# System Message Guide for Cisco IOS XE Cupertino 17.11.x

## Cisco System Messages Overview

This document describes system messages for Cisco software releases. During operation, the system software sends these messages to the console (and, optionally, to a logging server on another system) during operation. Not all system messages indicate problems with your system. Some are purely informational, and others may help diagnose problems with communications lines, internal hardware, or the system software.

## How To Read System Error Messages

System error messages begin with a percent sign (%) and are structured as follows:`%FACILITY-SUBFACILITY-SEVERITY-MNEMONIC: Message-text`

- `FACILITY` is a code consisting of two or more uppercase letters that indicate the facility to which the message refers. A facility can be a hardware device, a protocol, or a module of the system software.
- `SEVERITY` is a single-digit code from 0 to 7 that reflects the severity of the condition. The lower the number, the more serious the situation. Error Message Severity Levels lists the severity levels.
- `MNEMONIC` is a code that uniquely identifies the error message.
- `Message-text` is a text string describing the condition. This portion of the message sometimes contains detailed information about the event, including terminal port numbers, network addresses, or addresses that correspond to locations in the system memory address space. Because the information in these variable fields changes from message to message, it is represented here by short strings enclosed in square brackets (`[ ]`). A decimal number, for example, is represented as `[dec]`. Representation of Variable Fields in Error Messages lists the representations of variable fields and the type of information in them.

The following is a sample system error message:

```
%LINK-2-BADVCALL: Interface [chars], undefined entry point
```

Some error messages also indicate the card and slot reporting the error. These error messages begin with a percent sign (%) and are structured as follows:

```
%CARD-SEVERITY-MSG:SLOT %FACILITY-SEVERITY-MNEMONIC: Message-text
```

- `CARD` is a code that describes the type of card reporting the error. VIP and FEIP are possible card types.
- `MSG` is a mnemonic that indicates that this is a message. It is always shown as `MSG`.
- `SLOT` indicates the slot number of the card reporting the error. It is shown as `SLOT` followed by a number (for example, `SLOT5`).

The prepended portion of the error message (`%CARD-SEVERITY-MSG:SLOT)` is not shown in the error message listings in this document.

### Error Message Severity Levels

Error message severity levels correspond to the keywords assigned by the **logging** global configuration commands that define where and at what level these messages appear. The default is to log messages to the console at the debugging level (7). For more information, see the system configuration chapter and descriptions of the **logging** command in the configuration guide and command reference.

| Level | Description |
|---|---|
| 0 - emergency | System unusable |
| 1 - alert | Immediate action needed |
| 2 - critical | Critical condition |
| 3 - error | Error condition |
| 4 - warning | Warning condition |
| 5 - notification | Normal, but significant, condition |
| 6 - informational | Informational message only |
| 7 - debugging | Appears during debugging only |

### Representation of Variable Fields in Error Messages

| Representation | Type of Information |
|---|---|
| [atalk_address] | AppleTalk address |
| [atalk_net] | AppleTalk network, either 600 or 600-601 |
| [char] | Single character |
| [chars] | Character string |
| [dec] | Decimal number |
| [enet] | Ethernet address (for example, 0000.FEED.00C0) |
| [hex] | Hexadecimal number |
| [inet] | Internet address (for example, 10.0.2.16) |
| [int] | Integer number |
| [node] | Address or node name |
| [sci_notation] | Scientific notation |
| [t-line] | Terminal line number in octal (or decimal if the decimal-TTY service is enabled) |
| [v-name] | VINES name; or number (hex or decimal) |

# Error Message Traceback Reports

Some messages describe internal errors and contain traceback information. This information is very important and should be included when you report a problem to your technical support representative.

The following sample message includes traceback information:

```
-Process= "Exec", level= 0, pid= 17 -Traceback= 1A82 1AB4 6378 A072 1054 1860
```

