System Message Guide for Access and Edge Routers, Cisco IOS XE Bengaluru 17.5.x

Cisco System Messages Overview

This document describes system messages for Cisco software releases. During operation, the system software sends these messages to the console (and, optionally, to a logging server on another system) during operation. Not all system messages indicate problems with your system. Some are purely informational, and others may help diagnose problems with communications lines, internal hardware, or the system software.

How To Read System Error Messages

System error messages begin with a percent sign (%) and are structured as follows: `%FACILITY-SUBFACILITY-SEVERITY-MNEMONIC: Message-text`

- `FACILITY` is a code consisting of two or more uppercase letters that indicate the facility to which the message refers. A facility can be a hardware device, a protocol, or a module of the system software.
- `SEVERITY` is a single-digit code from 0 to 7 that reflects the severity of the condition. The lower the number, the more serious the situation. [Error Message Severity Levels](#) lists the severity levels.
- `MNEMONIC` is a code that uniquely identifies the error message.
- `Message-text` is a text string describing the condition. This portion of the message sometimes contains detailed information about the event, including terminal port numbers, network addresses, or addresses that correspond to locations in the system memory address space. Because the information in these variable fields changes from message to message, it is represented here by short strings enclosed in square brackets (`[]`). A decimal number, for example, is represented as `[dec]`. [Representation of Variable Fields in Error Messages](#) lists the representations of variable fields and the type of information in them.

The following is a sample system error message:

```
%LINK-2-BADVCALL: Interface [chars], undefined entry point
```

Some error messages also indicate the card and slot reporting the error. These error messages begin with a percent sign (%) and are structured as follows:

```
%CARD-SEVERITY-MSG: SLOT %FACILITY-SEVERITY-MNEMONIC: Message-text
```

- `CARD` is a code that describes the type of card reporting the error. `VIP` and `FEIP` are possible card types.
- `MSG` is a mnemonic that indicates that this is a message. It is always shown as `MSG`.
- `SLOT` indicates the slot number of the card reporting the error. It is shown as `SLOT` followed by a number (for example, `SLOT5`).

The prepended portion of the error message (`%CARD-SEVERITY-MSG: SLOT`) is not shown in the error message listings in this document.

Error Message Severity Levels

Error message severity levels correspond to the keywords assigned by the **logging** global configuration commands that define where and at what level these messages appear. The default is to log messages to the console at the debugging level (7). For more information, see the system configuration chapter and descriptions of the **logging** command in the configuration guide and command reference.

Level	Description
0 - emergency	System unusable
1 - alert	Immediate action needed
2 - critical	Critical condition
3 - error	Error condition
4 - warning	Warning condition
5 - notification	Normal, but significant, condition
6 - informational	Informational message only
7 - debugging	Appears during debugging only

Representation of Variable Fields in Error Messages

Representation	Type of Information
[atalk_address]	AppleTalk address
[atalk_net]	AppleTalk network, either 600 or 600-601
[char]	Single character
[chars]	Character string
[dec]	Decimal number
[enet]	Ethernet address (for example, 0000.FEED.00C0)
[hex]	Hexadecimal number
[inet]	Internet address (for example, 10.0.2.16)
[int]	Integer number
[node]	Address or node name
[sci_notation]	Scientific notation
[t-line]	Terminal line number in octal (or decimal if the decimal-TTY service is enabled)
[v-name]	VINES name; or number (hex or decimal)

Error Message Traceback Reports

Some messages describe internal errors and contain traceback information. This information is very important and should be included when you report a problem to your technical support representative.

The following sample message includes traceback information:

```
-Process= "Exec", level= 0, pid= 17 -Traceback= 1A82 1AB4 6378 A072 1054 1860
```

System Messages for Cisco IOS XE Bengaluru 17.5.x

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
PERF_MEASURE_CRITICAL	2-Critical	The Perf Measure protocol has encountered the critical error: [chars].	The protocol has run into a critical error. The reason should be given in the brackets.	perf-measure	LOG_STD_ACTION
PERF_MEASURE_INCOMPAT	4-Warning	\perf-measure-issu-compat returned FALSE	The compatibility checking has failed	perf-measure	LOG_STD_ACTION
PERF_MEASURE_TRANSFORM_FAIL	3-Error	PERF MEASURE ISSU client [chars] transform failed for 'Message Type [dec]'. Error: [dec] [chars]	The PERF MEASURE ISSU client could not transform the specified message type. If the transmit transformation failed the checkpoint message was not sent to the standby device. If the receive transformation failed the checkpoint message was not applied on the standby device. In both cases the PERF MEASURE state between the active device and the standby device is not identical.	perf-measure	"show issu session <client_id> and " "show issu negotiated version <session_id>"

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
PERF_MEASURE2_CTR	2-Critical	PERF MEASURE ISSU client failed to get buffer for message. Error: [dec] [chars]	The PERF MEASURE ISSU client failed to get buffer space for building a negotiation message. A negotiation message cannot be sent to the standby device. If a problem occurs with the ISSU session negotiation the standby device cannot be brought up properly.	perf-measure	"show logging and show checkpoint client"
PERF_MEASURE2_UNCSR	3-Error	PERF MEASURE ISSU client failed to unregister session information. Error: [dec] [chars]	The PERF MEASURE ISSU client failed to unregister session information.	perf-measure	"show issu session <client_id> and " "show issu negotiated capability <session_id>"
PERF_MEASURE2_INIT	2-Critical	PERF MEASURE ISSU client initialization failed to [chars]. Error: [dec] [chars]	The PERF MEASURE ISSU client could not be initialized. This initialization failure must be addressed before in-service software upgrade or downgrade can be performed successfully. If you do not address this failure there will be downtime during software upgrade or downgrade.	perf-measure	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
PERF_MEASURE_ISSU_CLIENT_FAILED	2-Critical	PERF MEASURE ISSU client failed to send negotiation message. Error: [dec] [chars]	The PERF MEASURE ISSU client failed to send a session negotiation message to the peer device. If a problem occurs with the ISSU session negotiation the standby device cannot be brought up properly.	perf-measure	"show logging and show checkpoint client"
PERF_MEASURE_ISSU_CLIENT_FAILED_TO_REGISTER_SESSION_INFORMATION	2-Critical	PERF MEASURE ISSU client failed to register session information. Error: [dec] [chars]	The PERF MEASURE ISSU client failed to register session information. If a problem occurs with the ISSU session registration the standby device cannot be brought up properly.	perf-measure	"show issu capability entries <client_id> and " "show issu session <client_id> and " "show issu negotiated capability <session_id>"
PERF_MEASURE_ISSU_CLIENT_INVALID_SESSION	3-Error	PERF MEASURE ISSU client does not have a valid registered session.	The PERF MEASURE ISSU client does not have a valid registered session.	perf-measure	"show issu capability entries <client_id> and " "show issu session <client_id> and " "show issu negotiated capability <session_id>"
PERF_MEASURE_ISSU_CLIENT_FAILED_TO_GET_MTU_FOR_MESSAGE_TYPE	3-Error	PERF MEASURE ISSU client failed to get the MTU for Message Type [dec]. Error: [dec] [chars]	The PERF MEASURE ISSU client failed to calculate the MTU for the specified message. The PERF MEASURE ISSU client is not able to send the message to the standby device.	perf-measure	"show issu message group <client_id> and " "show issu session <client_id> and " "show issu negotiated version <session_id>"

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
PERF MEASURE ISSU_NGO	2-Critical	PERF MEASURE ISSU client encountered unexpected client nego_done. Error: [dec] [chars]	An ISSU-compliant client transitions through a series of internal states. The PERF MEASURE ISSU client encountered a 'client negotiation done' state that was unexpected. If a problem occurs with the ISSU session negotiation the standby device cannot be brought up properly.	perf-measure	"show issu session <client_id> and " "show issu negotiated capability <session_id>"
IPX-2-RADIXINIT	2-Critical	Error Initializing novell path structure	A programming error has occurred	novell	"Please ensure that sufficient memory required to load this " "image is available in this device. If memory requirements " "are met then follow the succeeding procedure. " LOGSIDSHTTECHACION
IPX-3-BADPATHS	3-Error	Invalid number of paths [dec] for %q	An internal inconsistency was detected in the IPX routing table\n\ structure.	novell	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
IPX-3-BADRDBDATA	3-Error	Inconsistency in the [chars] LSP Linkage data structure detected.	An internal inconsistency was detected in the RDB or SRDB internal routing table structure. Specifically a data area used by NLSP to link LSPs.	novell	"Copy and save this message. If NLSP is not running this could mean there is a software or hardware problem which is corrupting memory. If the message recurs copy and save the messages and call your technical support representative for assistance."
IPX-3-BADIGRPSAP	3-Error	Cannot send incremental SAP update to peer on [chars]. Increasing output-sap-delay may help	An incremental SAP update could not be sent because this might cause the SAP tables between peers to become out of synch.	novell	"Increase the output SAP delay on the listed interface to reduce buffer usage. If after changing the delay the message remains copy the error message exactly as it appears and report it to your technical support representative."
IPX-3-BADIGRPSAPTYPE	3-Error	Unsupported SAP type for EIGRP being [chars] - type [hec]	-	novell	"Copy the error message exactly as it appears and report it to your technical support representative. If possible also provide the output of the <bold>debug ipx sap activity</bold> and <bold>debug ipx sap event</bold> commands for the period during which this message appeared."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
IPX-3-BADCOUNT	3-Error	Bad IPX server count. [chars] [dec] [chars] [dec]	The internal SAP service count does not match the number of services currently present and displayed by the <bold>show ipx servers <nobold>command.	novell	"If this message recurs report the problem to your technical support representative along with the output of the <bold>show ipx servers<nobold> command taken before the message appeared and again after the message appeared."
IPX-6-NOVACCESSLOG	6-Information	[chars] [chars] [chars] [chars] [hec].[enet] [chars] [hec].[enet] [dec] pkt[chars]	If IPX access violation logging is enabled these messages are displayed when an access list logging event has occurred.	novell	"Verify that the host system is permitted or denied as defined in the access list."
IPX-3-TOOMANYNETS	3-Error	Too many networks. The number of directly connected IPX networks cannot exceed [dec]	The limit of connected IPX networks has been reached. Additional IPX interfaces cannot be configured.	novell	"Do not configure IPX on additional interfaces. Remove IPX configuration commands from inactive interfaces."
IPX-3-BADINSERT	3-Error	Duplicate SAP entry insert attempted. [chars][chars] [chars]0x[hec] [chars]0x[hec] [chars][dec] [chars]0x[hec] [chars]0x[hec] [chars]0x[hec]	An IPX SAP service entry which is being added currently already exists in the current internal table.	novell	"Report the error messages and the tracebacks following them to your technical support representative."
IPX-3-BADHASHTABLE	3-Error	Consistency check failed for SAP table [dec].	An internal SAP table consistency check failed.	novell	"Copy the error message exactly as it appears and report it to your technical support representative."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
IPX-3-NOVNOSTART	3-Error	IPX Failed to Start due to insufficient memory	The Novell IPX routing subsystem failed to initialize properly\n\n due to memory allocation errors usually due to insufficient\n\n amount of available memory.	novell	"Free up memory look for a possible memory leak or upgrade the\n\n system to have more memory."
IPX-7-DEBUGMSG	7-Debug	[chars]: %08x %08x %08x %08x %08x %08x	Internal use only	novell	"Should not be seen in the field"
EHCIMPCONCIDS	3-Error	Service ID of received CC [chars] does not match local Service ID [chars].	For a given service within a domain the Service ID in the CC message should match the locally configured Service ID.	ethernet-cfm	"Verify that the service ID's are configured correctly using 'show ethernet cfm " "domain. "
EHCIMPCVLOCALMD	3-Error	MPID of CC matches local MPID.	The remote MPID matches a MPID configured locally for the service.	ethernet-cfm	"Either the local MPID or remote MPID should be changed as the MPID " " should be unique for a given service in a network"
EHCIMPCONCIRD	3-Error	received CC from unconfigured remote MEP.	While performing cross check a CC message was received from a remote MEP which is not configured under the domain submode.	ethernet-cfm	"Verify if the remote MEP should be added to the remote MEP list under the domain" " using 'show ethernet cfm domain."
EHCIMPCFROMGIP	3-Error	received Loopback Reply with correct Transaction Identifier but from a Maintenance Point different than Loopback Message's destination	An unknown destination sent a reply to a Loopback messages that was intended to another device.	ethernet-cfm	"Verify if the correct destination mac address was specified in the Command Line Interface" " while sending Loopback Message."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
EIHER_CFM6 CRSBNDN	3-Error	egress path found for TM is at a higher level than the traceroute message.	Traceroute found a domain boundry on egress since the egress port level is higher than the Traceroute Message level.	ethernet-cfm	"Check if the MIP level on the egress port is at appropriate level."
EIHER_CFM6 ENIER_LCK_NI	6-Information	Interface [chars] enters LCK defect condition for [chars] direction	Interface is put in OOS state through exec cli for input direction	ethernet-cfm	'LOG_SID_NO_ACTION'
EIHER_CFM6 EXIT_LCK_NI	6-Information	Interface [chars] exited LCK defect condition for [chars] direction	Interface has exited LCK defect condition.	ethernet-cfm	'LOG_SID_NO_ACTION'
EIHER_CFM6 ENIER_LCK	6-Information	local mep with mpid [dec] level [dec] id [dec] dir [chars] Interface [chars] enters LCK defect condition	Ethernet cfm mep has entered LCK Maintenance condition. Id refers to local mep vlan id or bridge-domain id.	ethernet-cfm	'LOG_SID_NO_ACTION'
EIHER_CFM6 EXIT_LCK	6-Information	local mep with mpid [dec] level [dec] id [dec] dir [chars] Interface [chars] exited LCK defect condition	Ethernet cfm mep has exited LCK Maintenance condition. Id refers to local mep vlan id or bridge-domain id.	ethernet-cfm	'LOG_SID_NO_ACTION'
EIHER_CFM6 ENIER_ASN_I	6-Information	Interface [chars] enters AIS defect condition for [chars] direction	Interface has entered AIS defect condition. This is due to traffic effecting indication from lower layer OAM like 802.3ah	ethernet-cfm	'LOG_SID_NO_ACTION'
EIHER_CFM6 EXIT_ASN_I	6-Information	Interface [chars] exited AIS defect condition for [chars] direction	LOG_SID_NO_ACTION	ethernet-cfm	"Interface has existed AIS defect condition. This is due to " "clearing of traffic effecting condition and 802.3ah entering " "in send_any operational state"

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
EIHER_CFM6ENTER_AIS	6-Information	local mep with mpid [dec] level [dec] id [dec] dir [chars] Interface [chars] enters AIS defect condition	Ethernet cfm mep has entered AIS defect condition. This is due to receive of ETH-AIS or ETH-LCK frames or CCM errors causing signal fail condition. Id refers to local mep vlan id or bridge-domain id.	ethernet-cfm	"LOG_SID_NO_ACTION"
EIHER_CFM6EXIT_AIS	6-Information	local mep with mpid [dec] level [dec] id [dec] dir [chars] Interface [chars] exited AIS defect condition	Ethernet cfm mep has exited AIS defect condition. This is due to not receiving ETH-AIS or ETH-LCK frames for expiry threshold or mep up state if LOC error happened before. Id refers to local mep vlan id or bridge-domain id.	ethernet-cfm	"LOG_SID_NO_ACTION"
EIHER_CFM6IGNORE_VLAN	5-Notice	Ignored VLAN [dec] in '[chars]'	Invalid VLAN was ignored in the configuration.	ethernet-cfm	"LOG_SID_NO_ACTION"

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
EHCMP6-INFO-EMPU	6-Information	Continuity Check message is received from a remote MEP with mpid [dec] [chars] [chars] domain [chars] event code [chars].	A CC message is received from remote MEP which is up. Event code: New: A remote MEP first comes up that is when we receive a CC message from the remote MEP for the first time. Event code: Returning: The device receives a CC message from a MEP for which it has an expired CCDB entry. Event code: PortState: The device receives a CC message from a remote MEP for which it has a valid CCDB entry and the message indicates a port status change This message may be for a particular vlan or evc with the corresponding MAID or CSIID	ethernet-cfm	"Information message only."
EHCMP3-ERR-EMPD	3-Error	Remote MEP mpid [dec] [chars] [chars] in domain [chars] changed state to down with event code [chars].	The entry in CCDB corresponding to this MEP times out or the device receives a CC message with zero hold-time Event code: LastGasp: A valid Continuity Check message with a zero hold-time is received from a remote MEP and the device either has a valid non-expired CCDB	ethernet-cfm	"Check the remote CFM configurations using CFM " " utilities like traceroute and ping."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
EF CFM CS CON CH ED ME	3-Error	Continuity Check message with unmatched [chars] is received from a remote MEP with mpid [dec] [chars] level [dec] domain [chars] MAC: [enet].	The Continuity Check message whose CSIID or MAID is different from what is locally configured on the device for the given EVC or VLAN thereby indicating that there is a potential for having a cross-connected service in the network.	ethernet-cfm	"Configure the CFM CSI ID properly across the " "network."
EF CFM FOR WARD ING LOO	3-Error	Continuity Check message is received with same source MAC [enet] and mpid [dec] [chars] of its own in the [chars].	The device is receiving its own CC messages for a particular vlan or evc within the same CSI or MA.	ethernet-cfm	"Configure the CFM maintenance points properly " "to avoid the forwarding loop."
EF CFM CON FIG UR ER	3-Error	CFM miss-configuration in the network. Same mpid [dec] configured within the same maintenance name [chars] having [chars] for [chars].	The same MPID as a locally configured MEP but different source MAC Address than its own. The maintenance name can be either maintenance domain or maintenance association. This message may be for a particular vlan or evc with the corresponding MAID or CSIID.	ethernet-cfm	"Configure the CFM maintenance end points properly " "by giving unique mpid in a particular maintenance " "domain or association."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
ETHERNET-CFM-CROSSCHECK-MISSING	3-Error	The device does not receive any CC messages from a remote MEP with mpid [dec] [chars] that it was expecting to be part of the [chars] in the domain [chars] from MAC: [enet].	The configured remote MEP does not come up during the cross-check start timeout interval. This message may be for a particular vlan or evc with the corresponding MAID or CSIID.	ethernet-cfm	"There could be a possible fault in the network. " "Check the CFM cross check configurations are " "proper. "
ETHERNET-CFM-CROSSCHECK-UNKNOWN	3-Error	The device received a CC message from a remote MEP having mpid [dec] [chars] with MAC: [enet] that it was not expecting to be part of the [chars] in the domain: [chars].	The received remote MEP is not there in the static list configured. This message may be for a particular vlan or evc with the corresponding MAID or CSIID.	ethernet-cfm	"Check whether the CFM crosscheck configurations " "are proper."
ETHERNET-CFM-CROSSCHECK-SUCCESSFUL	6-Information	The device received CC messages from all remote MEPs within a given [chars] in the maintenance domain [chars].	The service configured either CSI or MA is up as it receives CC messages from all remote statically configured MEPs.	ethernet-cfm	"Information message only."

