SYS-1-CUR-NGI-FRESHOLD	1-Alert	Threshold: [chars] CPU UtilizationTotal/Intr: [dec]%%/[dec]%%	The system is experiencing high CPU usage possibly from a process that is using too much CPU. This condition demands immediate attention or packets or calls may be dropped.	-	"Enter the <CmdBold>show processes CPU<NoCmdBold>" " command to determine the CPU hogging process" " that is causing this condition and if possible" " disable the activity that is causing the" " CPU hog condition so that CPU" " utilization is reduced."
SYS-1-CUR-NGI-FRESHOLD	1-Alert	Threshold: [chars] CPU UtilizationTotal/Intr [dec]%%/[dec]%%.	CPU usage has returned to normal after crossing over from a threshold of high usage. Any process that was disabled during the period of high CPU use can now be enabled.	-	"No action is required."
SYS-2-INPUTQ	2-Critical	INPUTQ set but no IDB ptr=[hec]	This message is issued when an attempt is made to alter the input queue count for a packet that should not be counted.	-	-
SYS-6-BADSHAREINFO	6-Information	[chars] packet [hec] has a zero reference count freeing pid = [hec] \n\ freeing pc = [hec] [chars].	Provides additional information about original freer of packet.	-	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS-2-BADSHARE	2-Critical	Bad refcount in [chars] ptr=[hec] count=[hec]	A reference count is used to track the usage of many data structures. A function increments the count when it begins to use a structure and decrements it when it finishes. When the count becomes zero the data structure is freed. This message indicates that when the count was accessed it was found to be negative which means that the data structure will not be freed until the system is reloaded.	-	-
SYS-2-CFORKLEV	2-Critical	Process creation of [chars] failed at level [dec].	An internal software error occurred.	Determine the component from the process name displayed in the\n\ error message.	"Copy the error message exactly as it appears and report it to your " "technical support representative."
SYS-2-CFORKMEM	2-Critical	Process creation of [chars] failed no memory.	Insufficient memory was available to create a process either while trying to support additional features or due to a memory leak.	mem-suspect	"A memory leak may be the cause if the system has been running for a " "while without changing its configuration. If you suspect a leak then " "copy this message exactly as it appears and report it to your technical " "support representative. Otherwise ensure that more memory is available " "to support the additional features."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS2CFORKBADFUNCT	2-Critical	Can't create process with start address = [hec]	An internal software error occurred.	-	"Copy the error message exactly as it appears and report it to your " "technical support representative."
SYS-3-BADPROCESS	3-Error	Bad process ID [dec] when [chars] process table	An internal software error occurred.	os-scheduler	"Copy the error message exactly as it appears and report it to your " "technical support representative."
SYS-2-INSCHED	2-Critical	[chars] within scheduler	-	Determine the component from the stack trace displayed in the error message. Then use Topic to search for a similar DDTS. If you find none submit a DDTS for this problem.	-
SYS-2-NOTIOSTASK	2-Critical	[chars] from outside IOS task context	An IOS reschedule request was made from code that is not running in the context of an IOS task -- from an interrupt handler the scheduler itself or a service pthread within the IOS process.	Determine the component from the stack trace displayed in the error message. Use Topic to search for a similar DDTS. If you find none write a DDTS for this problem.	"Copy the error message exactly as it appears and report it to your " "technical support representative."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS-2-INTSCHED	2-Critical	'[chars]' at level [dec]	The scheduler was entered from an interrupt service routine ISR.	Determine the component from the stack trace and process name displayed in the error message. Then use Topic to search for a similar DDTs. If you find none submit a DDTs for this problem. If the stack trace indicates that the scheduler was called from an interrupt handler choose the DDTs component based on the interrupt handler. Otherwise use the process name to determine the DDTs component.	-
SYS-3-PROCSEMFAIL	3-Error	Process semaphore creation for preemptive processes failed.	Creation of process function semaphore to protect the critical section of process create routine failed. The semaphore creation can fail if there isnt enough chunk memory to create the event structure.	os	-
SYS-2-NOBLOCK	2-Critical	[chars] with blocking disabled.	A process aattempted to relinquish control with blocking disabled.	Determine the component from the stack trace displayed in the error message. Use Topic to search for a similar DDTs. If you find none submit a DDTs for this problem. Choose the DDTs component associated with the routine that called the scheduler.	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS-2-BLOCKHUNG	2-Critical	Task hung with blocking disabled value = 0x[hec].	The indicated process has exceeded the time limit for which it may relinquish control with blocking disabled.	Determine the component from the stack trace displayed in the error message. Use Topic to search for a similar DDTS. If you find none submit a DDTS for this problem. Choose the DDTS component associated with the routine that called the scheduler.	"This message may be a result of high loads. If it recurs " "copy the text exactly as it appears and report it along " "with the associated stack trace to your technical support " "representative."
