maximum number of ports on a particular platform will not change. This error would only occur due to an error in the platform specific code which caused it to request more or less | stp | "show version" |
| SPANTREE-3-ERR_NOUNDERDOE | 3-Error | [chars]: Portfast disabled reverting to bidirectional mode | Because UCP is for edge ports only portfast must be configured. This messageis typically seen when spanning-tree portfast is enabled on a port thenauthentication control-direction is set to inbound unidirectional and then | stp | "Re-enable portfast on the edge port. This will re-enable unidirectional""authentication control." |

| SPANTREE-3-PORT_SHUTDOWN_LOOPED | 3-Error | [chars] disabled.- received BPDU src mac [enet] | The source MAC address contained in a BPDU received on the listed interface matches the MAC address assigned to that interface This indicates the possibility that a port is looped back to itself possibly due to a diagnostic cable being plugged in. The interface will be administratively shutdown. | stp | "Check the interface configuration and any cable plugged into the " "interface. Once problem resolved re-enable interface by doing a " "no shutdown in the interface configuration." |
| SPANTREE-3-PRESTD_NBRCH | 3-Error | pre-standard MST interaction not configured [chars]. Please configure: | The switch has received a pre-standard MST BPDU on a port that is not configured for pre-standard MST BPDU transmission. The switch will automatically adjust its mode of operation on this port and will start sending pre-standard BPDUs. However this auto-detection of pre-standard neighbors is not 100% accurate and it is recommended to configure explicitly the port for pre-standard MST BPDU transmission. This warning message will only be display once. | stp | "Configure 'spanning-tree mst pre-standard' on all the ports" "that are connected to switches running Cisco's pre-standard version " "of MST. It is recommended to migrate all the switches in the network to" "the IEEE standard MST version when it is possible." |

|---|---|---|---|---|---|
| SW_VLAN_ISSU_VTP_VERSION | 3-Error | VTP version [dec] is configured in vlan.dat file. Device cannot be downgraded to an image that does not support this VTP version. | The VTP version is not saved in startup or running config. It is stored in vlan.dat file. If vlan.dat file content is copied from some other source or if the pre-requisites for 'VTP version 3' is removed from the system via CLI and then the system is re-started the efective VTP version differs from the one stored in the file. | sw-vlan | "Please use 'vtp version' CLI to re-configure VTP version." |
| SW_VLAN_ISSU_INVALID_SESSION | 3-Error | Switch Vlan ISSU client does not have a valid registered session. | The Switch Vlan ISSU client does not have a valid registered session. | sw-vlan | "show issu capability entries <client_id> and " "show issu session <client_id> and " "show issu negotiated capability <session_id>" |
| SW_VLAN_ISSU_INCOMPATIBLE_PEER | 3-Error | 'Message Type [dec]' is not supported by Switch Vlan ISSU client at peer | The Switch Vlan ISSU client at the peer supervisor is not compatible for this message type. The Switch Vlan client will be marked as incompatible with the peer. | sw-vlan | "show issu message group <client_id> and " "show issu session <client_id> and " "show issu negotiated version <session_id>" |
| SW_VLAN_ISSU_MSG_NOT_OK | 3-Error | Switch Vlan ISSU client 'Message Type [dec]' is not compatible | The Switch Vlan ISSU client received an incompatible message from the peer device. The message cannot be processed. | sw-vlan | "show issu message group <client_id> and " "show issu session <client_id> and " "show issu negotiated version <session_id>" |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SW_VLAN_ISSU-3-MSG_SIZE | 3-Error | Switch Vlan ISSU client failed to get the MTU for Message Type [dec]. Error: [dec] [chars] | The Switch Vlan ISSU client failed to calculate the MTU for the specified message. The Switch Vlan ISSU client is not able to send the message to the standby device. | sw-vlan | "show issu message group <client_id> and " "show issu session <client_id> and " "show issu negotiated version <session_id>" |
| SW_VLAN_ISSU-3-SESSION_UNREGISTRY | 3-Error | Switch Vlan ISSU client failed to unregister session information. Error: [dec] [chars] | The Switch Vlan ISSU client failed to unregister session information. | sw-vlan | "show issu session <client_id> and " "show issu negotiated capability <session_id>" |
| SW_VLAN_ISSU-3-TRANSFORM_FAIL | 3-Error | Switch Vlan ISSU client [chars] transform failed for 'Message Type [dec]'. Error: [dec] [chars] | The Switch Vlan ISSU client could not transform the specified message type. If the transmit transformation failed the checkpoint message was not sent to the standby device. If the receive transformation failed the checkpoint message was not applied on the standby device. In both cases the Switch Vlan state between the active device and the standby device is not identical. | sw-vlan | "show issu session <client_id> and " "show issu negotiated version <session_id>" |
| SW_VLAN-4-IIF_ID_ALLOC_FAILED | 3-Error | IIF_ID alloc failed for vlan [dec] due to memory allocation failure. Some features will not work. | The system is low on memory due to which IIF-ID allocation failed. This results in failure to apply polices such as QoS and Security acls on this vlan. | sw-vlan | LOG_STD_REDUCE_ACTION "Once memory is available shutdown the vlan and then unshut the vlan" |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SW_VLAN-3-IID_REGISTRATION_FAILED | 3-Error | IIF_ID registration failed for vlan [dec] due to memory allocation failure. Some features will not work. Vlan has been shutdown | SWC Sensor Registration failed! | - | "This message is for informational purposes only" |
| SW_VLAN-3-MALLOC_FAIL | 3-Error | Failed to allocate [dec] bytes | Memory allocation failed. | sw-vlan | LOG_STD_SH_TECH_ACTION |
| SW_VLAN-3-VLAN_PM_COMPATIBILITY_FAILURE | 3-Error | VLAN Manager synchronization failure with Port Manager over [chars] | Due to lack of ready pool space the VLAN manager dropped a notification\n\ from the Port Manager as indicated by the message. | sw-vlan vtp pm | LOG_STD_ACTION |
| SW_VLAN-3-VTP_PROTOCOL_ERROR | 3-Error | VTP protocol code internal error: [chars] | VTP protocol code encountered an unexpected error will processing\n\ configuration request packet or timer expiration. | sw-vlan vtp | LOG_STD_SH_TECH_ACTION |
| SW_VLAN-4-BAD_PM_VLAN_COOKIE_RECEIVED | 4-Warning | VLAN manager unexpectedly received a bad PM VLAN cookie from the Port\n\ Manager VLAN indicated: [dec] | The VLAN manager received an upcall from the Port Manager containing a\n\ VLAN cookie which translated to a bad VLAN number. | sw-vlan pm | LOG_STD_SH_TECH_ACTION |
| SW_VLAN-4-FAILED_STARTUP_VLAN_CONFIG_FILE | 4-Warning | Failed to configure VLAN from startup-config. Fallback to use VLAN configuration file from non-volatile memory | VLAN software failed to use VLAN configuration from startup-config\n\ file. It will fallback to use the binary VLAN configuration file\n\ in non-volatile memory. | sw-vlan | LOG_STD_NO_ACTION |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SW_VLAN_CONFIG_FILE | 4-Warning | VLAN configuration file contained incorrect verification word: 0x[hec] | The VLAN configuration file read by the VLAN manager did not begin with\n\ correct value which would indicate a valid VLAN configuration file. Thus\n\ it has been rejected. | sw-vlan ifs | LOG_STD_ACTION |
| SW_VLAN_CONFIG_FILE_VERSION | 4-Warning | VLAN configuration file contained unknown file version: [dec] | The VLAN configuration file read by the VLAN manager contained an\n\ unrecognized file version number. This may indicate an attempt to\n\ regress to an older version of the VLAN manager software. | sw-vlan ifs | LOG_STD_ACTION |
| SW_VLAN_DOMAIN_NAME_LENGTH | 4-Warning | VLAN configuration file contained incorrect domain name length: %u | The VLAN configuration file read by the VLAN manager did not contain a valid domain name length. Thus it has been rejected. | sw-vlan ifs | "Please provision VTP domain name again" |
| SW_VLAN_PASSWORD_LENGTH | 4-Warning | VLAN configuration file contained incorrect VTP password length: %u | The VLAN configuration file read by the VLAN manager did not contain a valid VTP password length. Thus it has been rejected. | sw-vlan ifs | "Please provision VTP password again" |
| SW_VLAN_TIMER_ACTIVE_VALUE | 4-Warning | Encountered incorrect VLAN timer active value: [chars] | Due to a software error a VLAN timer was dectected active when it\n\ should have been inactive or inactive when it should have been active. | sw-vlan vtp | LOG_STD_ACTION |

|---|---|---|---|---|---|
| SYS-2-INVALID_FEATURE_INDEX | 2-Critical | Feature index [dec] is not within the defined feature array boundary. | An inconsistency was detected while looking up for feature index. It is software error because of wrong enumeration of feature index. | none | "Copy the error message exactly as it appears on the console " "or in the system log contact your Cisco technical support representative " "and provide the representative with the gathered information. " "Save any crashinfo or crashdump files. If the router has crashed and " "was not configured to automatically reload the router will " "need to be reloaded manually." |
| SYS-2-LINEPROCDEAD | 2-Critical | Killing process [chars] associated with line [dec] | A process associated with a tty line was killed by another process. The line may go dead | exec | "If this messages recurs copy it exactly as it appears " "and report it to your technical support representative." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SYS-2-LINKED | 2-Critical | Bad [chars] of [hec] in queue [hec] | An internal software error occurred. | Determine the component from the stack trace and process name\n\ displayed in the error message. \n\ Use Topic to search for a similar DDTS. If you find none write\n\ a DDTS for this problem. If the stack trace indicates that the\n\ buffer code was called from an interrupt handler use the interrupt\n\ handler to determine the DDTS component. Otherwise use the process\n\ name to determine the DDTS component. | "If this messages recurs copy it exactly as it appears and report " "it to your technical support representative." |