Fault-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
EIHRCM/FAULT_ALARM	3-Error	A fault has occurred in the network for the local MEP having mpid [dec] vlan [dec] [chars] indicating a fault with the event code [chars].	This indicates a fault in the network. Event code: RDICCM: Remote MEP has reported RDI in CCM Event code: MACstatus: The last CCM received by this MEP from some remote MEP indicated that the transmitting MEPP's associated MAC is reporting an error status via the Port Status TLV or Interface Status TLV. Event code: RemoteCCM: This MEP is not receiving CCMs from some other MEP in its configured list. Event code: ErrorCCM: This MEP is receiving invalid CCMs. Event code: XconCCM: This MEP is receiving CCMs that could be from some other CSI or MA.	ethernet-cfm	"There could be a possible fault in the network. " "Check whether the cfm configurations are proper."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
EIHER_CFM_HA2INIT	2-Critical	Ether CFM ISSU client initialization failed to [chars]. Error: [dec] [chars]	The Ether CFM ISSU client could not be initialized. This initialization failure must be addressed before in-service software upgrade or downgrade can be performed successfully. If you do not address this failure there will be downtime during software upgrade or downgrade.	ethernet-cfm	LOG_STD_ACTION
EIHER_CFM_HA3TRANSFORM	3-Error	Ether CFM ISSU client [chars] transform failed for 'Message Type [dec]'. Error: [dec] [chars]	The Ether CFM ISSU client could not transform the specified message type. If the transmit transformation failed the checkpoint message was not sent to the standby device. If the receive transformation failed the checkpoint message was not applied on the standby device. In both cases the Ether CFM state between the active device and the standby device is not identical.	ethernet-cfm	"show issu session <client_id> and " "show issu negotiated version <session_id>"
EIHER_CFM_HA3NOCK	3-Error	Ether CFM ISSU client 'Message Type [dec]' is not compatible	The Ether CFM ISSU client received an incompatible message from the peer device. The message cannot be processed.	ethernet-cfm	"show issu message group <client_id> and " "show issu session <client_id> and " "show issu negotiated version <session_id>"

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
EIHR_CFM_HA3MSG_SIZE	3-Error	Ether CFM ISSU client failed to get the MTU for Message Type [dec]. Error: [dec] [chars]	The Ether CFM ISSU client failed to calculate the MTU for the specified message. The Ether CFM ISSU client will not able to send the message to the standby device.	ethernet-cfm	"show issu message group <client_id> and " "show issu session <client_id> and " "show issu negotiated version <session_id>"
EIHR_CFM_HA1VALID_SESSION	3-Error	Ether CFM ISSU client does not have a valid registered session.	The Ether CFM ISSU client does not have a valid registered session.	ethernet-cfm	"show issu capability entries <client_id> and " "show issu session <client_id> and " "show issu negotiated capability <session_id>"
EIHR_CFM_HA1ISSU_REGISTER	2-Critical	Ether CFM ISSU client failed to register session information. Error: [dec] [chars]	The Ether CFM ISSU client failed to register session information. If a problem occurs with the ISSU session registration the standby device cannot be brought up properly.	ethernet-cfm	"show issu capability entries <client_id> and " "show issu session <client_id> and " "show issu negotiated capability <session_id>"
EIHR_CFM_HA1ISSU_UNREGISTER	3-Error	Ether CFM ISSU client failed to unregister session information. Error: [dec] [chars]	The Ether CFM ISSU client failed to unregister session information.	ethernet-cfm	"show issu session <client_id> and " "show issu negotiated capability <session_id>"

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
ETHERCFM_ISSU_NGO	2-Critical	Ether CFM ISSU client encountered unexpected client nego_done. Error: [dec] [chars]	An ISSU-compliant client transitions through a series of internal states. The Ether CFM ISSU client encountered a 'client negotiation done' state that was unexpected. If a problem occurs with the ISSU session negotiation the standby device cannot be brought up properly.	ethernet-cfm	"show issu session <client_id> and " "show issu negotiated capability <session_id>"
ETHERCFM_ISSU_NGO	2-Critical	Ether CFM ISSU client failed to send negotiation message. Error: [dec] [chars]	The Ether CFM ISSU client failed to send a session negotiation message to the peer device. If a problem occurs with the ISSU session negotiation the standby device cannot be brought up properly.	ethernet-cfm	"show logging and show checkpoint client"
ETHERCFM_HA_GET_BUF	2-Critical	Ether CFM ISSU client failed to get buffer for message. Error: [dec] [chars]	The Ether CFM HA client failed to get buffer space for building chkpt message. Message cannot be sent to standby device. If a problem occurs the standby device cannot be brought up properly.	ethernet-cfm	"show logging and show checkpoint client"
SCVIF_DB_ENTRY_ALLOC_FAIL	2-Critical	SCVIF pair db entry allocation for interface [chars] failed	SCVIF pair database error. Memory chunk allocation for SCVIF pair database entry has failed.	service-controller	"Check for accurate memory management. " "Perform memory leak checks and " "look for memory corruption causes. " "Execute 'show proc memory' command."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SCVIF2DB_INSERT_FAIL	2-Critical	SCVIF pair db entry add for interface [chars] failed	SCVIF pair database error. Insertion of a new entry into SCVIF pair database has failed.	service-controller	"Check for accurate memory management. " "Perform memory leak checks " "look for memory corruption causes " "verify correct database management. " "Execute 'show proc memory' command."
SCVIF2DB_DELETE_FAIL	2-Critical	SCVIF pair db entry delete for interface [chars] failed	SCVIF pair database error. Removal of entry from SCVIF database has failed.	service-controller	"Check for accurate memory management. " "Perform memory leak checks " "look for mamory corruption causes and " "check for correct database management. " "Execute 'show proc memory' command. " "
SCVIF2DB_ENTRY_FREE_FAIL	2-Critical	SCVIF pair entry free failed	SCVIF pair database error. Memory chunk free of SCVIF pair database entry has failed.	service-controller	"Check for accurate memory management. " "Perform memory leak checks " "and look for memory corruption causes. " "Execute 'show proc memory' command."
SCVIF2DB_ALLOC_FAIL	2-Critical	SCVIF pair db allocation failed	SCVIF pair database error. Memory chunk creation for SCVIF pair database has failed.	service-controller	"Check for accurate memory management. " "Perform memory leak checks " "and look for memory corruption causes. " "Execute 'show proc memory' command."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SCVIF2DB_DESTROY_FAIL	2-Critical	SCVIF pair database destroy failed	SCVIF pair database error. Memory chunk destroy has failed for SCVIF pair database.	service-controller	"Check for accurate memory management. " "Perform memory leak checks " "and look for memory corruption causes. " "Execute show proc memory command."
APPNAVCONTROLLER_UNREACHABLE	2-Critical	APPNAV-CONTROLLER: Alarm #29007 Severity: Major. SN: [chars] is unreachable	Service context has entered Operational state and there is at least one configured node that is not part of the SN view.	service-controller	"Check status of configured SNs."
APPNAVCONTROLLER_SN_REACHABLE	4-Warning	APPNAV-CONTROLLER: Alarm #29007 cleared. SN: [chars] is reachable	Service Node is available	service-controller	"None. All is well"
APPNAVCONTROLLER_MINOR_VERSION_MISMATCH	5-Notice	APPNAV-CONTROLLER: Alarm #29003 Severity: Minor	When an appnav controller detects upon that there are other appnav-controllers/SNs in the cluster with different ICIMP/DMP minor version number.	service-controller	"Check versions of SNs in network."
APPNAVCONTROLLER_MINOR_VERSION_MISMATCH_CLEARED	5-Notice	APPNAV-CONTROLLER: Alarm #29003 cleared	There are no appnav-controllers/SNs with different ICIMP/DMP minor version number	service-controller	"None. All is well"
APPNAVCONTROLLER_NO_SN_AVAILABLE	2-Critical	APPNAV-CONTROLLER: Alarm #30001 Severity: Major. SNG: [chars] unavailable	No SN in appnav node group is available for optimization.	service-controller	"Check status of configured nodes."
APPNAVCONTROLLER_SN_AVAILABLE	4-Warning	APPNAV-CONTROLLER: Alarm #30001 Cleared SNG: [chars] available	SN's in appnav node group is available for optimization.	service-controller	"None. All is well"

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
APPNAVCONTROLLER APPNAVCONTROLLER	2-Critical	APPNAVCONTROLLER: Alarm #30000 Severity: Major. In SNG: [chars] AO: [dec] is unavailable	No node in service node group is available for optimization and traffic is getting optimized by a secondary SNG.	service-controller	"Check status of configured SNs."
APPNAVCONTROLLER APPNAVCONTROLLER	4-Warning	APPNAVCONTROLLER: Alarm #30000 cleared. In SNG: [chars] AO: [dec] is available	Service node group is available for optimization	service-controller	"None. All is well"

MCASIRERRMVF_TABLEID	3-Error	MVRF lookup for tableid [dec] failed.	An MVRF lookup failed for a table ID known to be associated with an existing MVRF table. This indicates incorrect setup of search parameters. A PIM data synch operation has been aborted.	-	LOG_SIDSH_TECH_ACTION
MCASIRERRMLOOKUP	3-Error	PIM RP mapping range lookup for VRF [chars] range [chars]/[dec] failed.	A PIM RP mapping range lookup failed for a range that is known to exist. This indicates incorrect setup of search parameters. A PIM data synch operation has been aborted.	-	LOG_SIDSH_TECH_ACTION
MCASIRERRRPF_NO_IDB	3-Error	No IDB for if_number [dec] in Bidir RP DF sync attempt for RP address [inet].	The IDB if_number specified in a function call to trigger synching of Bidir RP DF information does not map to any existing IDB. The sync operation can not proceed. The DF information may no longer be correct following an RP failover.	-	LOG_SIDSH_TECH_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
MCA SI RD M CAC N IDB	3-Error	No IDB for if_number [dec] in mCAC reservation sync attempt for SG [chars] [chars]	-	-	-
MCA SI RD M CAC N IDB	3-Error	Failed to find IDB for mCAC [chars] reservation DB delete. AF = [dec] Reason: [chars]	Lookup of the IDB for the specified input parameters failed either because of an invalid input parameter or incorrect/missing entries in tables used for the lookup. The requested DB delete operation can not proceed. Extraneous mCAC reservations may exist temporarily following an RP failover.	-	<u>LOG</u> <u>SID</u> <u>SH</u> <u>TECH</u> <u>ACTION</u>

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
MCASIRERR3MCAC_COST	3-Error	Deleted mCAC reservation cost for [chars] [chars] if_number [dec]	The accumulated total source or group cost for the affected mCAC reservation DB should always be the greater than the cost of any reservation within the database. This logic error means that the accounting is incorrect. As a result the amount of bandwidth initially reserved for multicast state previously admitted by the current mCAC configuration may be incorrect following an RP failover. This may lead to some disruption of multicast traffic following an RP failover.	-	LOG_SIDSHTECH_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
MCASIREDMCAC_SEQ	3-Error	Missing standby mCAC configuration for [chars] [chars] mCAC	During handling of an mCAC reservation sync request on the standby RP the corresponding mCAC limit configuration was not found. This is probably a result of a sequencing problem between synching of multicast configuration information and synching of dynamic state information. As a result the amount of bandwidth initially reserved for multicast state previously admitted by the current mCAC configuration may be incorrect following an RP failover. This may lead to some disruption of multicast traffic following an RP failover.	-	LOGS_IDSHTTECH_ACTION
MCASIREDMCAC_RADXINT	3-Error	Failed to update radix tree for mCAC reservation [chars] DB for [chars] [chars] mCAC reservation on interface number [dec]	-	-	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
MASRE MCRADLEE	3-Error	Failed to delete radix tree node for mCAC reservation [chars] DB. Address [chars] Mask [chars]	During handling of an mCAC reservation database element deletion an attempt to delete the affected element from the mCAC reservation database radix tree failed. As a result the amount of bandwidth initially reserved for multicast state previously admitted by the current mCAC configuration may be incorrect following an RP failover. This may lead to some disruption of multicast traffic following an RP failover.	-	LOGSIDSHTTEHACION
MASRE RDFNULLDB	3-Error	NULL IDB pointer in Bidir RP DF sync attempt for RP address [inet].	A NULL IDB address was specified in a function call to trigger synching of Bidir RP DF information. The DF information may no longer be correct following an RP failover.	-	LOGSIDSHTTEHACION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
MCSRLMBU N NULL A BE	3-Error	NULL table pointer specified for MRIB update notification.	A NULL table address was specified in a function call to notify the PIM HA process that all pending updates have been read for a given multicast routing table. The process will attempt to continue with RP switchover handling despite this error.	-	LOGSIDSHT E CH A CTION
MCSRLH D R S NO T ABLE	3-Error	No table for tableid 0x[hec] specified for multicast NSF holdoff release.	A table ID for which no table exists was specified as an input to a function registered for releasing of a multicast NSF holdoff lock. If the calling client has a real holdoff extension request pending for some table the lock will not be released until the holdoff failsafe timer expires. This could delay completion of multicast reconvergence following an RP failover.	-	LOGSIDSHT E CH A CTION