SYS-2-NOTDEAD	2-Critical	Killing process [chars] pid [dec] again	An internal software error occurred.	os-scheduler	"If this messages recurs copy it exactly as it appears and report " "it to your technical support representative."
SYS-2-NOPROCESS	2-Critical	No such process [dec]	An internal software error occurred.	-	"If this messages recurs copy it exactly as it appears and report " "it to your technical support representative."
SYS-2-IMMORTAL	2-Critical	Attempt to shut down management process [dec] [chars].	An attempt was made to shut down the specified management process. Management processes must not be shut down as long as the\n\ router remains up.	Determine the component from the stack trace displayed in the error message. Use Topic to search for a similar DDTS. If you find none submit a DDTS for this problem. Choose the DDTS component associated with the routine that called the process_kill.	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS-2-SIGPENDING	2-Critical	Multiple Signals are sent to a process [dec]	An internal software error occurred.	os	"If this messages recurs copy it exactly as it appears and report " "it to your technical support representative."
SYS-2-BADSTACK	2-Critical	Process [chars] has trashed stack old size [dec]	An internal software error occurred.	-	"If this messages recurs copy it exactly as it appears and report " "it to your technical support representative."
SYS-6-MTRACE	6-Information	[chars]: addr pc\n ADDRPC ADDRPC ADDRPC ADDRPC \n ADDRPC ADDRPC ADDRPC ADDRPC	This is an auxiliary message to several memory-related messages. It provides the address of the memory block and the calling program counter for the last eight blocks allocated and for the last eight blocks freed.	Include this error message in the DDTS that was written for\n\ the previously printed error message.	"This message provides additional information only. Copy the error " "message exactly as it appears and report it to your technical support " "representative as part of a previously printed error message."
SYS-6-BLKINFO	6-Information	[chars]blk [hec] words [dec] alloc [hec] [chars] dealloc [hec] rfcnt [hec]	This is an auxiliary message to several memory-related messages. It provides a formatted display of some of the information in the header of a corrupted data block.	Include this error message in the DDTS that was written for\n\ the previously printed error message.	"This message provides additional information only. Copy the error " "message exactly as it appears and report it to your technical support " "representative as part of the previously printed error message."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS-6-MEMDUMP	6-Information	[hex]: [hex] [hex] [hex] [hex]	This is an auxiliary message to several memory-related messages. It provides a raw display of the information in the header of a corrupted data block.	Include this error message in the DDTs that was written for the previously printed error message.	"This message provides additional information only. Copy the error " "message exactly as it appears and report it to your technical support " "representative as part of the previously printed error message."
SYS-6-PROCINFO	6-Information	Process [chars] just finished executing	This message is an auxiliary to the SYS-3-OVERRUN and SYS-3-BADMAGIC error messages. It identifies the process or process fragment that was executing when the error occurred.	-	"Copy this messages exactly as it appears and report it along with " "the SYS-3-OVERRUN and SYS-3-BADMAGIC error messages to your " "technical support representative."