## A toE

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| AAA-3-CACHE_TREE_NULL_ERROR | 3-Error | Cache Tree pointer is of null value | The cache tree pointer is of null value. | aaa | "Copy the error message exactly as it appears and report it to your " "technical support representative." |
| AAA-2-AAA_INTERNAL_ERROR | 2-Critical | [chars]%08X: Acct db for Id %08X absent | AAA internal error | aaa | LOG_STD_ACTION |
| AAA-2-FORKFAIL | 2-Critical | Cannot fork process [chars] | Attempted to fork a process and failed. The reason could be either hardware or software. | aaa | LOG_STD_ACTION |
| AAA-3-ACCT_PROC_LOW_MEM | 3-Error | AAA ACCT process suspended : low I/O memory | AAA ACCT process has been suspended due to insufficient IO memory. | aaa | LOG_STD_ACTION |
| AAA-3-ACCT_LOW_MEM_TRASH | 3-Error | AAA unable to handle accounting requests due to insufficient I/O memory and could be trashing the queued accounting records | Dropping the accounting request as there is no enough I/O memory. Hence all queued accounting requests shall be trashed | aaa | LOG_STD_ACTION |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| AAA-3-ACCT_LOW_MEM_UID_FAIL | 3-Error | AAA unable to create UID for incoming calls due to insufficient processor memory | Stop creating the AAA UID due to LOW processor memory | aaa | LOG_STD_ACTION |
| AAA-3-ACCT_LOW_PROC_MEM_TRASH | 3-Error | AAA unable to handle accounting requests due to insufficient processor memory and could be trashing the queued accounting records | Dropping the accounting request as there is no enough processor memory. Hence all queued accounting requests shall be trashed | aaa | LOG_STD_ACTION |
| AAA-3-ACCT_UNKOWN_REASON_TRASH | 3-Error | AAA unable to handle accounting requests reason unknown and could be trashing the queued accounting records | Dropping the accounting request reason unknown. Hence all queued accounting requests shall be trashed | aaa | LOG_STD_ACTION |
| AAA-3-ATTRFORMATERR | 3-Error | Attribute with unknown format [dec] | An attribute was found with an invalid format. | aaa | "Attribute with unknown format in definition. Enable AAA " "debug and try to replicate the steps to get the message. " "If the meassage appears again Check bug toolkit " "on Cisco website for the issue. If you didn't find one " "Enter <CmdBold>Show tech-support<NoCmdBold> command " "Collect all the information and error message and report " "it to your technical support representative." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| AAA-3-AUTH_LOW_DMEM | 3-Error | RADIUS process is unable to handle the requests due to insufficient I/O memory | RADIUS process unable to handle request due to insufficient IO memory. Hence returning failure. | aaa | LOG_STD_ACTION |
| AAA-3-AUTHORMLSTUNDEF | 3-Error | Authorization method list '[chars]' is not defined. Please define it. | A given method list was listed in a command without defining it first. The method list should be defined before use. | aaa | "Define the method list before using it." |
| AAA-3-BADCURSOR | 3-Error | invalid cursor index [dec] max [dec] service [chars] protocol [chars] | A AAA client has provided an invalid attribute cursor to AAA. | aaa | LOG_STD_ACTION |
| AAA-3-BADLIST | 3-Error | invalid list AAA ID %u | A AAA client has provided an invalid attribute list to AAA. | aaa | LOG_STD_ACTION |
| AAA-3-BADMAGIC | 3-Error | Data structure failed magic number sanity check | A corrupted data structure has been found which was stored internally. | aaa | LOG_STD_ACTION |
| AAA-3-BADMETHOD | 3-Error | Cannot process [chars] method %u | A method list function encountered a method list that was unknown or could not be handled. | aaa | LOG_STD_ACTION |
| AAA-3-BADMETHODERROR | 3-Error | Cannot process [chars] method [chars] | A method list function encountered a method type that was unknown or could not be handled. | aaa | LOG_STD_ACTION |
| AAA-3-BADSERVERTYPEERROR | 3-Error | Cannot process [chars] server type [chars] | A method list function encountered a server type that was unknown or could not be handled. This may be due to a server misconfiguration. | aaa | "Research the cause of the misconfiguration and " "attempt to correct it otherwise take the following " "action. "LOG_STD_ACTION |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| AAA-3-BUFFER_OVERFLOW | 3-Error | Radius I/O buffer has overflowed | An unusually large number of RADIUS attributes has caused AAA to overflow its RADIUS I/O buffer. | aaa | "This is an internal software error. Check bug toolkit " "on Cisco website for the issue. If you didn't find one " "Enter <CmdBold>Show tech-support<NoCmdBold> command " "Collect all the information and error message and report " "it to your technical support representative." |
| AAA-3-DROPACCTFAIL | 3-Error | Accounting record dropped send to server failed: [chars] | An attempt to send an accounting record to a server failed. This happens when device exhaust all its retries and retransmission. The cause for this be the servers may not be operational or the NAS is not configured properly. | aaa | "Check the server whether they are " "operational or not. Next check whether " "the device is configured properly. Refer to" "the server configuration section of the " "cisco IOS documentation. Finally check " "that the NAS can communicate with the server. " "If the problem persist Enter <CmdBold>show running-" "config<NoCmdBold> command contact your cisco technical " "support representative and provide all the information " "gathered to the representative." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| AAA-3-HA_INIT_FAILURE | 3-Error | High availability initialization failure: [chars] | The AAA subsystem was unable to perform necessary high-availability related initialization. In the event of switchover to a standby device sessions depending on high availability capabilities in the AAA subsystem will be forced to renegotiate. | aaa | LOG_STD_ACTION |
| AAA-3-HA_INTERNAL_ERROR | 3-Error | High availability internal error for unique id 0x%8x: [chars] | The AAA subsystem was suffered an internal error. In the event of switchover to a standby device sessions depending on high availability capabilities in the AAA subsystem may be forced to renegotiate. | aaa | LOG_STD_ACTION |
| AAA-3-INVALIDATTRLIST | 3-Error | aaa attribute list CLI is not valid when configuring in sub-mode. | An internal error has occurred | aaa | LOG_STD_ACTION |
| AAA-3-INVALIDPARM | 3-Error | invalid parameter was used when accessing AAA function | A AAA client tried to use a AAA function with an invalid parameter. | aaa | LOG_STD_ACTION |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| AAA-3-IPILLEGALMSG | 3-Error | Invalid use of ip_pid%u | This error means a process sent an illegal message. | - | "If this message recurs. Check bug toolkit " "on Cisco website for the issue. If you didn't find one " "Enter <CmdBold>Show tech-support<NoCmdBold> command " "Collect all the information and error message and report " "it to your technical support representative." |
| AAA-3-ISDNINTF | 3-Error | [chars] [chars]: Can not apply configuration to ISDN channel:\n \[chars]\ | Configuration can not be applied to individual ISDN channels. | aaa | "You need virtual-profiles and virtual-access " "interfaces to apply configuration to ISDN. " "Refer to the section on \"Configuring virtual " "profile by AAA Configuration\" in the Cisco IOS " "Dial Technologies Configuration Guide." |
| AAA-3-LOW_MEM | 3-Error | [chars] process is unable to handle the incoming packet due to low memory | Please check the processor memory or IO memory. Most likely one is them has less available memory or worst case both may have insufficient memory. | aaa | LOG_STD_ACTION |
| AAA-3-METHODLISTINTERNALERROR | 3-Error | method list '[chars]': [chars] | This is an internal software error. | aaa | LOG_STD_ACTION |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| AAA-3-TOO_MANY_METHODS | 3-Error | method list '[chars]' | This is an internal software error. An AAA client attempted to add too many methods to a method list. | aaa | "This is an internal software error. Check bug tool-kit " "on Cisco web-site for the issue. If you didn't find one " "Collect the error message and report it to your " "technical support representative." |
| AAA-3-NOTABLE | 3-Error | AAA ID %u | Resource failure. | aaa | LOG_STD_ACTION |
| AAA-3-NULLCURSOR | 3-Error | Null cursor | A AAA client has provided a nonexistent attribute cursor to AAA. | aaa | LOG_STD_ACTION |
| AAA-3-NULLVRF | 3-Error | Null vrf entry | A NULL VRF entry found while comparing the AAA VRF attributes. | aaa | LOG_STD_ACTION |
| AAA-3-PARSEERR | 3-Error | Error[dec] parser is unable to parse [chars] per-user command | All attempts to parse this per_user unconfigure command failed. The unconfigure command is called when an error occurs while configuring per-user commands to revert back. The unconfiguration may fail due to parser or AAA error. | parser and aaa | "The given unconfigure command was not executed. " "Switch on the debug peruser command and repeat " "the steps that caused the error. If you get the error " "Report it to your technical support representative." |
| AAA-3-PASSWD_RESTRICT_ERR | 3-Error | AAA password restriction failed.-[chars]\n | The password/secret/key entered is not meeting the password restrictions configured | aaa | LOG_STD_ACTION |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| AAA-3-SERVER_INTERNAL_ERROR | 3-Error | Server '[chars]': [chars] | This is an internal software error in the AAA server group subsystem. | aaa | "This is an internal software error. Check bug toolkit " "on Cisco website for the issue. If you didn't find one " "Enter <CmdBold>Show tech-support<NoCmdBold> command " "Collect all the information and error message and report " "it to your technical support representative." |
| AAA-3-FAILED_TO_FORK | 3-Error | Failed to fork process for [chars]. | Quite likely we ran out of memory. Other explanations are possible. | aaa | "If this message recurs. Check bug toolkit " "on Cisco website for the issue. If you didn't find " "one Enter <CmdBold>Show tech-support<NoCmdBold> " "command collect all the information and error " "message and report it to your technical support " "representative." |
| AAA-3-GROUP_INTERNAL_ERROR | 3-Error | server group '[chars]': [chars] | This is an internal software error in the AAA server group subsystem. | aaa | "This is an internal software error. Check bug " "toolkit on Cisco website for the issue. If you " "didn't find one Enter <CmdBold>Show tech-support" "<NoCmdBold> command collect all the information " "and error message report it to your technical " "support representative." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| AAA-3-FORKFAIL | 3-Error | Failed to fork process for [chars]. | Quite likely we ran out of memory. Other explanations are possible. | aaa | "If this message recurs. Check bug toolkit " "on Cisco website for the issue. If you didn't find one " "Enter <CmdBold>Show tech-support<NoCmdBold> command " "Collect all the information and error message and report " "it to your technical support representative." |
| AAA-3-SORTFAIL | 3-Error | [chars] :Peruser Could not sort the [chars] attributes | Sorting of the attributes received from AAA server failed. | aaa | LOG_STD_ACTION |
| AAA-5-LOCAL_USER_BLOCKED | 5-Notice | User [chars] blocked for login till [chars] | User blocked since the number of authentication failures in the watch time exceeded the configured threshold. | aaa | LOG_STD_ACTION |
| AAA-5-USER_LOCKED | 5-Notice | User [chars] locked out on authentication failure | User locked out since the number of authentication failures exceeded the configured threshold. | aaa | LOG_STD_ACTION |
| AAA-5-USER_RESET | 5-Notice | User [chars] failed attempts reset by [chars] | User's number of failed authentication attempts so far has been reset to zero | aaa | LOG_STD_ACTION |
| AAA-5-USER_UNLOCKED | 5-Notice | User [chars] unlocked by [chars] | User unlocked by the system administrator. User is enabled to login to the system. | aaa | LOG_STD_ACTION |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| AAA-6-ACCTSESSIDWRAP | 6-Information | Accounting-Session-ID [dec] exceeded max value allowed | Accounting-Session-ID value exceeded max value allowed. Now it is wrapping. | aaa | "This is informational only not an error." |
| AAA-6-BADHDL | 6-Information | invalid hdl AAA ID %u hdl [hec] [chars] | A AAA client has provided an invalid attribute list handle to AAA. | aaa | LOG_STD_ACTION |
| AAA-6-INVALIDROUTE | 6-Information | Syntax error in route statement: [chars] | Currently downloading route contains syntax error. | aaa | LOG_STD_ACTION |
| AAA-6-SKIP_MOH_ATTRIBUTE | 6-Information | Warning: Hardware idb is NULL. No Modem. MoH attribute can not be applied and it is Skipped for authorization. | \nTo handle Modem-on-Hold attribute we need connectivity with modems supporting V.92 modem standards. If there is no modem there wouldn't be any tty without which we cannot use MOH attributes. | aaa | LOG_STD_ACTION |
| AAA-6-USER_BLOCKED | 6-Information | Enable view requires to be authenticated by non-none methods Please use the appropriate method with the login authentication | \nNone method authentication is not allowed in CLI | aaa | LOG_STD_ACTION |
| AAA-6-USER_FAIL_VIEW_AAA | 6-Information | User [chars] failed to enter view '[chars]'. | You have provided wrong User ID or Password for the requested view | aaa | "This message is for information only. No action" " is required." |
| AAA-3-AAAFORKFAIL | 3-Error | Failed to start AAA process. AAA requests may not be processed. | Failed to create the AAA process. | aaa | "Free up some memory." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| AAAA-3-ACCTATTR | 3-Error | last accounting attribute: | The data buffer overflowed while building the accounting packet.The accounting attribute that was being written to the buffer while the buffer overflow occured was logged. | AAA | LOG_STD_ACTION"Collect the logs with these debugs by" " using commands #debug aaa api#debug aaa attr#debug aaa accounting" |
| AAAA-3-ACCTDUMP | 3-Error | dump of accounting data: | The data buffer overflowed while building the accounting packet as the total length of the attributes exceed the buffer size. Last 128 bytes of buffer data is dumped. | AAA | LOG_STD_ACTION"Collect the logs with these debugs by" " using commands #debug aaa api#debug aaa attr#debug aaa accounting" |
| AAAA-3-ACCTFORKFAIL | 3-Error | Failed to start accounting process. Accounting records may not be sent. | Failed to create the accounting process. | aaa | "Free up some memory." |
| AAAA-3-BADARG | 3-Error | %% AAA: bad argument %0#4x | We tried to NVGEN a non-existent AAA command. | aaa | LOG_STD_ACTION |
| AAAA-3-BADAUTHENSTR | 3-Error | Bad authentication data: [chars] | The data buffer overflowed while building the authentication packet as the total length of the attributes exceeded the buffer size. | AAA | LOG_STD_ACTION"Collect the logs with these debugs" " by using the commands #debug aaa api#debug aaa attr#debug aaa" " authentication" |
| AAAA-3-BADCOMM | 3-Error | Trying config command but should not be. | An internal error has occurred | aaa | LOG_STD_ACTION |
| AAAA-3-BADLIST | 3-Error | %% AAA: bad [chars] list [chars] | One of the AAA methods does not seem to have a list associated with it. | aaa | LOG_STD_ACTION |
| AAAA-3-BADREG | 3-Error | Illegal registry call. | An internal software error has occurred | aaa | LOG_STD_ACTION |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| AAAA-3-BADSTATE | 3-Error | \n%% AAA: Bad state for [chars] list name [dec] | A AAA method list is neither default nor named. This is bad. | aaa | LOG_STD_ACTION |
| AAAA-3-BADSTR | 3-Error | Bad accounting data: [chars] | During AAA accounting operations the internal database of accounting information for a user was found to be corrupt. In all cases this indicates an internal software error and that accounting information for a particular user session has been lost. | aaa | "Copy the error message exactly as it appears and report it to your " "technical support representative." |
| AAAA-3-DLRFORKFAIL | 3-Error | Failed to fork process for [chars]. | Quite likely we ran out of memory. Other explanations are possible. | aaa | LOG_STD_ACTION |
| AAAA-3-DROPACCTFULLQ | 3-Error | Accounting record dropped due to a full aaa accounting queue: [chars]-[chars] [chars] [chars] | An accounting record was dropped because there are too many accounting packets enqueued. | aaa | "Disable periodic accounting if it is on. The accounting queue may " "have grown to be large which is usually due to a non-responsive " "AAA server. Use 'show radius statistics' or 'show tacacs' to see " "if the number of timeouts is increasing or if the response delay is " "unusually high." |
| AAAA-3-DROPACCTLOWMEM | 3-Error | Accounting record dropped due to low memory: [chars]-[chars] [chars] [chars] | An accounting record dropped due to low memory. | aaa | "Disable periodic accounting if it is on. Try to reduce the load " "on the router." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| AAA-3-DROPACCTQUEUEXCEEDED | 3-Error | accounting record dropped output record queue full: [chars]-[chars] [chars] [chars]\n\ | An accounting record was dropped. The record could not be enqueued because the number of records in the output queue has exceeded the system limit. | aaa | "Disable periodic accounting if it is on. " "<CmdBold>[no] aaa accounting update newinfo " "periodic <interval><NoCmdBold>" |
| AAA-3-DROPACCTSNDFAIL | 3-Error | Accounting record dropped send to server failed: [chars]-[chars] [chars] [chars] | An attempt to send an accounting record to a server failed. | aaa | "Check that the server TACACS+ or RADIUS is operational. Next " |
| AAA-3-ILLEGALNAME | 3-Error | Illegal [chars] [chars] name \[chars]\ rejected | A method-list name should not be the same as a method name. Please choose a different name for the method list. | aaa | "Pick a different method-list name that is not also a method-name." |
| AAA-3-ILLSGNAME | 3-Error | Illegal server-group name [chars] type [chars]. | The given server-group name is a name that could conflict with internally chosen lists. | aaa | "Please pick a different server-group name." |
| AAA-3-INTERNAL_ERROR | 3-Error | [chars] | This is an internal software error. | aaa | LOG_STD_ACTION |
| AAA-3-INVALIDATTRLIST | 3-Error | aaa attribute list CLI is not valid when configuring in sub-mode. | An internal error has occurred | aaa | LOG_STD_ACTION |
| AAA-3-INVALIDLIST | 3-Error | %% AAA: invalid [chars] list [dec]. | One of the AAA methods lists has inconsistent settings | aaa | LOG_STD_ACTION |
| AAA-3-INVSTATE | 3-Error | [chars] AUTHOR/[chars]: Internal state is invalid: astruct 0x[hec] ustruct 0x[hec] | One of the two mentioned data-structures is not set but is needed here. This is an internal software error. | aaa | LOG_STD_ACTION |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| AAAA-3-LISTCREATE | 3-Error | The list [dec] for [chars] is NULL. This should never be. | One of the method-lists created at startup wasn't created. This may cause a reload | aaa | LOG_STD_ACTION |
| AAAA-3-MKTIMERFAIL | 3-Error | Failed to create periodic accounting timer for user [chars]. This user may not generate periodic accounting records. | Failed to malloc a timer struct for periodic accounting. | aaa | "Free up some memory and have user re-authenticate." |
| AAAA-3-MKTIMERINVALID | 3-Error | Invalid request to create periodic accounting timer for user [chars]. Timer already exists. | Invalid client usuage of timer struct for periodic accounting. | aaa | "Copy the error message exactly as it appears and report it to your " "technical support representative." |
| AAAA-3-NOADMINPROC | 3-Error | [chars] | Administrative process has been enabled but somehow could not run | - | - |
| AAAA-3-NOFREELISTS | 3-Error | %% AAA: No free [chars] lists for \[chars]\ | You have reached the maximum number of possible authentication lists for this method. | aaa | LOG_STD_RECUR_ACTION |
| AAAA-3-NOLIST | 3-Error | [chars]: no method list-name. | An internal software error. | aaa | LOG_STD_ACTION |
| AAAA-3-NOREG | 3-Error | [chars] method [dec] has no registry! | An internal error has occurred | aaa | LOG_STD_ACTION |
| AAAA-3-NOSERV | 3-Error | No name for servergroup in method [chars] | An internal error has occurred | aaa | LOG_STD_ACTION |
| AAAA-3-NOSG | 3-Error | No server-group passed through parser. | An internal error has occurred | aaa | LOG_STD_ACTION |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| AAAA-3-NULPORT | 3-Error | Could not establish port information | This message indicates an internal software error. AAA could not determine a valid port string based on the information provided to it via a client. | aaa | "Copy the error message exactly as it appears and report it to your " "technical support representative." |
| AAAA-3-NULUSR | 3-Error | accounting for null user | This message indicates an internal software error. During shutdown of a line or interface the system tried to send accounting information via AAA but could not find the user to which the accounting information belonged. The most likely reason for this error is trying to do accounting twice for the same event. This error message can occur without any loss of accounting information. | aaa | "Copy the error message exactly as it appears and report it to your " "technical support representative." |
| AAAA-3-OVERWRITE | 3-Error | Overwrote internal buffer space [chars] | An internal software error. | aaa | "Report to tac@cisco.com." |
| AAAA-3-PERIODICFORKFAIL | 3-Error | Failed to start periodic accounting process. Periodic accounting records may not be sent. | Failed to create the periodic accounting process. | aaa | "Free up some memory." |
| AAAA-3-PERNOTIMER | 3-Error | AAA/ACCT/TIMER: Periodic update but no timer. | We are trying to free a timer and the method is PERIODIC but no timer seems to exist. | aaa | LOG_STD_ACTION |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| AAAA-3-RELOGIN | 3-Error | sanity check in re-login [chars] to [chars] | A software or hardware error occurred. | aaa | "Copy the error message exactly as it appears and report it to your " "technical support representative." |
| AAAA-3-SGDUPFREE | 3-Error | Duplicate free of server group 0x[hec] | This is an internal software error. | aaa | LOG_STD_ACTION |
| AAAA-3-STRCREATE | 3-Error | str_create overwrote its internal buffer. | An internal buffer used to assemble a string was exceeded thus possibly corrupting other memory. | aaa | LOG_STD_ACTION |
| AAAA-3-SUBTYPE | 3-Error | Bad Subtype [dec] for \[chars]\ [dec] | An internal software error. | aaa | "Report to tac@cisco.com." |
| AAAA-3-TIMERNOPER | 3-Error | AAA/ACCT/TIMER: No periodic update but timer set. | We are trying to free a timer but the update method is not PERIODIC and so no timer should exist. | aaa | LOG_STD_ACTION |
| AAAA-4-BADMETHNAME | 4-Warning | Bad [chars] method-list name \[chars]\ this is only a warning | A method-list name should not be the same as a method name. Please choose a different name for the method list. | aaa | "Pick a different method-list name that is not also a method-name." |
| AAAA-4-BADMETHNAME | 4-Warning | Bad [chars] method-list name \[chars]\ please choose another name | A method-list name should not be the same as a method name. Please choose a different name for the method list. | aaa | "Pick a different method-list name that is not also a method-name." |
| AAAA-4-BADSGNAME | 4-Warning | Bad server-group name [chars] type [chars]. | The given server-group name either doesn't exist or the given type does not match the defined server-group. | aaa | "Verify that the group exists and has the same " "type." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| AAAA-4-BADSGTYPE | 4-Warning | Server-group [chars] is not of type [chars]. | The given server-group name does not match the specified type | aaa | "Verify that the group exists and has " "the same type." |
| AAAA-4-CLI_DEPRECATED | 4-Warning | [chars] | CLI deprecated. New CLI to be used | aaa | LOG_STD_ACTION |
| AAAA-4-DNISGPUNDEF | 4-Warning | Warning: DNIS group [chars] is not defined. | The DNIS group was used without defining it first. It should be defined before use. | aaa | "Define the DNIS group before using it." |

|---|---|---|---|---|---|
| ADJ-5-PARENT | 5-Notice | Midchain parent maintenance for [chars] - [chars] | A midchain adjacency failed to stack onto output chain because a loop was detected. Traffic through the adjacency will be dropped until the adj is restacked. This condition is typically transient and is rectified by the control plane driving stacking. E.g. if an ip tunnel destination resolves through the tunnel transiently this message would appear. The situation would be rectified either by learning the tunnel destination through an interface other than the tunnel itself or by bringing the tunnel down. Monitor 'show adjacency internal' to determine if the problem has been resolved. | - | LOG_STD_NO_ACTION |
| ADJ-5-RESOLVE_REQ_FAIL | 5-Notice | Adj resolve request failed for [chars] on [chars] | The source e.g. ARP or ND could not resolve the address. | - | LOG_STD_ACTION |