PQUICC-1-NOMEMORY	1-Alert	msgtxt_nomemory	The MPC860/PowerQUICC CPU was unable to access the memory it needs to carry out its functions. Here are some possible causes. The network is large requiring a lot of memory for routing tables and so on. The router configuration has many features enabled each of which require a certain amount of memory. A software error memory leak exists.	-	"Reduce system activity to ease the memory demand or upgrade to a larger memory configuration."
PQUICC-3-OWNERR	3-Error	msgtxt_ownerror	An internal software error occurred.	-	"Call your technical support representative to obtain a software upgrade."
PQUICC-1-INITFAIL	1-Alert	PQUICC[dec]/[dec] SCC[dec] init failed	The software failed to initialize/restart a 1T serial card.	-	"Clear the serial interface. If the message recurs call your technical support representative for assistance."
PQUICC-1-CTSLOST	1-Alert	PQUICC[dec]/[dec] Clear to Send Lost	-	-	"Check the serial interface cable and/or communication equipment such as the channel service unit/data service unit CSU/DSU."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
PQUICC-1-UNDERFLO	1-Alert	PQUICC[dec]/[dec] Transmit underflow	While transmitting a frame the serial controller chip's local buffer received insufficient data because data could not be transferred to the chip fast enough to keep pace with its output rate. Normally such a problem is temporary depending on transient peak loads within the system.	-	"The system should recover. No action is required."
PQUICC-1-LINEFLAP	1-Alert	PQUICC[dec]/[dec] Excessive modem control changes	-	-	"Check the serial interface cable. The error can occur if the cable is disconnected or has come loose and is picking up noise. If the cable appears to be connected correctly check the equipment connected to the cable."
PQUICC-1-BADHDXFSM	1-Alert	PQUICC[dec]/[dec] Unexpected HDX state [dec] event [dec]	A bad event was detected in the state machine for half duplex transmission/reception.	-	"Copy the error message exactly as it appears and report it to your technical support representative."
PQUICC-1-TOOSMALL	1-Alert	PQUICC[dec]/[dec] packet was less than 2 bytes A small packet	-	-	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
PQUICC-1-TOOBIG	1-Alert	PQUICC[dec]/[dec] packet too big packet size was [dec] bytes	A packet greater than the assigned MTU of this serial interface\n\ was queued up for transmission.	-	"The system should recover. No action is required.\n\ \n\ If the message recurs it may indicate an error\n\ related to data traffic patterns. Copy the error message exactly as it\n\ appears and report it to your technical support representative."
PQUICC-UNKNOWN_WIC	1-Alert	PQUICC[dec] WIC card has an unknown ID of 0x[hec]	The software does not recognize the type of WIC card plugged\n\ into the port module.	-	"Check the part number on the WIC card to verify that it is supported\n\ in the IOS release operational on the router or contact\n\ your technical support representative."
PQUICC-1-WRONG_SLOT	1-Alert	PQUICC[dec] BRI card in wrong slot1	The BRI card is not supported in WIC slot 0.	-	"Power down move the BRI card to the other WIC slot on the\n\ port module and reboot."
PQUICC-UNKNOWN_SCCS	3-Error	PQUICC Incorrect SCC number	An internal software error occurred.	-	"Call your technical support representative to obtain a software\n\ upgrade."
PQUICC-UNSUPPORTED_COMB	1-Alert	Slot [dec] has an unsupported combination of ISDN WAN interface cards	It is not possible to support this type of BRI card in\n\ slot 1 along with another BRI card in slot 0.	-	"Remove one of the BRI cards from either slot."
PQUICC-UNEXPECTED_INTERRUPT	1-Alert	PQUICC[dec] Unexpected modem-signal interrupt	The software did not expect to see a modem control signal change\n\ on this type of WIC card interface.	-	"Copy the error message exactly as it\n\ appears and report it to your technical support representative."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
PQUICCGLOBALERR	1-Alert	PQUICC[dec]/[dec] Global error [hec] in QMC	One or more of the channels served by the QMC instance encountered\n\ntransmitter underflow or receiver overflow or the QMC interrupt\n\ntable overflowed. Normally such a problem is temporary depending on\n\ntransient peak loads within the system.	-	"The system should recover. No action is required."
PQUICCKNOWNTXVECTOR	3-Error	PQUICC Unknown TX vector on port [dec]	An internal software error occurred.	-	"Copy the error message exactly as it\n\nappears and report it to your technical support representative."
PQUICCSURIOUS_INTERRUPT	3-Error	Interface card in slot [dec] generated a spurious interrupt	Interface card on the router which is not supported by this image\n\n generated a spurious interrupt that can not be handled.	-	"No action is required. To avoid seeing this message in the future\n\n remove the unsupported card or use an image that supports it."
ALIGN-3-CORRECT	3-Error	Alignment correction made at 0x[hec] [chars]ing 0x[hec]	A software component within the router needs memory optimization.	-	"Copy the error message exactly as it appears and report it to your\n\n technical support representative."
ALIGN-3-FULL	3-Error	Alignment log is full - no new entries will be recorded	The router identified more software components in need of memory\n\n optimization than it can record.	-	"Copy the error message exactly as it appears and report it to your\n\n technical support representative."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
ALIGN-3-SPURIOUS	3-Error	Spurious memory access made at 0x[hec] reading 0x[hec]	An attempted but illegal access to a low memory address within a software component in the router has been temporarily blocked.	-	"Copy the error message exactly as it appears on the console or in the " "system log. Issue the <CmdBold>show alignment<noCmdBold> command to " "gather data that may help identify the nature of the error. If you " "cannot determine the nature of the error from the error message text " "or from the <CmdBold>show alignment<noCmdBold> output call your " "Cisco technical support representative and provide the representative " "with the gathered information."

SYS4DUAL_MESSAGE	4-Warning	SNMP system message request [dec] denied because of pending job	A software error occurred.	-	"Copy the error message exactly as it appears and report it to your " "technical support representative."
SYS-6-LOGOUT	6-Information	User [chars] has exited tty session [dec][chars]	A user has closed a tty session normally using the exit CLI command.	os	"This message is for information only. " "No action is required."
SYS-5-CONFIG	5-Notice	Configured from [chars]	The router's configuration was changed.	none	"This is a notification message only. No action is required."
SYS-5-CONFIG_R	5-Notice	Config Replace is [chars]	The router's configuration was changed.	none	"This is a notification message only. No action is required."
SYS-5-CONFIG_C	5-Notice	Running-config file is [chars]	The router's configuration was changed.	none	"This is a notification message only. No action is required."
SYS-5-CONFIG_P	5-Notice	Configured programmatically by process [chars] from [chars] as [chars]	The router's configuration was changed programmatically.	none	"This is a notification message only. No action is required."
SYS-5-CONFIG_I	5-Notice	Configured from [chars] by [chars]	The write of the system running configuration failed.	-	"If this messages recurs copy it exactly as it appears and report " "it to your technical support representative."
SYS-5-CONFIG_FAILURE	4-Warning	System config parse from [chars] failed	The configuration file from the URL specified in the error message could not be read.	-	"Enter the <CmdBold>no service config<NoCmdBold> " "command to disable autoloading of configuration files " "OR investigate why the tftp load is failing."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS-5-CONFIG_NV	5-Notice	Nonvolatile storage configured from [chars]	The configuration was written successfully.	none	"This is a notification message only. No action is required."
SYS-5-CONFIG_NV_I	5-Notice	Nonvolatile storage configured from [chars] by [chars]	The write of the nonvolatile configuration failed.	-	"If this messages recurs copy it exactly as it appears and report " "it to your technical support representative."
SYS3CONFIG_NV_DATA	3-Error	Variable [chars] not set properly in the routine [chars].	The write of the nonvolatile configuration failed because an internal variable was not set properly.	-	"If this messages occurs copy it exactly as it appears and report " "it to your technical support representative."
SYS4CONFIG_NEWER	4-Warning	Configuration from version [dec].[dec] may not be correctly understood	The software detected that the configuration saved in memory was written by a newer version of software. There might be commands saved in memory that are not implemented by the older software version.	none	"Examine all the messages printed while the router was " "booting. For each message about an unknown command determine " "whether that feature is required. If so upgrade to a " "newer version of software that supports that feature."
SYS4CONFIG_NOLOCK	4-Warning	The configuration could not be locked	A software error occurred.	-	"Copy the error message exactly as it appears and report it " "to your technical support representative."
SYS3CONFIG_NO_PRIVATE	3-Error	No space remaining to save private config	A software or hardware error occurred.	-	"Copy the error message exactly as it appears and report it to your " "technical support representative."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS_CFG_NVRM_OVRUN	4-Warning	Non config data present at the end of nvram is corrupted	The software detected that the configuration saved into nvram has overlaid a part of the nvram occupied by non config data files. Typically these files are used by snmp to store and retrieve non config persistent data across system reload.	-	"Compress the configuration and store or copy to flash as appropriate"
SYS_CFG_NVRM_TRUNC	4-Warning	Truncated configuration to %ld bytes from %ld bytes	The software detected that the configuration saved into nvram has been truncated. There was not enough space to save the compressed configuration.	-	"Save the configuration to flash if the platform supports " "\boot config\" command."
SYS_CFG_NVRM_OVRUN	4-Warning	Non config data present at the end of nvram needs to be overwritten to fit the configuration into nvram	The software detected that the non config data files occupying the end of nvram need to be overwritten to fit the configuration. Typically these files are used by snmp to store and retrieve non config persistent data across system reload.	-	"Compress the configuration and store or copy to flash as appropriate"
SYS_CFG_NVRM_TRUNC	4-Warning	Configuration needs to be truncated to fit into nvram	The software detected that the configuration is to be truncated to fit in the nvram. There was not enough space to save the compressed configuration	-	"Save the configuration to flash if the platform supports " "\boot config nvbypass\" command."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS4-NV_BLOCK_INIT_FAIL	4-Warning	Unable to initialize the geometry of nvram	The software detected that it failed to initialize the nvram block geometry a part of the nvram to host non config data files. Typically these files are used by snmp to store and retrieve non config persistent data accross system reload. This may happen when the entire nvram is packed with the configuration and the newer version of software which supports this feature could not find the minimum room in the nvram to initialize block file system.	-	"Reduce the configurations in the nvram atleast by 2K"
SYS7-NV_BLOCK_INIT	7-Debug	Initialized the geometry of nvram	Initialized the nvram block geometry a part of the nvram to host non config data files. Typically these files are used by snmp to store and retrieve non config persistent data accross system reload.	-	""
SYS4-NV_CHKSUM	4-Warning	An nvram checksum is already in progress	An interrupt service routine attempted to perform a checksum on the nvram contents and found the resource in use.	nvram	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS4-EXMALLOCFAIL	4-Warning	External memory allocation of [dec] bytes failed from EXMEM [dec]	The requested memory allocation is not available from the specified memory pool. The current system configuration network environment or possibly a software error might have exhausted or fragmented the router's memory.	-	"Copy the error message exactly as it appears and report it to your " "technical support representative."
SYS-4-NV_NOLOCK	4-Warning	Failed to acquire an nvram lock	An interrupt service routine's attempt to acquire a semaphore lock failed	-	"Copy the error message exactly as it appears and report it to your " "technical support representative."
SYS2-EXMEMPARAM	2-Critical	Bad parameter [dec] when calling to the allocator utility	Illegal parameter is used when called to allocator. may represent data some corruption.	-	"Copy the error message exactly as it appears and report it to your " "technical support representative."
SYS2-EXMEMFREE	2-Critical	Free a non allocated ptr [hec] size [dec].	Trying to free a memory which not all of it marked as allocated.	-	"Copy the error message exactly as it appears and report it to your " "technical support representative."
SYS-6-ENCRPT_SUCCES	6-Information	[chars]	Private config encryption successful	none	"This is an informational message."
SYS-2-ENCRPT_FAILRE	2-Critical	[chars]	An error was encountered by the private config encryption	none	"Copy the error message exactly as it appears and report it to your " "technical support representative."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SSRCFGDCRYPTSUCCS	6-Information	[chars]	Private config decryption successful	none	"This is an informational message."
SSRCFGDCRYPTFAURE	2-Critical	[chars]	An error was encountered by the private config decryption	none	"Copy the error message exactly as it appears and report it to your " "technical support representative."
SYS2CONFIG_DOWNFAL	2-Critical	Generated configuration not backward compatible	The router has been configured to generate nonvolatile memory using the commands of an older software version. The current configuration of the router contains a command that cannot be saved using only the older command set.	none	"Allow the router to save the configuration using the command set of " "the current software version or remove the commands that cannot be " "saved using the older command set."
SYS-5-OUTSETUP	5-Notice	Configuration file [chars] accepted aborting setup	A configuration was accepted over the network so the setup session will be aborted.	none	"This is a notification message only. No action is required."
SYS-3-BADLINKTYPE	3-Error	* Unexpected linktype [dec]	* A software error occurred.	udp	* "Copy the error message exactly as it appears and report it to your " * "technical support representative."
SYS-2-SIGNUM	2-Critical	Process aborted on invalid signal signum = [dec].	An attempt was made to send an invalid signal to another process.	-	"If this message occurs more than once report this message " "to your technical support representative."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS-3-CPUHOG	3-Error	Task is running for [dec]msecs more than [dec]msecs [dec]/[dec]	The indicated process ran too long without relinquishing the processor. Each process should run for a small amount of time and then relinquish the CPU so that other processes can run. This problem can be caused by many things like traffic or system load hardware or operational configuration a configuration change initialization of many interfaces cards or ports for example a high momentary error rate a sustained abnormal	If this error occurs in conjunction with a TIMERHOG message \n\ report the two errors together and use the component obtained \n\ for the TIMERHOG message.	"If you suspect a software error copy the error message exactly as it " "appears on the console or in the system log contact your technical support" "representative and provide the representative with the gathered information."
SYS-2-WATCHDOG	2-Critical	Process aborted on watchdog timeout process = [chars].[chars]	The indicated process ran for too long without relinquishing control. The system killed it as a runaway process.	-	-
SYS-3-TIMERHOG	3-Error	Timer callback ran long PC = [hec].	The indicated callback routine ran for too long without relinquishing the processor.	Determine the component from the callback routine address displayed in\n\ the error message. Use Topic to search for a similar DDTS. If you \n\ find none write a DDTS for this problem.	"Copy the message exactly as it appears and report it your technical " "support representative."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS-6-STACKLOW	6-Information	Stack for [chars] [chars] running low [dec]/[dec]	An internal software error occurred.	-	"If this messages recurs copy it exactly as it appears and report " "it to your technical support representative."
SYS4GREEDY_REGEX	4-Warning	[chars] while processing the input regular expression. Aborting processing use alternate regular expression. Input regular expression: \[chars]\	Regular expression processing limitation: Certain regular expressions require huge stack space for processing or can lead to processing timeouts. We abort processing such regular expressions and print this message to avoid stack overflow/unexpected reload.	os	"The regular expression specified leads to stack overflow/processing " "timeout of the indicated process. Recommended to use a different " "regular expression."
SYSICURNGIHRSHOLD	1-Alert	Threshold: [chars] CPU UtilizationTotal/Intr: [dec]%%/[dec]%%	The system is experiencing high CPU usage possibly from a process that is using too much CPU. This condition demands immediate attention or packets or calls may be dropped.	-	"Enter the <CmdBold>show processes CPU<NoCmdBold>" " command to determine the CPU hogging process" " that is causing this condition and if possible" " disable the activity that is causing the" " CPU hog condition so that CPU" " utilization is reduced."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS-1-ALERT-HIGH-THRESHOLD	1-Alert	Threshold: [chars] CPU UtilizationTotal/Intr [dec]%%/[dec]%%.	CPU usage has returned to normal after crossing over from a threshold of high usage. Any process that was disabled during the period of high CPU use can now be enabled.	-	"No action is required."
SYS-2-INPUTQ	2-Critical	INPUTQ set but no IDB ptr=[hec]	This message is issued when an attempt is made to alter the input queue count for a packet that should not be counted.	-	-
SYS-6-BADSHAREINFO	6-Information	[chars] packet [hec] has a zero reference count freeing pid = [hec] \n freeing pc = [hec] [chars].	Provides additional information about original freer of packet.	-	-
SYS-2-BADSHARE	2-Critical	Bad refcount in [chars] ptr=[hec] count=[hec]	A reference count is used to track the usage of many data structures. A function increments the count when it begins to use a structure and decrements it when it finishes. When the count becomes zero the data structure is freed. This message indicates that when the count was accessed it was found to be negative which means that the data structure will not be freed until the system is reloaded.	-	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS-4-ADD_STACK	4-Warning	Invalid index [dec] for additional stack size request.	The index passed should be less than the enum <code>E_MAX_ADD_STACK_SIZE</code> value equal to or higher than the enum is an invalid index.	-	"Copy the error message exactly as it appears and report it to your " "technical support representative."
SYS-2-CFORKLEV	2-Critical	Process creation of [chars] failed at level [dec].	An internal software error occurred.	Determine the component from the process name displayed in the\n\ error message.	"Copy the error message exactly as it appears and report it to your " "technical support representative."
SYS-2-CFORKMEM	2-Critical	Process creation of [chars] failed no memory.	Insufficient memory was available to create a process either while trying to support additional features or due to a memory leak.	mem-suspect	"A memory leak may be the cause if the system has been running for a " "while without changing its configuration. If you suspect a leak then " "copy this message exactly as it appears and report it to your technical " "support representative. Otherwise ensure that more memory is available " "to support the additional features."
SYS-2-CFORKBADFUNCT	2-Critical	Can't create process with start address = [hec]	An internal software error occurred.	-	"Copy the error message exactly as it appears and report it to your " "technical support representative."
SYS-3-BADPROCESS	3-Error	Bad process ID [dec] when [chars] process table	An internal software error occurred.	os-scheduler	"Copy the error message exactly as it appears and report it to your " "technical support representative."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS-2-INSCHED	2-Critical	[chars] within scheduler	-	Determine the component from the stack trace displayed in the error message. Then use Topic to search for a similar DDTS. If you find none submit a DDTS for this problem.	-
SYS-2-NOTIOSTASK	2-Critical	[chars] from outside IOS task context	An IOS reschedule request was made from code that is not running in the context of an IOS task -- from an interrupt handler the scheduler itself or a service pthread within the IOS process.	Determine the component from the stack trace displayed in the error message. Use Topic to search for a similar DDTS. If you find none write a DDTS for this problem.	"Copy the error message exactly as it appears and report it to your technical support representative."
SYS-2-SEMSCHED	2-Critical	'[chars]'	The scheduler was entered with mempool semaphore held.	Determine the component from the stack trace and process name displayed in the error message. Then use Topic to search for a similar DDTS. If you find none submit a DDTS for this problem. If the stack trace indicates that the scheduler was called with mempool semaphore held choose the DDTS component based on the process name displayed.	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS-2-INTSCHED	2-Critical	'[chars]' at level [dec] [chars]	The scheduler was entered from an interrupt service routine ISR.	Determine the component from the stack trace and process name displayed in the error message. Then use Topic to search for a similar DDTs. If you find none submit a DDTs for this problem. If the stack trace indicates that the scheduler was called from an interrupt handler choose the DDTs component based on the interrupt handler. Otherwise use the process name to determine the DDTs component.	-
SYS-3-PROCSEMFAIL	3-Error	Process semaphore creation for preemptive processes failed.	Creation of process function semaphore to protect the critical section of process create routine failed. The semaphore creation can fail if there isnt enough chunk memory to create the event structure.	os	-
SYS-2-NOBLOCK	2-Critical	[chars] with blocking disabled.	A process attempted to relinquish control with blocking disabled.	Determine the component from the stack trace displayed in the error message. Use Topic to search for a similar DDTs. If you find none submit a DDTs for this problem. Choose the DDTs component associated with the routine that called the scheduler.	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS-2-BLOCKHUNG	2-Critical	Task hung with blocking disabled value = 0x[hec].	The indicated process has exceeded the time limit for which it may relinquish control with blocking disabled.	Determine the component from the stack trace displayed in the error message. Use Topic to search for a similar DDTS. If you find none submit a DDTS for this problem. Choose the DDTS component associated with the routine that called the scheduler.	"This message may be a result of high loads. If it recurs " "copy the text exactly as it appears and report it along " "with the associated stack trace to your technical support " "representative."
SYS-2-NOTDEAD	2-Critical	Killing process [chars] pid [dec] again	An internal software error occurred.	os-scheduler	"If this messages recurs copy it exactly as it appears and report " "it to your technical support representative."
SYS-2-NOPROCESS	2-Critical	No such process [dec]	An internal software error occurred.	-	"If this messages recurs copy it exactly as it appears and report " "it to your technical support representative."
SYS-2-IMMORTAL	2-Critical	Attempt to shut down management process [dec] [chars].	An attempt was made to shut down the specified management\n\ process. Management processes must not be shut down as long as the\n\ router remains up.	Determine the component from the stack trace displayed in the error message. Use Topic to search for a similar DDTS. If you find none submit a DDTS for this problem. Choose the DDTS component associated with the routine that called the process_kill.	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS-2-SIGPENDING	2-Critical	Multiple Signals are sent to a process [dec]	An internal software error occurred.	os	"If this messages recurs copy it exactly as it appears and report " "it to your technical support representative."
SYS-2-BADSTACK	2-Critical	Process [chars] has trashed stack old size [dec]	An internal software error occurred.	-	"If this messages recurs copy it exactly as it appears and report " "it to your technical support representative."
SYS-6-MTRACE	6-Information	[chars]: addr pc\n ADDRPC ADDRPC ADDRPC ADDRPC \n ADDRPC ADDRPC ADDRPC ADDRPC	This is an auxiliary message to several memory-related messages. It provides the address of the memory block and the calling program counter for the last eight blocks allocated and for the last eight blocks freed.	Include this error message in the DDTS that was written for\n\ the previously printed error message.	"This message provides additional information only. Copy the error " "message exactly as it appears and report it to your technical support " "representative as part of a previously printed error message."
SYS-6-BLKINFO	6-Information	[chars]blk [hec] words [dec] alloc [hec] [chars] dealloc [hec] rfcnt [hec]	This is an auxiliary message to several memory-related messages. It provides a formatted display of some of the information in the header of a corrupted data block.	Include this error message in the DDTS that was written for\n\ the previously printed error message.	"This message provides additional information only. Copy the error " "message exactly as it appears and report it to your technical support " "representative as part of the previously printed error message."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS-6-MEMDUMP	6-Information	[hex]: [hex] [hex] [hex] [hex]	This is an auxiliary message to several memory-related messages. It provides a raw display of the information in the header of a corrupted data block.	Include this error message in the DDTs that was written for the previously printed error message.	"This message provides additional information only. Copy the error " "message exactly as it appears and report it to your technical support " "representative as part of the previously printed error message."
SYS-6-PROCINFO	6-Information	Process [chars] just finished executing	This message is an auxiliary to the SYS-3-OVERRUN and SYS-3-BADMAGIC error messages. It identifies the process or process fragment that was executing when the error occurred.	-	"Copy this messages exactly as it appears and report it along with " "the SYS-3-OVERRUN and SYS-3-BADMAGIC error messages to your " "technical support representative."
SYS-6-TESTINFO	6-Information	Scheduler test [hex] for [chars] just executed	This message is an auxiliary to the SYS-3-OVERRUN and SYS-3-BADMAGIC error messages. It identifies the process or process fragment that was executing when the error occurred.	Determine the component from the address of the scheduler test routine displayed in the error message. Use Topic to search for a similar DDTs. If you find none write a DDTs for this problem.	"Copy this message exactly as it appears and report it along with the " "SYS-3-OVERRUN and SYS-3-BADMAGIC error messages to your technical " "support representative."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS-3-BADBLOCK	3-Error	Bad block pointer [hec]	A block of memory at the indicated location is corrupt. An internal check of memory block pointers indicates an inconsistency.	-	"Copy the error message exactly as it appears on the console " "or in the system log contact your Cisco technical support representative " "and provide the representative with the gathered information. " "Save any crashinfo or crashdump files. If the router has crashed and " "was not configured to automatically reload then the router will " "need to reloaded manually."
SYS-3-BADMAGIC	3-Error	Corrupt block at [hec] magic %08x	The free memory pool is corrupt. An inconsistency was detected in the free memory pool.	-	"Copy the error message exactly as it appears on the console " "or in the system log contact your Cisco technical support representative " "and provide the representative with the gathered information. " "Save any crashinfo or crashdump files. If the router has crashed and " "was not configured to automatically reload the router will " "need to be reloaded manually."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS3-BADREFCOUNT	3-Error	Bad reference count at [hec] refcount [hec]	An internal software error occurred.	-	"Copy the error message exactly as it appears and report it to " "your technical support representative."
SYS-3-OVERRUN	3-Error	Block overrun at [hec] red zone %08x	An internal software error occurred.	-	"If this messages recurs copy it exactly as it appears and report " "it to your technical support representative."
SYS-2-FREEBAD	2-Critical	Attempted to free memory at [hec] not part of buffer pool	An attempt was made to free memory but the request could not be completed due to an invalid memory data structure	-	-
SYS-2-MADVISEFAIL	2-Critical	Madvise failed memory at [hec].	An attempt was made to create secure mempool but it failed.	os	"This is a notification message only. No action is required."
SYS-2-FREEFREE	2-Critical	Attempted to free unassigned memory at %lx alloc %lx dealloc %lx	An attempt was made to free memory at the indicated location. The memory could not be freed because it was not allocated.	-	-
SYS-3-INVMEMINT	3-Error	Invalid memory action [chars] at interrupt level	This message indicates that a memory allocation or deallocation was attempted from an interrupt handler.	-	"If this messages recurs copy it exactly as it appears and report " "it to your technical support representative."
SYS-3-INVMEMPID	3-Error	Invalid pid [dec] in block: [hec]	There has been attempt to allocate memory on behalf of an invalid process.	mem	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS-3-MEMSEMFAIL	3-Error	Mempool semaphore creation failed for [chars]	This message indicates that the semaphore creation for the specified mempool failed.	-	-
SYS-3-INUSEFREE	3-Error	Block [hec] on free list [dec] in use	A memory management function attempted to allocate the indicated block from a list of free blocks. However the block was found to be already in use.	-	-
SYS-3-NZREFCNT	3-Error	Block [hec] on free list [dec] with refcount [dec]	A block of memory in the free pool is actually in use. The message indicates the number of processes using the memory block.	-	"If this messages recurs copy it exactly as it appears and report " "it to your technical support representative."
SYS3-WRONGFREELIST	3-Error	Block [hec] size [dec] on wrong free list [dec] [dec]	A freed buffer was placed on the wrong list of free buffers.	-	"If this messages recurs copy it exactly as it appears and report " "it to your technical support representative."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS3-BADFREEMAGIC	3-Error	Corrupt free block at [hec] magic %08x	A block of memory at the indicated location is corrupt. An inconsistency was detected while checking the free memory area.	-	"Copy the error message exactly as it appears on the console " "or in the system log contact your Cisco technical support representative " "and provide the representative with the gathered information. " "Save any crashinfo or crashdump files. If the router has crashed and " "was not configured to automatically reload the router will " "need to be reloaded manually."
SYS-3-BADPTRVAL	3-Error	Bad pointer value [chars] = [hec] in function [chars]	Corrupted pointer value is encountered.	-	"If this messages recurs copy it exactly as it appears and report " "it to your technical support representative."