SYS-6-TESTINFO	6-Information	Scheduler test [hex] for [chars] just executed	This message is an auxiliary to the SYS-3-OVERRUN and SYS-3-BADMAGIC error messages. It identifies the process or process fragment that was executing when the error occurred.	Determine the component from the address of the scheduler test routine displayed in the error message. Use Topic to search for a similar DDTs. If you find none write a DDTs for this problem.	"Copy this message exactly as it appears and report it along with the " "SYS-3-OVERRUN and SYS-3-BADMAGIC error messages to your technical " "support representative."

Fault-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS-3-BADBLOCK	3-Error	Bad block pointer [hec]	A block of memory at the indicated location is corrupt. An internal check of memory block pointers indicates an inconsistency.	-	"Copy the error message exactly as it appears on the console " "or in the system log contact your Cisco technical support representative " "and provide the representative with the gathered information. " "Save any crashinfo or crashdump files. If the router has crashed and " "was not configured to autotmatically reload then the router will " "need to reloaded manually."
SYS-3-BADMAGIC	3-Error	Corrupt block at [hec] magic %08x	The free memory pool is corrupt. An inconsistency was detected in the free memory pool.	-	"Copy the error message exactly as it appears on the console " "or in the system log contact your Cisco technical support representative " "and provide the representative with the gathered information. " "Save any crashinfo or crashdump files. If the router has crashed and " "was not configured to automatically reload the router will " "need to be reloaded manually."

SYS2CHUNKBADRECOUNT	2-Critical	Bad chunk reference count chunk [hec] data [hec] refcount [hec] alloc pc [hec].	An inconsistency was detected while managing the chunk memory pool. The probability that this is a software error is close to 100 percent but there could be a hardware problem with memory.	-	"Copy the error message exactly as it appears on the console " "or in the system log contact your Cisco technical support representative " "and provide the representative with the gathered information. " "Save any crashinfo or crashdump files. If the router has crashed and " "was not configured to automatically reload the router will " "need to be reloaded manually."
SYS2CHUNKNOMEMORY	2-Critical	* Could not allocate chunks for [chars]. No memory	* A software error occurred.	-	* "Copy the error message exactly as it appears and report it to " * "your technical support representative."
SYS2CHUNKEXPANDEFAIL	2-Critical	Could not expand chunk pool for [chars]. No memory available	There is not enough processor memory left to grow this chunk pool.	-	"Copy the error message exactly as it appears and report it to " "your technical support representative."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS2CHUNKBADFREEMAGIC	2-Critical	Bad free magic number in chunk header chunk [hec] data [hec] chunk_freemagic [hec]	An inconsistency was detected while managing the chunk memory pool. The probability that this is a software error is close to 100 percent but there could be a hardware problem with memory.	-	"Copy the error message exactly as it appears on the console " "or in the system log contact your Cisco technical support representative " "and provide the representative with the gathered information. " "Save any crashinfo or crashdump files. If the router has crashed and " "was not configured to automatically reload the router will " "need to be reloaded manually."
SYS2CHUNKNOROOT	2-Critical	Root chunk need to be specified for [hec]	A software error occurred.	-	"Copy the error message exactly as it appears and report it to " "your technical support representative."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS2CHUNKINVALIDHDR	2-Critical	Invalid chunk header type [dec] for chunk [hec] data [hec]	An inconsistency was detected while managing the chunk memory pool. The probability that this is a software error is close to 100 percent but there could be a hardware problem with memory.	-	"Copy the error message exactly as it appears on the console " "or in the system log contact your Cisco technical support representative " "and provide the representative with the gathered information. " "Save any crashinfo or crashdump files. If the router has crashed and " "was not configured to automatically reload the router will " "need to be reloaded manually."
SYS3CRASHINFOINITFAIL	3-Error	Crashinfo subsystem initialization did not add registry \n\ crashinfo_get_default_file_name	In order to figure out the device which the crashinfo writes to the crashinfo subsystem has to add the registry crashinfo_get_default_file_name	-	"Use Topic to search for a similar DDTS. If you find none write " "a DDTS for this problem. This SHOULD never happen - it is an " "indication of a bug elsewhere in the code."