| AMDP2_FE-6-EXCESSCOLL | 6-Information | [chars] TDR=[dec] TRC=[dec] | Ethernet/Fast Ethernet is seeing multiple collisions. This may occur under heavy loads. | pas-ethernet | "The system should recover. No action is " "required." |
| AMT-2-ADD_GATEWAY | 2-Critical | Error adding new Gateway | Can't get memory for a new Gateway [chars] port [dec] | - | LOG_STD_NO_ACTION |
| AMT-2-GATEWAY_INIT | 2-Critical | Error initializing AMT Gateway | Insufficient memory is available to initialize Gateway | - | LOG_STD_SH_TECH_ACTION |
| AMT-2-MSGTYPE_ERR | 2-Critical | [chars] AMT message with invalid type [dec] | AMT type is not 1-7 | - | LOG_STD_NO_ACTION |
| AMT-2-PROCESS_ERR | 2-Critical | Error initializing AMT process | Can't start the AMT process | - | LOG_STD_NO_ACTION |
| AMT-2-RELAY_INIT | 2-Critical | Error initializing AMT Relay | Insufficient memory is available to initialize Relay | - | LOG_STD_SH_TECH_ACTION |
| AMT-2-RPT_WAVL_INIT | 2-Critical | Error initializing IGMP Unsolicited Report handler | Insufficient memory is available to initialize the IGMP \n\ Unsolicited Report handler. | - | LOG_STD_SH_TECH_ACTION |
| AN-3-ACP_CHANNEL_CONN_FAILED | 3-Error | Failed to create ACP [chars] from Device Addr [chars] | Autonomic Network Control Plane Channel has not been created to the neighbor | AN | LOG_STD_NO_ACTION |
| AN-3-ACP_IKE_CONN_FAILED | 3-Error | Failed to create DIKE on ACP [chars] from Device Addr [chars] | Autonomic Network Control plane - Failed to create DIKE tunnel to neighbor | AN | LOG_STD_NO_ACTION |
| AN-3-ACP_IPSEC_CONN_FAILED | 3-Error | Failed to create IPSEC on ACP from device Addr [chars] | Autonomic Network Control plane - Failed to create IPSEC tunnel to neighbor | AN | LOG_STD_NO_ACTION |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| AN-3-ACP_VRF_GLOBAL_CREATE_FAIL | 3-Error | Device UDI [chars] failed to create | Autonomic network VRF has not been created globally | AN | LOG_STD_NO_ACTION |
| AN-3-ACP_VRF_INTERFACE_CREATE_FAIL | 3-Error | Device UDI [chars] failed to create Autonomic VRF | Autonomic network VRF has not been created on the interface | AN | LOG_STD_NO_ACTION |
| AN-3-ANR_WHITELIST_FILE_ERROR | 3-Error | Autonomic Registrar with Addr [chars] encountered error in | The autonomic registeration authority encountered file error when reading from whitelist file check the file name and its contents | AN | LOG_STD_NO_ACTION |
| AN-3-DOMAIN_KEY_GEN_FAIL | 3-Error | The bootstrapping device with key label [chars] | The key pair generation failed at the device for triggering BS request message to Autonomic registrar. Can be due to failure in RSA key pair generation in the crypto library | AN | LOG_STD_NO_ACTION |
| AN-3-IDP_INTENT_FILE_ERROR | 3-Error | Device Addr [chars] encountered error [chars] when reading from | The Intent Distribution Protocol Module encountered file error when reading from intent file check the file name and its contents | AN | LOG_STD_NO_ACTION |
| AN-3-MSG_INVALID_HEADER | 3-Error | Invalid message header type [dec] received | The message packet header got corrupted and invalid header received | AN | LOG_STD_NO_ACTION |
| AN-3-NBR_DOMAIN_CERT_EXPIRED | 3-Error | Domain certificate of Neighbor with Addr [chars] connected on interface [chars] has expired | The domain certificate of the neighbor device has expired | AN | LOG_STD_NO_ACTION |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| AN-3-NBR_DOMAIN_CERT_INVALID | 3-Error | Domain certificate of Neighbor with Addr [chars] connected on interface [chars] is invalid | The domain certificate of the neighbor device is invalid | AN | LOG_STD_NO_ACTION |
| AN-3-NBR_DOMAIN_CERT_REVOKED | 3-Error | Domain certificate of Neighbor with Addr [chars] connected on interface [chars] is revoked | The domain certificate of the neighbor device has been revoked | AN | LOG_STD_NO_ACTION |
| AN-3-TLV_PARSE_ALIGN_ERROR | 3-Error | TLV parsed Len [dec] Next TLV could be misaligned | Parsed TLV message is not a multiple of 4 and the next TLV message can be misaligned | AN | LOG_STD_NO_ACTION |
| AN-3-TLV_PARSE_LEN_INCORRECT | 3-Error | TLV parsed len [dec] > original message length [dec] | Parsed TLV message length is greater than original message length | AN | LOG_STD_NO_ACTION |
| AN-4-ANR_SGN_VERIFY_FAIL | 4-Warning | Device UDI [chars] signature verification of Autonomic registrar | The new device joining the network verified the signature of autonomic registrar as a part of mutual authentication and the verification failed | AN | LOG_STD_NO_ACTION |
| AN-4-ANR_UDI_ALREADY_REGISTERED_BY_ANR | 4-Warning | Device with UDI [chars] connected to Proxy Addr [chars] on interface [chars] is already registered by | The autonomic network registration authority will not allow this device to join as it already registered with a different public key | AN | LOG_STD_NO_ACTION |
| AN-4-DEVICE_NOT_IN_WHITELIST | 4-Warning | Device with UDI [chars] | The autonomic network registration authority will not allow this device to join as it is not in whitelist | AN | LOG_STD_NO_ACTION |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| AN-4-MASA_AUDIT_LOG_FAIL | 4-Warning | Device with udi [chars] is not in the audit log of MASA | The manufacturer authorised signing authority audit log doesnt contain this device in its database | AN | LOG_STD_NO_ACTION |
| AN-4-MASA_AUTH_FAIL | 4-Warning | Device with udi [chars] is not authorized by MASA | The MASA - manufacturer authorised signing authority has not authorised this device in its network | AN | LOG_STD_NO_ACTION |
| AN-4-MASA_AUTH_TOKEN_PARSE_ERROR | 4-Warning | Error while parsing authentication token from MASA server for device udi-[chars] | Encountered error while parsing the authentication token response string from MASA server | AN | LOG_STD_NO_ACTION |
| AN-5-ANR_DOWN | 5-Notice | Disabled autonomic registrar with Addr [chars] | The autonomic network registration authority functionality is disabled | AN | LOG_STD_NO_ACTION |
| AN-5-ANR_UP | 5-Notice | A New Autonomic Registrar has been configured in domain [chars] and it has been assigned IP Addr [chars] | The autonomic network registration authority has been confgiured and is locally up | AN | LOG_STD_NO_ACTION |
| AN-5-CD_STATE_CHANGED | 5-Notice | [chars] Channel [dec] [chars] - Our Intf [chars] | CD L2 or Reuse Channel Created/Removed/Expired | AN | LOG_STD_NO_ACTION |
| AN-5-DEVICE_BOOTSTRAPPED_BY_ANR | 5-Notice | Device with UDI [chars] and Addr [chars] has been boot strapped by autonomic registrar in autonomic domain [chars] | The autonomic network registration authority has bootstrapped this device | AN | LOG_STD_NO_ACTION |
| AN-5-INTENT_VER_OLD_DISCARD | 5-Notice | Device Addr [chars] discarded the older intent version [dec] | The device received an old intent file by Intent Distribution Protocol and is discarding it | AN | LOG_STD_NO_ACTION |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| AN-5-INTENT_VERSION_UPDATED | 5-Notice | Device Addr [chars] updated to a new Intent version [dec] | The device received a new intent file by Intent Distribution Protocol | AN | LOG_STD_NO_ACTION |
| AN-5-NBR_ADDED | 5-Notice | Device with UDI [chars] is added as a Neighbor to Device with Addr [chars] on the interface [chars] | A hello message is received and the device is added in the neighbor table | AN | LOG_STD_NO_ACTION |
| AN-5-NBR_IN_DOMAIN | 5-Notice | Neighbor with Addr [chars] connected via interface [chars] to device Addr [chars] is brought inside my domain [chars] | The device has been admitted into the autonomic domain | AN | LOG_STD_NO_ACTION |
| AN-5-NBR_LOST | 5-Notice | Device with ACP Addr [chars] lost connectivity to its Neighbor Addr [chars] on interface [chars] | Lost connectivity to the neighboring device & it is no longer part of autonomic domain | AN | LOG_STD_NO_ACTION |
| AN-5-NBR_OUT_DOMAIN | 5-Notice | Neighbor with Addr [chars] connected via interface [chars] | The device is removed from the autonomic domain it can happen if the domain certificate is NULL or if the domain certificate is invalid | AN | LOG_STD_NO_ACTION |
| AN-5-SERVICE_LEARNT | 5-Notice | Device with Addr [chars] learnt Autonomic service with Service Type [dec] Service IP Addr [chars] | - | - | - |
| AN-6-ACP_CHANNEL_NBR_CREATED | 6-Information | Established ACP [chars] from Device Addr [chars] to | Autonomic Network Control plane Channel has been created to the neighbor | AN | LOG_STD_NO_ACTION |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| AN-6-ACP_CHANNEL_NBR_REMOVED | 6-Information | Removed ACP [chars] from Device Addr [chars] to | Autonomic Network Control Plane Channel to neighbor is removed | AN | LOG_STD_NO_ACTION |
| AN-6-ACP_IKE_TUNNEL_NBR_CREATED | 6-Information | Established DIKE on ACP [chars] from Device Addr [chars] | Autonomic Network Control plane - DIKE tunnel established to neighbor | AN | LOG_STD_NO_ACTION |
| AN-6-ACP_IKE_TUNNEL_NBR_REMOVED | 6-Information | Removed DIKE on ACP [chars] from Device Addr [chars] | Autonomic Network Control plane - DIKE tunnel to neighbor is removed | AN | LOG_STD_NO_ACTION |
| AN-6-ACP_IPSEC_TUNNEL_NBR_CREATED | 6-Information | Established IPSEC on ACP from Device Addr [chars] | Autonomic Network Control plane - IPSEC tunnel established to neighbor | AN | LOG_STD_NO_ACTION |
| AN-6-ACP_IPSEC_TUNNEL_NBR_REMOVED | 6-Information | Removed IPSEC on ACP from Device Addr [chars] to | Autonomic Network Control plane - IPSEC tunnel to neighbor is removed | AN | LOG_STD_NO_ACTION |
| AN-6-ACP_ROUTING_GLOBAL_DISABLE | 6-Information | Removed OSPFv3 routing globally pid [dec] | OSPF routing has been disabled globally | AN | LOG_STD_NO_ACTION |
| AN-6-ACP_ROUTING_GLOBAL_ENABLED | 6-Information | Enabled global OSPFv3 pid [dec]rid %iarea [dec] | OSPF routing has been enabled globally | AN | LOG_STD_NO_ACTION |
| AN-6-ACP_ROUTING_INTF_ENABLED | 6-Information | OSPF routing enabled on interface: [chars] pid [dec]rid %i area [dec] | OSPF routing has been enabled on all physical interface | AN | LOG_STD_NO_ACTION |
| AN-6-ACP_VRF_GLOBAL_CREATE_SUCCESS | 6-Information | Device UDI [chars] Autonomic VRF | Autonomic network VRF has been created globally | AN | LOG_STD_NO_ACTION |
| AN-6-ACP_VRF_GLOBAL_REMOVE | 6-Information | Device UDI [chars] Autonomic VRF | Autonomic network VRF has been removed globally | AN | LOG_STD_NO_ACTION |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| AN-6-AUTONOMIC_VRF_CREATE_SUCCESS | 6-Information | Device UDI [chars] | Autonomic network VRF has been created on the interface | AN | LOG_STD_NO_ACTION |
| AN-6-AN_DISABLED_BY_CONSOLE_INPUT | 6-Information | Autonomic disabled due to User intervention on console. configure 'autonomic' to enable it. | User entered into configuration mode So AN is disabled An process is stopped | AN | LOG_STD_NO_ACTION |
| AN-6-AN_DISABLED_BY_NEW_CONFIG_DETECTED | 6-Information | Autonomic disabled due to detection of new configuration. | Some other process configures something. So AN is disabled An process is stopped | AN | LOG_STD_NO_ACTION |
| AN-6-AN_DISABLED_BY_NO_AUTONOMIC | 6-Information | Autonomic disabled due to 'no autonomic' command. | 'No autonomic' command is entered So AN is disabled An process is stopped | AN | LOG_STD_NO_ACTION |
| AN-6-ANR_WHITELIST_CONFIG | 6-Information | Autonomic registrar with Addr [chars] Domain id [chars] has whitelist- will allow only these devices in autonomic network | The autonomic registeration authority has been configured with white list and will allow only these devices to enter its network | AN | LOG_STD_NO_ACTION |
| AN-6-ANR_WHITELIST_NOT_CONFIG | 6-Information | Autonomic registrar with Addr [chars] has no whitelist- will allow all devices | The autonomic registeration authority has not been configured with white list and will allow all devices to enter its network | AN | LOG_STD_NO_ACTION |
| AN-6-CONFIG_DOWNLOAD_FAILED | 6-Information | Config download on the Device Addr [chars] has FAILED | Failed to download the config file to the Running config | AN | LOG_STD_NO_ACTION |
| AN-6-CONFIG_DOWNLOAD_STARTED | 6-Information | Config download started on the Device Addr [chars] | Config download is triggerred | AN | LOG_STD_NO_ACTION |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| AN-6-CONFIG_DOWNLOAD_SUCCESS | 6-Information | Config download at the Device Addr [chars] | Download of the config file to the Running config is Successful | AN | LOG_STD_NO_ACTION |
| AN-6-CONFIG_SAVE | 6-Information | Issuing 'write memory' to save config | Saving configurations to startup-config by AN process | AN | LOG_STD_NO_ACTION |
| AN-6-DEVICE_ALLOWED_BY_ANR | 6-Information | Device with udi [chars] is allowed by autonomic registrar in its Domain ID [chars] with addr [chars] and Device ID [chars] | The autonomic network registration authority has authorised this device to enter its network | AN | LOG_STD_NO_ACTION |
| AN-6-DEVICE_ENROLLED | 6-Information | Device with UDI [chars] connected to Proxy Addr [chars] on the interface [chars] is allowed by Autonomic registrar Addr [chars] | The autonomic network registration authority has enrolled this device | AN | LOG_STD_NO_ACTION |
| AN-6-MASA_NOT_CONFIG | 6-Information | Autonomic registrar with udi [chars] has no reachability to MASA -not configured Cant verify device udi [chars] | The manufacturer authorised signing authority has not been configured cannot do the verification of device | AN | LOG_STD_NO_ACTION |
| AN-6-MY_DOMAIN_CERT_EXPIRED | 6-Information | Domain certificate of this device Addr [chars] has expired | The domain certificate of this device has expired | AN | LOG_STD_NO_ACTION |
| AN-6-MY_DOMAIN_CERT_RENEWED | 6-Information | Domain certificate of device Addr [chars] has been renewed | The domain certificate of this device is renewed | AN | LOG_STD_NO_ACTION |
| AN-6-NBR_DOMAIN_CERT_VALID | 6-Information | Domain certificate of Neighbor with Addr [chars] | The domain certificate of the neighbor device is validated successfully | AN | LOG_STD_NO_ACTION |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| AN-6-SUDI_AVAILABLE | 6-Information | secure UDI - [chars] | Secure unique device identification number is available on the device | AN | LOG_STD_NO_ACTION |
| AN-6-UDI_AVAILABLE | 6-Information | UDI - [chars] | Unique device identification number is available on the device | AN | LOG_STD_NO_ACTION |