| SYS-2-LOWMEMIO | 2-Critical | Low-memory debug exception limit=%u free=%u | The router is configured to crash when total available IO memory drops below a specified threshold. That threshold has been reached. This may have occurred due to a memory leak or from supporting additional features. | mem | "If you suspect a memory leak " "copy the message exactly as it appears and " "report it to your technical support representative. " "Otherwise you may need to add memory " "or reduce the number of features you are trying to " "support." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SYS-2-LOWMEMPROC | 2-Critical | Low-memory debug exception limit=%u free=%u | The router is configured to crash when total available processor memory drops below a specified threshold. That threshold has been reached. This may have occurred due to a memory leak or from supporting additional features. | mem | "If you suspect a memory leak copy the message exactly as it appears and " "report it to your technical support representative. Otherwise you may " "need to add memory or reduce the number of features you are trying to " "support." |
| SYS-2-MADVISEFAIL | 2-Critical | Madvise failed memory at [hec]. | An attempt was made to create secure mempool but it failed. | os | "This is a notification message only. No action is required." |
| SYS-2-MALLOCFAIL | 2-Critical | Memory allocation of %u bytes failed from [hex] alignment [dec] \n Pool: [chars] Free: %u Cause: [chars] \nAlternate Pool: [chars] Free: %u Cause: [chars] \n | The requested memory allocation is not available from the specified memory pool. The current system configuration network environment or possibly a software error may have exhausted or fragmented the router's memory. | mem-suspect | "If you suspect a software error copy the error message exactly as it " "appears on the console or in the system log contact your technical support" "representativeand provide the representative with the gathered information. " "Otherwise you may need to add more memory or reduce the number of " "features you are trying to support." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SYS-2-MALLOCFAIL | 2-Critical | Memory allocation of %u bytes failed from [hex] alignment [dec] \n Pool: [chars] Free: %u Cause: [chars] \nAlternate Pool: [chars] Free: %u Cause: [chars] \n | The requested memory allocation is not available from the specified memory pool. The current system configuration network environment or possibly a software error may have exhausted or fragmented the router's memory. | mem-suspect | "If you suspect a software error copy the error message exactly as it " "appears on the colsole or in the system log contact your technical support" "representativeand provide the representative with the gathered information. " "Otherwise you may need to add more memory or reduce the number of " "features you are trying to support." |
| SYS-2-MAXIDBBMEXCEEDED | 2-Critical | BM bit allocation limit exceeded | The BM has exhausted all of the bits available for allocation | idb | "Copy the error message exactly as it appears and report it to" " your technical support representative." |
| SYS-2-MMAP | 2-Critical | mmap failed for size [dec] bytes Caller PC 0x[hec] errno [dec] | Failed to allocate memory for the requested size. The memory could not be mapped because there is no memory. | - | - |
| SYS-2-MUNMAP | 2-Critical | Could not return memory Neutrino via munmap at %lx size [dec] errno [dec] | Failued to unmap memory memory at the indicated location. The memory could not be unmapped because it was allocated via mmap. | - | - |
| SYS-2-MUTEXLOCKFAIL | 2-Critical | pthread_mutex_lock failed for [chars] | The thread failed in pthread_mutex_lock while trying to acquire a mutex. | mem-suspect | "Copy the error message exactly as it appears and report it to your " "technical support representative." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SYS-2-NOBLOCK | 2-Critical | [chars] with blocking disabled. | A process attempted to relinquish control with blocking disabled. | Determine the component from the stack trace displayed in the error message. Use Topic to search for a similar DDTS. If you find none submit a DDTS for this problem. Choose the DDTS component associated with the routine that called the scheduler. | - |
| SYS-2-NOBLOCK | 2-Critical | [chars] with blocking disabled. | A process aattempted to relinquish control with blocking disabled. | Determine the component from the stack trace displayed in the error message. Use Topic to search for a similar DDTS. If you find none submit a DDTS for this problem. Choose the DDTS component associated with the routine that called the scheduler. | - |
| SYS-2-NOMEMFRGIO | 2-Critical | Memory fragmentation check debug exception fragment size %u | The router is configured to crash when the largest available contiguous IO memory block drops below a specified threshold. That threshold has been reached. This may have occurred due to excessive memory thrashing or from supporting additional features. | mem | "If you suspect memory thrashing " "copy the message exactly as it appears " "and report it to your technical support representative. Otherwise " "you may need to add memory or reduce the number of features you are " "trying to support." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SYS-2-NOMEMFRGPROC | 2-Critical | Memory fragmentation check debug exception fragment size %u | The router is configured to crash when the largest available contiguous processor memory block drops below a specified threshold. That threshold has been reached. This may have occurred due to excessive memory thrashing or from supporting additional features. | mem | "If you suspect memory thrashing copy the message exactly as it appears " "and report it to your technical support representative. Otherwise " "you may need to add memory or reduce the number of features you are " "trying to support." |
| SYS-2-NOMEMORY | 2-Critical | No memory available for [chars] [dec] | An operation could not be accomplished because of a low-memory condition. The current system configuration network environment or possibly a software error might have exhausted or fragmented the router's memory. | mem-suspect | "Reduce other system activity to ease memory demands. If conditions " "warrant upgrade to a configuration that has more memory." |
| SYS-2-NOPROCESS | 2-Critical | No such process [dec] | An internal software error occurred. | - | "If this messages recurs copy it exactly as it appears and report " "it to your technical support representative." |
| SYS-2-NOTDEAD | 2-Critical | Killing process [chars] pid [dec] again | An internal software error occurred. | os-scheduler | "If this messages recurs copy it exactly as it appears and report " "it to your technical support representative." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SYS-2-NOTIOSTASK | 2-Critical | [chars] from outside IOS task context | An IOS reschedule request was made from code that is not running in the context of an IOS task -- from an interrupt handler the scheduler itself or a service pthread within the IOS process. | Determine the component from the stack trace displayed in the\n\ error message. \n\ Use Topic to search for a similar DDTS. If you find none write\n\ a DDTS for this problem. | "Copy the error message exactly as it appears and report it to your " "technical support representative." |
| SYS-2-NOTQ | 2-Critical | [chars] didn't find [hec] in queue [hec] | An internal software error occurred. | Determine the component from the stack trace and process name\n\ displayed in the error message. \n\ Use Topic to search for a similar DDTS. If you find none write\n\ a DDTS for this problem. If the stack trace indicates that the\n\ buffer code was called from an interrupt handler use the interrupt\n\ handler to determine the DDTS component. Otherwise use the process\n\ name to determine the DDTS component. | "If this messages recurs copy it exactly as it appears and report " "it to your technical support representative." |
| SYS-2-NULLCHUNK | 2-Critical | [chars] operation on Null Chunk | Chunk manager cannot allocate memory from NULL chunks | - | "Copy the error message exactly as it appears and report it to " "your technical support representative." |
| SYS-2-NULLCHUNK | 2-Critical | Memory requested from Null Chunk | Chunk manager cannot allocate memory from NULL chunks | - | "Copy the error message exactly as it appears and report it to " "your technical support representative." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SYS-2-NV_BAD_PTR | 2-Critical | Bad NVRAM pointer. NV Header values are nv: 0x%p .textbase: 0x%p .textsize: [dec] .magic: 0x[hex] .checksum: 0x[hex] .system_version: [dec] .textptr: 0x%p v1_ptr: 0x%p .priv: 0x%p | - | nvram | LOG_STD_SH_TECH_ACTION |
| SYS-2-PAK_SUBBLOCK_ALREADY | 2-Critical | [dec] | This message indicates an error in attempting to allocate a pak subblock. A subblock was already associated with the packet. | - | - |
| SYS-2-PAK_SUBBLOCK_BADSIZE | 2-Critical | [dec] | This message indicates an error in attempting to allocate a pak subblock. The requested size is larger than the maximum registered subblock size. | - | - |
| SYS-2-PAK_SUBBLOCK_SETSIZE | 2-Critical | [dec] | This message indicates an error in startup code to register a pak subblock size. An attempt was made to register a size after the subblock chunk pool had been initialized. This problem is caused by software initialization order. | - | - |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SYS-2-PRIVCFG_DECRYPT_FAILURE | 2-Critical | [chars] | An error was encountered by the private config decryption | none | "Copy the error message exactly as it appears and report it to your " "technical support representative." |
| SYS-2-PRIVCFG_ENCRYPT_FAILURE | 2-Critical | [chars] | An error was encountered by the private config encryption | none | "Copy the error message exactly as it appears and report it to your " "technical support representative." |
| SYS-2-QCOUNT | 2-Critical | Bad [chars] [hec] count [dec] | An internal software error occurred. | - | "If this messages recurs copy it exactly as it appears and report " "it to your technical support representative." |