SYS2CHUNKBADPOOLSIZE	2-Critical	Bad poolsize returned by the system : [dec]	System returns a non-optimal pool size. Need to change pool sizes	-	"Copy the error message exactly as it appears and report it to " "your technical support representative."
SYS2CHUNKINCONSIS	2-Critical	Inconsistent counters for chunk : [chars] total free [dec]/[dec] total sibs [dec]/[dec] total alloc [dec]/[dec]	System returns a non-optimal pool size. Need to change pool sizes	-	"Copy the error message exactly as it appears and report it to " "your technical support representative."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS2CHUNKBADLESZE	2-Critical	Chunk element size is more than 64k for [chars]	Chunk manager cannot function properly with big chunk elements	-	"Copy the error message exactly as it appears and report it to " "your technical support representative."
SYS-2-NULLCHUNK	2-Critical	Memory requested from Null Chunk	Chunk manager cannot allocate memory from NULL chunks	-	"Copy the error message exactly as it appears and report it to " "your technical support representative."
SYSCHUNKSIBLINGEXCD	4-Warning	Number of siblings in a chunk has gone above the threshold. Threshold:[dec] Sibling-Count:[dec] Chunk:0x[hec] Name:[chars]	Number of siblings in a chunk with no header has gone above the default/configured threshold configured using <cmdBold>memory chunk siblings threshold<nocmdBold> <cmdArg>current</cmdArg>	-	LOG_STD_ACTION
SYS-1-CCA_SYS_ERR	1-Alert	CCA Detected System Error code = [dec]	CCA has detected a severe system software error. This condition is usually caused by one of the components using CCA or by the interaction among components using CCA.	os	LOG_STD_ACTION
SYS-2-CCA_INT_ERR	2-Critical	CCA Detected Logic Error code = [dec]	CCA has detected a severe internal logic error. This condition is usually caused by one of the components using CCA or by the interaction among components using CCA.	os	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS-3-TIMERNEG	3-Error	Cannot start timer [hex] with negative offset [dec].	An internal software error occurred.	-	"Copy the error message exactly as it appears and report it to your " "technical support representative."
SYS-3-MGDTIMER	3-Error	[chars][chars] timer = [hec].	This message indicates an error in a system timer. The problem can be caused either by software or by hardware.	-	-
SYS-3-DMPMEM	3-Error	%08x: %08x %08x %08x %08x %08x %08x	A software or hardware error occurred.	-	"Copy the error message exactly as it appears and report it to your " "technical support representative."
SYS6BOOT_MESSAGES	6-Information	Messages above this line are from the boot loader.\n	At least one informational or error message was printed by the boot loader.	-	"If the system image was loaded no action is recommended. If the " "system image did not load as configured send a log file and " "configuration information to your technical support representative."
SYS2EXCEPTIONDUMP	2-Critical	System Crashed Writing Core....	The system has crashed because of an exception A core is being generated	-	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS3LOGGER_FLUSHING	3-Error	System pausing to ensure console debugging output.\n	Debugging or informational messages are being generated faster than they can be displayed on the console. In order to guarantee that they can be seen the rest of the system is paused until the console output catches up. This can break time-critical behavior such as maintaining an ISDN link.	-	"Consider using conditional debugging turning off console logging " "or using the \"no logging console guaranteed\" command or turning " "off link-state messages for some interfaces"
SYS3LOGGER_FLUSHED	3-Error	System was paused for %TE to ensure console debugging output.\n	Debugging or informational messages are being generated faster than they can be displayed on the console. In order to guarantee that they can be seen the rest of the system was paused until the console output catches up. This can break time-critical behavior such as maintaining an ISDN link.	-	"Consider using conditional debugging turning off console logging " "or using the \"no logging console guaranteed\" command or turning " "off link-state messages for some interfaces"
SYS3LOGGER_DROPPED	3-Error	System dropped [dec] console debug messages.\n	Debugging or informational messages are being generated faster than they can be displayed on the console. The messages can not be guaranteed to be seen so this message replaces the lost messages.	-	"Consider using conditional debugging or turning off console logging."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYSERRCONSCHK	3-Error	System cannot release chunk memory.\n	The system was not able to destroy a previously allocated chunk of memory.	-	"Copy the error message exactly as it appears and report it to your " "technical support representative."