| APPNAV_CONTROLLER_SNG_AVAILABLE | 4-Warning | APPNAV-CONTROLLER: Alarm #30000 cleared. In SNG: [chars] AO: [dec] is available | Service node group is available for optimization | service-controller | "None. All is well" |
| APPNAV_CONTROLLER_SNG_AVAILABLE | 4-Warning | APPNAV-CONTROLLER: Alarm #30001 Cleared SNG: [chars] available | SN's in appnav node group is available for optimization. | service-controller | "None. All is well" |
| APPNAV_CONTROLLER_SN_VERSION_ALARM | 5-Notice | APPNAV-CONTROLLER: Alarm #29003 Severity: Minor | When an appnav controller detects upon that there are other appnav-controllers/SNs in the cluster with different ICIMP/DMP minor version number. | service-controller | "Check versions of SNs in network." |
| APPNAV_CONTROLLER_SN_VERSION_ALARM_CLEAR | 5-Notice | APPNAV-CONTROLLER: Alarm #29003 cleared | There are no appnav-controllers/SNs with different ICIMP/DMP minor version number | service-controller | "None. All is well" |
| APPNAV_CONTROLLER_REGISTRATION_SUCCESS | 6-Information | AppNav registered with Central Manager successfully | Received a registration success message from the Central Manager | service-controller | "None. All is well" |
| APS-1-NO_ACTIVE | 1-Alert | No Active Port In Group [chars] | After an active interface failure the system\n\ switches over to the standby interface if APS has\n\ been enabled. This message is posted if after a\n\ switchover the system finds no active interface\n\ i.e. both working and protection interfaces are\n\ found to be nonoperational. | - | "Isolate the cause of failure on both working\n\ and protection interfaces." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| APS-2-CHNLCFGMM | 2-Critical | Group [chars]: Channel Config Mismatch | Working and Protection interfaces do not point to the\n\ same path on local and remote network elements | - | "Configure working and protection interfaces\n\ to point to the same path on local and remote\n\ network elements" |
| APS-2-CHNLMISMATCH | 2-Critical | Group [chars]: Channel Mismatch - [chars] | - | - | "Check for any failures on the APS commnication\n\ channel. If APS communication channel is\n\ operational contact Cisco TAC." |
| APS-2-FEPF | 2-Critical | Group [chars]: Far End Prot Failure - [chars] | - | - | "Isolate the cause of failure on the protection\n\ channel on the remote network element." |
| APS-2-INITSYS | 2-Critical | [chars] | A software error occurred during initialization of\n\ the APS subsystem | - | "Check for sufficient processor memory." LOG_STD_ACTION |
| APS-2-INTRNLERR | 2-Critical | [chars] [dec] | APS software detected an internal error | - | LOG_STD_ACTION |
| APS-2-MODEMISMATCH | 2-Critical | Group [chars]: Mode Mismatch - [chars] | - | - | "Configure the remote APS group for\n\ bidirectional operation." |
| APS-2-NOSOCKET | 2-Critical | Failed To Open Socket | This message is posted when the APS subsystem fails\n\ to create a UDP socket for exchanging APS channel\n\ protocol messages over APS message channel configured\n\ for IP. This usually is due to a low memory condition\n\ in the system | - | LOG_STD_RECOVERY_ACTION |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| APS-2-PSBF | 2-Critical | Group [chars]: Prot Switch Byte Failure - [chars] | - | - | "Check for failures on the APS communication\n\ channel. Isolate the cause for such failures\n\ and restore the communication channel to\n\ working condition" |
| APS-3-PORT_FAIL | 3-Error | [chars] Port Fail On [chars] | This message is posted when APS subsystem receives\n\ a port fail indication from the driver subsystem.\n\ This message indicates that the specified interface\n\ has detected a failure condition\n\ e.g. Loss Of Light. | - | "Isolate the cause of the failure and restore\n\ the interface to normal operational\n\ condition." |
| APS-6-ADJUSTMODE | 6-Information | Group [chars]: Mode Mismatch - [chars] | This message is posted by the local network element\n\ if the local APS group has been configured for\n\ bidirectional operation but the associated remote\n\ APS group has been configured for unidirectional\n\ operation. This message is posted after the local\n\ network element detects the mismatch and changes\n\ the operation to unidirectional. | - | "Configure the remote APS group for\n\ bidirectional operation." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| APS-6-AUTOFOVER | 6-Information | Auto-Failover - Group [chars] | This message is posted if APS hardware\n\ successfully switched over to the standby interface\n\ after the failure of the active interface. This is\n\ informational only. | - | "Isolate the cause of failure of the previous\n\ active interface and restore it to a working\n\ condition." |
| APS-6-BIDIRSWCH | 6-Information | Group [chars]: Remote Request - [chars] | This message is posted by the local network element\n\ after an APS switchover that is triggered by an APS\n\ request from the remote network element. This is\n\ informational only. | - | LOG_STD_NO_ACTION |
| APS-6-CHNLACTIVE | 6-Information | Group [chars] - [chars] channel is now ACTIVE | This message is posted when a previously standby\n\ channel becomes the active channel. This is\n\ informational only. | - | LOG_STD_NO_ACTION |
| APS-6-DISAUTFOV | 6-Information | Disable Auto-Failover On [chars] | APS has disabled auto-failover for the indicated\n\ group | - | show aps group <name> |
| APS-6-ENAUTFOVR | 6-Information | Enable Auto-Failover On [chars] | This message is posted when APS software enables\n\ hardware to perform APS actions for failures\n\ detected by the hardware. This is informational\n\ only. | - | LOG_STD_NO_ACTION |
| ARAP-0-DEFAULT | 0-Emergency | TTY [dec] | An internal software error occured. | - | LOG_STD_SH_TECH_ACTION |
| ARAP-0-NOINULLRESEND | 0-Emergency | TTY [dec] | An internal software error occured. | - | LOG_STD_SH_TECH_ACTION |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| ARAP-0-NULLRESEND | 0-Emergency | TTY [dec] | An internal software error occured. | - | "Report this error to you technical support representative." |
| ARAP-0-VSERROR | 0-Emergency | TTY [dec]: VS queued error | An internal software error occured. | - | LOG_STD_SH_TECH_ACTION |
| ARAP-0-WAITBADMSG | 0-Emergency | TTY [dec]: arg msg bad [hec] | The router received an invalid packet during ARAP MNP4 connection\ setup phase. | - | "Check for excessive line noise.\ Check the ARAP client software configuration for\ possible problems." |
| ARAP-2-NOLOG | 2-Critical | TTY [dec]: Could not malloc log | Memory not available for internal MNP4 logging. | - | LOG_STD_SH_TECH_ACTION |
| ARAP-3-ABORTED | 3-Error | TTY [dec]: arap callback aborted | An unexpected message was received during the Microcom Networking\n\ Protocol version 4 MNP4 link setup. | - | LOG_STD_ACTION |
| ARAP-3-BADCONFIG | 3-Error | TTY [dec]: unhandled configuration command | A configuration command was not recognized. | - | "Check the configuration file on the server for any invalid\n\ configuration commands." |
| ARAP-3-BADPAK | 3-Error | TTY [dec]: Bad packet type in arap_send_msg | Internal data structures are corrupted. | - | "Check for abnormally high CPU usage." |
| ARAP-3-REMOTEERROR | 3-Error | TTY [dec]: arap input error | ARAP connection was terminated without a known cause. | - | LOG_STD_ACTION |
| ARAP-3-TIMEOUT | 3-Error | TTY [dec]: arap expected message timeout | The SCP process has been terminated. | - | "If this message recurs copy the error message exactly as it appears\n\ and report it to your technical support representative." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| ARAP-4-CONFAILED | 4-Warning | TTY [dec]: ARAP connection failed: [chars] | The ARA protocol client was denied access probably due to a\n\ configuration problem on the server. The error message should indicate\n\ the problem. This message does not indicate access denials due to bad\n\ passwords. | - | "Investigate the problem reported in the error message." |
| ARAP-4-NOEXTTACACS | 4-Warning | TTY [dec]: arap TACACS is configured but extended TACACS is not. | - | - | "Configure extended TACACS." |
| ARAP-5-INITCONFUSED | 5-Notice | TTY [dec]: ARAP unexpected initialization packet [chars] | The startup negotiation between a client and the ARA protocol server\n\ fell out of order. If this message is received sporadically it\n\ indicates line noise. | - | "If this message recurs reinstall the ARA client software." |
| ARAP-5-PAKINVALID | 5-Notice | TTY [dec]: ARAP invalid packet received | This message appears only when ARA protocol logging is configured. The\n\ message notes that an ARA protocol user has logged out. | - | LOG_STD_NO_ACTION |
| ARAP-6-BADEXIT | 6-Information | TTY [dec]: exited user [chars]: [chars] | A user was disconnected from ARA protocol at an unexpected time. The\n\ disconnection may be due to modems dropping server error client\n\ problems or any number of other difficulties. | - | "To determine the cause of the disconnection correlate the receipt of\n\ this message with the user problem reports." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| ARAP-6-LRPHASERROR | 6-Information | TTY [dec]: Received LT in CONNECTION PHASE | The router received an invalid packet during ARA connection setup\ phase. | - | "Check for excessive line noise.\ Check the ARAP client software configuration for\ possible problems." |
| ARAP-6-MAXRESENDS | 6-Information | TTY [dec] | The router resent MNP4 packets maximum number of times without\ receiving an acknowledgement. | - | "To determine the cause of the disconnection correlate the receipt of\n\ this message with the user problem reports." |
| ARAP-6-MNP4RCVDISC | 6-Information | TTY [dec]: MNP4 input disconnect | This indicates that the router received disconnect request\ from the remote Macintosh client. | - | LOG_STD_NO_ACTION |
| ARAP-6-MNP4T401 | 6-Information | TTY [dec]: T401 [dec] baud rate [dec] | This message indicates that the router received MNP4 connection\ request. MNP4 acknowledgement timer value is also indicated. | - | LOG_STD_NO_ACTION |
| ARAP-6-RCVGIANT | 6-Information | TTY [dec]: Rcv giant. dropping frame | The router received an oversized MNP4 frame. | - | "Check for excessive line noise.\ Check the ARAP client software configuration for\ possible problems." |
| ARAP-6-RCVNOPAK | 6-Information | TTY [dec]: Receive getbuffer failure. dropping frame | No buffer exists for an incoming packet. | - | "Examine buffer usage statistics. Possibly more memory is\ required." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| ARAP-6-RESENDSLOW | 6-Information | TTY [dec] | The router repeated resending of MNP4 packets as the\ Macintosh client failed to acknowledge previously resent packets. | - | "If this error message persists for several ARAP connections\ report it to your technical support representative." |
| ARAP-6-TIMERERROR | 6-Information | TTY [dec]: MNP4 timeout error | The router is dropping the connection after doing maximum resends. | - | "To determine the cause of the disconnection correlate the receipt of\n\ this message with the user problem reports." |
| ARAP-6-XTICKLE | 6-Information | TTY [dec]: exited user [chars]: Other side stopped answering ARAP tickles\ mnp4 pak resent [dec] mnp4 pak sent [dec] last [dec] now [dec] | The router disconnected as the remote Macintosh client stopped\ sending ARAP tickle or data packets. | - | "To determine the cause of the disconnection correlate the receipt of\n\ this message with the user problem reports." |
| ARCHIVE-4-CONFIG_ARCHIVE_DELETE_FAILED | 4-Warning | Delete of a previously saved archive of the router configuration could not be completed. | The router could not delete a file that was previously written. The file that was being deleted file contains an archive of the router configuration. This could occur for example if the file was manually deleted. | - | "None" |
| ARCHIVE-4-CONFIG_ARCHIVE_SKIPPED | 4-Warning | Archive of router configuration was skipped due to a previous initiation. | Only one archive can be created at a time. Two or more simultaneous archives in progress is not allowed. This could occur for example if two users attempt to create an archive simultaneouly. | - | "Retry the archive creation later when the previous archive has finished being written." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| ARCHIVE-6-REMOTE_WRITE_FAILED | 6-Information | Could not create an archive of the router configuration on the standby RP. | The router could not create an archive file on the standby RP. The file that was being created contains an archive of the router configuration. This could occur for example if the active RP cannot communicate with the standby RP. | - | "None" |
| ARCHIVE-6-REMOTE_DELETE_FAILED | 6-Information | Delete of a previously saved archive of the router configuration could not be completed on the standby RP. | The router could not delete a file that was previously written on the standby RP. The file that was being deleted file contains an archive of the router configuration. This could occur for example if the file was manually deleted. Alternatively the file could not be deleted when the active RP cannot communicate with the standby RP. | - | "None" |
| ARCHIVE-3-DIFF_CMD_INIT_FAILED | 3-Error | Failed to register the special case [chars] command:\[chars]\ during initialization. Config Diff and Rollback cannot be used as a result of this error. | An internal software error occurred during initialization - Config Diff and Rollback cannot be used as a result of this error. | - | "Copy the error message exactly as it appears. Copy down the system's " "configuration along with any other relevant information. Contact your " "technical support representative for assistance." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| ARCHIVE-3-DIFF_INIT_FAILED | 3-Error | Could not initialize the Config Diff and Rollback subsystem | An internal software error occurred during initialization. Config Diff and Rollback cannot be used as a result of this error. | - | "Copy the error message exactly as it appears. Copy down the system's " "configuration along with any other relevant information. Contact your " "technical support representative for assistance." |
| ARCHIVE-5-ROLLBACK_MD_BKUP | 5-Notice | Backing up current running config to [chars] | The current running config is saved so that when the timer expires if no confirmation has been received from user to confirm what they've configured the system will rollback to the saved config. | - | "This message DOES NOT denote any error condition. It is a part of the " "normal operation of the rollback confirmed change." |
| ARCHIVE-5-ROLLBACK_MD_CANCEL | 5-Notice | User: [chars]Priv: [dec] View: [dec]: Rollback Confirmed Change is cancelled due to [chars] failure | Rollback Confirmed Change is normally configured along with other configuration operations such as \config term\ or \config replace\. If those operation failed Rollback Confirmed Change should not be activated. | - | "Remove the error condition and try again later." |
| ARCHIVE-5-ROLLBACK_MD_CONFIRM | 5-Notice | User: [chars]: Confirm the configuration change | The configuration change is confirmed. The timer for rolling to the previously saved config is cancelled | - | "This message DOES NOT denote any error condition. It is a part of the " "normal operation of the rollback confirmed change." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| [illegible] | 5-Notice | User: [chars]: Reset Rollback Confirmed Change timerabsolute to %lu minute | Reset Rollback Confirmed Change timerabsolute to a new value | - | "This message DOES NOT denote any error condition. It is a part of the " "normal operation of the rollback confirmed change." |
| [illegible] | 5-Notice | User: [chars] Reset Rollback Confirmed Change timeridle to %lu minute | Reset Rollback Confirmed Change timeridle to a new value | - | "This message DOES NOT denote any error condition. It is a part of the " "normal operation of the rollback confirmed change." |
| [illegible] | 5-Notice | User: [chars]: Rollback immediately. | Rollback immediately and cancel the timer | - | "This message DOES NOT denote any error condition. It is a part of the " "normal operation of the rollback confirmed change." |
| [illegible] | 5-Notice | Failed to acquire configuration lock. Rollback did not start. Schedule to retry in 5 minutes | Failed to acquire configuration lock. Rollback did not start. In this case retry will be scheduled. | - | "This message DOES NOT denote any error condition. It is a part of the " "normal operation of the rollback confirmed change." |
| [illegible] | 5-Notice | Start rolling to: [chars] | The timer for Rollback Confirmed Change has expired. System will rollback to the previously saved config. | - | "This message DOES NOT denote any error condition. It is a part of the " "normal operation of the rollback confirmed change." |
| [illegible] | 5-Notice | User: [chars]Priv: [dec] View: [dec]: Scheduled to rollback to config [chars] in %lu minutes | The system will wait for the user to confirm that they wish to keep what they've configured until the timer expires. If the confirmation is not received in time the router will rollback. | - | "This message DOES NOT denote any error condition. It is a part of the " "normal operation of the rollback confirmed change." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| [illegible] | 5-Notice | User: [chars]Priv: [dec] View: [dec]: Scheduled to rollback to config [chars] if session has been idle for %lu minutes | The system will wait for the user to confirm that they wish to keep what they've configured until the timer expires. If the confirmation is not received in time the router will rollback. | - | "This message DOES NOT denote any error condition. It is a part of the " "normal operation of the rollback confirmed change." |
| [illegible] | 5-Notice | System will rollback to config [chars] in one minute. Enter \configure confirm\ if you wish to keep what you've configured | Rollback will start in one minute. User could enter \configure confirm\ if they wish to keep what they've configured. | - | "This message DOES NOT denote any error condition. It is a part of the " "normal operation of the rollback confirmed change." |
| [illegible] | 5-Notice | User [chars] on tty [dec] has been idle for %lu minutes. System will rollback to config [chars] in oneminute if it continues to be idle. Enter \configure confirm\ if you wish to keep what you've configured | Rollback will start in one minute. User could enter \configure confirm\ if they wish to keep what they've configured. | - | "This message DOES NOT denote any error condition. It is a part of the " "normal operation of the rollback confirmed change." |
| [illegible] | 2-Critical | Archive ISSU client failed to get buffer for message. Error: [dec] [chars] | The Archive ISSU client failed to get buffer space for building a negotiation message. A negotiation message cannot be sent to the standby device. If a problem occurs with the ISSU session negotiation the standby device cannot be brought up properly. | parser | "show logging and show checkpoint client" |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| ARCHIVE_ISSU-2-INIT | 2-Critical | Archive ISSU client initialization failed to [chars]. Error: [dec] [chars] | The Archive ISSU client could not be initialized. This initialization failure must be addressed before in-service software upgrade or downgrade can be performed successfully. If you do not address this failure there will be downtime during software upgrade or downgrade. | parser | LOG_STD_ACTION |
| ARCHIVE_ISSU-2-SEND_NEGO_FAILED | 2-Critical | Archive ISSU client failed to send negotiation message. Error: [dec] [chars] | The Archive ISSU client failed to send a session negotiation message to the peer device. If a problem occurs with the ISSU session negotiation the standby device cannot be brought up properly. | parser | "show logging and show checkpoint client" |
| ARCHIVE_ISSU-2-SESSION_NEGO_START | 2-Critical | Failed to start Archive ISSU session negotiation. Error: [dec] [chars] | The Archive ISSU client failed to start session negotition. If a problem occurs with the ISSU session start the standby device cannot be brought up properly. | parser | "show issu session <client_id>" |
| ARCHIVE_ISSU-2-SESSION_REGISTRY | 2-Critical | Archive ISSU client failed to register session information. Error: [dec] [chars] | The Archive ISSU client failed to register session information. If a problem occurs with the ISSU session registration the standby device cannot be brought up properly. | parser | "show issu capability entries <client_id> and " "show issu session <client_id> and " "show issu negotiated capability <session_id>" |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |

|---|---|---|---|---|---|
| AT-3-DOMLOOP | 3-Error | Loop detected on domain [dec] [[chars]] | The domain router detected a routing loop. Routing loops are not allowed. The domain router runs a background loop detection process. The domain router starts this process when it receives a new zone list from a domain that is identical to the list in the main routing table and whose network range length matches that in this list. The loop detection process sends several AppleTalk NBP loopback packets. When one of these packets is received on an interface that does not belong to the original domain the domain router first shuts off all the domains involved in the loop and then shuts off all the interfaces in these domains. The loop detection does not catch all types of loops. It is your responsibility to make sure that no loop exists. | atalk | "Disable the cause of the routing loop. Then use the clear appletalk " "command to restart the interfaces involved." |
| AT-3-DOMOVERFLOW | 3-Error | Remap range overflow for [chars] domain [dec] | The remap range overflowed. If a network range cannot fit inside the | atalk | "Use the appletalk domain remap-range command to increase the remapping " "range. Then restart the interfaces." |

| AUTO_IP_RING-5-IP_ADDR_POOL_EXHAUST | 5-Notice | Free IP addresses are not available in the Auto-IP Server pool. Configure additional pools to get IP addresses for the requesting | The Auto-IP server is configured with pools of Auto-IP addresses. The IP addresses are assigned to the requesting ring ports. The Auto-IP address pool is exhaused and there are no more free addresses. | auto_ip_ring | "Configure additional address pools in the" " Auto-IP server by using the configuration command" " 'auto-ip-ring server' and the sub command" " 'ipv4-address-pool <auto-ip-base-address> <num of nodes in ring>" |
| AUTO_IP_RING-5-IP_ADDR_SUCCESS | 5-Notice | IP address%i/31 is assigned to the ring port[chars] and | IP address is assigned to the ring port and the device is added to the ring successfully | auto_ip_ring | "Use the 'show auto-ip-ring' or 'show run' command" " on the device to view the configured IP address on the ring port." |
| AUTO_IP_RING-5-IP_ADDRS_SUCCESS | 5-Notice | IP addresses%i/31 %i/31 are assigned to the ring ports[chars] [chars] | IP addresses are assigned to the ring ports and the device is inserted into the ring successfully | auto_ip_ring | "Use the 'show auto-ip-ring' or 'show run' command" " on the device to view the configured IP addresses on the ring ports." |
| AUTO_IP_RING-5-IP_ADDR_SUCCESS_P | 5-Notice | IP address%i is assigned to the ring port[chars] successfully | IP address is assigned to the ring port successfully. | auto_ip_ring | "Use the 'sh ip interface' or 'show run' command" " to view the IP address of the ring port." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| AUTO_IP_RING-5-DUPLICATE_ADDRESS | 5-Notice | Neighbor device advertised the same configured Auto-IP address%i | Auto-IP Ring feature requires each device to configure a unique auto-ip address different from those on other devices. The local device is configured with an Auto-IP address. However the local device has also received the same Auto-IP address from a neighbor device. This may indicate that two devices are configured with the same Auto-IP address. | auto_ip_ring | "Use the 'show auto-ip-ring' or 'show run' command" " on both devices to view the configured Auto-IP address. If two edge" " devices show the same configured Auto-IP address then the duplicate" " configured Auto-IP address needs to be removed." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| AUTOIP_RING_EQUAL_AUTOIP_PRIORITY | 5-Notice | Port[chars]: Received the same priority[dec] as the peer device | Auto-IP Ring feature requires two neighbor devices to exchange different Auto-IP priority for IP auto-negotiation to happen. If they advertise the same Auto-IP priority then the IP auto-negotiation will not happen. This may indicate that the ring ports of the two devices are either wrongly wired or there is a missing seed configuration. | auto_ip_ring | "Use the 'show auto-ip-ring' or 'show run' command" " on both devices to view the IP addresses of the ring ports and the" " advertised/received Auto-IP priorities. If the Auto-IP priority is both 2" " or both 0 it represents a faulty wire connection that can be fixed by" " switching the two ring ports on one of the devices as necessary." " If the Auto-IP priority is both 1 there are two possibilities based on" " the mode. In pre-config mode manually configure an IP address on one" " device to start the Auto-IP negotiation. In auto-config mode if the" " Auto-IP server is reachable then configure 'auto-ip-ring <ring-d> seed'" " on one ring port of the device." |
| AUTOIP_RING_LLDP_NOT_ENABLE | 5-Notice | port [chars]: lldp not enabled for interface please enable lldp on | Auto-ip depends on lldp to communicate with it's peer. So configure lldp before auto-ip configuration | auto_ip_ring | "Configure 'lldp run' in global config mode and" " check 'sh lldp neighbors'" |

| CABLECLK-3-CONFIG_MISMATCH | 3-Error | Card type mismatch. config: [chars] is not consistent with the working mode in slot [dec] | | cmts-platform-infra | LOG_STD_ACTION |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| | | | There are several scenarios that the error message will be reported. Some cases can be recovered by CLC auto reloading. Eg. Kobal-R can work as 10GE or 100GE ifmod for DPIC-G2. If system reload with card pre-configured as DPIC-G2-10GE 'card <slot_num>/0 CBR-CCAP-LC-G2-R r-phy DPIC-G2-10GE' while .board.conf was saved as DPIC-G2 100GE mode and Kobal boot up before card precfg parsing. Some cases need to shut down the lc first then change the configuration or change the pic card Eg. if the card is pre-configured as RPHY with the command 'card <slot_num>/0 cBR-CCAP-LC-40G r-phy' but a rf-pic card was inserted to the same slot. Or the card is pre-configured as ICMTS with the command 'card <slot_num>/0 cBR-CCAP-LC-40G' but a dpic card was inserted to the same slot. Or DPIC type is pre-configured as DPIC-G2 with the command 'card | | |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| | | | <slot_num>/0 CBR-CCAP-LC-G2-R r-phy DPIC-G2-10GE' but a DPIC-G1 card was inserted to the same slot. Or DPIC type is pre-configured as DPIC-G1 with the command 'card <slot_num>/0 CBR-CCAP-LC-G2-R r-phy' but a DPIC-G2 card was inserted to the same slot. | | |
| CABLE_CI-3-UNSUPPORTED_DATA | 3-Error | Data conversion error [chars] 0x[hex] | An internal software error has occured when converting the data specified in the message from one representation to another. | DDTS_COMPONENT | LOG_STD_SH_TECH_ACTION |
| CABLE_CI-4-CI_LOG_PARSE_ERR | 4-Warning | Error parsing logger message: [chars] from subslot %u/%u | The carrier card passed down a logger message that could not be parsed. | cmts-platform-infra | LOG_STD_ACTION |
| CABLE_CI-4-CI_LOG_TOO_LONG | 4-Warning | Message too long from slot %u/%u: %u bytes | The carrier card passed down a logger message that is too long for\n\ the RP to handle. | cmts-platform-infra | LOG_STD_ACTION |
| CABLE_CI-4-LOGGER_MSG_TOO_BIG | 4-Warning | Logger message length %u bytes exceeds the maximum allowed size | The carrier card attempted to send a large message to the Route Processor | cmts-platform-infra | LOG_STD_ACTION |
| CABLE_CI-5-LOGGER_CI_REMOVED | 5-Notice | Carrier Card [dec] removed | The carrier card was removed | cmts-platform-infra | LOG_STD_NO_ACTION |