| SYS-2-RUNTIME_CAPABILITY_NOT_SET | 2-Critical | Capability value [chars] needed by Feature [chars] is not defined.\n | An inconsistency was detected while looking up for capability on which feature functionality depends upon. It is software error because platform/branch using the feature should provide a override value for feature capability . | none | "Copy the error message exactly as it appears on the console " "or in the system log contact your Cisco technical support representative " "and provide the representative with the gathered information. " "Save any crashinfo or crashdump files. If the router has crashed and " "was not configured to automatically reload the router will " "need to be reloaded manually." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SYS-2-SELFLINKED | 2-Critical | Buffer [hec] linked to itself in free pool [chars] | An internal software error occurred. | - | "If this messages recurs copy it exactly as it appears and report " "it to your technical support representative." |
| SYS-2-SEMSCHED | 2-Critical | '[chars]' | The scheduler was entered with mempool semaphore held. | Determine the component from the stack trace and process name displayed in the error message. Then use Topic to search for a similar DDTS. If you find none submit a DDTS for this problem. If the stack trace indicates that the scheduler was called with mempool semaphore held choose the DDTS component based on the process name displayed. | - |
| SYS-2-SHARED | 2-Critical | Attempt to return buffer with sharecount [dec] ptr= [hec] | An internal software error occurred. | - | "If this messages recurs copy it exactly as it appears and report " "it to your technical support representative." |
| SYS-2-SHARED1 | 2-Critical | Attempt to return buffer with sharecount [dec] ptr= [hec] caller= [hec] | An internal software error occurred. | - | "If this messages recurs copy it exactly as it appears and report " "it to your technical support representative." |
| SYS-2-SIGNUM | 2-Critical | Process aborted on invalid signal signum = [dec]. | An attempt was made to send an invalid signal to another process. | - | "If this message occurs more than once report this message " "to your technical support representative." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SYS-2-SIGPENDING | 2-Critical | Multiple Signals are sent to a process [dec] | An internal software error occurred. | os | "If this messages recurs copy it exactly as it appears and report " "it to your technical support representative." |
| SYS-2-SNMP0IDX | 2-Critical | Attempt to [chars] snmpidb with if_index of 0 | A software error occurred. | - | "Copy the message exactly as it appears and report it your technical " "support representative." |
| SYS-2-SPEC | 2-Critical | Trying to set unknown special character [dec] to [dec] | An internal software error occurred. | - | "If this messages recurs copy it exactly as it appears and report " "it to your technical support representative." |
| SYS-2-SYSMEMINFO | 2-Critical | System Memory: %luK total %luK used %luK free | This is an auxiliary message to several memory-related messages. It\n\ provides system memory information usage. | - | "This message provides additional information only. Copy the error \n\ message exactly as it appears and report it to your technical support \n\ representative as part of a previously printed error message." |
| SYS-2-USERLOG_CRIT | 2-Critical | Message from tty[t-line]user id: [chars]: [chars] | A user has used the 'send log' command to include a message on the configured logging destinations. Such messages can be used to help tag where user-initiated events occur during debugging. The severity level might have been changed by the user. | - | "This message is informational only. " |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SYS-2-USERLOG_CRIT | 2-Critical | Message from tty[t-line]user id: [chars]: [chars] | A user has used the 'send log' command to include a message on the configured logging destinations. Such messages can be used to help tag where user-initiated events occur during debugging. The severity level might have been changed by the user. | - | "This message is informational only. " |
| SYS-2-WATCHDOG | 2-Critical | Process aborted on watchdog timeout process = [chars].[chars] | The indicated process ran for too long without relinquishing control. The system killed it as a runaway process. | - | - |
| SYS-2-WRONGPOOL | 2-Critical | Buffer [hec] found in pool [hec] should be in pool [hec] | A software error occurred. | - | "Copy the message exactly as it appears and report it your technical " "support representative." |
| SYS-3-ABRUPTTERM | 3-Error | Abrupt termination of tty session for [chars] [t-line] | An internal software error occurred. | os | "If this messages recurs copy it exactly as it appears and report " "it to your technical support representative." |
| SYS-3-BAD_GLIBC_BUF_FREE | 3-Error | A glibc buffer is freed in IOS buffer blockmagic: 0x[hec] flags 0x[hec] | A software error occurred. A glibc buffer is freed into IOS buffer pool. | - | "Copy the error message exactly as it appears and report it to your " "technical support representative." |
| SYS-3-BAD_RESET | 3-Error | Questionable reset of process [dec] on tty[t-line]\n | A process was reset without giving it a chance to clean itself up. | exec | "Copy the error message exactly as it appears and report it to your " "technical support representative." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SYS-3-BAD_TRIPCOUNT | 3-Error | Traversed block count crossed the maximum possible count[dec]/[dec] in | A software error occurred. Value of tripcount has been zero or less which is harmful. | - | "Copy the error message exactly as it appears and report it to your " "technical support representative." |
| SYS-3-BADBLOCK | 3-Error | Bad block pointer [hec] | A block of memory at the indicated location is corrupt. An internal check of memory block pointers indicates an inconsistency. | - | "Copy the error message exactly as it appears on the console " "or in the system log contact your Cisco technical support representative " "and provide the representative with the gathered information. " "Save any crashinfo or crashdump files. If the router has crashed and " "was not configured to automatically reload then the router will " "need to reloaded manually." |
| SYS-3-BADBLOCK | 3-Error | Bad block pointer [hec] | A block of memory at the indicated location is corrupt. An internal check of memory block pointers indicates an inconsistency. | - | "Copy the error message exactly as it appears on the console " "or in the system log contact your Cisco technical support representative " "and provide the representative with the gathered information. " "Save any crashinfo or crashdump files. If the router has crashed and " "was not configured to auotmatically reload then the router will " "need to reloaded manually." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SYS-3-BADDISP | 3-Error | Bad disposal code [hec] in [chars] | An invalid status code has been passed to a buffer deletion routine. The buffer will be correctly returned to the free pool but will not be correctly counted in the per-protocol statistics. | - | "Copy the error message exactly as it appears and report it to your " "technical support representative." |
| SYS-3-BADFREEMAGIC | 3-Error | Corrupt free block at [hec] magic %08x | A block of memory at the indicated location is corrupt. An inconsistency was detected while checking the free memory area. | - | "Copy the error message exactly as it appears on the console " "or in the system log contact your Cisco technical support representative " "and provide the representative with the gathered information. " "Save any crashinfo or crashdump files. If the router has crashed and " "was not configured to automatically reload the router will " "need to be reloaded manually." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SYS-3-BADFREEPTRS | 3-Error | Bad [chars] pointer [hec] at [hec] [chars] = [hec] | A pointer in the block header at the indicated location is corrupt. An inconsistensy was detected in the free memory pool. | - | "Copy the error message exactly as it appears on the console " "or in the system log contact your Cisco technical support representative " "and provide the representative with the gathered information. " "Save any crashinfo or crashdump files. If the router has crashed and " "was not configured to automatically reload the router will " "need to be reloaded manually." |
| SYS-3-BADLINKTYPE | 3-Error | * Unexpected linktype [dec] | * A software error occurred. | udp | * "Copy the error message exactly as it appears and report it to your " * "technical support representative." |
| SYS3BADLIST_DESTROY | 3-Error | Removed a non-empty list[hec] name: [chars] having %lu elements | A non-empty list should not be destroyed. If it happens there is a possibility that all elements enqueued into the list will never be deallocated. This message reports that an non-empty list got destroyed. | Determine the component from the stack trace and process name displayed in the error message. | LOG_STD_ACTION |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SYS-3-BADMAGIC | 3-Error | Corrupt block at [hec] magic %08x | The free memory pool is corrupt. An inconsistensy was detected in the free memory pool. | - | "Copy the error message exactly as it appears on the console " "or in the system log contact your Cisco technical support representative " "and provide the representative with the gathered information. " "Save any crashinfo or crashdump files. If the router has crashed and " "was not configured to automatically reload the router will " "need to be reloaded manually." |
| SYS-3-BADPARAM | 3-Error | Function [chars]: value [hex] passed in parameter [chars] | A software error occurred. | - | "Copy the error message exactly as it appears and report it to your " "technical support representative." |
| SYS-3-BADPRINT | 3-Error | Process has no associated tty in [chars]. | An internal software error occurred. | - | "Copy the error message exactly as it appears and report it to your " "technical support representative." |
| SYS-3-BADPROCESS | 3-Error | Bad process ID [dec] when [chars] process table | An internal software error occurred. | os-scheduler | "Copy the error message exactly as it appears and report it to your " "technical support representative." |
| SYS-3-BADPTRVAL | 3-Error | Bad pointer value [chars] = [hec] in function [chars] | Corrupted pointer value is encountered. | - | "If this messages recurs copy it exactly as it appears and report " "it to your technical support representative." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SYS-3-BADREFCOUNT | 3-Error | Bad reference count at [hec] refcount [hec] | An internal software error occurred. | - | "Copy the error message exactly as it appears and report it to " "your technical support representative." |