SYSCHKNOEXMEM	3-Error	No handler to [chars] external memory.	An attempt was made to allocate or free a chunk of external memory but no handler for managing external memory was registered.	-	"Copy the error message exactly as it appears and report it to your " "technical support representative."
SYSREAD_BOOTFILE_FAIL	6-Information	[chars] [chars].\n	A configured boot system command failed.	-	"If a system image was eventually loaded no action is recommended. If " "the system image did not load as configured send a log file and " "configuration information to your technical support representative."
SYS3-URLWRITEFAIL	3-Error	redirection url write failed '[chars]'	Redirection of output to URL failed.	-	"Check for free space on destination URL and retry."
SYSREAD_BOOTFILE_SKP	6-Information	boot system [chars] command is skipped\n	A configured boot system command is skipped. Either the system experienced a crash while loading this image in the last attempt or the filename is not properly specified. Subsequent boot system commands will be tried	-	"Replace the failed boot system image with a good one. There could be " "various reasons that this specified image failed for example the image " "might be with a bad checksum."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SUNRESMEMORY	6-Information	Reserve memory is being used	The reserved memory is being used by the console	-	"The system is low in memory. The reserved memory will be " "used only by the console process. Please take a techsupport " "so that the reason for low memory can be found"
SUNRESMEMORY/READ	6-Information	Reserve memory is being created	A portion of memory is reserved exclusively for console	-	"The console access is made available even in low memory " "condition. User can collect the details like tech-support " "for further diagnosis"
SYS-3-BAD_RESET	3-Error	Questionable reset of process [dec] on tty[t-line]\n	A process was reset without giving it a chance to clean itself up.	exec	"Copy the error message exactly as it appears and report it to your " "technical support representative."
SYS-3-DUP_TIMER	3-Error	Same tty[t-line] in linewatch_timers type [dec]	A tty appeared twice in a timer list where it should have only appeared once.	exec	"Copy the error message exactly as it appears and report it to your " "technical support representative."
SYS-2-LINEPROCDEAD	2-Critical	Killing process [chars] associated with line [dec]	A process associated with a tty line was killed by another process. The line may go dead	exec	"If this messages recurs copy it exactly as it appears " "and report it to your technical support representative."
SYS-3-TIMER_EXPAND	3-Error	timer heap at 0x[hec] needed to expand but hasn't	A timer heap should have expanded but has not	-	"Copy the error message exactly as it appears and report it to your " "technical support representative."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS-3-HTIMER_INIT	3-Error	heap timer at 0x[hec] has not been initialized	A heap timer has not been initialized	-	"Copy the error message exactly as it appears and report it to your " "technical support representative."
SYS3-HTIMER_STATE	3-Error	heap timer at 0x[hec] in state [dec]	A heap timer has not been initialized	-	"Copy the error message exactly as it appears and report it to your " "technical support representative."
SYS-2-MUNMAP	2-Critical	Could not return memory Neutrino via munmap at %lx size [dec] errno [dec]	Failed to unmap memory memory at the indicated location. The memory could not be unmapped because it was allocated via mmap.	-	-
SYS-2-MMAP	2-Critical	mmap failed for size [dec] bytes Caller PC 0x[hec] errno [dec]	Failed to allocate memory for the requested size. The memory could not be mapped because there is no memory.	-	-
SYS3-CERF_RECOVER	3-Error	[chars]	This message is emitted when there has been a full recovery after a cache error	-	"Copy the error message exactly as it appears and report it to your " "technical support representative."