Fault-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS-3-BADFREEPTRS	3-Error	Bad [chars] pointer [hec] at [hec] [chars] = [hec]	A pointer in the block header at the indicated location is corrupt. An inconsistency was detected in the free memory pool.	-	"Copy the error message exactly as it appears on the console " "or in the system log contact your Cisco technical support representative " "and provide the representative with the gathered information. " "Save any crashinfo or crashdump files. If the router has crashed and " "was not configured to automatically reload the router will " "need to be reloaded manually."
SYS-2-GETBUF	2-Critical	Bad getbuffer bytes=[dec]	The software requested a buffer that is larger than the largest configured buffer size or it requested a negative-sized buffer.	Determine the component from the stack trace and process name displayed in the error message. \n\nUse Topic to search for a similar DDTS. If you find none submit a DDTS for this problem. If the stack trace indicates that the buffer code was called from an interrupt handler use the interrupt handler to determine the DDTS component. Otherwise use the process name to determine the DDTS component.	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS-2-INPUT_GETIBUF	2-Critical	Bad getbuffer bytes=[dec] for interface=[chars]	The software requested a buffer that is larger than the largest configured buffer size or it requested a negative-sized buffer.	Determine the component from the stack trace and process name displayed in the error message. \n\nUse Topic to search for a similar DDTS. If you find none submit a DDTS for this problem. If the stack trace indicates that the buffer code was called from an interrupt handler use the interrupt handler to determine the DDTS component. Otherwise use the process name to determine the DDTS component.	LOG_STD_ACTION
SYS-2-INLIST	2-Critical	Buffer in list ptr=[hec]	An internal software error occurred.	-	"If this messages recurs copy it exactly as it appears and report " "it to your technical support representative."
SYS-2-SHARED	2-Critical	Attempt to return buffer with sharecount [dec] ptr=[hec]	An internal software error occurred.	-	"If this messages recurs copy it exactly as it appears and report " "it to your technical support representative."
SYS-2-INLIST1	2-Critical	Buffer in list ptr=[hec] caller=[hec]	An internal software error occurred.	-	"If this messages recurs copy it exactly as it appears and report " "it to your technical support representative."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS-2-SHARED1	2-Critical	Attempt to return buffer with sharecount [dec] ptr= [hec] caller= [hec]	An internal software error occurred.	-	"If this messages recurs copy it exactly as it appears and report " "it to your technical support representative."
SYS-2-BADPOOL	2-Critical	Attempt to use buffer with corrupt pool pointer ptr= [hec] pool= [hec]	An memory management function attempted an operation that could not be performed due to invalid memory pool descriptors.	-	-
SYS2BADPOOLMAGIC	2-Critical	Attempt to use pool pointer with corrupt header pool= [hec]	An internal software error occurred.	-	"If this messages recurs copy it exactly as it appears and report " "it to your technical support representative."
SYS-2-WRONGPOOL	2-Critical	Buffer [hec] found in pool [hec] should be in pool [hec]	A software error occurred.	-	"Copy the message exactly as it appears and report it your technical " "support representative."
SYS-2-BADBUFFER	2-Critical	Attempt to use [chars] buffer as [chars] ptr= [hec] pool= [hec]	A hardware or software error occurred. An inconsistency was encountered while processing a packet buffer.	-	"Copy the error message exactly as it appears on the console " "or in the system log contact your Cisco technical support representative " "and provide the representative with the gathered information."

SYSCCCHISENTOBRN	4-Warning	Logging persistent command exceeded its size. Oldest logging-persistent file was deleted file name: [chars].	The Common Criteria CC certification requires a log message to indicate when logging persistent command exceeded the specified size limit and the old messages were overwritten.	os-logging	"This message is for information however the " "user may consider to increase logging-persistent size or to " "delete old logging persistent files."
SYS6LOGGING_MOVE	6-Information	User [chars] has activated the logging persistent move command.	The Common Criteria CC certification requires a log message to	os-logging	"This message is for information only. No action is required."
SYS3-INTUNWEDGE	3-Error	%llu packets where forcefully unwedged %llu packets were forcefully deallocated	This is an auxiliary message to indicate that packet buffers were forcefully deallocated/unaccounted from interfaces through CLI.	Include this error message in any other DDTS that was written for any other problems reported on this router after leak debugging was configured.	"This message is to explicitly notify that packets were forcefully deallocated/unaccounted. If the router is facing other problems for which you are contacting your technical support representative copy this error message to as it appears and provide this information too."
SYS3UNWEDGEDISABLED	3-Error	Policy map [chars] has been removed. Leak debugging on interface [chars] disabled.	This is error message indicates that the policy-map configured as filter in an interface for leak debugging has been removed without disabling the filter in the interface.	mem	"If the filter is required on the interface for debugging leaks reconfigure the policy-map and reconfigure the interface for leak debugging"

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYSMEMSUSPENDALLOW	3-Error	[chars] called with request to suspend when it cannot suspend	A process which is currently in a state where it cannot relinquish the CPU invoked a memory management function that can relinquish control of the CPU	Determine the component from the stack trace displayed in the error message. Use Topic to search for a similar DDTS. If you find none submit a DDTS for this problem. Choose the DDTS component associated with the routine that called the memory management function	-
SYS3BAD_TRIPCOUNT	3-Error	Traversed block count crossed the maximum possible count[dec]/[dec] in	A software error occurred. Value of tripcount has been zero or less which is harmful.	-	"Copy the error message exactly as it appears and report it to your "technical support representative."
SYS3BAD_GLIBC_BUF_FREE	3-Error	A glibc buffer is freed in IOS buffer blockmagic: 0x[hec] flags 0x[hec]	A software error occurred. A glibc buffer is freed into IOS buffer pool.	-	"Copy the error message exactly as it appears and report it to your "technical support representative."
SYSNVRAMINI_WAITIME	7-Debug	Waited [dec] seconds for NVRAM to be available	The amount of time spent waiting during bootup before NVRAM was available.	-	"This is a debug message."
SCHED-2-NOATTR	2-Critical	Attempt to [chars] unknown process attribute [dec].	Each process has various attributes associated with it. This message indicates that an attempt was made to set or get a nonexistent process attribute.	-	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SCHED-2-ATTRCMD	2-Critical	Attempt to [chars] attribute [chars] on process [dec].	Each process has various public and private attributes associated with it. This message indicates that an attempt was made to set or get a private attribute belonging to another process.	-	LOG_STD_ACTION
SCHED-2-ATTRVALUE	2-Critical	Attempt to set bad [chars] value [hec] on process [dec]	Each process has various attributes associated with it. This message indicates that an attempt was made to set the specified attribute to an invalid value.	-	"Copy the error message exactly as it appears and report it " "to your technical support representative."
SCHED-3-SEMLOCKED	3-Error	[chars] attempted to lock a semaphore already locked by itself	Some sections of code use semaphores to protect critical sections of software. This message indicates that an attempt was made to lock a semaphore that was already locked.	-	"Copy the error message exactly as it appears and report it " "to your technical support representative."
SCHED-2-SEMUNLOCKED	2-Critical	[chars] attempted to unlock an unlocked semaphore	Some sections of code use semaphores to protect critical sections of software. This message indicates that an attempt was made to unlock a semaphore that was not locked.	-	"Copy the error message exactly as it appears and report it to your technical support representative."
SCHED-2-SEMUNLOCK	2-Critical	[chars] attempted to unlock semaphore owned by [chars] PID: [dec].	-	-	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SCHED-2-EDISMSCRIT	2-Critical	Critical/high priority process [chars] may not dismiss.	Scheduler was running for a long time and so caused the system to reset	os	LOG_SID_RECUR_ACTION
SCHED-7-WATCH	7-Debug	Attempt to [chars] uninitialized watched [chars] address [hec].	A processes can register to be notified when various events occur. This message indicates that an attempt was made to register for an event without first creating the data structure for that event.	-	LOG_SID_RECUR_ACTION
SCHED-2-NOWATCHIMER	2-Critical	[chars] timer [hec] not being watched.	A process can register to be notified when various events occur in the\n\n router. This message indicates that an attempt was made to deregister a \n\n timer expiration event that is not currently registered.	-	"Copy the error message exactly as it appears and report it\n\n to your technical support representative."
SCHED-2-QUEUEEMPTY	2-Critical	Attempt to delete non-empty watched queue [chars] address [hec].	A process can register to be notified when various events occur in the\n\n router. This message indicates that an attempt was made to destroy a queue that\n\n still contained items. These items are lost and not returned to free\n\n memory.	-	"Copy the error message exactly as it appears and report it\n\n to your technical support representative."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SCHED2SEIHIGHORCRIT	2-Critical	Attempt to set [chars] priority on process [dec] [chars]	Each process executes at a specified priority level. Higher priority processes must use the new scheduler primitives while lower priority processes can use primitives from either the new or old scheduler. This message indicates that an attempt was made to set the specified priority too high for a process using old scheduler primitives.	-	"Copy the error message exactly as it appears and report it to your technical support representative."
SCHEDUNEXHCHEVENT	3-Error	Process received unknown event maj [hec] min [hec].	A process can register to be notified when various events occur in the router. This message indicates that a process received an event it did not know how to handle.	-	"Copy the error message exactly as it appears and report it to your technical support representative."
SCHEDUNEXHCHEQUEUE	3-Error	Queue event for unknown queue index [dec].	A process can register to be notified when various events occur in the router. This message indicates that a process received a queuing event for an unknown queue.	-	"Copy the error message exactly as it appears and report it to your technical support representative."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SCHED-3-EXPIREDTIMER	3-Error	Unknown timer expiration timer = [hec] type [dec].	A process can register to be notified when various events occur in the\n\n router. This message indicates that a process received a timer\n\n expiration event for an unknown timer.	-	"Copy the error message exactly as it appears and report it\n\n to your technical support representative."
SCHED-3-EXPIREDMESSAGE	3-Error	Unknown message [hec] received ptr arg [hec] num arg [hec].	A process can register to be notified when various events occur in the\n\n router. This message indicates that a process received a message from\n\n another process that it does not know how to handle.	-	"Copy the error message exactly as it appears and report it\n\n to your technical support representative."
SCHED-3-STACKSIZE	3-Error	Illegal stack size [dec] specified for process [chars].	Each process has its own stack space which must be one of several predefined sizes. This message indicates that an attempt was made to specify an illegal stack size.	-	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SCHED-3-PRIORITY	3-Error	Illegal priority [dec] specified for process [chars].	Each process executes at a specified priority level. Higher priority processes must use the new scheduler primitives while lower priority processes can use primitives from either the new or old scheduler. This message indicates that an attempt was made to set the specified process to a priority level that is not allowed for the type of scheduler primitives used.	-	"Copy the error message exactly as it appears and report it to your technical support representative."
SCHED-3-PAGEZERO	3-Error	Low memory modified by [chars] [hex] = [hex]	In all Cisco products the first 256 bytes of memory are unused and are off limits. Newer platforms have hardware to immediately trap reads or writes to this area. Older platforms periodically check this memory. This message appears only on older platforms and indicates that this off-limits memory area was modified.	-	"Copy the error message exactly as it appears and report it to your technical support representative."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SCHED3-LOSTWAKEUP	3-Error	Wakeup information for process [chars] lost maj [hec] min [hec].	A process can register to be notified when various events occur in the router. This message indicates that an event for the specified process was lost and that the system might not be functioning correctly.	-	-
SCHED3-STUCKTMR	3-Error	Sleep with expired timer [hec] time %#Ta %TE ago.	A process can register to be notified when various events occur. This message indicates that a registered timer has expired and its value is unchanged after the process has received control twice.	-	-
SCHED3-STUCKMIMR	3-Error	Sleep with expired managed timer [hec] time %#Ta %TE ago.	A process can register to be notified when various events occur. This message indicates that a registered timer has expired and its value is unchanged after the process has received control twice.	-	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SCHED-3-THRASHING	3-Error	Process thrashing on watched [chars].	A process can register to be notified when various events occur. This message indicates that the indicated process relinquished control 50 consecutive times and there were still outstanding events to be processed.	-	-
SCHED3STILLWATCHING	3-Error	Process still watching [chars] [chars]	A process can register to be notified when various events occur in the\n\ router. This message indicates that a process destroyed a set of\n\ events without first individually removing each event in the set.	-	"Copy the error message exactly as it appears and report it\n\ to your technical support representative."
SCHED3STILLWATCHINGT	3-Error	Process still watching [chars] timer [hec]	A process can register to be notified when various events occur in the\n\ router. This message indicates that a process destroyed a set of\n\ events without first individually removing each event in the set.	-	"Copy the error message exactly as it appears and report it\n\ to your technical support representative."
SCHED-3-CORRUPT	3-Error	Scheduler '[chars]' corrupted by process [chars] expected [hec] found [hec]	-	-	-
SCHED3NISETWAKEUP	3-Error	Invalid scheduler action [chars] at interrupt level	This message indicates that a <code>process_set_wakeup_reasons</code> was attempted from an interrupt handler.	-	"If this message recurs call your technical support representative for "assistance."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SCHED-2-MESSAGE	2-Critical	Key [chars] does not match key [chars] of process [dec] in process_send_message request	An attempt was made to send a message to a process. The key associated with that process did not match the key in the message. This usually means an incorrect process id was used in the send message request.	Determine the component by extracting the first word in the first set of parantheses	-
SCHED-4-PROCESSTIME	4-Warning	Invalid argument [dec] msec for process_set_schedtime	This message indicates that there was an attempt to change the maximum time a process can run per scheduling to an invalid value. The value should range between 20msec to 200msec	Determine the component from the process name and the stack trace from the error message	-
SCHED-4-NO-REMP-CTX	4-Warning	[chars] is preempting [chars] without preemption context. Preemption is [chars] and [chars]. preempted_process_epc = 0x%p	This message indicates that the IOS scheduler is preparing to schedule a preemptive process but the preempted process does not have a preemption context allocated to it.	-	-
SCHED-5-INT-REMP-EN	5-Notice	Detected interrupts being disabled in preemption handler. schedflag = [dec] forkx = [chars] preempted process = [chars]	This message indicates that the interrupt enable bit is unexpectedly found to be disabled in preemption handler before servicing the ready to run preemptive processes.	-	"If this message recurs just report it your technical support " "representative. However the functionality is not impacted. "