| SYS-3-BADRESID | 3-Error | Clock hardware returned bad residual [dec]. | A software error occurred. | - | "Copy the error message exactly as it appears and report it to your " "technical support representative." |
| SYS-3-BADTREEPARAM | 3-Error | Bad parameter for [chars] passed to tree library function. | This message indicates that a pointer passed to a tree library function is invalid. | - | LOG_STD_SH_TECH_ACTION |
| SYS-3-CERF_RECOVER | 3-Error | [chars] | This message is emitted when there has been a full recovery after a cache error | - | "Copy the error message exactly as it appears and report it to your " "technical support representative." |
| SYS-3-CFG_AT_RELOAD | 3-Error | System reloading unable to complete startup configuration update | Startup configuration updation is already in progress and reload has been called either from interrupt level or with all interrupts disabled. Reload can not suspend to let startup configuration updation get completed. Startup configuration may get corrupted. | none | "This is a notification message only. No action is required." |
| SYS-3-CHUNK_NO_EXMEM | 3-Error | No handler to [chars] external memory. | An attempt was made to allocate or free a chunk of external memory but no handler for managing external memory was registered. | - | "Copy the error message exactly as it appears and report it to your " "technical support representative." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SYS-3-CONFIG_NO_PRIVATE | 3-Error | No space remaining to save private config | A software or hardware error occurred. | - | "Copy the error message exactly as it appears and report it to your " "technical support representative." |
| SYS-3-CONFIG_NV_DATA | 3-Error | Variable [chars] not set properly in the routine [chars]. | The write of the nonvolatile configuration failed because an internal variable was not set properly. | - | "If this messages occurs copy it exactly as it appears and report " "it to your technical support representative." |
| SYS-3-CPUHOG | 3-Error | Task is running for [dec]msecs more than [dec]msecs [dec]/[dec] | The indicated process ran too long without relinquishing the processor. Each process should run for a small amount of time and then relinquish the CPU so that other processes can run. This problem can be caused by many things like traffic or system load hardware or operational configuration a configuration change initialization of many interfaces cards or ports for example a high momentary error rate a sustained abnormal | If this error occurs in conjunction with a TIMERHOG message \n\ report the two errors together and use the component obtained \n\ for the TIMERHOG message. | "If you suspect a software error copy the error message exactly as it " "appears on the console or in the system log contact your technical support" "representative and provide the representative with the gathered information." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SYS-3-CPUHOG | 3-Error | Task is running for %umsecs more than [dec]msecs %u/%u | The indicated process ran too long without relinquishing the processor. Each process should run for a small amount of time and then relinquish the CPU so that other processes can run. This problem can be caused by many things like traffic or system load hardware or operational configuration a configuration change initialization of many interfaces cards or ports for example a high momentary error rate a sustained abnormal | If this error occurs in conjunction with a TIMERHOG message \n\ report the two errors together and use the component obtained \n\ for the TIMERHOG message. | "If you suspect a software error copy the error message exactly as it " "appears on the colsole or in the system log contact your technical support" "representative and provide the representative with the gathered information." |
| SYS3CRASHINFOINITFAIL | 3-Error | Crashinfo subsys initialization did not add registry \n\ crashinfo_get_default_file_name\n | In order to figure out the device which the crashinfo writes to the crashinfo subsys has to add the registry crashinfo_get_default_file_name. | - | "Use Topic to search for a similar DDTS. If you find none write " "a DDTS for this problem. This SHOULD never happen - it is an " "indication of a bug elsewhere in the code." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |

" "To disable this particular logging feature issue the " "<CmdBold>no logging userinfo<NoCmdBold> command from the " "global configuration mode." |
| SYS-5-RELOAD | 5-Notice | Reload requested[chars] | A reload or restart was requested. | none | "This is a notification message only. No action is required." |
| SYS-5-RESBUFRECOVER | 5-Notice | Resource user[chars] [chars] has recovered after exceeding the buffer [chars] threshold. configured [dec] Current usage :[dec]\n | The Resource User specified in the error message has recovered from the high buffer usage. Its usage has gone below the threshold | rmi | "No action is required" |
| SYS-5-RESBUFUNAPPLY | 5-Notice | Buffer Usage of resource user[chars] [chars] is no longer monitored for the [chars] threshold.\n | The Resource User specified in the error message is no longer monitored for high buffer usage. The corresponding policy is revoked | rmi | "No action is required" |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SYS-5-RESMEMRECOVER | 5-Notice | Resource user [chars] has recovered after exceeding the [chars] memory threshold\nPool: [chars] Used: [dec] Threshold :[dec] \n | The memory pool specified in the error message is recovering from a low-memory condition. The amount of free memory available in the specified memory pool has recovered above the configured low-memory limit. | rmi | "No action is required" |
| SYS-5-RESMEMUNAPPLY | 5-Notice | Memory usage of Resource user [chars] is no longer monitored for [chars] threshold. Pool: [chars]\n | The memory pool specified in the error message is no longer monitored for low-memory condition as configured by the Resource User specified. The corresponding policy is revoked. | rmi | "No action is required" |
| SYS-5-RESTART | 5-Notice | System restarted --\n[chars] | A reload or restart was requested. | none | "This is a notification message only. No action is required." |
| SYS-5-SCHEDULED_RELOAD | 5-Notice | Reload requested for [chars] | A scheduled reload has been requested for the router. | none | "No action is required." |
| SYS-5-SCHEDULED_RELOAD_CANCELLED | 5-Notice | Scheduled reload cancelled at [chars] | A scheduled reload that was requested for the router has been cancelled. | none | "No action is required." |
| SYS-5-SWITCHOVER | 5-Notice | Switchover requested[chars] | A switchover was requested. | none | "This is a notification message only. No action is required." |
| SYS-5-TABLEERR | 5-Notice | [chars] table [chars] damaged: [chars]. | An internal table entry became corrupt. | - | "Copy the message exactly as it appears and report it your technical " "support representative." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SYS-5-USERLOG_NOTICE | 5-Notice | Message from tty[t-line]user id: [chars]: [chars] | A user has used the 'send log' command to include a message on the configured logging destinations. Such messages can be used to help tag where user-initiated events occur during debugging. The severity level might have been changed by the user. | - | "This message is informational only." |
| SYS-5-USERLOG_NOTICE | 5-Notice | Message from tty[t-line]user id: [chars]: [chars] | A user has used the 'send log' command to include a message on the configured logging destinations. Such messages can be used to help tag where user-initiated events occur during debugging. The severity level might have been changed by the user. | - | "This message is informational only." |
| SYS-6-BADSHAREINFO | 6-Information | [chars] packet [hec] has a zero reference count freeing pid = [hec] \n\ freeing pc = [hec] [chars]. | Provides additional information about original freer of packet. | - | - |
| SYS-6-BLKINFO | 6-Information | [chars]blk [hec] words %u alloc [hec] [chars] dealloc [hec] rfcnt [hec] | This is an auxiliary message to several memory-related messages. It provides a formatted display of some of the information in the header of a corrupted data block. | Include this error message in the DDTS that was written for\n\ the previously printed error message. | "This message provides additional information only. Copy the error " "message exactly as it appears and report it to your technical support " "representative as part of the previously printed error message." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SYS6-BOOT_MESSAGES | 6-Information | Messages above this line are from the boot loader.\n | At least one informational or error message was printed by the boot loader. | - | "If the system image was loaded no action is recommended. If the " "system image did not load as configured send a log file and " "configuration information to your technical support representative." |
| SYS-6-BOOTTIME | 6-Information | Time taken to reboot after reload = %-4d seconds | This is an informational message for the user. This provides the time taken for the router to come up after reload or crash. The time is actually the difference between the last crash and a successive boot. If autoboot was not set and router is in rommon for a long time then the reload time shown could be large. | - | "No action required." |
| SYS-6-CLOCKUPDATE | 6-Information | System clock has been updated from [chars] to [chars] configured from [chars] by [chars]. | This message indicates that the system clock has been modified. | - | "This is informational message." |
| SYS-6-CPURESFALLING | 6-Information | [chars][chars] is no longer seeing [chars] high cpu at [chars] level for the configured [chars] limit %u%% current value %u%% | CPU usage has returned to normal after crossing over from a threshold of high usage. Any process that was disabled during the period of high CPU use can now be enabled. | - | "No action is required" |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SYS6-CPURESUNAPPLY | 6-Information | [chars][chars] is no longer monitoring [chars] cpu at [chars] level for the configured [chars] limit. | CPU usage is no loger monitored for the configured threshold level mentioned in the error message The corresponding policy is revoked. | - | "No action is required" |
| SYS6-INVALID_BOOTTIME | 6-Information | Time since last reboot not available | This is an informational message for the user. The time taken for the router to come up after OIR is not available. | - | "No action required." |