SYS-2-CERF_ABORT	2-Critical	[chars]	This message is emitted when a cache error has occurred but an attempt to recover has been aborted	-	"Copy the error message exactly as it appears and report it to your " "technical support representative."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS3-PAKSUBBLOCKSETZ	2-Critical	[dec]	This message indicates an error in startup code to register a pak subblock size. An attempt was made to register a size after the subblock chunk pool had been initialized. This problem is caused by software initialization order.	-	-
SYS-3-RGCREATEFAIL	3-Error	Resource group creation failed\nCause: [chars]	An attempt to create a resource group failed at the indicated location	-	-
SYS-3-RGADDFAIL	3-Error	Couldn't add process process pid [dec] to resource group [hec]\n Cause: [chars]	An attempt to create a resource group failed at the indicated location	-	-
SYS-3-RGDELEFAIL	3-Error	Couldn't delete process process pid [dec] from resource group\n \nCause: [chars]	An attempt to remove a process from a resource group failed at the indicated location	-	-
SYS-3-RGDESTFAIL	3-Error	Couldn't destroy resource group [hec]\nCause: [chars]	An attempt to destroy a resource group failed at the indicated location	-	-
SYS-3-RGOPFAIL	3-Error	Requested memory thresholding operation on resource group failed\n Resource Group handle: [hec] Cause: [chars]	The message indicates that an request to Set/Get memory thresholding data or enable/disable thresholding failed in the indicated location	The component that issued the request	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS3-RGMEMEXCEED	3-Error	\nLimit Exceeded: [chars] Holding: %lu Requested:%lu bytes	A resource group has requested for more memory than the configured limit at the indicated location	The component to which the offending resource group belongs.	-
SYS3-PAKSUBBLOCKSIZE	2-Critical	[dec]	This message indicates an error in attempting to allocate a pak subblock. The requested size is larger than the maximum registered subblock size.	-	-
SYS3-PAKSUBBLOCKALREADY	2-Critical	[dec]	This message indicates an error in attempting to allocate a pak subblock. A subblock was already associated with the packet.	-	-
SYS3-IMAGE_TOO_BIG	3-Error	'[chars]' is too large for available memory [dec] bytes.	The allocated memory for the image is too small to hold the image file.	-	"Increase the amount of memory available in the router by booting " "with a smaller image not enabling non-essential sub-systems " "or upgrading the installed memory. Call your technical " "support representative for assistance."
SYS-2-BAD_BM_ARG	2-Critical	Invalid BM index boolean used as argument [dec]	An illegal boolean manager index argument was referenced	idb	"Copy the error message exactly as it appears and report it to" " your technical support representative."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SS MAXDBMEMXCHDD	2-Critical	BM bit allocation limit exceeded	The BM has exhausted all of the bits available for allocation	idb	"Copy the error message exactly as it appears and report it to" " your technical support representative."
SYS2BAD_BM_NAME	2-Critical	Invalid BM name	An illegal name string was registered with the BM	idb	"Copy the error message exactly as it appears and report it to" " your technical support representative."
SYS2ASSERTION_FAILED	2-Critical	Assertion failed: \[chars]\	An internal state consistency check failed. Correct operation cannot be guaranteed and the system has been halted.	-	LOG_STD_ACTION
SS STARTUPCONGNOED	6-Information	System startup configuration is ignored based on the configuration register setting.	The configuration register was set to ignore the system startup configuration.	-	"If the system should ignore the startup configuration no action " "is required. If the system should boot with the startup configuration " "saved in the NVRAM change the configuration register value."
SYS-3-URLREADFAIL	3-Error	cannot open file for reading '[chars]'	The URL for the cannot be opened for reading.	-	"Check for proper Uniform Resource Locator syntax and for read " "permission and retry."
SYS-3-TCLSETFAIL	3-Error	cannot set TCL interpreter variable '[chars]' to '[chars]' : '[chars]'	The value could not be passed to the TCL interpreter	-	"Copy the error message exactly as it appears and report it to your " "technical support representative."

SYS-5-CONFIG_NV	5-Notice	Nonvolatile storage configured from [chars]	The configuration was written successfully.	none	"This is a notification message only. No action is required."