E_CFM_6_MAX_MEP_EXCEED	6-Information	Maximum MEPs threshold exceeded in [chars] for domain [chars] service [chars] mac [enet] mpid [dec]	The number of remote MEP entries in CC database has exceeded the maximum MEPs configured. The current remote MEP is not saved in the CC database.	ethernet-cfm	"Verify that the correct number for maximum MEPs is specified in the " "configuration. If correct number of maximum MEPs is configured " "verify if any unexpected remote MEP is not part of the service via " "'show ethernet cfm maintenance remote' or 'show ethernet cfm mpdb' " "command"
E_CFM_6_REMOTE_MEP_UP	6-Information	Continuity Check message is received from a remote MEP with mpid [dec] [chars] MA name [chars] domain [chars] interface status [chars] event code [chars].	A CC message is received from remote MEP which is up. Event code: New: A remote MEP first comes up that is when we receive a CC message from the remote MEP for the first time. Event code: Returning: The device receives a CC message from a MEP for which it has an expired CCDB entry. Event code: PortState: The device receives a CC message from a remote MEP for which it has a valid CCDB entry and the message indicates a port status change This message may be for a particular vlan or evc with the corresponding MA.	ethernet-cfm	"Information message only."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
ECM REMOTE_MEP_DOWN	3-Error	Remote MEP mpid [dec] [chars] MA name [chars] in domain [chars] changed state to down with event code [chars].	The entry in CCDB corresponding to this MEP times out or the device receives a CC message with zero hold-time Event code: LastGasp: A valid Continuity Check message with a zero hold-time is received from a remote MEP and the device either has a valid non-expired CCDB	ethernet-cfm	"Check the remote CFM configurations using CFM " " utilities like traceroute and ping."
ECM CROSS_CONNECTED	3-Error	Continuity Check message is received from remote MEP mpid [dec] with service MA name [chars] [chars] MAC: [enet] for service MA name [chars] of domain [chars] level [dec].	The Continuity Check message whose MA name or MA level is different from what is locally configured on the device for the given EVC or VLAN thereby indicating that there is a potential for having a cross-connected service in the network.	ethernet-cfm	"Configure the CFM MA name or MA level properly across " "the network."
ECM FORWARDING_LOOP	3-Error	Continuity Check message is received with same source MAC [enet] and mpid [dec] [chars] of its own in the MA name [chars].	The device is receiving its own CC messages for a particular vlan or evc within the same MA.	ethernet-cfm	"Configure the CFM maintenance points properly " "to avoid the forwarding loop."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
E_CFM3CONFIG_ERROR	3-Error	CFM mis-configuration in the network. Continuity-check message is received from mac-address [enet] with duplicated mpid [dec] as configured locally for service MA name [chars] with [chars] of domain [chars].	The same MPID as a locally configured MEP but different source MAC Address than its own. The maintenance name can be either maintenance domain or maintenance association. This message may be for a particular vlan or evc with the corresponding MA.	ethernet-cfm	"Configure the CFM maintenance end points properly " "by giving unique mpid in a particular maintenance " "domain or association."
E_CFM3CROSSCHECK_MISCONF	3-Error	The device does not receive any CC messages from a remote MEP with mpid [dec] MA name [chars] that it was expecting to be part of the [chars] in the domain [chars].	The configured remote MEP does not come up during the cross-check start timeout interval. This message may be for a particular vlan or evc with the corresponding MA.	ethernet-cfm	"There could be a possible fault in the network. " "Check the CFM cross check configurations are " "proper. "
E_CFM3CROSSCHECK_UNKNOWN	3-Error	The device received a CC message from a remote MEP having mpid [dec] [chars] with MAC: [enet] that it was not expecting to be part of the MA name [chars] in the domain: [chars].	The received remote MEP is not there in the static list configured. This message may be for a particular vlan or evc with the corresponding MA.	ethernet-cfm	"Check whether the CFM crosscheck configurations " "are proper."
E_CFM3CROSSCHECK_SERVICE	6-Information	The device received CC messages from all remote MEPs within a given MA name [chars] in the maintenance domain [chars].	The service configured either MA is up as it receives CC messages from all remote statically configured MEPs.	ethernet-cfm	"Information message only."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
E_CFM3FAULT_ALARM	3-Error	A fault has occurred in the network for the local MEP having mpid [dec] [chars] for service MA name [chars] with the event code [chars].	This indicates a fault in the network. Event code: RDICCM: Remote MEP has reported RDI in CCM Event code: MACstatus: The last CCM received by this MEP from some remote MEP indicated that the transmitting MEP's associated MAC is reporting an error status via the Port Status TLV or Interface Status TLV. Event code: RemoteCCM: This MEP is not receiving CCMs from some other MEP in its configured list. Event code: ErrorCCM: This MEP is receiving invalid CCMs. Event code: XconCCM: This MEP is receiving CCMs that could be from some other MA.	ethernet-cfm	"There could be a possible fault in the network. " "Check whether the cfm configurations are proper."
E_CFM2CAPABILITY_UPDATE	2-Critical	Platform has indicated an invalid capability update which has been ignored.	Platform code has indicated that its capabilities have changed based on a configuration knob but the updated values were inconsistent.	ethernet-cfm	"This likely indicates a programming error in Platform code but should " "not present a problem unless either of MA Alias and SLM over xconnect " "features are required. See documentation for this platform/release."

LOCALDRCONFSECY	4-Warning	Inconsistent LISP routing locator configuration detected in the local EID database for instance-ID [dec] [chars] address family.	All the LISP local EID prefixes for an address family must be configured with the same set of routing locators. LISP detected that there are routing locators configured on some local EID prefixes and not on other local EID prefixes of the same address family.	-	"Issue the <CmdBold>show {ip ipv6} lisp database" <noCmdBold> command and look for routing "locators marked as <CmdBold>missing</CmdBold>" "Configure the missing routing locators for the "remaining local EID prefixes. If a routing locator" "must not be used for inbound traffic to a local "EID prefix then a priority of 255 can be "specified."
LISPROUTE_MCRRT_WARN	4-Warning	LISP [chars] RIB import warning[chars] [chars] reached [dec] routes limit set to [dec].	-	-	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
ISPCMDRIBEVENTD	4-Warning	LISP [chars] RIB [chars] route import events dropped after reaching queue size of [dec]. Re-evaluation scheduled in [dec] minutes.	The transient event queue used by LISP to store received RIB route import events reached the limit specified through the <CmdBold>{ipv4 ipv6} route-import maximum-prefix <limit><noCmdBold> configuration. Subsequent RIB events were dropped. There may now be an inconsistency between the routes present in the RIB and those imported by LISP. A re-evaluation of LISP route import for the affected EID table has been scheduled to attempt to automatically recover from this condition.	-	"Modify the LISP <CmdBold>route-import <CmdBold> " "configuration for the specified EID table to " "apply a route-map that only allows the desired RIB " "routes. If more routes are desired than the " "current limit you can increase it through the " " <CmdBold>route-import <CmdBold> command. If " "error was a transient condition in the RIB you can " "force a re-evaluation of route import through the " "<CmdBold>clear {ip ipv6} lisp route-import" "<noCmdBold>"
ISPCALHDNORCUIE	4-Warning	No route to local EID database prefix [chars].	There is no RIB route that covers or is a more specific of the configured local EID database prefix. This means that the ETR will not be able to forward decapsulated packets to their destination.	-	"Check the network connectivity and routing " "configuration within the LISP site and re-establish " "a route to destinations covered by the configured " "EID prefix."

Family-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
IP4-EXTRLOC_NOTIFY	4-Warning	[chars] RLOC [chars] in EID database configuration in record for [chars] from [chars].	While probing other xTRs in our own site we received a map reply mapping record listing a different set of locators than those we have configured in database commands.	-	"Issue the <CmdBold>show {ip ipv6} lisp database" "<noCmdBold> command on both this xTR and the other " "site xTR that sent us the map reply to locate the " "mis-configuration. Add or remove locators in the " "config of one or both xTRs to make them have the " "same list of configured locators."
IP4-IPLOC_NOTIFY	5-Notice	Map request received for EID[chars] but map server does not	This message is to alert the user to the fact that a map request for an EID prefix is received by the map server and it doesn't have reachability to any ITR or ETR that registered this prefix so it cannot provide a useable locator to complete the EID-to-locator mapping.	-	"Normally this should not happen but if this " "condition persists it shows a connectivity problem " "between the map server and locators connected to the " "network."
LISP4-CEF_DISABLED	4-Warning	Disabling [chars] CEF will impact configured LISP functionality.	CEF has been disabled whilst LISP has configuration which depends on CEF being enabled.	-	"Re-enable CEF using the command " "<CmdBold>{ip ipv6} cef [distributed]<noCmdBold>!"
IP4-SUPPORT_LOCAL_RLOC	4-Warning	This platform does not support local [chars] RLOCs [chars] will be marked as down.	The platform has indicated it does not support local RLOCs of this address family.	-	"Deconfigure the RLOC or move it to another xTR at " "the site which does not have this platform " "limitation."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
INFO <u>DDT</u> BAD <u>XIR</u> NONCE	6-Information	DDT resolver received two Map-Requests from [chars] for different EID prefixes but with the same nonce.	An xTR issuing LISP Map-Requests includes a nonce value in each request. The xTR must use a different nonce value for each Map-Request for a new EID prefix. The identified xTR has sent us two Map-Requests each for a different EID prefix and they both carried the same nonce value. When querying the DDT hierarchy duplicate nonce values prevent the DDT resolver from associating received Map-Referral messages with the correct request. To protect against this problem the DDT resolver has dropped the second of the two received requests.	-	"Contact the operator of the ITR that is issuing " "the Map-Requests so that they can fix the problem " "by upgrading their system."
WARN <u>MAP</u> CACHE THRESHOLD	4-Warning	The LISP map-cache limit warning threshold [dec]/[dec] entries for instance-id [dec] has been reached.	-	-	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
IBM MAPCACHECREATEFAIL	4-Warning	Failed to create map cache entry for EID prefix [chars] under Lisp instance-id [dec] Cause: [chars]	This message is a notification that the map cache creation for an EID prefix has failed. Probable reasons could be failure to create or lookup a corresponding map cache entry due to inconsistent states low memory conditions or commonly if map-cache-limit is explicitly set to a low value. If the cache size limit is reached new entries will replace old/inactive ones as required. If the map-cache limit is set too low actively used EID-to-RLOC mappings may be replaced continuously which causes traffic to be dropped while these mappings are re-	-	"If this limit is reached and traffic drops are " "experienced consider re-evaluating the map-cache " "limit and configure a higher limit."
IBM MAPDYNMAPPINGREACHED	4-Warning	The LISP dynamic database-mapping limit[chars] [dec]/[dec] dynamic entries for eid-table [chars] has been reached.	-	-	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
BDAM/PC/MR/RE	4-Warning	The LISP database-mapping platform limit of [dec] has been reached. Current count is [dec].	This message is a warning that the local database size has hit the platform limit. The limit may be reached during normal operation if a xTR discovers a large number of dynamic hosts in the EID-prefix ranges enabled for dynamic learning. If the dynamic local database size limit is reached new hosts will not be discovered. It is worth noting that it is normal for the local database to have a limit for dynamic entries for example to set an upper limit on the amount of memory required. To diagnose this issue it may be helpful to inspect the local database using show ip[v6] lisp [eid-table <vrf>] database. The entries can also be cleared with clear lisp[eid-table <vrf>] dynamic-eid.	-	"If this warning persists and traffic drops are " "experienced please contact TAC."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
ENMISPCOMLRAD	4-Warning	The LISP [chars] EID warning limit greater than [dec] percent for platform	This message is a warning that the EID resource size has hit the platform warning limit. The limit may be reached during normal operation if a xTR has a large number of Local hosts/and or Remote map-caches entries. To diagnose this issue it may be helpful to inspect the platform resource usage using show lisp platform	-	"If this warning persists traffic drops can be " "experienced please contact TAC."
ENMISPCOMLRAD	4-Warning	The LISP [chars] EID platform limit [dec] percent has been reached.	This message is a warning that the EID resource size has hit the platform limit. The limit may be reached during normal operation if a xTR has a large number of Local hosts/and or Remote map-caches entries. To diagnose this issue it may be helpful to inspect the platform resource usage using show lisp platform	-	"If this warning persists traffic drops can be " "experienced please contact TAC."
ENMISPCOMLRAD	4-Warning	The LISP [chars] configured Local EID limit [dec] has been reached.	-	-	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
ISAECHDVCNRCBDD	4-Warning	The LISP [chars] EID platform limit reached. Remote EID eviction triggered to make space for Local EIDs. The eviction will continue till the Local EID Reserved [dec] percentage is reached.	-	-	-
ISERSDMEEDOCF	4-Warning	Configured site-registration limit [dec] is less than or equal	The newly configured limit is less than the current count of registrations.	-	"Issue <CmdBold>clear lisp <id> site<noCmdBold> for " "limit to take immediate effect."
ISERSDMEEDDD	4-Warning	Configured site-registration limit [dec] has been reached or	Map-server cannot create any more site registrations which are not explicitly configured. Consequently at least one map-register has been dropped.	-	"Increase the site registration limit using " "<CmdBold>site-registration limit <limit><noCmdBold> " "or limit the number of registrations from ETRs."
ISERSDNIWANG	4-Warning	Configured site-registration warning threshold [dec]/[dec] > [dec]%%	Site registration count has reached or exceeded the configured threshold. This is used to warn the administrator that corrective action may need to be taken to avoid reaching the configured site registration limit.	-	"No immediate action is required. Administrator may " "want to consider whether ETR registrations should " "be limited or capacity provisioned to accomodate " "growth in registration count."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
MAPSERVER	4-Warning	[dec] IID [dec] Failed to receive map-notify from map-server [chars]	This implies the map-server may not have received/processed the map-register from this ETR or the map-server failed to successfully deliver the map-notify to the ETR.	-	"Ensure map-server is configured to accept " "map-register for this EID prefix ETR is " "configured with the correct map-server key and " "bidirectional traffic can flow between ETR and " "map-server."
MAPSERVER	5-Notice	[dec] IID [dec] Map-resolver [chars] is [chars].	No route to reach map-resolver hence map-cache will not get resolved.	-	"Ensure ITR has connectivity to map-resolver."
MAPSERVER	5-Notice	[dec] IID [dec] Map-server [chars][chars] is [chars].	No route to reach map-server so local EID database prefix will not get registered.	-	"Ensure ETR has connectivity to map-server."
PROXY	5-Notice	[dec] IID [dec] Proxy ETR [chars] is [chars].	No route to reach proxy ETR so traffic drop is expected.	-	"Ensure router has connectivity to proxy ETR."
MAPSERVER	6-Information	[dec] IID [dec] Map-Server site [chars] all registrations expired	-	-	-
MAPSERVER	5-Notice	[dec] IID [dec] No site configuration to accept	No site is configured to accept registration for EID prefix.	-	"Configure EID prefix in map-server site to "enable registration."
MAPSERVER	5-Notice	[dec] IID [dec] Site [chars] Failed to authenticate map-register for	Map-server failed to authenticate map-register for EID prefix. This is potentially caused by different shared keys configured on ETR and map-server.	-	"Ensure ETR and map-server have the same " "configured shared key."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
BA/PS/RS/EDR/MAH	5-Notice	[dec] IID [dec] Site [chars] Allowed locator mismatch in map-register	The map-register contains RLOC that is not in the site's allowed locator list.	-	"Ensure map-server has the registering RLOCs " "added to the site's allowed locator list."
BA/PS/RS/EDR/KIM	4-Warning	[dec] IID [dec] Site [chars] Map-server site dynamic EID prefix	Map-server cannot create any more dynamic EID prefix entry result accept-more-specifics. Consequently the map-register is not processed.	-	"Increase the map-server dynamic EID prefix " "entry limit."
BA/PS/RS/EDR/ROD	4-Warning	[dec] IID [dec] Site [chars] Map-server site dynamic EID prefix	Dynamic EID prefix entry count has reached or exceeded the configured threshold. This is used to warn the administrator that corrective action may need to be taken to avoid reaching the map-server EID prefix limit.	-	"No immediate action is required unless the " "entry count is very close to the configured " "limit at which point the limit on the map-server " "needs to be adjusted."
BA/PS/RS/EDR/MCG	4-Warning	Configured limit [dec] is less than current EID prefix count	The newly configured limit is less than the current EID prefix count.	-	"Issue \"clear lisp site\" for limit to " "take effect."
BA/PS/RS/EDR/PAM	4-Warning	Map-server site EID prefix entry platform limit for [chars] is reached [dec]: prefix [chars] in [dec] IID [dec] Site [chars] blocked	-	-	-
BA/PS/RS/EDR/PAM	4-Warning	Map-server Extranet policy EID platform limit for [chars] is reached [dec]: prefix [chars] in [dec] IID [dec] Extranet [chars] blocked	-	-	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action