| SYS6-RELOAD_BY_MEM_PRESS_HIGH_CPU | 6-Information | Last reload was triggered because CPU Usage due to Memory Pressure exceeds threshold | This is an informational message for the user to indicate the reason behind the last reload which was triggered by forcefully crashing top N memory intensive processes because system encountered low-memory pressure. By looking at the core-files developer may be able to narrow down the cause of the memory depletion. | - | "This is a notification message only. No action is required." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SYS-6-LOGGING_BUGINF | 6-Information | Logging of buginf debugs was [chars] | All calls to debugging have been disabled in Cisco IOS software as a result the user entering the <CmdBold>no logging buginf<NoCmdBold> command. This command is used to avoid a situation where a large amount of debugging calls might overload the processor CPU hog condition. This | os-logging | "This is an informational message only. No action is required." |
| SYS-6-LOGGING_MOVE | 6-Information | User [chars] has activated the logging persistent move command. | The Common Criteria CC certification requires a log message to | os-logging | "This message is for information only. No action is required." |
| SYS-6-LOGGING_HOST_STARTSTOP | 6-Information | Logging to host [chars][chars][chars][chars] | Syslog logging to specified server or hostvrf has started or stopped | os-logging | LOG_STD_NO_ACTION |
| SYS-6-LOGOUT | 6-Information | User [chars] has exited tty session [dec][chars] | A user has closed a tty session normally using the exit CLI command. | os | "This message is for information only. " "No action is required." |
| SYS-6-MEMDUMP | 6-Information | [hex]: [hex] [hex] [hex] [hex] | This is an auxiliary message to several memory-related messages. It provides a raw display of the information in the header of a corrupted data block. | Include this error message in the DDTS that was written for\n\ the previously printed error message. | "This message provides additional information only. Copy the error " "message exactly as it appears and report it to your technical support " "representative as part of the previously printed error message." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SYS-6-MTRACE | 6-Information | [chars]: addr pc\n ADDRPC ADDRPC ADDRPC ADDRPC \n ADDRPC ADDRPC ADDRPC ADDRPC | This is an auxiliary message to several memory-related messages. It provides the address of the memory block and the calling program counter for the last eight blocks allocated and for the last eight blocks freed. | Include this error message in the DDTS that was written for\n\ the previously printed error message. | "This message provides additional information only. Copy the error " "message exactly as it appears and report it to your technical support " "representative as part of a previously printed error message." |
| SYS-6-NOBRIDGE | 6-Information | Bridging software not present | Your system is not configured to be a bridge. | none | "Configure the bridging software." |
| SYS-6-PRIVCFG_DECRYPT_SUCCESS | 6-Information | [chars] | Private config decryption successful | none | "This is an informational message." |
| SYS-6-PRIVCFG_ENCRYPT_SUCCESS | 6-Information | [chars] | Private config encryption successful | none | "This is an informational message." |
| SYS-6-PROCINFO | 6-Information | Process [chars] just finished executing | This message is an auxiliary to the SYS-3-OVERRUN and SYS-3-BADMAGIC error messages. It identifies the process or process fragment that was executing when the error occurred. | - | "Copy this messages exactly as it appears and report it along with " "the SYS-3-OVERRUN and SYS-3-BADMAGIC error messages to your " "technical support representative." |
| SYS-6-READ_BOOTFILE_FAIL | 6-Information | [chars] [chars].\n | A configured boot system command failed. | - | "If a system image was eventually loaded no action is recommended. If " "the system image did not load as configured send a log file and " "configuration information to your technical support representative." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SYS-6-READ_BOOTFILE_SKIP | 6-Information | boot system [chars] command is skipped\n | A configured boot system command is skipped. Either the system experienced a crash while loading this image in the last attempt or the filename is not properly specified. Subsequent boot system commands will be tried | - | "Replace the failed boot system image with a good one. There could be " "various reasons that this specified image failed for example the image " "might be with a bad checksum." |
| SYS-6-RESERVE_MEMORY_CREATED | 6-Information | Reserve memory is being created | A portion of memory is reserved exclusively for console | - | "The console access is made available even in low memory " "condition. User can collect the details like tech-support " "for further diagnosis" |
| SYS-6-TCL_INVALID_TRUSTPOINT_NAME | 6-Information | [chars] cannot run the signed TCL script. | The TCL script being run has either an unmatched trustpoint name or a missing or a corrupted trustpoint name | tcl-bleeding | "Either re-sign the TCL script with a proper trustpoint name or " "use crypto pki authenticate tcl to add the desired trustpoint name." "Then rerun the TCL script." |
| SYS-6-TCL_SECURE_RESPONSE | 6-Information | [chars] cannot verify signed TCL script. | The TCL script being run is lacking either scripting tcl secure-mode or trustpoint being configured first | tcl-bleeding | "Configure the missing scripting tcl secure-mode or " "scripting tcl trustpoint name <name>. Then rerun the TCL script." |
| SYS-6-SHOW_LOGGING | 6-Information | User [chars] has activated the show [chars] command. | The Common Criteria CC certification requires a log message to indicate when a user activates the show logging persistent command. | os-logging | "This message is for information only. No action is required." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SYS-6-STACKLOW | 6-Information | Stack for [chars] [chars] running low [dec]/[dec] | An internal software error occurred. | - | "If this messages recurs copy it exactly as it appears and report " "it to your technical support representative." |
| SYS-6-STARTUP_CONFIG_IGNORED | 6-Information | System startup configuration is ignored based on the configuration register setting. | The configuration register was set to ignore the system startup configuration. | - | "If the system should ignore the startup configuration no action " "is required. If the system should boot with the startup configuration " "saved in the NVRAM change the configuration register value." |
| SYS-6-TESTINFO | 6-Information | Scheduler test [hex] for [chars] just executed | This message is an auxiliary to the SYS-3-OVERRUN and SYS-3-BADMAGIC error messages. It identifies the process or process fragment that was executing when the error occurred. | Determine the component from the address of the scheduler test routine\n\ displayed in the error message.\n\ Use Topic to search for a similar DDTS. If you find none write\n\ a DDTS for this problem. | "Copy this message exactly as it appears and report it along with the " "SYS-3-OVERRUN and SYS-3-BADMAGIC error messages to your technical " "support representative." |
| SYS-6-TTY_EXPIRE_TIMER | 6-Information | [chars] expired tty [dec] %i user [chars] | The maximum inactivity time has been reached for the tty session as configured by the exec-timeout CLI configuration command. The session has expired. | os | "This message is for information only. No action is" " required." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SYS-6-USERLOG_INFO | 6-Information | Message from tty[t-line]user id: [chars]: [chars] | A user has used the 'send log' command to include a message on the configured logging destinations. Such messages can be used to help tag where user-initiated events occur during debugging. The severity level might have been changed by the user. | - | "This message is informational only." |
| SYS-6-USERLOG_INFO | 6-Information | Message from tty[t-line]user id: [chars]: [chars] | A user has used the 'send log' command to include a message on the configured logging destinations. Such messages can be used to help tag where user-initiated events occur during debugging. The severity level might have been changed by the user. | - | "This message is informational only." |
| SYS-6-LOG_RESERVE_MEMORY | 6-Information | Reserve memory is being used | The reserved memory is being used by the console | - | "The system is low in memory. The reserved memory will be " "used only by the console process. Please take a techsupport " "so that the reason for low memory can be found" |
| SYS-7-ESMSHUTDOWN | 7-Debug | ESM shutdown | The Embedded Syslog Manager has been shut down | - | LOG_STD_NO_ACTION |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| SYS-7-NV_BLOCK_INIT | 7-Debug | Initialized the geometry of nvram | Initialized the nvram block geometry a part of the nvram to host non config data files. Typically these files are used by snmp to store and retrieve non config persistent data accross system reload. | - | "" |
| SYS-7-NVRAM_INIT_WAIT_TIME | 7-Debug | Waited [dec] seconds for NVRAM to be available | The amount of time spent waiting during bootup before NVRAM was available. | - | "This is a debug message." |
| SYS-7-USERLOG_DEBUG | 7-Debug | Message from tty[t-line]user id: [chars]: [chars] | A user has used the 'send log' command to include a message on the configured logging destinations. Such messages can be used to help tag where user-initiated events occur during debugging. The severity level might have been changed by the user. | - | "This message is informational only." |
| SYS-7-USERLOG_DEBUG | 7-Debug | Message from tty[t-line]user id: [chars]: [chars] | A user has used the 'send log' command to include a message on the configured logging destinations. Such messages can be used to help tag where user-initiated events occur during debugging. The severity level might have been changed by the user. | - | "This message is informational only." |

| VINES-2-BADPARAM | 2-Critical | [chars] called with [chars] parameter set to [chars] | One of the VINES lookup functions was called with an illegal\n\ argument. | vines | "Copy the message exactly as it appears do a memory dump up to\n\ 128 bytes and the location specified in the error message and report \n\ this information to your technical support representative." |