| CHKPT-3-SYSMGR_LOOKUP | 3-Error | Failed to get process Job ID from SysMgr | Failed to get the Job ID for this ION process from SysMgr. The | checkpoint | "show tech" |
| CHKPT-3-TIMER | 3-Error | [chars] | Checkpoint Facility was unable to retrieve the correct context for a previously saved message descriptor. This is most likely a software error caused by possible memory corruption. | checkpoint | LOG_STD_ACTION |
| CHKPT-3-TRANSMIT_FAILED | 3-Error | Checkpointing message transmission failure [chars] | - | - | - |
| CHKPT-3-UNKNOWNMSG | 3-Error | Unknown message received from peer on the standby for client [dec]. | This is a severe error as far as check pointing is concerned. This will be caused when one of the peers can some checkpoint message types that the other side does not understand. This is caused due to a software error as the set of messages being exchanged by either side must be the same. | checkpoint | LOG_STD_SH_TECH_ACTION |
| CHKPT-4-DISABLED | 4-Warning | Check Pointing is disabled. Client [chars] should not be calling any CF API | This is mainly a warning and might be due to timing issue | checkpoint | LOG_STD_SH_TECH_ACTION |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| CHKPT-4-DUPID | 4-Warning | Duplicate checkpoint client ID [dec]. | A checkpoint client is using a client ID which is already assigned to an another client. This could be due to a synchronization delay which will typically resolve itself. This would happen when an already registered Checkpointing Facility client again tries to add itself. | checkpoint | LOG_STD_SH_TECH_ACTION |
| CHKPT-4-FREE_BUFFER | 4-Warning | Checkpointing [dec] failed to free buffer | Checkpointing failed to free a buffer. This may cause leak in memory resources. | checkpoint | LOG_STD_SH_TECH_ACTION |
| CHKPT-4-GET_BUFFER | 4-Warning | Checkpointing ISSU failed to get buffer. Dest seat id 0x[hec] | Checkpointing ISSU failed to get a buffer. This is due to the dearth of memory resources. | checkpoint | "Upgrade the memory. If the error " "persists " LOG_STD_SH_TECH_ACTION |
| CHKPT-4-INIT | 4-Warning | Checkpoint [chars] initialization failed in RF state [chars] | Checkpointing initialization has failed This is software error caused by an out of memory condition as there aren't enough resources available to set up the initialization data structures | checkpoint | "Upgrade the memory. If the error " "persists " LOG_STD_ACTION |
| CHKPT-4-INVALID_CLIENT | 4-Warning | Invalid checkpoint client ID [dec]. | The client id is invalid. This error has occured since the corresponding client is not present. | checkpoint | LOG_STD_SH_TECH_ACTION |
| CHKPT-4-INVALID_ENTITY | 4-Warning | Invalid checkpoint entity ID [dec]. | The entity id is invalid. This error has occured since the corresponding entity is not present. | checkpoint | LOG_STD_SH_TECH_ACTION |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| CHKPT-4-MSG_SEND | 4-Warning | Checkpointing ISSU failed to send message. Dest seat id 0x[hec] | Checkpointing ISSU failed to send nego message to peer. This will be due to an out of memory condition communication with the peer being severed | checkpoint | LOG_STD_ACTION |
| CHKPT-4-NOCLIENT | 4-Warning | CF client is NULL [chars] | Checkpoint Facility cannot send the message as the client is NULL. | checkpoint | LOG_STD_ACTION |
| CHKPT-4-NOIPCPORT | 4-Warning | IPC port is NULL [chars] | Checkpoint Facility cannot send the message as the IPC port information is NULL. This message appears since since the communication session between the Checkpointing Facility peers has not yet been established. | checkpoint | LOG_STD_ACTION |
| CHKPT-4-NOMESSAGE | 4-Warning | Message is NULL [chars] | Checkpoint Facility cannot send the message as the message is NULL. | checkpoint | LOG_STD_ACTION |
| CHKPT-4-PAK_MGR_CONN | 4-Warning | Failed to connect to the Packet Manager | During Checkpoint initialization unable to create a connection to the Packet Manager. This could result in the CF infra unable to access shared memory in the client context using a virtual address. | checkpoint | LOG_STD_ACTION |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| CHKPT-4-PAK_RECLAIM | 4-Warning | Failed to reclaim packet from Packet Manager client [chars] | After the message send failed the CF client was unable to reclaim the packet to be able to free the message. | checkpoint | LOG_STD_ACTION |
| CHKPT-5-HIGHBUFFER | 5-Notice | Checkpoint client using Large No. of Buffers in domain [dec] are [chars] | Several IPC messages are pending to be processed by or delevered to | checkpoint | "show checkpoint statistics buffer-usage" |
| CHUNK-3-CHUNK_BAD_REFCNT | 3-Error | refcnt=[dec] data=0x[hec] | The memory chunk manager detected a bad reference count | cpp-ucode | LOG_STD_ACTION |
| CHUNK-3-INVALID_ELEM_SIZE | 3-Error | requested %u | Memory corruption was detected by the memory chunk manager | cpp-ucode | LOG_STD_ACTION |
| CHUNK-3-SIBLING_ERR | 3-Error | Tried to destroy sibling memory chunk 0x[hec] | An invalid sibling condition was hit in the Memory Chunk Manager | cpp-ucode | LOG_STD_ACTION |
| CI-1-BLOWSHUT | 1-Alert | Blower failure shutdown in [dec] seconds | One of the six blowers in a five-slot chassis has failed. Because each blower cools a separate region of the cards in the chassis all blowers are needed for router operation. If a blower failure persists for 2 minutes the router will shut itself down and will need to be power cycled. | - | LOG_STD_ACTION |
| CI-2-ENVCRIT | 2-Critical | [chars] measured at [chars] | One of the measured environmental test points exceeds an extreme threshold. | - | "Correct the specified condition or the router may shut itself down or fail to operate properly." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| CI-2-INT | 2-Critical | Unexpected interrupt - status %02x | An unexpected interrupt occurred. This is a serious software error which will be followed by a core dump. | - | LOG_STD_ACTION |
| CI-3-BLOWER | 3-Error | [chars] fan failure | One of the router's cooling fans failed. | - | "Replace the fan as soon as possible or the router may shut itself down or fail to operate properly." |
| CI-3-CTRLRTYPE | 3-Error | Wrong controller type %02x | The CI was manufactured incorrectly. | - | "Copy the error message exactly as it appears and report it to your technical support representative." |
| CI-3-NOACK | 3-Error | [chars] acknowledge failure cmd %02x addr %02x data %02x | The CI software failed to communicate with the CI hardware. | - | "Copy the error message exactly as it appears and report it to your technical support representative." |
| CI-3-PSFAIL | 3-Error | Power supply %u failure | One of the router's power supplies failed. | - | "Replace the failed power supply as soon as possible." |
| CI-3-SLOTCOMP | 3-Error | Inconsistent [chars] slot %02x | The CI software detected a possible inconsistency in the CI hardware. | - | "Confirm that the CI card is correctly and fully installed in the backplane. If error recurs call your technical support representative for assistance." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| CI-4-COND | 4-Warning | Restarting with %u recent soft power shutdowns\n\t\tor system just powered-on | A soft shutdown occurs when the router powers itself down due to a detected over temperature condition. When the temperature goes up past the board shutdown trip point the cards are shutdown but the power supplies fans and CI continue to run. <body><par>When the system cools past the restart trip point the system will restart. The system counts the number of times this happens to keep the up/down cycle from repeating indefinitely. If the above counter reaches zero the system undergoes a hard shutdown which requires a power cycle to recover. The soft shutdown counter is reset to its maximum value after the system has been up for six hours. | - | "Copy the error message exactly as it appears and report it to your technical support representative." |
| CI-4-ENVWARN | 4-Warning | [chars] measured at [chars] | One of the measured environmental test points exceeds the warning threshold. | - | "Closely monitor the condition and correct if possible. If the situation worsens call your technical support representative for assistance." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| CI-4-MAXOUTPUT | 4-Warning | Power supply %u [dec]V is at or near rated output | This indicates that the power supply is delivering its maximum rated current. This condition is not a problem unless the current continues to increase beyond the rated limit of the power supply which can cause hardware damage. | - | LOG_STD_ACTION |
| CI-4-NOTFOUND | 4-Warning | Chassis Interface not found | The system software could not detect the presence of a CI card. | - | "Verify that the CI card is correctly and fully installed in the backplane. If the error recurs call your technical support representative for assistance." |
| CI-4-SYSLOAD | 4-Warning | System [dec]V load exceeds single power supply %u capacity | This warning message indicates that the system's electrical current usage exceeds the capacity of a single power supply. During this condition power supplies must not be removed from the system. | - | - |
| CI-4-UNBALANCE | 4-Warning | Unbalanced [dec]V output from dual power supplies | The difference in electrical current output between the two power supplies is out of tolerance for the system design. One of the power supplies may be failing or about to fail. | - | LOG_STD_ACTION |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| CI-6-BPLANE | 6-Information | CI type %u differs from NVRAM type %u | The chassis type as reported by the CI is different from that programmed into NVRAM. | - | "Copy the error message exactly as it appears and report it to your technical support representative." |
| CI-6-PSCHANGE | 6-Information | Power supply %u changed from [chars] to [chars] | The CI reported that a power supply was either installed removed or changed. | - | "If the situation does not correspond with a physical change in the system's power supplies call your technical support representative for assistance." |
| CI-6-PSNORMAL | 6-Information | Power supply %u normal | One of the router's failed power supplies are working normal now. | - | "If the situation does not correspond with a normal operation of the system's power supplies call your technical support representative for assistance." |
| CIP-DUMP-CIP_CORE_DUMP_ERROR | 3-Error | CIP core dump error slot [dec]: [chars] | An error occured during a CIP core dump | - | "None." |

|---|---|---|---|---|---|
| CPPDRV-3-GUEST_CPU_FEATURE | 3-Error | CPP[dec]: Guest CPU lacks feature [chars]. | The currently installed Guest CPU lacks a certain feature that is required by the forwarding engine but that feature is supported by the Host CPU. The QFP is operating with normal functionality using the host CPU feature but live migration to a host which lacks this feature will result in a crash. | cpp-sw | LOG_STD_NO_ACTION |
| CPPDRV-3-HOT | 3-Error | [chars][dec] Interrupt : [chars] Seq:%03d repeating interrupt has been disabled. | A repeating hardware interrupt has been disabled. | cpp-sw | LOG_STD_NO_ACTION |
| CPPDRV-3-INIT_NOTF | 3-Error | Failed to initialize: [chars] | A function failed to initialize. | cpp-sw | LOG_STD_NO_ACTION |
| CPPDRV-3-INIT_NOTF_ID | 3-Error | CPP[dec]: Failed to initialize: [chars] | A function failed to initialize. | cpp-sw | LOG_STD_NO_ACTION |
| CPPDRV-3-LOCKDOWN | 3-Error | QFP%u.%u CPP Driver LOCKDOWN encountered due to previous fatal error [chars]: [chars]. | A fatal error has caused the driver to LOCKDOWN. | cpp-sw | LOG_STD_NO_ACTION |
| CPPDRV-3-LOCKDOWN_INITIATED | 3-Error | QFP%u.%u CPP Driver LOCKDOWN being triggered due to fatal error. | A fatal error has caused the process to initiate LOCKDOWN. | cpp-sw | LOG_STD_NO_ACTION |
| CPPDRV-3-SRT_PERR_FAILURE | 3-Error | [chars][dec] Failed to correct BQS SRT Parity error. | Failed to correct a BQS SRT Parity error. | cpp-sw | LOG_STD_NO_ACTION |
| CPPDRV-3-TCAM_PERR | 3-Error | [chars][dec] TCAM Parity error TCAM device #[dec] at offset 0x%08X. | A Parity error has occurred in a TCAM device. | cpp-sw | LOG_STD_NO_ACTION |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| CPPDRV-3-TCAM_PERR_FAILURE | 3-Error | [chars][dec] Failed to correct TCAM Parity error. Parity error detection disabled. | Failed to correct a TCAM Parity error and further detection has been disabled. | cpp-sw | LOG_STD_NO_ACTION |
| CPPDRV-4-ADRSPC_LIMIT | 4-Warning | Address space limit %u KB reached mapping block [chars] size %u dynamically over limit space: %u KB | The process indicated tried to map more of the Forwarding Engine's address space than was allocated for it. A slower access method will be used instead. This will lower the performance of some operations which require accesses to the Forwarding Engine | cpp-sw | LOG_STD_SH_TECH_ACTION |
| CPPDRV-4-CORE_TABLE | 4-Warning | CPP[dec] specific core dump table '[chars]' not found using minimal fallback table '[chars]' instead | The QFP configuration found on this board did not match any of the tables which define which data has to be collected if a fatal error is detected. Instead a minimal table is used which covers most of the QFP registers. The QFP is fully operational. | cpp-sw | LOG_STD_SH_TECH_ACTION |
| CPPDRV-4-CPU_FEATURE | 4-Warning | CPP[dec]: CPU lacks feature [chars]. Performance may be sub-optimal. | The currently installed CPU lacks a certain feature that improve performance of the forwarding engine. The QFP is fully operational but may operate at a reduced capacity. | cpp-sw | LOG_STD_NO_ACTION |

|---|---|---|---|---|---|
| CRYPTO-4-IPSEC_CLEARTEXT | 4-Warning | Unencrypted traffic [chars] %i because crypto optional is configured | Cleartext traffic is passing through an interface that is configured for encryption. This traffic is accepted because the router has the CRYPTO IPSEC OPTIONAL ENABLE setting which allows such traffic. | ipsec | "If you did not intend to configure the crypto " "optional setting you should reconfigure the box " "to turn it off" |
| CRYPTO-4-IPSEC_ENABLE | 4-Warning | Security warning: crypto ipsec optional is configured | Currently the router has the CRYPTO IPSEC OPTIONAL ENABLE setting which allows data which normally would be encrypted to be sent in the clear. | ipsec | "If you did not intend to configure the crypto " "optional setting you should reconfigure the box to turn " "it off" |
| CRYPTO-4-IKMP_DEFAULT_POLICY_ACCEPTED | 4-Warning | IKE default policy was matched and is being used. | The default policy is being used because the local configured policies did not match with the peer's policies. | ipsec-isakmp | "To avoid using the default policy " "reconfigure the local policy to match " "with peer's policy" |
| CRYPTO-4-IKMP_NO_IKMODE_ATTR_ACCEPT | 4-Warning | encrypted connection attempted with a peer without the\n configured certificate attributes | An encrypting peer attempted to establish an IPSec session with an interface which it was not authorized for. Some might consider this a hostile event. | - | "Check if the peer should be authorized to connect with the" " IPSec connection. If he should be allowed it may be a" " configuration issue. Otherwise you should contact the" " peer's administrator." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| CRYPTO-4-IKMP_BAD_MESSAGE | 4-Warning | IKE message from [chars] failed its sanity check or is malformed | A quick sanity check is done on all received ISAKMP messages to verify that all component payload types are valid and that the sum of their individual lengths equals the total length of the received message. This message failed the sanity check. Persistantly bad messages could be a denial of service attack or bad decryption. | - | "Contact the remote peer's administrator." |
| CRYPTO-4-IKMP_HASH_SIZE_EXCEEDED | 4-Warning | IKE hash size exceeded with peer at %i. | A hash operation required by the IKE protocol exceeded an internal limit. The IKE SA negotiation was rejected. That can happen if an inordinately large number of IKE policies were being proposed by the initiator | - | "Reduce the number of configured IKE policies." |
| CRYPTO-4-IKMP_INVALID_POLICY | 4-Warning | ISAKMP policy rsa-encr not supported by crypto HW accelerator [chars] | rsa-encr is not supported by Hifn based crypto HW accelerators | - | "Use ISAKMP policy rsa-sig" |
| CRYPTO-4-IKMP_SPI_LIMIT_MAX | 4-Warning | INV SPI RECOV LIMIT [dec] maxed [chars] [chars] [chars] | INVALID SPI RECOVERY SAs maximum limit has been reached. | - | "Possibly the local box reloaded." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| CRYPTO-4-IKMP_NO_SA | 4-Warning | IKE message from [chars] has no SA and is not an initialization offer | IKE maintains state for a communication in the form of security associations. No security association exists for this packet and it is not an initial offer from the peer to establish one. This situation could denote a denial of service attack. | - | "Contact the remote peer and/or his administrator" |
| CRYPTO-4-IKMP_PKT_OVERFLOW | 4-Warning | ISAKMP message from [chars] larger %ld than the UDP packet length %ld | - | - | - |
| CRYPTO-4-IPSEC_AAA_START_FAILURE | 4-Warning | IPSEC Accounting was unable to send start record | The AAA subsystem was unable to send the accounting start on behalf of IPSec. This could be due to the AAA Server being unreachable. | ipsec | "Ensure that the AAA server is reachable and enabled" "for accounting." |
| CRYPTO-4-IPSEC_AAA_STOP_FAILURE | 4-Warning | IPSEC Accounting was unable to send stop record | The AAA subsystem was unable to send the accounting stop on behalf of IPSec. This could be due to the AAA Server being unreachable. | ipsec | "Ensure that the AAA server is reachable and enabled" "for accounting." |
| CRYPTO-4-IPSEC_ENCMETHOD_NOTSUPPORTED | 4-Warning | Transform [chars] not valid under IPSec transform [chars] | Configured encryption algorithm not supported | - | "Specify a valid encryption algorithm for the ipsec transform" |
| CRYPTO-4-IPSEC_ENCMETHOD_NOTSUPPORTED_HW | 4-Warning | Transform [chars] will run with reduced performance because of IPSec transform [chars] | Configured encryption algorithm will not run on the hardware encryption card. The transform is still usable but will run with reduced performance. | - | "If you need to use the full performance of the encryption card " "specify another encryption algorithm for the ipsec transform" |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| [illegible] | 4-Warning | Transform [chars] not usable with IKE because of IPSec transform [chars] | Configured encryption algorithm not uable with IKE with current hardware configuration | - | "If you need to negotiate this with IKE specify a valid encryption " "algorithm for the ipsec transform" |
| [illegible] | 4-Warning | On-Token RSA keypairs from token [chars] and associated IPSEC sessions being deactivated now | On-Token Router RSA keypairs and associated IPSEC sessions are being deactivated because the token containing them was removed | pki | "Re-insert the crypto token" |
| CRYPTO-4-IKT_REPLAY_ERR | 4-Warning | [chars]\n \tconnection id=[dec] sequence number=%lu\n | Replay processing failed. This may be a temporary condition due to waiting for new SAs to be established. In the inbound case this may also be due to an actual replay attack. Some might consider this a hostile event. | - | "If the problem appears to be more than a transient one" " contact the peer's administrator." |
| [illegible] | 4-Warning | pcp: [dec] byte packet failed to decompress pcp: dest_addr=%i src_addr=%i | The received IPPCP packet failed to decompress. This may be due to a decompression buffer error. | - | LOG_STD_ACTION |
| [illegible] | 4-Warning | Rec'd packet has invalid cTCP wrapper protocol.\n \tcryptoflags = [hec] sa->udp_wrapper_support = [dec] transform = [hec] | Rec'd packet either cTCP encapsulated but is not correct negotiation transform. Or it expected an cTCP encapsulated packet but it received a non-cTCP packet. There may simply be a policy setup error on the peer. Some might consider this a hostile event. | - | "Contact the peer's administrator to compare policy settings." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| CRYPTO-4-RECVD_PKT_INV_IDENTITY | 4-Warning | [chars]\n \tip dest_addr= %i src_addr= %i prot= [dec]\n | Decapsulated IPSEC packet not maching negotiated identity The peer is sending other traffic through this SA. It may be due to an SA selection error by the peer. Some might consider this a hostile event. | - | "Contact the peer's administrator to compare policy settings." |
| CRYPTO-4-RECVD_PKT_INV_IDENTITY_ACL | 4-Warning | ipsec check access: identity not allowed by ACL\n \tip dest_addr= %i src_addr= %i prot= [dec]\n | After all is said and done the decaps packet fails the ACL check The peer is sending other traffic through this SA. It may be due to an SA selection error by the peer. Some might consider this a hostile event. | - | "Contact the peer's administrator to compare policy settings." |
| CRYPTO-4-RECVD_PKT_INV_PROT | 4-Warning | decapsulate: packet missing [chars] destadr=%i actual prot=[dec] | Rec'd IPSEC packet missing an expected AH or ESP header The peer is sending packets that don't match the negotiated security policy. Some might consider this a hostile event. | - | "Contact the peer's administrator." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| CRYPTO-4-RECVD_PKT_INV_SPI | 4-Warning | decaps: rec'd IPSEC packet has invalid spi for destaddr=[chars] prot=[dec] spi=0x[hec]%u srcaddr=[chars] | Rec'd IPSEC packet specifies SPI that doesn't exist in SADB. This may be a temporary condition due to slight differences in aging of SAs between the IPSEC peers or it may be because the local SAs have been cleared. It may also be because of bogus packets sent by the IPSEC peer. Some might consider this a hostile event. | - | "If the local SAs have been cleared the peer may not know" " this. In this case if a new connection is established" " from the local router the two peers may reestablish " " successfully. Otherwise if the problem occurs for more than " " a brief period either attempt to establish a new connection " " or contact the peer's administrator." |
| CRYPTO-4-RECVD_PKT_INV_UDP_WRAPPER | 4-Warning | Rec'd packet has invalid udp wrapper protocol.\n \tcryptoflags = [hec] sa->udp_wrapper_support = [dec] transform = [hec] | Rec'd packet either udp encapsulated but is not correct negotiation transform. Or it expected an udp encapsulated packet but it received a non-udp packet. There may simply be a policy setup error on the peer. Some might consider this a hostile event. | - | "Contact the peer's administrator to compare policy settings." |
| CRYPTO-4-RECVD_PKT_MAC_ERR | 4-Warning | decrypt: mac verify failed for connection id=[dec][chars] | MAC verify processing failed. This may be due to the use of the wrong key by either party during the MAC calculations. Some might consider this a hostile event. | - | "Contact the peer's administrator." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| CRYPTO-4-RECVD_PKT_MALFORMED | 4-Warning | decapsulate: packet has bad [chars] length destadr=%i prot=[dec] len=[dec] | Rec'd IPSEC packet is malformed: possibly encapsulation error? The peer is sending malformed packets. It may be due to a decryption error. Some might consider this a hostile event. | - | "Contact the peer's administrator." |
| CRYPTO-4-RECVD_PKT_NOT_IPSEC | 4-Warning | Rec'd packet not an IPSEC packet. ip vrf/dest_addr= [chars]/%i src_addr= %i prot= [dec] | Rec'd packet matched crypto map ACL but is not IPSEC-encapsulated. IPSEC Peer is sending unencapsulated packets. There may simply be a policy setup error on the peer. Some might consider this a hostile event. | - | "Contact the peer's administrator to compare policy settings." |
| CRYPTO-4-RECVD_PKT_NOT_IPSEC_V6 | 4-Warning | Rec'd packet not an IPSEC packet. ip vrf/dest_addr= [chars]/[chars] src_addr= [chars] prot= [dec] | - | - | - |
| CRYPTO-4-REM_CRYPTOMAP_TS | 4-Warning | \nPlease recheck your crypto map [chars]. | Transform set entry removed from crypto-map as it is no longer valid with hardware crypto engine enabled. | - | "Create and apply valid transform set to cryptomap" |
| CRYPTO-4-TOKEN_KEYS_DEACTIVATED | 4-Warning | RSA keypairs from token [chars] and associated IPSEC sessions being deactivated now | Router RSA keypairs and associated IPSEC sessions are being deactivated because the token containing them was removed | pki | "Re-insert the crypto token" |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| CRYPTO-4-TOKEN_KEY_TIMEOUT | 4-Warning | RSA keypairs for token [chars] and associated IPSEC sessions will be deactivated in [dec] seconds | Router RSA keypairs and associated IPSEC sessions will be deactivated when the timeout expires | pki | "Re-insert the crypto token before the timeout expires" |
| CRYPTO-4-TRANSFORM_NOT_SUPPORTED | 4-Warning | \nTransform [chars] is not supported with the current hardware configuration.\nGlobal transform [chars] will be deleted. | System configuration modified.Some ipsec transforms which were earlier valid with software crypto are no longer valid now after switching hardware crypto. | - | "Create valid transform sets & update cryptomaps" |