CHKPT-3-IPCSESSION	3-Error	Unable to open an IPC session with [chars]	A severe checkpointing error occurred as the system was unable to establish an interprocess communications session between the Active and the Standby peers.	checkpoint	"As this failure hinders any communication from taking place " "between the Active and the Standby peers reset the Standby. " "If the error persists" LOG_SIDSH_TECH_ACTION
CHKPT-3-RFREG	3-Error	Unable to register checkpoint as client of RF.	This is a severe error as far as checkpointing is concerned	checkpoint	LOG_SIDSH_TECH_ACTION
CHKPT-4-INVALID_CLIENT	4-Warning	Invalid checkpoint client ID [dec].	The client id is invalid. This error has occurred since the corresponding client is not present.	checkpoint	LOG_SIDSH_TECH_ACTION
CHKPT-4-INVALID_ENTITY	4-Warning	Invalid checkpoint entity ID [dec].	The entity id is invalid. This error has occurred since the corresponding entity is not present.	checkpoint	LOG_SIDSH_TECH_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
CHKPT-4-DUPID	4-Warning	Duplicate checkpoint client ID [dec].	A checkpoint client is using a client ID which is already assigned to another client. This could be due to a synchronization delay which will typically resolve itself. This would happen when an already registered Checkpointing Facility client again tries to add itself.	checkpoint	LOGSIDSHTTECHACTION
CHKPT-3-NOMEM	3-Error	Unable to allocate resources for CF on [chars].	This error occurs when there are no memory resources available. This is a severe error as far as check pointing is concerned	checkpoint	"Reduce other system activity to ease memory demands. Add more memory. " "If enough memory is available try to see whether the problem goes away " "by reloading the router. If not then" LOGSIDSHTTECHACTION
CHKPT-3-ILLEGAL	3-Error	ILLEGAL call to CF API by client [dec] on the [chars] system	An illegal API call was made by a CF client	checkpoint	"Find out the offending client using " LOGSIDSHTTECHACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
CHKPT3UNKNOWNMSG	3-Error	Unknown message received from peer on the standby for client [dec].	This is a severe error as far as check pointing is concerned. This will be caused when one of the peers can some checkpoint message types that the other side does not understand. This is caused due to a software error as the set of messages being exchanged by either side must be the same.	checkpoint	LOGSIDSHTECHACTION
CHKPT4-DISABLED	4-Warning	Check Pointing is disabled. Client [chars] should not be calling any CF API	This is mainly a warning and might be due to timing issue	checkpoint	LOGSIDSHTECHACTION
CHKPT3TRANSMIT_FAILED	3-Error	Checkpointing message transmission failure [chars]	-	-	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
CHKP_MSG_COMPATIBLE	3-Error	Checkpointing message type not compatible	Checkpointing messages are used to carry encoded information for transfer between various High-Availabilty clients. For example to synchronize state information between redundant route processor units. An error was detected when verifying the checkpointing message type compatibility between checkpointing client peers. The failure most likely occurred because of a software error. The system state between one or more checkpointing clients might not be properly synchronized.	checkpoint	"show checkpoint client"
CHKP_RECV_HEADER_FAILED	3-Error	Checkpointing receive message header transformaton failed [chars]	-	-	-
CHKP_XMIT_HEADER_FAILED	3-Error	Checkpointing transmit message header transformaton failed [chars]	-	-	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
CHKPT3ISSU_NEGO_FAILED	3-Error	Checkpointing Facility failed to start ISSU negotiation with the peer [chars]	Checkpointing Facility was unable to start the ISSU negotiation successfully. ISSU negotiation is done during system initialization or if the Standby system is signing in with the Active system. The failure to start negotiation is a fatal error condition and most likely occurred because of a software error.	checkpoint	"show tech"
CHKPT4GET_BUFFER	4-Warning	Checkpointing ISSU failed to get buffer. Dest seat id 0x[hec]	Checkpointing ISSU failed to get a buffer. This is due to the dearth of memory resources.	checkpoint	"Upgrade the memory. If the error " "persists " LOG_SIDSH_TFH_ACTION
CHKPT4FREE_BUFFER	4-Warning	Checkpointing [dec] failed to free buffer	Checkpointing failed to free a buffer. This may cause leak in memory resources.	checkpoint	LOG_SIDSH_TFH_ACTION
CHKPT4MSG_SEND	4-Warning	Checkpointing ISSU failed to send message. Dest seat id 0x[hec]	Checkpointing ISSU failed to send nego message to peer. This will be due to an out of memory condition communication with the peer being severed	checkpoint	LOG_SIDSH_TFH_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
CHKPT-4-INIT	4-Warning	Checkpoint [chars] initialization failed in RF state [chars]	Checkpointing initialization has failed This is software error caused by an out of memory condition as there aren't enough resources available to set up the initialization data structures	checkpoint	"Upgrade the memory. If the error " "persists " LOG_STD_ACTION
CHKPT-3-INVALID_CALLBACK_ARG	3-Error	Attempt to add a checkpointing client with an invalid [chars] argument	Checkpointing messages are used to carry encoded information for transfer between various High-Availabilty clients. For example to synchronize state information between redundant route processor units. An invalid argument was supplied to an internal API. The failure most likely occurred because of a software error. The message output identifies the type of error that occurred. The system state between one or more checkpointing clients might not be properly synchronized.	checkpoint	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
CHKPT-3-TIMER	3-Error	[chars]	Checkpoint Facility was unable to retrieve the correct context for a previously saved message descriptor. This is most likely a software error caused by possible memory corruption.	checkpoint	LOG_STD_ACTION
CHKPT4PAK_RECLAIM	4-Warning	Failed to reclaim packet from Packet Manager client [chars]	After the message send failed the CF client was unable to reclaim the packet to be able to free the message.	checkpoint	LOG_STD_ACTION
CHKPT4PAK_MGR_CONN	4-Warning	Failed to connect to the Packet Manager	During Checkpoint initialization unable to create a connection to the Packet Manager. This could result in the CF infra unable to access shared memory in the client context using a virtual address.	checkpoint	LOG_STD_ACTION
CHKPT3CHKPT_MGNULL	3-Error	The chkpt message has an empty data buffer	This is a severe error as far as checkpointing is concerned. The chkpt message's data buffer is NULL indicating that there were no memory resources to assign while getting a buffer.	checkpoint	"Check whether this error goes away when the "memory is increased else " LOG_SIDSH_TRCH_ACTION
CHKPT3SYS_MGR_LOOKUP	3-Error	Failed to get process Job ID from SysMgr	Failed to get the Job ID for this ION process from SysMgr. The	checkpoint	"show tech"