| VINES-2-BADTIMER | 2-Critical | RTP timer for [chars] was found disabled and was reset | An internal interface timer is not running. This condition usually\n\ occurs after an interface is reset. | vines | "No action is required. The system automatically restarts the timer." |
| VINES-2-CACHEFAILED | 2-Critical | Cannot build cache entry [dec] bytes for [v-name] on [chars] | VINES fast switching detected that the packet destined to a given\n\ address did not have proper encapsulation information or its\n\ encapsulation size was too large to fit into the cache. | vines | "Verify that the VINES encapsulation and interface-specific mappings\n\ for the interface concerned are properly configured. Copy the \n\ message exactly as it appears and report it your technical\n\ support representative." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| VINES-2-CACHEUNSUPP | 2-Critical | Caching of [chars] not supported on [chars] | The cache population routing for VINES fast switching was called for\n\ an interface that does not support VINES fast switching. | vines | "Copy the message exactly as it appears and report it your technical\n\ support representative. If other encapsulation types are available\n\ on the interface try using them. If this problem is not limited to \n\ one or two destinations but rather occurs with all traffic\n\ using the interface diable VINES fast switching for the\n\ interface until you have identified the real cause of the problem." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| VINES-2-CONSISTENCY | 2-Critical | Error [chars] | The VINES code ran into a situation that should not happen. For\n\ example an IPC port number needs to be allocated but all 65535 port\n\ numbers are currently in use. Another possible cause is that VINES \n\ attempted to add a cache entry but had no path associated with the \n\ destination address. This may cause temporary slow performance to \n\ only those stations that have experienced this inconsistency \n\ until complete cache entries are added. However connectivity\n\ should not be lost because all data traffic can still be routed \n\ vvia process-level switching. | vines | "Copy the message exactly as it appears and report it your technical\n\ support representative. If the warning message is about IPC port \n\ number depletion use the show vines ipc command to check how many \n\ IPC ports are currently in use by which services and determine\n\ whether the IPC connections are all legitimate. To release IPC ports \n\ issue the clear vines ipc command. If the warning message is about\n\ vines cache entries provide the contents of the vines route cache\n\ neighbor and route tables immediately after the error messages \n\ appeared. If the problem persists issue the clear vines\n\ cache command and monitor the router if the situation improves." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| VINES-2-CORRUPTENTRY | 2-Critical | Detected a corrupted entry in the [chars] table | The VINES code detected that an internal table entry was corrupted. | vines | "Copy the message exactly as it appears and report it your technical\n\ support representative. If possible clear the VINES\n\ routing table or neighbor table depending on the table in which the\n\ corrupted entry was observed. This will result in a temporary\n\ loss of connectivity until the routing or neighbor table is rebuilt." |

|---|---|---|---|---|---|
| VINES-2-DUPADDR | 2-Critical | Duplicate address detected on interface [chars] | The router detected that its VINES address is being used by another\n\ router. | vines | "To identify the other router that is using this address manually\n\ inspect each router's configuration. When you have identified\n\ the router with the duplicate address issue the vines routing\n\ recompute command on both routers or issue the enable vines routing \n\ command specifying specify a unique address. If one of the routers \n\ does not support the recompute keyword disable VINES on that router \n\ issue the write terminal command to save the configuration to memory \n\ reboot the router and then enter the vines routing command with\n\ a unique vines address on the offending routers until each router has\n\ a unique address." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| VINES-2-ENCAPFAILED | 2-Critical | Encapsulation failed for [v-name] via [v-name] on [chars] | VINES fast switching encountered an encapsulation failure\n\ when building a cache entry for a neighbor. | vines | "Examine your configuration for causes of the encapsulation failure.\n\ Look for missing map statements interfaces that have gone down and so\n\ on. If this error results in lost connectivity disable vines fast\n\ switching by issuing the no vines route-cache command. Because\n\ disabling fast switching will slow network perform you should\n\ issue the vines route-cache command to re-enable fast switching\n\ as soon as you have identified the cause of the problem. If you\n\ cannot identify the cause contact your technical support\n\ representative. Provide the output of the show vines cache\n\ show vines neighbor and show vines route commands for the\n\ destination address and neighboring routers you are using. Also\n\ provide the output of the show interface and show vinces\n\ interface commands for the incoming and outgoing interfaces." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| VINES-2-INVALIDPATH | 2-Critical | Bad [chars] in path for neighbor entry %z | While searching the neighbor table the code determined that a pointer\n\ that should point to a VINES path structure actually points to some\n\ other structure. | vines | "Copy the message exactly as it appears and report it your technical\n\ support representative. If possible clear the VINES\n\ neighbor table. This will result in a temporary loss of connectivity\n\ until all neighbors and routes are relearned." |
| VINES-2-INVALIDROUTE | 2-Critical | Bad [chars] in route for server entry %Z | While searching the routing table the code determined that a pointer\n\ that should point to a VINES route structure actually points to some\n\ other structure. | vines | "Copy the message exactly as it appears and report it your technical\n\ support representative. If possible clear the VINES\n\ routing table. This will result in a temporary loss of connectivity\n\ until all routes are relearned." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| VINES-2-NOBUFFERS | 2-Critical | No buffers available for [chars] | There were no buffers available to send a VINES service query\n\ or reply. | vines | "Examine your system's memory and buffer capacity and compare\n\ it with current usage. If you notice a substantial discrepancy\n\ monitor your system for possible memory leaks or buffer drainage\n\ and report the problem to your technical support representative\n\ along with the output of the show memory show memory processor\n\ show buffers show buffers assigned and show buffers old commands." |
| VINES-2-NOVENCAP | 2-Critical | Encapsulation failed on [chars] for address [v-name] | The VINES code tried to send a packet on an interface that does not\n\ have a new encapsulation routine for outbound packets. | vines | "Toggle the problematic interface by issuing the interface shut and\n\ no shut commands and then issue the no vines metric and vines metric\n\ command see if the problem goes away. If the problem persists copy\n\ the message exactly as it appears and report it your technical\n\ support representative. If possible turn on and provide\n\ interface-specific debug traces particularly for VINES activities." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| VINES-6-FNNOTFOUND | 6-Information | [chars] service [chars] routine missing [chars] vector | There is an inconsistency in the static VINES data structures for\n\ handling application-layer packets. | vines | "Turn on VINES service level debugging for the service reported\n\ in the error message and copy the debug traces and the error\n\ message exactly as they appear and report them to your technical\n\ support representative." |
| VINES-6-IPCNOROUTINE | 6-Information | IPC port [dec] registered without an upcall [chars] | There is an inconsistency in the active VINES data structure for\n\ handling IPC data messages. A message was received for a port that\n\ should have a listener but the listener routine cannot be found. | vines | "Examine the IPC ports currently supported on the router\n\ by issuing the show vines ipc command and see whether the reported\n\ IPC port is indeed not active. Copy the message exactly as it\n\ appears and report it to your technical support representative\n\ along with the output of the debug vines ipc command." |
| VINES-6-RPCNOSERVICE | 6-Information | IPC port [dec] registered without a service | There is an inconsistency in the active VINES data structure for\n\ handling Net RPC messages. A message was received for a port that\n\ should have a service description but that service description cannot\n\ be found. | vines | "Enter the show vines ipc command and see whether the reported IPC\n\ port has a registered service. Copy the message exactly as it\n\ appears and report it to your technical support representative\n\ if possible along with output of the debug vines netrpc command." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| VINES-6-RTNNOTFOUND | 6-Information | [chars] service [chars] routine not found while [chars] | There is an inconsistency in the active VINES service description data\n\ structures. A service handler routine cannot find the description of\n\ its own service. | vines | "Copy the message exactly as it appears and report it your technical\n\ support representative. In addition provide the output of the show\n\ vines service command and debug vines service traces for the\n\ service reported in the error message." |
| VIPMLP-2-NOINTERLEAVE | 2-Critical | [chars] Interleave not configured due \n\ to Insufficient memory | Interleave not configured due to Insufficient memory. | - | "Copy the error message exactly as it appears and report it to your\n\ technical support representative." |
| VIPMLP-2-NOVC | 2-Critical | [chars]: packet received for non-existent VC [dec] | Virtual channel encapsulation is corrupted. | - | "Copy the error message exactly as it appears and report it to your\n\ technical support representative." |