| DHCP_SNOOPING_ACL-3-ACL_INSTALL | 3-Error | Cannot install [chars] ACLs for DHCP Snooping probably no TCAM space | When DHCP Snooping is enabled ACLs need to be installed into the TCAM. This will fail if there is insufficient space in the TCAM. | firmware | "Reduce the number of input and/or output" "PACLs and/or VACLs to make space in the TCAM." |
| DHCP_SNOOPING_ACL-3-UNEXPECTED_EVENT | 3-Error | Process received unknown event major [hec] minor [hec]. | - | - | - |
| DHCP_SNOOPING_ISSU-2-BUFFER | 2-Critical | DHCP Snooping ISSU client failed to get buffer for message. Error: [dec] [chars] | The DHCP Snooping ISSU client failed to get buffer space for building a negotiation message. A negotiation message cannot be sent to the standby device. If a problem occurs with the ISSU session negotiation the standby device cannot be brought up properly. | dhcp-snooping | "show logging and show checkpoint client" |
| DHCP_SNOOPING_ISSU-2-INIT | 2-Critical | DHCP Snooping ISSU client initialization failed to [chars]. Error: [dec] [chars] | The DHCP Snooping ISSU client could not be initialized. This initialization failure must be addressed before in-service software upgrade or downgrade can be performed successfully. If you do not address this failure there will be downtime during software upgrade or downgrade. | dhcp-snooping | LOG_STD_ACTION |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| DHCP_SNOOPING_ISSU_SEND_NEGO_FAILED | 2-Critical | DHCP Snooping ISSU client failed to send negotiation message. Error: [dec] [chars] | The DHCP Snooping ISSU client failed to send a session negotiation message to the peer device. If a problem occurs with the ISSU session negotiation the standby device cannot be brought up properly. | dhcp-snooping | "show logging and show checkpoint client" |
| DHCP_SNOOPING_ISSU_NEGO_DONE_NOT_COMPATIBLE | 2-Critical | DHCP Snooping ISSU client encountered unexpected client nego_done. Error: [dec] [chars] | An ISSU-compliant client transitions through a series of internal states. The DHCP Snooping ISSU client encountered a 'client negotiation done' state that was unexpected. If a problem occurs with the ISSU session negotiation the standby device cannot be brought up properly. | dhcp-snooping | "show issu session <client_id> and " "show issu negotiated capability <session_id>" |
| DHCP_SNOOPING_ISSU_REGISTRY | 2-Critical | DHCP Snooping ISSU client failed to register session information. Error: [dec] [chars] | The DHCP Snooping ISSU client failed to register session information. If a problem occurs with the ISSU session registration the standby device cannot be brought up properly. | dhcp-snooping | "show issu capability entries <client_id> and " "show issu session <client_id> and " "show issu negotiated capability <session_id>" |
| DHCP_SNOOPING_ISSU_INVALID_SESSION | 3-Error | DHCP Snooping ISSU client does not have a valid registered session. | The DHCP Snooping ISSU client does not have a valid registered session. | dhcp-snooping | "show issu capability entries <client_id> and " "show issu session <client_id> and " "show issu negotiated capability <session_id>" |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| DHCP_SNOOPING_ISSU_MSG_NOT_OK | 3-Error | DHCP Snooping ISSU client 'Message Type [dec]' is not compatible | The DHCP Snooping ISSU client received an incompatible message from the peer device. The message cannot be processed. | dhcp-snooping | "show issu message group <client_id> and " "show issu session <client_id> and " "show issu negotiated version <session_id>" |
| DHCP_SNOOPING_ISSU_MSG_SIZE | 3-Error | DHCP Snooping ISSU client failed to get the MTU for Message Type [dec]. Error: [dec] [chars] | The DHCP Snooping ISSU client failed to calculate the MTU for the specified message. The DHCP Snooping ISSU client is not able to send the message to the standby device. | dhcp-snooping | "show issu message group <client_id> and " "show issu session <client_id> and " "show issu negotiated version <session_id>" |
| DHCP_SNOOPING_ISSU_UNREGISTRY | 3-Error | DHCP Snooping ISSU client failed to unregister session information. Error: [dec] [chars] | The DHCP Snooping ISSU client failed to unregister session information. | dhcp-snooping | "show issu session <client_id> and " "show issu negotiated capability <session_id>" |
| DHCP_SNOOPING_ISSU_TRANSFORM_FAIL | 3-Error | DHCP Snooping ISSU client [chars] transform failed for 'Message Type [dec]'. Error: [dec] [chars] | The DHCP Snooping ISSU client could not transform the specified message type. If the transmit transformation failed the checkpoint message was not sent to the standby device. If the receive transformation failed the checkpoint message was not applied on the standby device. In both cases the DHCP Snooping state between the active device and the standby device is not identical. | dhcp-snooping | "show issu session <client_id> and " "show issu negotiated version <session_id>" |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |

|---|---|---|---|---|---|
| FM-2-NOMAP | 2-Critical | Cannot create Feature Manager data structures for VLAN Map [chars] | The Feature Manager could not allocate the data structures needed to describe a VLAN Map in a form that can be loaded into hardware. Probably caused by lack of free memory. | firmware | LOG_STD_REDUCE_ACTION |
| FM-2-NOSB | 2-Critical | Cannot create subblock for interface [chars] | The Feature Manager was unable to save per-interface information needed for its correct operation. Some per-interface features such as access groups or VLAN maps will not be configured correctly. | firmware | "Use a less complicated configuration that " "requires less memory." |
| FM-2-NOVLB | 2-Critical | Cannot create memory block for VLAN [dec] | The Feature Manager was unable to save per-VLAN information needed for its correct operation. Some per-interface features such as access groups or VLAN maps will not be configured correctly. | firmware | "Use a less complicated configuration that " "requires less memory." |
| FM-2-NOVMR | 2-Critical | Cannot create VMR data structures for access list [chars] | The Feature Manager could not allocate the data structures needed to describe an ACL in a form that can be loaded into hardware. Probably caused by lack of available memory. | firmware | "Use a less complicated configuration that " "requires less memory." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| FM-3-AUGMENTFAIL | 3-Error | Augmenting of access-map [chars] on [chars] label [dec] failed | The system ran out of CPU memory when attempting to merge internally required elements with the configured access maps. | firmware | LOG_STD_REDUCE_ACTION |
| FM-3-CONFLICT | 3-Error | [chars] [chars] conflicts with [chars] | Port access lists PACLs may not be applied when input router access lists or VLAN maps have been applied and vice versa | firmware | "Remove the conflicting feature or features" |
| FM-3-GOTLABEL | 3-Error | Got label for [chars] | The Feature Manager has now been able to allocate a hardware label for the interface. The interface had needed a label before but none was available. | - | LOG_STD_NO_ACTION |
| FM-3-GOTVLABEL | 3-Error | Got label for VLAN #[dec] | The Feature Manager has now been able to allocate a hardware label for the VLAN. The VLAN had needed a label before but none was available. | - | LOG_STD_NO_ACTION |
| FM-3-ILLEGALCOPY | 3-Error | Illegal copy of [chars] access group [chars] from [chars] label [dec] to [dec] | An internal software error has occurred | firmware | "show running-config" |
| FM-3-INITLABEL | 3-Error | Special initialization of label [dec] failed | Initialization of the access list hardware failed. Prioritization of routing protocol packets above other kinds of packets may not occur on some VLANs or routed ports. | firmware | LOG_STD_ACTION |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| FM-3-INSERTFAIL | 3-Error | Insert of access-map [chars] #[dec] into [chars] label [dec] failed | The system ran out of CPU memory when trying to merge sections of an access map. | firmware | "Reduce other system activity to ease the memory demands. For example " "remove any ACLs that have been defined but are not now used. Use " "simpler ACLs with fewer access control entries ACEs. Use fewer " |
| FM-3-INTTABLE | 3-Error | Not in truth table: VLMAP [dec] RACL [dec] Rtprot [dec] Redir [dec] Mcb [dec] Feat [dec] | An unrecoverable software error occurred while trying to merge the configured input features. | firmware | "show running-config" |
| FM-3-LABELERROR | 3-Error | Incorrect label to [chars] vlan label attribute copy callback srclabel [dec] dstlabel [dec] | The Feature Manager attribute copy callback was called with an incorrect source or destination label. | firmware | "show running-config" |
| FM-3-MAXRECURSION | 3-Error | Too many [dec] levels of recursion while merging [chars] code [dec]. | The configuration is too complicated for the platform specific ACL merge code to support. Most likely cause is including too many separate access lists in a single VLAN map or policy map. | - | "Reduce the number IP or MAC access lists" " considered separately in any one VLAN or policy" |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| FM-3-MERGEFAIL | 3-Error | [chars] ACL merge error [dec] [chars] on [chars] label [dec] | The Feature Manager was unable to complete the merge of the configured features into a form suitable for loading into the hardware. Packets potentially affected by this feature will be sent to the CPU for processing instead. The most likely cause is specifying an ACL that is too large or too complex for the system to handle. | firmware | "Try specifying a smaller and less complicated " "configuration." |
| FM-3-NOLABEL | 3-Error | Cannot allocate [chars] label for interface [chars] | The Feature Manager was unable to allocate a label for the features on this interface. This means that the hardware cannot be programmed to implement the features and packets for this interface will be filtered in software. There is a limit of 256 labels per direction. | firmware | "Allocate more space to the relevant section " "of the TCAM and reboot or else use a simpler " "configuration. Use the same ACLs on multiple " "interfaces if possible." |
| FM-3-NOLABELVL | 3-Error | Cannot allocate [chars] label for VLAN [dec] | The Feature Manager was unable to allocate a label for the features on this VLAN. This means that the hardware cannot be programmed to implement the features and packets on this VLAN will be filtered in softtware. There is a limit of 256 labels per direction. | firmware | "Allocate more space to the relevant section " "of the TCAM and reboot or else use a simpler " "configuration. Use the same VLAN Maps on multiple " "VLANs if possible." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| FM-3-NOTEMPTY | 3-Error | Illegal copy of attribute to non empty [chars] vlan label [dec] | The Feature Manager attribute copy callback was called with a destination label already being used by a VLAN or routed port. | firmware | "show running-config" |
| FM-3-NOTOBJECT | 3-Error | Invalid object VLAN [dec] IDB [hec] used in Feature Manager operation | An internal software error has occurred | firmware | "show running-config" |
| FM-3-OUTTTABLE | 3-Error | Not in truth table: RACL [dec] VLMAP [dec] | An unrecoverable software error occurred while trying to merge the configured output features. | firmware | "show running-config" |
| FM-3-QOSTTABLE | 3-Error | Not in truth table: ACL [dec] in map action [dec] | A software error occurred while trying to merge a QoS Policy Map | firmware | "show running-config" |
| FM-3-RELOADED | 3-Error | Reloading [chars] label [dec] feature in [chars] | The Feature Manager was able to fit more of the configured features on this label into the hardware. One or more features had previously been unloaded because of lack of space. | - | LOG_STD_NO_ACTION |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| FM-3-TOSCOST | 3-Error | Minimize monetary cost TOS bit unsupported in hardware ignored | This hardware platform supports filtering based on DSCP rather than TOS and precedence. The DSCP field does not include the minimize monetary cost bit from the TOS field so hardware will ignore this bit when checking for a match to an ACE. This can lead to unintended filtering actions. | firmware | "Design filters that do not test for minimum " "monetary cost TOS." |
| FM-3-UNKNOWNACTION | 3-Error | Unknown VMR access group action 0x[hec] | An internal software error has occurred. | firmware | LOG_STD_ACTION |
| FM-3-UNLOADING | 3-Error | Unloading [chars] label [dec] feature from [chars] | The Feature Manager was unable to fit the complete configuration into the hardware so some features will have to be applied in software. This prevents some or all of the packets from being forwarded in hardware and requires them to be forwarded by the CPU. Multicast packets may be dropped entirely instead of being forwarded. | firmware | "Allocate more space to the relevant section " "of the TCAM and reboot or else use a simpler " "configuration. Use the same ACLs on multiple " "interfaces if possible." |
| FM-3-WRONGLABEL | 3-Error | Inconsistent records of label for [chars]: FM has [dec] LM has [dec] | An internal software error has occurred. | firmware | "show running-config" |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| FM-4-EXCESSSECONDARY | 4-Warning | More than [dec] secondary IP addresses configured on interface [chars] | When secondary IP addresses are configured on an interface the hardware is usually programmed so that the ICMP redirect functionality on the CPU is not notified of packets sent between two subnets configured on the same interface. If many secondary IP addresses are configured on the same interface it becomes impractical to program the hardware in this manner this message is logged and the CPU will be notified of every packet sent between two subnets on this interface. No ICMP redirects will be sent in error but the CPU usage may increase because of the additional notifications. The user may wish to configure \no ip redirects\ on the interface to reduce the CPU load on the system. | firmware | "configure the \"no ip redirects\" command on " "this interface" |
| FM-7-TRANSDEF | 7-Debug | No augmentation function found for VMR | An Internal Error occured. An Access Control List was not interpretted correctly. The Value-Mask Result is incorrect. | firmware | LOG_STD_ACTION |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| FMANRP_ACL-3-EXPOACLLIMITERR | 3-Error | Expanded OGACL [chars] size [dec] exceeded MAX ACL limit [dec] | Expanded OGACL size exceeded the maximum ACL limit. Command rejected | iosxe-acl | "Reduce # of ACEs in the ACL" |
| FMANRP_ACL-4-INVALIDV4ACETYPE | 4-Warning | v4 ACE type is invalid | An unexpected condition has occurred which is due to the type of v4 ACE\n\ created | iosxe-acl | "show ip access-list" |