ATMCR INTERNAL_WARNG	4-Warning	[chars]	The ATM core redundancy subsystem encountered an internal software error. The error message contains text which can be used to help identify the nature of the problem.	-	LOG_SIDSH_TECH_ACTION
ATMCR INTERNAL_CRITICAL	2-Critical	[chars]	The ATM core subsystem encountered an internal software error. The error message contains text which can be used to help identify the nature of the problem.	-	LOG_SIDSH_TECH_ACTION
ATMCR INTERNAL_ERRR	3-Error	[chars]	The ATM core subsystem encountered an internal software error. The error message contains text which can be used to help identify the nature of the problem.	-	LOG_SIDSH_TECH_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
AIMCORE INTERNAL_WARNING	4-Warning	[chars]	This warning is generated by the ATM core subsystem to the user. This could arise because the user request may not be granted due to some existing configuration on the device. This message serves as an alert to the user. This message contains text which can be used to help identify the nature of the problem.	-	LOGS_IDSHTTECH_ACTION
AIMCORE AIMSYS_ERROR	4-Warning	[chars]	The ATM core subsystem encountered an internal software error. The error message contains text which can be used to help identify the nature of the problem.	-	LOGS_IDSHTTECH_ACTION
AIMCORE CONFIG_ERROR	4-Warning	Configuration Error: [chars]	This message indicates a configuration error. The message will display more specific information about the problem location.	-	"Change the configuration to correct the error."
RAC-3-RACNOIPL	3-Error	Can not find lease information for interface [chars]	Internal error - DHCP lease information is missing for the interface	-	"Report the problem and how it can be reproduced to Cisco TAC"
RAC-3-RACNOQ	3-Error	Can't create RAC work queue	Internal error - probable cause is insufficient memory resources	-	"Check available memory."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
RAC-3-RACIPL	3-Error	DHCP is already running on interface [chars]	The interface already has a DHCP originated address via some other system mechanism	-	"Verify the system configuration"
ACCHNQA/ACCHNY	5-Notice	Port[chars]: Received the same priority[dec] as the peer device	Auto-IP Ring feature requires two neighbor devices to exchange different Auto-IP priority for IP auto-negotiation to happen. If they advertise the same Auto-IP priority then the IP auto-negotiation will not happen. This may indicate that the ring ports of the two devices are either wrongly wired or there is a missing seed configuration.	auto_ip_ring	"Use the 'show auto-ip-ring' or 'show run' command" " on both devices to view the IP addresses of the ring ports and the" " advertised/received Auto-IP priorities. If the Auto-IP priority is both 2" " or both 0 it represents a faulty wire connection that can be fixed by" " switching the two ring ports on one of the devices as necessary." " If the Auto-IP priority is both 1 there are two possibilities based on" " the mode. In pre-config mode manually configure an IP address on one" " device to start the Auto-IP negotiation. In auto-config mode if the" " Auto-IP server is reachable then configure 'auto-ip-ring <ring-d> seed'" " on one ring port of the device."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
ATCRNGIP/ADRS	5-Notice	Neighbor device advertised the same configured Auto-IP address[inet]	Auto-IP Ring feature requires each device to configure a unique auto-ip address different from those on other devices. The local device is configured with an Auto-IP address. However the local device has also received the same Auto-IP address from a neighbor device. This may indicate that two devices are configured with the same Auto-IP address.	auto_ip_ring	"Use the 'show auto-ip-ring' or 'show run' command" " on both devices to view the configured Auto-IP address. If two edge" " devices show the same configured Auto-IP address then the duplicate" " configured Auto-IP address needs to be removed."
ATCRNGIP/DRCS	5-Notice	IP address[inet] is assigned to the ring port[chars] successfully	IP address is assigned to the ring port successfully.	auto_ip_ring	"Use the 'sh ip interface' or 'show run' command" " to view the IP address of the ring port."
ATCRNGIP/DRCS	5-Notice	IP addresses[inet]/31 [inet]/31 are assigned to the ring ports[chars] [chars]	IP addresses are assigned to the ring ports and the device is inserted into the ring successfully	auto_ip_ring	"Use the 'show auto-ip-ring' or 'show run' command" " on the device to view the configured IP addresses on the ring ports."
ATCRNGIP/DRCS	5-Notice	IP address[inet]/31 is assigned to the ring port[chars] and	IP address is assigned to the ring port and the device is added to the ring successfully	auto_ip_ring	"Use the 'show auto-ip-ring' or 'show run' command" " on the device to view the configured IP address on the ring port."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
AUTO-IP-NO-LLDP	5-Notice	port [chars]: lldp not enabled for interface please enable lldp on	Auto-ip depends on lldp to communicate with it's peer. So configure lldp before auto-ip configuration	auto_ip_ring	"Configure 'lldp run' in global config mode and" " check 'sh lldp neighbors'"
AUTO-IP-NO-ADDRESSES	5-Notice	Free IP addresses are not available in the Auto-IP Server pool. Configure additional pools to get IP addresses for the requesting	The Auto-IP server is configured with pools of Auto-IP addresses. The IP addresses are assigned to the requesting ring ports. The Auto-IP address pool is exhausted and there are no more free addresses.	auto_ip_ring	"Configure additional address pools in the" " Auto-IP server by using the configuration command" " 'auto-ip-ring server' and the sub command" " 'ipv4-address-pool <auto-ip-base-address> <num of nodes in ring>"
BEEP-3-SLOG_LINE	3-Error	[chars] [chars]	This is an internal BEEP library error message.	beep	LOG_STD_ACTION
BEEP-3-SLOG_LINE_TB	3-Error	[chars] [chars]	This is an internal BEEP library error message.	beep	LOG_STD_ACTION
BEEP-3-SESSION_ERR	3-Error	[chars] at [chars]:[dec]	The BEEP subsystem had an error and may stop running.	beep	LOG_STD_ACTION
BSC-3-BADPEERTYPE	3-Error	Peer [chars] is incorrect type	This message occurs only when BSC local-ack is configured. It\n indicates the serial interfaces that are using the BSTUN tunnel are\n configured incorrectly that is both have been configured as a\n secondary.	-	"Reconfigure the serial interfaces correctly to be a primary and\n secondary pair."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
BSC-2-NOMEM	2-Critical	No buffers available on interface [chars].	This message indicates that memory in the router was exhausted.	-	"Perform diagnostics on the router to locate the subsystem or interface responsible for consuming memory. The only method that will clear this situation is to reload the router."
BSC-3-BADLINESTATE	3-Error	Line state Tx when receiving [chars] on line [chars]	An unexpected receive occurred during a transmission.	-	"Verify that the line has been consistently defined in regards to the carrier. If a message report was sent hard-on stop and start the bisynchronous interface in question."
BSTUN-4-DUPROUTE	4-Warning	Cannot define duplicate route on the same group	This route command is defined on another interface belonging to the same group. Cannot define duplicate route on the same group	-	"Consider defining a new group and moving this interface onto that group"
BSTUN-4-PEERSTATE	4-Warning	Peer [chars] wrong state [dec] [dec]	An internal software error occurred.	-	LOG_SID_RECUR_ACTION
BSTUN-3-BADMAGIC	3-Error	[chars]: wrong magic mine [hec] theirs [hec] [dec]	An internal software error occurred.	-	LOG_SID_RECUR_ACTION
BSTUN-3-BADMAGICICP	3-Error	[chars]: peer [chars] wrong magic mine [hec] theirs [hec]	An internal software error occurred.	-	LOG_SID_RECUR_ACTION
BSTUN-3-BADLENOP	3-Error	[chars]: bad len or unknown op op [dec] len [dec]	An internal software error occurred.	-	LOG_SID_RECUR_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
BSTUN6TCPPEERSHUT	6-Information	[chars] [chars] [inet][dec]	This route closed a BSTUN connection with a remote peer.	-	"Examine this router to see why it closed this connection with this\n peer. This can be caused by normal events such as reconfiguration."
BSTUN3CONNILLSTATE	3-Error	CONN: Peer [chars] illegal state [dec]	An internal software error occurred.	-	LOG_SID_RECUR_ACTION
BSTUN-3-BADCONN	3-Error	CONN: bad connection [dec] peer: [chars]	An internal software error occurred.	-	LOG_SID_RECUR_ACTION
BSTUN-6-ERR	6-Information	[chars]: [chars]: [chars] op [hec] len [dec]	An internal software error occurred.	-	LOG_SID_RECUR_ACTION
BSTUN-3-SENDPUNT	3-Error	[chars]: sent [chars] to [chars]	An internal software error occurred.	-	LOG_SID_RECUR_ACTION
BSTUN4SENDPUNTICP	4-Warning	[chars]: sent [chars] to [[dec]][inet]	An internal software error occurred.	-	LOG_SID_RECUR_ACTION
BSTUN-6-OPENING	6-Information	CONN: opening peer [chars] [dec]	-	-	LOG_SID_NO_ACTION
BSTUN6CONNOPENFAIL	6-Information	CONN: peer [chars] open failed [chars] [[dec]]	An attempt to connect to a remote TCP BSTUN peer failed.	-	"Verify that the remote peer is accessible from this router that it is\n running software capable of supporting BSTUN and that it is configured\n correctly."
BSTUN3BADPASSIVEOPEN	3-Error	passive open from [inet][dec] -> [dec] failed	An internal software error occurred.	-	LOG_SID_RECUR_ACTION
BSTUN6PASSIVEOPEN	6-Information	passive open [inet][dec] -> [dec]	-	-	LOG_SID_NO_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
BSTUN-6-TCPFINI	6-Information	peer [chars] closed [previous state [chars]]	A remote peer closed a BSTUN connection with this router.	-	"Examine the other router to see why it closed this connection with\n\nthis peer. This can be caused by normal events such as\n\nreconfiguration."
BSIUN6PEERSHUTDOWN	6-Information	shutting down peer [chars] on [chars]	A connection to a remote peer is being shut down. This is typically\n\nthe result of user intervention in BSTUN reconfiguration or disabling.\n\n This is good expected behavior.	-	LOG_SID_NO_ACTION
BSTUN-6-OPENED	6-Information	[chars]: peer [chars] opened [previous state [chars]]	-	-	LOG_SID_NO_ACTION
BSTUN-6-RECONNECT	6-Information	PHDR: reconnect from peer [chars]	A remote peer reestablished a connection to this router.	-	LOG_SID_NO_ACTION
BSTUN-2-NOBUF	2-Critical	Interface [chars] no buffer available to [chars]	A memory shortage existed at the time that the configuration command\n\n was issued. This condition is rare and under normal conditions\n\n temporary.	-	"Reconfigure the BSTUN group. If memory shortages persist call your\n\n technical support representative for assistance."
BSTUN-3-NOGRPDEF	3-Error	No bstun group defined on interface [chars]	An action was taken that requires the previous definition of a BSTUN\n\n group number.	-	"Make sure \"encapsulation bstun\" and the \"bstun group\" have been\n\n defined for the interface."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
BSTUN-3-UNKPROTOEV	3-Error	Unknown protocol event [dec] on interface [chars]	An event passed to the BSTUN layer for processing could not\n be decoded.	-	"Perform a hard restart on the indicated interface."
BSTUN-6-PROCEXIT	6-Information	Process terminating. Due to signal [dec]. Subcode [dec]. Address [hec].	The BSTUN background process is terminating.	-	"If this message appears while you are unconfiguring BSTUN no action\n is required. Otherwise record all the displayed values and any other\n BSTUN error messages and contact your technical support\n representative."
BSTUN-3-NOPEER	3-Error	No peer configured to route frame with destination address [chars] bstun group [dec]	A BSTUN route has not been configured for the frame with a destination address.	-	"If this message appears while you are debugging bstun it indicates that no\n specific bstun route has been configured for the frames being received with\n the device address listed in the packet debug trace. You may choose to configure\n a bstun route or ignore this message."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
BSTUN-3-IFNOTSETUP	3-Error	Could not setup interface for protocol [chars]	BSTUN was unable to start the interface for handling the specified protocol traffic.	-	"If this message appears while you are configuring BSTUN check for\n\ other system errors such as no available memory in the router or the interface\n\ shutting down. If no obvious problem can be detected record all the displayed\n\ values and any other BSTUN error messages and contact your technical support\n\ representative."
ASPP-3-NOTTY	3-Error	[chars]: Unable to set Rx/Tx tty async service hooks.	This message occurs only when ASP is configured. It\n\ indicates the serial interface using ASP is configured\n\ incorrectly or does not support asynchronous mode.	-	"Verify the correct hardware interface type is being used."
FIC_TRUNK-1-NOMEMORY	1-Alert	msgtxt_nomemory	The MPC860/PowerQUICC CPU was unable to access the memory it needs to carry out its functions. Here are some possible causes. The network is large requiring a lot of memory for routing tables and so on. The router configuration has many features enabled each of which require a certain amount of memory. A software error memory leak exists.	-	"Reduce system activity to ease the memory demand or upgrade to a larger memory configuration."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
FIC_TRUNK3TOOMANY	3-Error	Cannot config more than [dec] ftc-trunks	When the operator enters the 'encap ftc-trunk' configuration command if there are already 4 interfaces configured for encap ftc-trunk this message is displayed to indicate that no more can be configured.	-	"Free one of the other interfaces first or if conditions warrant upgrade to a larger configuration with more interfaces."
FIC_TRUNK-I-RELOAD	1-Alert	Must reload to config Interface [chars] as ftc-trunk again	If the operator first configures an interface to 'encapsulation ftc-trunk' then re-configures it later to some other encapsulation such as HDLC then attempts to re-configure it again to 'encap ftc-trunk' then this error messages is displayed to notify the operator that the 'reload' command must be entered first before attempting to configure the interface to 'encap ftc-trunk' again.	-	"Issue the 'reload' command."
FIC_TRUNK3TOOMANY_SESSION	3-Error	Cannot config more than [dec] session-trunks	When the operator enters the 'encap ftc-trunk' configuration command if there are already 4 interfaces configured for encap ftc-trunk then the message is displayed to indicate that no more can be configured.	-	"Free one of the existing interfaces before trying again or if conditions warrant upgrade to a larger configuration."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
FIC_TRUNK3CID_IN_USE	3-Error	[chars] connection-id [dec] is busy try other cid	When setting up a new session-trunk if the operator attempts to use a connection-ID that is already assigned and in-use then the error message is displayed to indicate that the selected connection-id cannot be used for this session-trunk.	-	"Try again with a connection-ID which is not already in use."
SPARC-3-DOWN	3-Error	SPARC process is not responding [chars]	Failed to init calltracker record table.	CallTracker	"Disable calltracker first [no calltracker enable] enable it again."
CALLTRKR3-NO_MEM	3-Error	Memory allocation failed for CT [chars] [dec] bytes	Calltracker couldn't allocate new record due to no free memory.	CallTracker	"Disable calltracker [no calltracker enable]. Run show memory to \n\n find out where is the memory been allocated."
CALLTRKR-3-PROC	3-Error	can't spawn [chars]	Couldn't spawn calltracker process.	CallTracker	"Disable calltracker first [no calltracker enable] enable it again."
CALLTRKR3-PRINT_BUFFER	3-Error	calltrkr cli print buffer [chars]	calltrkr cli internal print buffer overflow.	Calltracker	"Stop to using calltrkr show commands call TAC to report the problem"

RADIO-4-NO_IMAGE	4-Warning	[chars][dec]/[dec] Chip \[chars]: failed to find image given current configuration	Most likely configured to use external files	ubr-radiop2p-sw	"Change configuration to use internal files"
RADIO-5-IMAGE_BAD_CRC	5-Notice	[chars][dec]/[dec] detected a bad CRC while downloading image \[chars]\ to chip \[chars]\	Most likely a protocol error while downloading	ubr-radiop2p-sw	-
RADIO-5-IMAGE_TIMEOUT	5-Notice	[chars][dec]/[dec] timeout trying to open image \[chars]\ for chip \[chars]\	Most likely a protocol error while opening	ubr-radiop2p-sw	-
RADIO-6-IMAGE_NOT_FOUND	6-Information	[chars][dec]/[dec] could not find image \[chars]\ for chip \[chars]\	Most likely a typo when set the url of the image	ubr-radiop2p-sw	"Try again"
RADIO-6-SELF_TEST_SUCCESS	6-Information	Radio[dec]/0 self-test successful	Passed a self-diagnostic	ubr-radiop2p-hw	"This is a good thing"

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
RADIO3SELF_TEST_FAILED	3-Error	Radio[dec]/0 failed self-test	Most likely a hardware failure	ubr-radiop2p-hw	"Call tech support"
RADIO4NO_HWCAP_HLD	4-Warning	Radio[dec]/0 could not find HW Capabilities field in IDPROM	Most likely cause is an improperly-programmed IDPROM	ubr7200	"Have the IDPROM on the linecard reprogrammed"
RADIO4BAD_IF_PIC	4-Warning	Radio[dec]/0 bad IF PIC version [dec] on IDU	Most likely a hardware configuration oversight	ubr-radiop2p-hw	"Call tech support"
RADIO4BAD_RF_PIC	4-Warning	Radio[dec]/0 bad RF PIC version [dec] on ODU [dec]	Most likely a hardware configuration oversight	ubr-radiop2p-hw	"Call tech support"
RADIO4NEWRF_EEPROM	4-Warning	Radio[dec]/0 Unsupported IF PIC major eeprom version [dec] on IDU	IOS should be upgraded to support the new eeprom	ubr-radiop2p-sw	LOG_STD_ACTION
RADIO4NEWRF_EEPROM	4-Warning	Radio[dec]/0 Unsupported RF PIC major eeprom version [dec] on ODU [dec]	LOG_STD_ACTION	ubr-radiop2p-sw	"Call tech support - upgrade IOS"
RADIO-4-IF_OSC	4-Warning	Radio[dec]/0 Internal [chars] Oscillator out of Lock [chars]	Most likely cause is vibration or hardware failure	ubr-radiop2p-hw	"Replace internal card"
RADIO-4-RF_OSC	4-Warning	Radio[dec]/0 ODU [dec] [chars] Oscillator out of Lock [chars]	Most likely cause is vibration or hardware failure	ubr-radiop2p-hw	"Replace electronics on Out Door Unit"
RADIO-4-RF_AGC	4-Warning	Radio[dec]/0 ODU [dec] max transmitter power exceeded [chars]	Most likely cause is hardware failure	ubr-radiop2p-hw	"Replace RF ODU"
RADIO-4-RF_VOLT	4-Warning	Radio[dec]/0 ODU [dec]: supply voltage out of range [chars]	Most likely cause is hardware failure	ubr-radiop2p-hw	"Replace RF ODU"

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
RADIO4RF_TEMP	4-Warning	Radio[dec]/0 ODU [dec]: temperature is [dec] degrees C threshold is [dec] degrees C	Most likely cause is hardware failure or solar heating	ubr-radiop2p-hw	"Keep the RF ODU cool"
RADIO2RF_OVERTEMP	2-Critical	Radio[dec]/0 ODU [dec]: over temperature [chars]	Most likely cause is hardware failure or solar heating	ubr-radiop2p-hw	"Keep the RF ODU cool"
RADIO4RF_ANTIENNA	4-Warning	Radio[dec]/0 ODU [dec] is [chars]	Most likely cause is a disconnected cable	ubr-radiop2p-hw	"Check or replace cable from UBR to the Out Door Unit"
RADIO4IF_COMM	4-Warning	Radio[dec]/0 IDU IF internal serial communication error - [chars]	Most likely cause is a loose IF baby board	ubr-radiop2p-hw	"Replace hardware"
RADIO4RF_COMM	4-Warning	Radio[dec]/0 ODU [dec] serial communication error - [chars]	Most likely cause is a disconnected cable	ubr-radiop2p-hw	"Check or replace cable from UBR to the Out Door Unit"
RADIO4CHECKSUM_ERR	4-Warning	Radio[dec]/0 radio phy eeprom \[chars]\ checksum stored:0x%02x calculated:0x%02x	Most likely cause is Shut or No Shut command	ubr7200	"Enter the No Shut command"
RADIO5CONFIG_HW	5-Notice	Radio[dec]/0 hardware does not support requested configuration: [chars]	Most likely cause is incorrect configuration	ubr-radiop2p-sw	"Change the configuration to match the hardware"
RADIO5CONFIG_MISMATCH	5-Notice	Radio[dec]/0 invalid or inconsistent configuration requested [chars]	Most likely cause is the ARQ settings are not supported by the current radio channel parameters	ubr7200	"Change ARQ settings to allowed values given the current radio channel parameters. You can use the radio arq reset command to do this."
RADIO5MEIRCS_THRESH	5-Notice	Radio[dec]/0 [chars] per [chars] threshold met[dec]>=[dec]	Most likely cause is a mis-aligned antenna	ubr7200	"Re-align the antennas"

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
RADIO5-THRESHOLD	5-Notice	Radio[dec]/0 [chars] [chars] threshold crossed ODU [dec]	Most likely cause is a user defined threshold	ubr7200	"none"
RADIO5CLEAR_MEIRCS	5-Notice	Radio[dec]/0 link metrics cleared	User requested the link metrics be cleared	ubr7200	"none"
RADIO4PHY_SYNC_OK	4-Warning	Radio[dec]/0 link synchronization acquired.	Most likely cause is No Shut command	ubr7200	"None"
RADIO4PHY_SYNC_RECK	4-Warning	Radio[dec]/0 link synchronization re-acquired.	Most likely cause is No Shut command on remote end	ubr7200	"None"
RADIO4-PHY_REQ	4-Warning	Radio[dec]/0 link synchronization [chars].	Most likely cause loose ODU cable	ubr7200	"Check all cables"
RADIO4PHY_SYNC_FAIL	4-Warning	Radio[dec]/0 link synchronization [chars].	Most likely cause loose ODU cable	ubr7200	"Check all cables"
RADIO5-PHY_RETRY	5-Notice	Radio[dec]/0 event %23s in state %15s	Most likely cause incorrect configuration	ubr7200	"Review configuration and hardware capabilities"
RADIO5REMOTE_LOST_SYNC	5-Notice	Radio[dec]/0 Remote end reports: [chars]	Most likely cause cable not attached ODU overheated	ubr7200	"Check ODU cables"
RADIO5REMOTE_NO_SYNC	5-Notice	Radio[dec]/0 Remote end reports: Unable to acquire link synchronization.	Most likely cause cable not attached ODU overheated	ubr7200	"Check ODU cables"
RADIO5LOCAL_IN_SYNC	5-Notice	Radio[dec]/0 Link synchronization acquired.	Phy layer successfully acquired link.	ubr7200	"None"
RADIO5PHY_SYNC_LOST	5-Notice	Radio[dec]/0 Lost link. Check remote transmitter.	Most likely cause remote system is not transmitting.	ubr7200	"No Shut remote system"
RADIO5LOCAL_NO_SYNC	5-Notice	Radio[dec]/0 Still trying to establish link timing sync.	Most likely cause remote system is not transmitting.	ubr7200	"No Shut remote system"

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
RADIO5LOCAL_NO_FREQ	5-Notice	Radio[dec]/0 Still trying to establish link frequency sync.	Most likely cause remote system is not transmitting on correct frequency	ubr7200	"No Shut remote system"
RADIO5LOCAL_NO_VITERBI	5-Notice	Radio[dec]/0 Still trying to establish link viterbi sync.	Most likely cause remote system is not transmitting on correct frequency	ubr7200	"No Shut remote system"
RADIO5LOCAL_NO_CW	5-Notice	Radio[dec]/0 Still trying to establish link validate codeword.	Most likely cause remote system is not transmitting on correct frequency	ubr7200	"No Shut remote system"
RADIO5LOCAL_NO_TRANSMIT	5-Notice	Radio[dec]/0 ODU safety interlock is preventing transmission. Check ODU and cables. [chars]	Most likely cause cable not attached ODU overheated	ubr7200	"Check ODU cable"
RADIO4FPGAINITNLOW	4-Warning	Radio[dec]/0 INIT pin on FPGA [chars] not asserted when PROG pin asserted	The INIT pin of a FPGA device on the RADIO line card did not assert when the PROG pin was asserted. This indicates either a faulty FPGA device or software problem resetting it.	ubr7200	LOG_STD_ACTION
RADIO4FPGAINITNHIGH	4-Warning	Radio[dec]/0 INIT pin on FPGA [chars] asserted during downloading	The INIT pin of a FPGA device on the RADIO line card asserted midway through the downloading of the device. Most likely cause is corrupted FPGA image.	ubr7200	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
RADIO4FADONEFLOW	4-Warning	Radio[dec]/0 DONE pin on FPGA \[chars] did not assert after downloading	The DONE pin of a FPGA device on the RADIO line card did not assert after the downloading of the device. This probably indicates an existing or developing hardware failure.	ubr7200	LOG_STD_ACTION
RADIO4DSPHPI TIMEOUT	4-Warning	Radio[dec]/0 HPI timeout while attempting to access DSP \[chars]	A DSP on the RADIO line card was not granting access to its memory. Most likely cause is a DSP firmware internal error.	ubr7200	LOG_STD_ACTION
RADIO4DSPSPURRESP	4-Warning	Radio[dec]/0 spurious DSP response from \[chars]: %08x %08x %08x %08x %08x %08x	A DSP on the RADIO line card generated a response message unexpectedly. This can happen when the router is operating under severe traffic load.	ubr7200	LOG_STD_ACTION
RADIO4DSPULOFLOW	4-Warning	Radio[dec]/0 uplink message queue overflow reported by DSP \[chars]	At least one DSP-to-router message was lost due to that DSP's uplink queue being full. This can happen when many thresholds histogram timers are being triggered or expiring at the same time.	ubr7200	"Change thresholds and/or reduce histogram/timeline usage to lower the load on the system"