| VRI_SERVICE-3-ACTIVATE_FAIL | 3-Error | Failed to send virtual service [chars] activate message | During the creation and transmission of the virtual service activate TDL message a failure occurred. The message was not successfully sent and therefore the virtual service was not activated. | vman | LOG_STD_ACTION |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| VRT_SERVICE-3-DEACTIVATE_FAIL | 3-Error | Failed to send virtual service [chars] deactivate message | During the creation and transmission of the virtual service deactivate TDL message a failure occurred. The message was not successfully sent and therefore the virtual service was not deactivated. | vman | LOG_STD_ACTION |
| VRT_SERVICE-3-INIT_FAIL | 3-Error | Failed to initialize required virtual service object: [chars] | During the initialization of the resources required for the virtual service feature a memory allocation failure occurred. This has prevented the virtual service feature from being enabled. | vman | LOG_STD_ACTION |
| VRT_SERVICE-3-INVALID_APPCTX_TMOUT | 3-Error | A response timeout occurred for an invalid virtual service | An unexpected condition occurred where the virtual service context pointer in the expired timer was set to NULL. | vman | LOG_STD_ACTION |
| VRT_SERVICE-3-INVALID_RF_MSG | 3-Error | Received an invalid RF message type from peer | An unexpected condition occurred where an invalid message type was detected. | vman | LOG_STD_ACTION |
| VRT_SERVICE-3-PKG_PATH | 3-Error | Failed to [chars] required by virtual service [chars] | Specified package definition file was not found following a switchover. | vman | LOG_STD_ACTION |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| VIRTSERVICE-3-PKGPATHACTIVATE | 3-Error | Failed to [chars]. Virtual service [chars] will not be activated | Specified package definition file was not found following a switchover. Unable to activate virtual service without specified package definition file present. | vman | LOG_STD_ACTION |
| VIRT_SERVICE-3-RESET | 3-Error | Virtual service [chars] reset | An unexpected condition has occurred where Virt-manager has reported that it detected the named virtual service reset. This virtual service is not configured to be activated and as such no attempt to reactivate it will be made. | vman | LOG_STD_ACTION |
| VIRTSERVICE-3-RESPONSE_TIMEOUT | 3-Error | Virtual service [chars] timed out waiting for a response from Virt-manager | Failed to receive a response message from Virt-manager for last activation operation performed on the named virtual service. The virtual service activation state was marked as deactivated. | vman | LOG_STD_ACTION |
| VIRTSERVICE-3-ROMMON_UNSUPPORTED | 3-Error | ROM monitor configuration does not support virtualization | Virtualization is not supported by the current ROM monitor configuration. Verify both the ROM monitor version and ROM monitor variable ENABLE_VTX are correct to enable virtualization. | vman | LOG_STD_ACTION |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| VRTSRVCE-3-SENDRFMSG | 3-Error | Failed to send RF message to peer - [chars] | An unexpected condition occurred where an attempt to send an RF message to peer failed. | vman | LOG_STD_ACTION |
| VRTSRVCE-3-STBYPKGPATH | 3-Error | Failed to [chars] required by virtual service [chars] on standby | Specified package definition file was not found on standby. Configuration was accepted. Copy package definition file to standby at earliest convenience. | vman | LOG_STD_ACTION |
| VRTSRVCE-3-STBYROMMONUNSUPPORTED | 3-Error | Standby ROM monitor configuration does not support virtualization | Virtualization is not supported by the current ROM monitor configuration on the standby. Verify both the ROM monitor version and ROM monitor variable ENABLE_VTX are correct to enable virtualization. | vman | LOG_STD_ACTION |
| VRTSRVCE-3-UNKNOWNTIMEOUT | 3-Error | A response timeout occurred for unknown virtual service [chars] | A response timeout occurred for a virtual service that is no longer in the virtual service database. | vman | LOG_STD_ACTION |
| VRTSRVCE-3-UNKNOWNRFMSG | 3-Error | Received an unknown RF message type [dec] from peer | An unexpected condition occurred where an unknown timer event was detected. | vman | LOG_STD_ACTION |
| VRTSRVCE-3-UNKNOWNTMOUTTYPE | 3-Error | A response timeout occurred for an unknown timeout type [dec] | An unexpected condition occurred where an unknown timeout type was detected. | vman | LOG_STD_ACTION |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| VRISMGR-3-UNKNOWN_TIMER_EVENT | 3-Error | A timer event occurred for an unknown timer event [dec] | An unexpected condition occurred where an unknown timer event was detected. | vman | LOG_STD_ACTION |
| VRISMGR-3-UNPROVISION_FAIL | 3-Error | [chars]: [chars] | During the unprovision of the named virtual service an unexpected failure occurred. | vman | LOG_STD_ACTION |
| VRISMGR-3-UPGRADE_TIMEOUT | 3-Error | Virtual service [chars] timed out waiting for a package upgrade response from Virt-manager | Failed to receive a response message from Virt-manager for last upgrade operation performed on the named virtual service. | vman | LOG_STD_ACTION |
| VRISMGR-4-SWITCHOVER_ACTIVATE | 4-Warning | Virtual service [chars] will not be activated following a switchover | Following a switchover this virtual service will not be activated as there is an issue with its package definition file. Copy package definition file to standby at earliest convenience. | vman | LOG_STD_ACTION |
| VRISMGR-5-ACTIVATION_STATE | 5-Notice | [chars] [chars] | The activation state of the named virtual service has changed as notified by Virt-manager. | vman | LOG_STD_ACTION |
| VRISMGR-5-INSTALL_STATE | 5-Notice | [chars] [chars] | The installation state of the named virtual service has changed as notified by Virt-manager. | vman | LOG_STD_ACTION |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| VRT_SERVICE_RESET_REACTIVATE | 5-Notice | Virtual service [chars] reset and will be reactivated | Virt-manager has reported that it detected the named virtual service reset. An attempt will be name to reactivate this virtual service. | vman | LOG_STD_ACTION |
| VLAN_PORT_IIFID_ALLOC_FAILED | 3-Error | IIF_ID alloc failed for vlan-port: Port [chars] in Vlan [dec] due to memory allocation failure. Some features will not work. | The system is low on memory due to which IIF-ID allocation failed. This results in failure to apply polices such as QoS on this vlan-port. | vlan-port | LOG_STD_REDUCE_ACTION "Once memory is available unconfigure and reconfigure the vlan on the" "port" |
| VLAN_PORT_IIFID_REGISTRATION_FAILED | 3-Error | IIF_ID registration failed for vlan-port: Port [chars] in Vlan [dec] due to memory allocation failure. Some features will not work. Vlan-port is errdisabled | The system is low on memory due to which IIF-ID registration failed. This results in failure to apply polices such as QoS on this vlan-port. If port is carrying the vlan vlan-port is errdisabled. | sw-vlan | LOG_STD_REDUCE_ACTION "Once memory is available " "run 'clear errdisable interface <intf> vlan <vlanId>' " "or run 'shutdown' followed by 'no shutdown' on the port." |
| VLAN_INTERFACE_NOT_PRESENT | 3-Error | The [chars] link [chars] does not exist. Sub-interface: [chars] VLAN-Id: %u | This message appears when the below command is issued under port-channel sub-interface with the unknown | vlan | "Verify if the interface shows up using the " "command - show ip int brief. \n Please insert " "the card in case it is removed and run " "the command again once the card comes up." |
| VLAN-3-XDRLEN | 3-Error | Invalid XDR length. Type [dec] [chars]. XDR/buffer len [dec]/[dec] | - | - | - |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |

Syncing of information to/from this slot will not happen for any XDR client. | XDR_DDTS_COMPONENT | "Copy the message exactly as it appears and report it to your technical " "support representative." |
| XDR-3-PULLSENDFAIL | 3-Error | Sending data for pull client [chars] to [chars] failed due to slots [chars] not being in group 0x[hec] of slots [chars] | - | - | - |
| XDR-3-XDRIPC | 3-Error | XDR IPC error on multicast-group 0x[hec] due to [chars]. | A general IPC related error occurred which may prevent transfer of data to other peers using the IPC mechanism | XDR_DDTS_COMPONENT | "Get the output of \"show xdr multicast\" immediately after this error. " "Copy the message exactly as it appears and report it to your technical " "support representative." |
| XDR-3-XDRMCASTPEERBNDNG | 3-Error | XDR peer [chars] bind to group [chars] was bound to [chars]: [chars] | - | - | - |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| XDR-3-XDRMCASTGRPINVALID | 3-Error | Invalid XDR multicast group for slots [chars]: [chars] | - | - | - |
| XDR-3-XDRMCASTJOIN | 3-Error | Attempt to join [chars] to [chars] failed because client [chars] returned an error | Internal error. May result in unpredictable behaviour. | XDR_DDTS_COMPONENT | "Get the output of \"show xdr multicast\" \"show xdr client all\" and " "\"show monitor event-trace xdr all\". " "Copy the message exactly as it appears and report it to your technical " "support representative." |
| XDR-3-XDRMCASTJOINREQ | 3-Error | Client [chars] returned an invalid response to a join request for groups [chars] and [chars] | Internal error. May result in unpredictable behaviour. | XDR_DDTS_COMPONENT | "Get the output of \"show xdr multicast\" \"show xdr client all\" and " "\"show monitor event-trace xdr all\". " "Copy the message exactly as it appears and report it to your technical " "support representative." |
| XDR-3-XDRNOMEM | 3-Error | XDR failed to allocate memory during [chars] creation. | Allocation of memory by the XDR subsystem failed. This may result in an unpredictable behavior of XDR | XDR_DDTS_COMPONENT | "Make sure that there is enough memory for the operations being performed " "by your machine. " "Copy the message exactly as it appears and report it to your technical " "support representative." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| XDR-3-XDROOS | 3-Error | Received an out of sequence IPC message. Expected [dec] but got [dec] from slot [chars]. | An out of sequence IPC message was received | XDR_DDTS_COMPONENT | "We weren't meant to get the IPC message we did. From this point onwards " "IPC can't be relied on. " "Copy the message exactly as it appears and report it to your technical " "support representative." |
| XDR-4-XDRIPCPORTFAIL | 4-Warning | Attempt to open the IPC ports failed. [chars] | XDR failed an attempt to open the IPC port to communicate to the specified peer | XDR_DDTS_COMPONENT | LOG_STD_NO_ACTION |