|---|---|---|---|---|---|
| IDS-4-IP_IMPOSSIBLE_SIG | 4-Warning | Sig:1102:Impossible IP Packet - from %i to %i | This triggers when an IP packet arrives with source\n\ equal to destination address. This signature will\n\ catch the so-called Land Attack. | ids | "This should never occur in legitimate traffic." |
| IDS-4-IP_UNKNOWN_PROTO_SIG | 4-Warning | Sig:1101:Unknown IP Protocol - from %i to %i | Triggers when an IP datagram is received with the protocol\n\ field set to 101 or greater. The use of these protocol\n\ types is highly unusual and should be investigated. | ids | "Locally developed protocols that may use \n\these protocol types will trigger the signature. The use of these \n\protocol types is highly unusual and should be investigated. When \n\non-specific network traffic of this type is encountered the most \n\prudent action from a security perspective is to shun or disallow it.\n\If the source of this traffic is legitimate the user will then \n\identify him or herself." |
| IDS-4-IP_FRAG_ATTACK_SIG | 4-Warning | Sig:1100:IP Fragment Attack - from %i to %i | Triggers when any IP datagram is received with the\n\ 'more fragments' flag set to 1 or if there is an\n\ offset indicated in the offset field. | ids | "IP datagrams may be fragmented normally as they\n\are transported across the network. This is not uncommon but is \n\unusual enough that the traffic should be investigated. This is \n\especially important if the network is protected by a packet \n\filtering firewall." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| IDS-4-IPOPT_LSRR_SIG | 4-Warning | Sig:1004:IP options-Loose Source Route - from %i to %i | Triggers on receipt of an IP datagram where the IP option\n\ list for the datagram includes option 3 Loose Source \n\ Route. This option may be misused to defeat | ids | "While network troubleshooting may require the \n\legitimate use of this feature this type of traffic is rarely if ever \n\noted and should comprise much less than 1% of network traffic. Small \n\amounts of source routed traffic most probably indicates that a \n\network problem is being investigated. Large amounts of source \n\routed traffic is more suspicious and a thorough investigation of the \n\source and reason is indicated." |
| IDS-4-IPOPT_RR_SIG | 4-Warning | Sig:1001:IP options-Record Packet Route - from %i to %i | The IP options list contains one or more options that\n\ perform various network management or debugging tasks.\n\ This alarm may indicate a reconnaissance attack is in\n\ progress against your network. | ids | "While network troubleshooting may require \n\the legitimate use of this feature this is unusual traffic that warrants\n\investigation. When non-specific network traffic of this type is \n\encountered the most prudent action from a security perspective is \n\to shun or disallow it. If the source of this traffic is legitimate \n\the user will then identify him or herself." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| IDS-4-IPOPT_SATID_SIG | 4-Warning | Sig:1005:IP options-SATNET ID - from %i to %i | Triggers on receipt of an IP datagram where the IP\n\ option list for the datagram includes option 8 SATNET\n\ stream identifier. No known exploit exists. | ids | "This option is obsolete and should not be encountered. When\n\non-specific network traffic of this type is encountered the most \n\prudent action from a security perspective is to shun or disallow \n\it. If the source of this traffic is legitimate the user will then \n\identify him or herself." |
| IDS-4-IPOPT_SECURITY_SIG | 4-Warning | Sig:1003:IP options-Provide schtcc - from %i to %i | Triggers on receipt of an IP datagram where the IP option\n\ list for the datagram includes option 2. No known \n\ exploit exists. | ids | "This signature will trigger if you have \n\implemented IP security options on your network However this is \n\rarely if ever implemented . When non-specific network traffic \n\of this type is encountered the most prudent action from a security \n\perspective is to shun or disallow it. If the source of this traffic \n\is legitimate the user will then identify him or herself." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |

|---|---|---|---|---|---|
| IDS-4-TCP_FTP_SITE_SIG | 4-Warning | Sig:3150:FTP Remote Command Execution - from %i to %i | Triggers when someone tries to execute the FTP SITE command. | ids | "The FTP Site command allows a user to execute a limited\n\number of commands via the FTP server on the host machine. No authentication\n\is required to execute the command. The commands that may be executed vary\n\from system to system and on many systems the SITE command is not\n\implemented. Recommend that the SITE command be disabled on FTP servers if\n\possible. If this signature is triggered from a source outside of your\n\network prudent security practices would suggest that the source be shunned." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| IDS-4-TCP_FTP_SYST_SIG | 4-Warning | Sig:3151:FTP SYST Command Attempt - from %i to %i | Triggers when someone tries to execute the FTP SYST command. | ids | "The FTP SYST command returns the type of operating system\n\that the FTP server is running. Authentication is not required to execute\n\this command. SYST provides information that may be used to refine attack\n\methods. FTP from Linux causes SYST signature to fire. Some proxies such as\n\the TIS Toolkit issue the SYST command as a matter of course. Running an\n\FTP version with SYST disabled." |
| IDS-4-TCP_MAJORDOMO_EXEC_BUG | 4-Warning | Sig:3107:Majordomo Execute Attack - from %i to %i | A bug in the Majordomo program will allow remote users to\n\ execute arbitrary commands at the privilege level of the\n\ server. | ids | "Prudent security practices would suggest that the source of this \n\attempt be shunned." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| IDS-4-TCP_NO_FLAGS_SIG | 4-Warning | Sig:3040:TCP - No bits set in flags - from %i to %i | Triggers when a TCP packet is received with no bits set\n\ in the flags field. | ids | "There is no legitimate use for malformed TCP datagrams. This is \n\unusual traffic and warrants investigation. Hacker tools will generate\n\TCP packets with no bits set in the flags field in an attempt to elude\n\intrusion dection. When non-specific network traffic of this\n\type is encountered the most prudent action from a security perspective\n\is to shun or disallow it. If the source of this traffic is legitimate\n\the user will then identify him or herself." |
| IDS-4-TCP_SENDMAIL_BAD_FROM_SIG | 4-Warning | Sig:3102:Sendmail Invalid Sender - from %i to %i | - | ids | "For security reasons users should not be allowed to execute\n\programs via e-mail servers. This is a very serious indication that your\n\network may be under attack and the source should be shunned immediately." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| DS4KCPSENDMAIL_BADTOSG | 4-Warning | Sig:3101:Sendmail Invalid Recipient - from %i to %i | - | ids | "For security reasons users should not be allowed to execute\n\programs via e-mail servers. This is a very serious indication that your\n\network may be under attack and the source should be shunned immediately." |
| DS4KCPSENDMAIL_BOUNCESG | 4-Warning | Sig:3100:Smail Attack - from %i to %i | Triggers on the very common "smail" attack against e-mail\n\ servers. This attack attempts to cause e-mail servers to\n\ execute programs on the attacker's behalf. | ids | "For security reasons users should not be allowed to execute\n\programs via e-mail servers. This is a very serious indication that your\n\network may be under attack and the source should be shunned immediately. " |
| DS4KCPSENDMAIL_DECODE | 4-Warning | Sig:3105:Sendmail Decode Alias - from %i to %i | Triggers on any mail message with ": decode@" in the header.\n\ The decode alias is used to uudecode files and is primarily\n\ implemented as a convenience for system administration. | ids | "The decode alias is used to uudecode files and is primarily\n\implemented as a convenience for system administration. For security\n\purposes this should not be allowed and the service should be disabled. If\n\allowed users that mail to the alias will trigger this signature. Recommend\n\shunning of hosts that attempt to mail to this alias especially if they are\n\outside of your network." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| IDS_4_TCP_SENDMAIL_INVALID_COMMAND | 4-Warning | Invalid SMTP command - from %i to %i | Triggers on an invalid SMTP command in the \n\ SMTP connection. This message indicates that a suspicious violation \n\ was detetected that may be an attack to the mail server system. | ids | "This is unusual traffic and may warrant investigation." |
| IDS_4_TCP_SENDMAIL_OLD_SIG | 4-Warning | Sig:3104:Archaic Sendmail Attacks - from %i to %i | Triggers when "wiz" or "debug" commands are sent to the SMTP port. | ids | "There is no reason for this type of traffic to be seen on\n\modern networks. There is little chance that there will be any adverse\n\effects from someone attempting these "old" hacks. Prudent security\n\practices would suggest that the source of this attempt be shunned." |
| IDS_4_TCP_SENDMAIL_SPAM_SIG | 4-Warning | Sig:3106:Excessive Rcpt to: SPAM - from %i to %i | Parse for RCPT TO: in header. Alarm on threshold. | ids | "Some mailing list software may trigger this signature." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| IDS4IDPS-SENDMAIL_VRFY_SIG | 4-Warning | Sig:3103:Sendmail Reconnaissance - from %i to %i | Triggers when "expn" or "vrfy" commands are issued to\n\ the SMTP port. | ids | "These commands are commonly used to verify that a user mail\n\account exists on the server or to expand an alias to determine who the\n\actual recipients of a message may be. Users that use the EXPN and VRFY\n\functions for legitimate purposes will trigger this signature. The\n\information that can be obtained is useful but not dangerous on its own.\n\Monitoring of future traffic for patterns of misuse is recommended." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| IDS-4-TCP_SYN_ATTACK_SIG | 4-Warning | Sig:3050:Half-Open Syn Flood - from %i to %i | Triggers when the number of half-open TCP connections\n\ exceeds the high-water mark or the one minute high rate mark | ids | "There are no known sources that would legitimately generate\n\this traffic pattern. This may be indicative of some type of network problem\n\and should be investigated. To avoid depletion of your network resources it\n\is recommended that the source be shunned during the course of the\n\investigation. If no network problems are discovered prudent security\n\practices would suggest that the source be shunned permanently." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| IDS-4-TCP_SYN_FIN_SIG | 4-Warning | Sig:3041:TCP - SYN and FIN bits set - from %i to %i | Triggers when a TCP packet is received with both the SYN\n\ and FIN bits set in the flags field. | ids | "There is no legitimate use for malformed TCP datagrams. This is \n\unusual traffic and warrants investigation. Hacker tools will generate\n\TCP packets with the SYN and FIN bits set in the flags field in an \n\attempt to elude\n\intrusion dection. When non-specific network traffic of this\n\type is encountered the most prudent action from a security perspective\n\is to shun or disallow it. If the source of this traffic is legitimate\n\the user will then identify him or herself." |

| Facility-Severity-Mnemonic | Severity-Meaning | Message | Message-Explanation | Component | Recommended-Action |
|---|---|---|---|---|---|
| IDS-4-UDP_BOMB_SIG | 4-Warning | Sig:4050:UDP Bomb - from %i to %i | Triggers when the UDP length specified is less than the IP\n\ length specified. This malformed packet type is associated\n\ with a denial of service attempt. | ids | "There is no legitimate use for malformed datagrams. This\n\may be indicative of systems that are experiencing problems with their\n\kernel or NIC cards. This is unusual traffic and warrants investigation.\n\When non-specific network traffic of this type is encountered the most\n\prudent action from a security perspective is to shun or disallow it. If the\n\source of this traffic is legitimate the user will then identify him or\n\herself." |
| IDS-4-UDP_TFTP_PASSWD_SIG | 4-Warning | Sig:4100:Tftp Passwd File - from %i to %i | Triggered when someone tries to tftp a password file. | ids | "System administrators might use this service to update\n\system files. It is a high security risk if this is normal practice and\n\should be avoided. No other benign triggers exist for this signature. If\n\after investigation the alarm was not generated by a system administrator\n\prudent security practices would suggest that the source be shunned." |