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
RADIO-4-DSPINDERR	4-Warning	Radio[dec]/0 Error processing indication from DSP \<[chars]\ [chars]:[dec]	A DSP on the RADIO line card generated an indication message that could not be processed. This can happen when the router is operating under severe traffic load.	ubr7200	LOG_STD_ACTION
CSM_VOICE3UNDEFNIRF	3-Error	Invalid interface slot:controller:group[dec]/[dec]/[dec]	The voice interface defined by slot:controller:group is not yet defined within the voice software but attempts were made to use this interface.	das	"Internal software fault. Contact your field service representative if this message is coincident with dropped calls."
CSM_VOICE3UNDEFDSX0	3-Error	Undefined dsx0 interface for controller[dec]/[dec]	The dsx0 interface for the specified controller is not defined but the voice software use it.	das	"Internal software fault. Contact your field service representative if this message is coincident with dropped calls."
CSM_VOICE3-NOSDB	3-Error	No signaling data block is available to build the voice interface[dec]/[dec]:[dec]	The voice software was unable to obtain a signaling data block from the Voice Telephony Service Provider. The system may be out of memory.	das	LOG_SID_SH_TECH_ACTION
CSM_VOICE3ADDNIRHAL	3-Error	The Voice Telephony Service Provider has rejected our request to add this voice interface [dec]/[dec]:[dec]	The voice software was unable to report a new signaling interface to the Voice Telephony Service Provider	das	LOG_SID_SH_TECH_ACTION

SNASW3DEBUG_LOG_0	3-Error	PROBLEM - %lu - SNA Switch DEBUG log [chars]	SNA Switch Debug log.	snasw	"Report to SNA Switch technical support."
SNASW-3-RM_LOG_0	3-Error	PROBLEM - %lu - Insufficient storage to start TP instance and conversation requested by received Attach [chars]	Insufficient storage to start the transaction program instance\n\n and conversation requested by a received Attach MC_ALLOCATE Either decrease the system load	-	-
SNASW-3-RM_LOG_3	3-Error	PROBLEM - %lu - Insufficient storage to start conversation requested by [MC_]ALLOCATE or CMALLC [chars]	Insufficient storage to start a new conversation requested by\n\n ALLOCATE MC_ALLOCATE or CMALLC.\n\n [MC_]ALLOCATE will fail with primary_rc of\n\n FUNCTIONS_ERROR or\n\n CMALLC with fail with return_code of CMPRODUCT_ERROR	snasw	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SNASW-3-CLS_LOG_0	3-Error	PROBLEM - %lu - Could not validate process handle [chars]	CLS has passed SNA Switch a DLC packet but SNA Switch does not have a valid\n\ handle to invoke the correct SNA process. The CLS message has been \n\ discarded.	snasw	"Dump traces and contact the Cisco TAC."
SNASW-4-RM_LOG_13	4-Warning	EXCEPTION - %lu - APPC Transaction Program or CPI-C application has ended abnormally with active conversations [chars]	An APPC transaction program or CPI-C application has ended\n\ abnormally with active conversations. This usually indicates\n\ an error in the application.\n\ SNA Switch will deactivate all sessions currently being used by\n\ the application.	snasw	"Run a trace on the APPC API or the CPI-C API to see the\n\ sequence of verbs causing the problem."
SNASW-3-RM_LOG_14	3-Error	PROBLEM - %lu - Deactivating session because of insufficient storage [chars]	Deactivating session because of insufficient storage.\n\ SNA Switch will deactivate the session.	snasw	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SNASW3-RM_LOG_15	3-Error	PROBLEM - %lu - Insufficient storage to initiate session activation requested by [MC_]ALLOCATE or CMALLC [chars]	Insufficient storage to initiate session activation requested\n\ by ALLOCATE MC_ALLOCATE or CMALLC.\n\ [MC_]ALLOCATE will fail with primary_rc of NP_ALLOCATION_ERROR and secondary_rc of NP_ALLOCATION_ERROR CMALLC will fail with return_code of\n\ CM_ALLOCATION_ERROR	snasw	-
SNASW3-RM_LOG_22	3-Error	PROBLEM - %lu - LU-LU verification failed. [chars]	LU-LU verification failed. The partner LU has sent an incorrect\n\ response to a challenge sent by a local LU. This is either a\n\ security attack or a defect in the software at the partner LU\n\ location.\n\ The session will be deactivated.	snasw	"Check the identity of the partner LU. If this is a defect in\n\ the software at the partner LU location then contact support."
SNASW4-RM_LOG_23	4-Warning	EXCEPTION - %lu - Insufficient storage to deactivate limited resource session [chars]	Insufficient storage to deactivate limited resource session.\n\ The limited resource session will not be deactivated although\n\ it may be deactivated later. This could result in highly degraded Either decrease the system load	-	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SNASW-6RM_LOG_27	6-Information	INFO - %lu - Session limits changed [chars]	The session limits for a local LU partner LU and mode have\n\n changed. The termination count indicates the number of\n\n sessions SNA Switch will deactivate as a result of the change\n\n in session limits.	snasw	"None"
SNASW-3RM_LOG_37	3-Error	PROBLEM - %lu - LU-LU verification protocol error [chars]	LU-LU verification protocol error. This may indicate an\n\n interoperability problem.\n\n The session will be deactivated with the specified sense code.	snasw	"Contact support with details of the problem."
SNASW-3RM_LOG_42	3-Error	PROBLEM - %lu - Failed to activate a new session since this would exceed LU or mode session limit [chars]	SNA Switch was unable to activate a new session because the\n\n maximum session limit specified for the mode or the local LU\n\n would be exceeded.\n\n ALLOCATE MC_ALLOCATE or CMALLC verbs will either fail or hang\n\n waiting for a session to become free.	snasw	"Wait for a session to become free and retry or use a different\n\n mode."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SNASW-3-RM_LOG_43	3-Error	PROBLEM - %lu - Insufficient storage to start TP instance requested by TP_STARTED [chars]	Insufficient storage to start the transaction program instance\n requested by TP_STARTED.\n If other instances of the same transaction program are active\n SNA Switch will queue the TP_STARTED waiting for one of them to\n become free. Otherwise the TP_STARTED verb will fail with\n primary_rc of NPACIMONALNOBRY	snasw	-
SNASW-3-RM_LOG_44	3-Error	PROBLEM - %lu - Insufficient storage to initiate automatic session activation [chars]	Insufficient storage to initiate automatic session activation.\n Fewer active sessions will be available on the specified mode\n which may cause application delays or failures.	snasw	-
SNASW-3-RM_LOG_45	3-Error	PROBLEM - %lu - Insufficient storage to initiate session activation requested by ACTIVATE_SESSION [chars]	Insufficient storage to initiate session activation requested\n by ACTIVATE_SESSION verb.\n ACTIVATE_SESSION will fail with NPACIMONALNOBRY	snasw	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SNASW-3-RM_LOG_46	3-Error	PROBLEM - %lu - Bracket protocol error [chars]	Bracket protocol error. This may indicate a problem in the partner LU. The sense codes are as follows. 20080000 - partner LU attempted to start bracket after sending BIS 20030000 - partner LU attempted to start bracket after local LU had BID for session successfully or unexpected RTR request received 20100000 - Received negative response to BID with sense code 088B0000 from a partner LU who supports parallel sessions or BIS protocol error The session will be deactivated with the specified sense code.	snasw	"Contact support with details of the problem."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SNASW-3-RM_LOG_47	3-Error	PROBLEM - %lu - Attach protocol error [chars]	Attach protocol error. This may indicate a problem in the partner LU. The sense codes are as follows: 080F6051 - Attach security protocol violation 10086011 - LUW identifier format error or LUW identifier not specified when sync level is syncept 10086040 - sync level not supported by session or already-verified not accepted from partner LU 10086031 - PIP not allowed by TP The session will be deactivated with the specified sense code.	snasw	"Contact support with details of the problem."
SNASW-3-RM_LOG_48	3-Error	PROBLEM - %lu - Attach rejected because security information invalid [chars]	Attach rejected because security information invalid. This indicates an attempt to access a secure TP by an unknown user or a known user who has specified an incorrect password. The Attach will be rejected.	snasw	"Use the information in the log to locate the attempted security violation."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SNASW-3-RM_LOG_49	3-Error	PROBLEM - %lu - Attach rejected because requested sync level not supported by requested transaction program [chars]	Attach rejected because the specified sync level is not supported by the specified transaction program. This may be a mismatch in the capabilities of the originating transaction program and the destination transaction program or it may simply be a configuration error. The Attach will be rejected.	snasw	"Check the sync level supported by the specified transaction program and check that it matches the sync_level defined for the transaction program. If they match or the transaction program is not defined there is a mismatch between the originating and destination transaction programs."
SNASW-3-RM_LOG_50	3-Error	PROBLEM - %lu - Attach rejected because requested TP is temporarily disabled [chars]	Attach rejected because the specified TP is temporarily disabled. The Attach will be rejected.	snasw	"This condition is not currently supported by SNA Switch so this log should not occur."
SNASW-3-RM_LOG_51	3-Error	PROBLEM - %lu - Attach rejected because requested TP is permanently disabled [chars]	Attach rejected because the specified TP is permanently disabled. This should only occur if an application has explicitly disabled the transaction program. The Attach will be rejected.	snasw	"Collect trace and contact support."
SNASW-3-RM_LOG_52	3-Error	PROBLEM - %lu - Failed to activate a new session because mode name was not recognized [chars]	SNA Switch was unable to activate a new session because the mode name specified was not recognized. ALLOCATE MC_ALLOCATE or CMALLC verbs will fail.	snasw	"Check the mode name."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SNASW-3-RM_LOG_53	3-Error	PROBLEM - %lu - Attach rejected because security information not specified [chars]	Attach rejected because security information not specified.\n\n This indicates an attempt to access a secure TP without\n\n specifying a user ID or password.\n\n The Attach will be rejected.	snasw	"Use the information in the log to locate the security mismatch"
SNASW-3-RM_LOG_54	3-Error	PROBLEM - %lu - Bracket protocol error [chars]	BIS protocol error. This may indicate a problem in the\n\n partner LU. The sense code is always set to 20100000.\n\n The session will be deactivated with the specified sense code.	snasw	"Contact support with details of the problem."
SNASW-3-CS_LOG_0	3-Error	PROBLEM - %lu - An active link station has failed [chars]	An active link station has failed.\n\n The link and any sessions using it will be deactivated	snasw	"Attempt to restart the link. If the problem persists inspect\n\n the log for problems or exceptions logged by the DLC which give\n\n more specific reasons for the failure and follow the actions\n\n specified by those logs. Otherwise run a trace on the\n\n specified port or link station to find the reason for the\n\n failure."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SNASW-3-CS_LOG_1	3-Error	PROBLEM - %lu - XID exchange count exceeds activation limit [chars]	The number of XIDs received during link activation exceeded the limit defined for the port. This could indicate an XID protocol error or an excessively unreliable physical media. The sense data gives more information about the error. 083E0001 - the limit was exceeded while exchanging prenegotiation or negotiation XIDs 0809003A - the limit was exceeded while exchanging NULL XIDs. Link activation will fail.	snasw	"Retry the activation. If SNA Switch is still unable to activate the link station run a trace on the link station or port to diagnose the problem."
SNASW-3-CS_LOG_2	3-Error	PROBLEM - %lu - XID exchange count exceeds nonactivation limit [chars]	The number of XIDs received during non-activation exchange exceeded the limit defined for the port. This could indicate an XID protocol error or an excessively unreliable physical media. Non-activation XID exchange will fail and the link will be deactivated.	snasw	"Run a trace on the link station or port to diagnose the problem and contact support with trace information."
SNASW-3-CS_LOG_3	3-Error	PROBLEM - %lu - Insufficient storage to activate link [chars]	Insufficient storage to activate link. Link activation will fail.	snasw	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SNASW-3-CS_LOG_4	3-Error	PROBLEM - %lu - Link to back-level LEN node not configured [chars]	An XID3 from an adjacent back-level LEN node ie. not carrying a network name control vector was received and there was not an adjacent link. Define a link station	-	-
SNASW-3-CS_LOG_5	3-Error	PROBLEM - %lu - Link to host not configured correctly host is not a Type 2.1 node [chars]	Link to host not configured correctly that is configured as a link to a Type 2.1 node. Redefine	-	-
SNASW-3-CS_LOG_6	3-Error	PROBLEM - %lu - XID protocol error during activation exchange [chars]	-	snasw	"Contact support with details of the problem."
SNASW-3-CS_LOG_7	3-Error	PROBLEM - %lu - No free TG numbers [chars]	No free TG numbers between this node and the specified adjacent node. This should only occur if there are already 236 parallel TGs between this node and the adjacent node. Link activation will fail.	snasw	"Re-configuring the network to reduce the number of parallel TGs between this node and the specified adjacent node."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SNASW-3-CS_LOG_8	3-Error	PROBLEM - %lu - XID protocol error during non-activation exchange [chars]		snasw	"Run a trace on the link station or port to obtain more\n\ diagnostic information on the problem. Contact support with\n\ details of the log and trace."

Fault-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
			<p>XID protocol error during non-activation exchange. This may indicate an interoperability problem between this node and the adjacent node. The sense codes are as follows.</p> <p>0809003A - received a null XID when an activation XID format 3 was expected</p> <p>0809003B - received a null XID when a nonactivation XID format 3 was expected</p> <p>0809003E - activation XID received when non-activation XID expected</p> <p>0809003F - adjacent node initiated a secondary-initiated non-activation XID exchange on a link that does not support secondary-initiated non-activation XID exchanges</p> <p>08090042 - nonactivation exchange initiation indicator not set when expected</p> <p>0809004E - received a non-null XID from a secondary NRM link station when a null XID was expected</p> <p>10160002 - adjacent</p>		

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
			node has been inconsistent in its setting\n\n of ACTPU suppression indicator\n\n 10160008 - adjacent node has been inconsistent in its setting\n\n of networking capabilities\n\n 1016000B - adjacent node attempted to change TG number during\n\n nonactivation exchange to a TG number that was\n\n already in use\n\n 10160019 - adjacent node has attempted to change its CP name\n\n when CP-CP sessions supported on link station or\n\n link station not quiesced\n\n The link will be deactivated.		
SNASW-3-CS_LOG_9	3-Error	PROBLEM - %lu - Link to host not configured correctly host is not a DSPU [chars]	Link to host not configured correctly that is\n\n configured as a link to a DSPU\n\n Define a link station Redefine	-	-
SNASW-3-CS_LOG_10	3-Error	PROBLEM - %lu - Link to host not configured [chars]	An unexpected SET_MODE ie. received before XID exchange had\n\n completed was received from an adjacent host and there was\n\n Define a link station Define a link station	-	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SNASW-3-CS_LOG_11	3-Error	PROBLEM - %lu - Parallel TGs not supported to this adjacent node [chars]	Attempted to activate more than one TG to an adjacent node that does not support parallel TGs. Link activation will fail.	snasw	"Modify the configuration so that there is only one link station defined to the specified adjacent node. Alternatively several links to the adjacent node can be defined but only one can be active concurrently."
SNASW-4-CS_LOG_12	4-Warning	EXCEPTION - %lu - Insufficient storage to perform orderly link deactivation link deactivated immediate instead [chars]	Insufficient storage to perform orderly link deactivation performing immediate deactivation instead. None.	snasw	-
SNASW-3-CS_LOG_13	3-Error	PROBLEM - %lu - Conflicting requirements for error recovery link is not HPR-capable [chars]	Conflicting requirements for error recovery between the local node and a partner node when attempting to activate a link that is HPR-capable. Link will activate but will not be HPR-capable.	snasw	"To allow HPR protocols to be used on the link the local and partner nodes must be able to accommodate the other's error recovery requirement. At the minimum this will require reconfiguration but may not always be possible."
SNASW-4-CS_LOG_14	4-Warning	EXCEPTION - %lu - Insufficient storage to update ANR routing tables following deactivation of an HPR-capable link [chars]	Insufficient storage to update ANR routing tables following deactivation of an HPR-capable link. The node may not be able to free resources that are no longer required but will otherwise operate normally.	snasw	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SNASW-4CS_LOG_15	4-Warning	EXCEPTION - %lu - Insufficient storage to update ANR routing tables following activation of an HPR-capable link [chars]	Insufficient storage to update ANR routing tables following activation of an HPR-capable link. HPR traffic using this ANR label will not be routed correctly which may cause RTP connections to path-switch or fail altogether.	snasw	-
SNASW-3CS_LOG_17	3-Error	PROBLEM - %lu - DLC failed [chars]	A DLC has ended abnormally. All ports and link stations defined on the DLC will be inoperative.	snasw	-