| XDR-6-CLIENTISSUBADRCVITEM | 6-Information | Failed to rcv_transform message - from slot [chars] XDR client [chars] context [dec] | Cannot perform ISSU receive transform. This is likely due to a failure in negotiation earlier or when one side of an ISSU-enabled XDR connection is out of sync with the other. | XDR_DDTS_COMPONENT | "Get the output of \"show xdr multicast\" \"show xdr client all\" and " "\"show issu message types [XDR client ISSU ID]\". " "Copy the message exactly as it appears and report it to your technical " "support representative." |
| XDR-6-CLIENTISSUBADXMITM | 6-Information | Failed to xmit_transform message - to slot [chars] XDR client [chars] context [dec] | Cannot perform ISSU transmit transform. This is likely due to a failure in negotiation earlier or when one side of an ISSU-enabled XDR connection is out of sync with the other. | XDR_DDTS_COMPONENT | "Get the output of \"show xdr multicast\" \"show xdr client all\" and " "\"show issu message types [XDR client ISSU ID]\". " "Copy the message exactly as it appears and report it to your technical " "support representative." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| XDR-6-CLIENTISSUUNREG | 6-Information | Failed to unregister session - XDR client [chars] slot [chars] reason [chars] | Unable to unregister this session. This will likely cause problems when reregistering and should be reported. | XDR_DDTS_COMPONENT | "Get the output of \"show xdr multicast\" \"show xdr client all\" and " "\"show issu message types [XDR client ISSU ID]\". " "Copy the message exactly as it appears and report it to your technical " "support representative." |
| XDR-6-CLIENTNOTREGONRP | 6-Information | Client [chars] has registered on slot [chars] before RP. | XDR client has registered on non-RP card before RP card. If this has occurred while toggling the client's registration status rapidly then it may be a transient problem and will resolve itself. If not then the client's status may be unpredictable and ISSU negotiation if platform is ISSU-aware may not take place correctly. | XDR_DDTS_COMPONENT | "Verify whether the client's registration status is the same on both " "the RP and the card on which the problem is reported by comparing " "the output of 'show xdr client all' to see if the client is present or " "absent in BOTH. If so and no other error messages have been seen " "then this is a transient issue and no further action is required. " "Otherwise copy the message exactly as it appears and report it to " "your technical support representative." |
| XDR-6-ISSUBADRCVTFM | 6-Information | Failed to rcv_transform message - slot [chars] reason: [chars] | Unable to perform ISSU transform on incoming XDR header. Message will be ignored | XDR_DDTS_COMPONENT | "Get the output of \"show xdr multicast\" \"show xdr client all\" and " "\"show issu message types [XDR client ISSU ID]\". " "Copy the message exactly as it appears and report it to your technical " "support representative." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| XDR-6-ISSUBADTXITFM | 6-Information | Failed to xmit_transform message - slot [chars] reason [chars] | Unable to perform ISSU transform on outgoing XDR header. Message will be ignored | XDR_DDTS_COMPONENT | "Get the output of \"show xdr multicast\" \"show xdr client all\" and " "\"show issu message types [XDR client ISSU ID]\". " "Copy the message exactly as it appears and report it to your technical " "support representative." |
| XDR-6-ISSUCLIENTABSENT | 6-Information | XDR client [chars] absent on slot [chars]. Client functionality may be affected. | The remote slot doesn't support this ISSU client. The software will handle this by reducing client functionality locally to continue in SSO mode or by forcing the remote peer into RPR mode as apprporiate. This is expected behaviour in ISSU-capable systems. | XDR_DDTS_COMPONENT | "No action required. This message just indicates that certain " "functionality may be reduced due to running different images together." |
| XDR-6-XDRINVALIDHDR | 6-Information | XDR for client [chars] dropped slots:[chars] from slot:[chars] context:%u length:%u | The XDR message was dropped for the reason given. | XDR_DDTS_COMPONENT | "If the failure was due to an invalid context for the CEF push client " "and occurred during an ISSU upgrade then it may be safely ignored. " "Otherwise: " LOG_STD_ACTION |
| XDR-6-XDRINVALIDHDRISSU | 6-Information | XDR ISSU negotiation message for client [chars] dropped | The XDR ISSU negotiation message was dropped for the reason given. | XDR_DDTS_COMPONENT | "If the message occurred during an ISSU upgrade then it may be " "safely ignored. Otherwise: " LOG_STD_ACTION |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| XDR-6-XDRIPCPEER | 6-Information | XDR IPC error occurred for peer in slot [chars] due to [chars][chars]. | A general IPC related error occurred which may prevent transfer of data to other peers using the IPC mechanism | XDR_DDTS_COMPONENT | "Get the output of \"show xdr multicast\" and \"show xdr linecard\" " "immediately after this error. Copy the message exactly as it appears " "and report it to your technical support representative." |
| XDR-6-XDRMCASTINIT | 6-Information | XDR mcast subsystem initilisation error: [chars] | XDR non functional. | XDR_DDTS_COMPONENT | "A failure occured which prohibits the XDR client from registering with " "the core. " "Copy the message exactly as it appears and report it to your technical " "support representative." |
| XDR-6-XDRREGISTRATION | 6-Information | XDR failed to register [chars] client due to [chars] | Failure to register the said XDR client. | XDR_DDTS_COMPONENT | "A failure occured which prohibits the XDR client from registering with " "the core. " "Copy the message exactly as it appears and report it to your technical " "support representative." |
| XIPC-3-LDP | 3-Error | ERRMSG_NOFLAGS | - | - | - |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| XMCP-4-CLIENT_DENIED | 4-Warning | Client [chars]/[chars] denied: [chars] | An external XMCP client connection was denied. This may be due to a valid configuration reason for example <CmdBld>maxNoCmdBld</CmdBld> or an <CmdBld>downNoCmdBld</CmdBld> or it may indicate that a protection mechanism has been triggered - for example an authentication failure or DOS attack prevention | - | "Check that this is caused by configuration. If not " "and if the frequency of this message suggests that " "this may be malicious - contant your TAC security " "support immediately" |
| XMCP-4-CLIENT_ERR_RSP | 4-Warning | Received error response %u [chars] from client [chars]/[chars] | - | - | - |
| XMCP-5-CLIENT_CHANGE | 5-Notice | Client [chars]/[chars] is [chars]: [chars] | An XMCP client connected or disconnected. | - | LOG_STD_NOACTION |
| XMPP-3-MEMORY | 3-Error | [chars] | An IPv6 process could not be started. This machine will not be able to process any IPv6 packets. | ipv6 | "Reduce other system activity to ease memory demands. If conditions " "warrant upgrade to a larger memory configuration." |
| XMPP-3-MEMORY | 3-Error | [chars] | XMPP subsystem has experienced a problem gettting the required\n\ memory to complete this operation. | xmpp | "Check system memory for other memory allocation errors and contact\n\ Technical support for problem resolution. In the absence of IOS errors\n\ upgrading the memory in the network device may be required." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| XOS-7-XOS_DM_DISPATCH | 7-Debug | xos_dm_dispatch API cannot be called that does not own the XDM xdm pid: [dec] current pid: [dec] | The xos_dm_dispatch API was called by a process that is not the owner of \n that XDM. Only process that create the XDM instance can own it. | infra-xoslib | "Please check your code and avoid invoking this API in a different process \n" "context." |
| XOS-7-XOS_DM_WAIT | 7-Debug | xos_dm_wait API cannot be called by a process that does not own the XDM xdm pid: [dec] current pid: [dec] | The xos_dm_wait API was called by a process that is not the owner of that \n XDM. Only process that create the XDM instance can own it. | infra-xoslib | "Please check your code and avoid invoking this API in a different process \n" "context." |
| XOS-7-XOS_DM_XDISPATCH | 7-Debug | xos_dm_xdispatch API cannot be called that does not own the XDM xdm pid: [dec] current pid: [dec] | The xos_dm_xdispatch API was called by a process that is not the owner of \n that XDM. Only process that create the XDM instance can own it. | infra-xoslib | "Please check your code and avoid invoking this API in a different process \n" "context." |
| XOS-7-XOS_ONINT | 7-Debug | XOS APIs cannot be called in a interrupt path | An XOS API was called in the interrupt path this is currently not supported. | infra-xoslib | "Please check your code and avoid using this API in the interrupt path" |
| XOS-7-XOS_STUCK_TMR | 7-Debug | XOS timer expired earlier than expected expiration time tree:%p time:[dec].[dec] | The XOS timer handler was invoked earlier than expiration value of the \n timer | infra-xoslib | "Please check expiration timer value set on the timer. Also some OS \n" "infrastructures can roundup expiration time so that timer handler gets \n" "invoked earlier than expected " |
| XXX-3-SBINIT | 3-Error | Error initializing [chars] subblock data structure. [chars] | Initialization of the specified subblock data structure could not be accomplished. | flexible-netflow | LOG_STD_ACTION |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| YANG_INFRA-3-DISABLE_ONEP | 3-Error | Error disabling onep | An error has occurred when attempting to disable onep. | polaris-dmi-infra | LOG_STD_ACTION |
| YANG_INFRA-3-ENABLE_ONEP | 3-Error | Error enabling onep | An error has occurred when attempting to enable onep. | polaris-dmi-infra | LOG_STD_ACTION |
| ZONE-4-API | 4-Warning | Zone [chars] [chars][chars] [chars] failed to notify the data plane | The notification of a zone operation has failed to update the data\n\ plane and as such the application of the zone information within the\n\ object will not be applied to the data plane. It is also possible\n\ that the common classification may fail to locate and bind to the\n\ zone rendering the configuration inconsistent in terms of\n\ application. | zone | show memory |
| ZONE-4-LICENSE | 4-Warning | License smart enable and zone-license enable should be enabled first | The notification indicates that zone smart license\n\ should be enabled | zone | show running |
| ZONE-6-CONFIG | 6-Information | Zone security [chars] is removed due to VRF config change on interface [chars] | The notification of a zone is removed from an interface\n\ due to a vrf is removed from the interface | zone | show running |