SYS-5-CONFIG_NV_I	5-Notice	Nonvolatile storage configured from [chars] by [chars]	The write of the nonvolatile configuration failed.	-	"If this messages recurs copy it exactly as it appears and report " "it to your technical support representative."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS3CONFIG_NV_DATA	3-Error	Variable [chars] not set properly in the routine [chars].	The write of the nonvolatile configuration failed because an internal variable was not set properly.	-	"If this messages occurs copy it exactly as it appears and report " "it to your technical support representative."
SYS4CONFIG_NEWER	4-Warning	Configuration from version [dec].[dec] may not be correctly understood	The software detected that the configuration saved in memory was written by a newer version of software. There might be commands saved in memory that are not implemented by the older software version.	none	"Examine all the messages printed while the router was " "booting. For each message about an unknown command determine " "whether that feature is required. If so upgrade to a " "newer version of software that supports that feature."
SYS4CONFIG_NOLOCK	4-Warning	The configuration could not be locked	A software error occurred.	-	"Copy the error message exactly as it appears and report it " "to your technical support representative."
SYS3CONFIG_NO_PRIVATE	3-Error	No space remaining to save private config	A software or hardware error occurred.	-	"Copy the error message exactly as it appears and report it to your " "technical support representative."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SSCONFG_NV_OVRUN	4-Warning	Non config data present at the end of nvram is corrupted	The software detected that the configuration saved into nvram has overlaid a part of the nvram occupied by non config data files. Typically these files are used by snmp to store and retrieve non config persistent data across system reload.	-	"Compress the configuration and store or copy to flash as appropriate"
SSCONFG_NV_TRUNC	4-Warning	Truncated configuration to %ld bytes from %ld bytes	The software detected that the configuration saved into nvram has been truncated. There was not enough space to save the compressed configuration.	-	"Save the configuration to flash if the platform supports " "\boot config\" command."
SSCONFG_NV_END_OVRUN	4-Warning	Non config data present at the end of nvram needs to be overwritten to fit the configuration into nvram	The software detected that the non config data files occupying the end of nvram need to be overwritten to fit the configuration. Typically these files are used by snmp to store and retrieve non config persistent data across system reload.	-	"Compress the configuration and store or copy to flash as appropriate"
SSCONFG_NV_END_TRUNC	4-Warning	Configuration needs to be truncated to fit into nvram	The software detected that the configuration is to be truncated to fit in the nvram. There was not enough space to save the compressed configuration	-	"Save the configuration to flash if the platform supports " "\boot config nvbypass\" command."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS4-NV_BLOCK_INITFAIL	4-Warning	Unable to initialize the geometry of nvram	The software detected that it failed to initialize the nvram block geometry a part of the nvram to host non config data files. Typically these files are used by snmp to store and retrieve non config persistent data across system reload. This may happen when the entire nvram is packed with the configuration and the newer version of software which supports this feature could not find the minimum room in the nvram to initialize block file system.	-	"Reduce the configurations in the nvram atleast by 2K"
SYS7-NV_BLOCK_INIT	7-Debug	Initialized the geometry of nvram	Initialized the nvram block geometry a part of the nvram to host non config data files. Typically these files are used by snmp to store and retrieve non config persistent data across system reload.	-	""
SYS4-NV_CHKSUM	4-Warning	An nvram checksum is already in progress	An interrupt service routine attempted to perform a checksum on the nvram contents and found the resource in use.	nvram	-

Family-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS4-EXMALLOCFAIL	4-Warning	External memory allocation of [dec] bytes failed from EXMEM [dec]	The requested memory allocation is not available from the specified memory pool. The current system configuration network environment or possibly a software error might have exhausted or fragmented the router's memory.	-	"Copy the error message exactly as it appears and report it to your " "technical support representative."
SYS-2-EXMEMINIT	2-Critical	EXMEM [dec]: [chars]	The requested external memory allocator failed to be initialized. reasons are not clear.	-	"Copy the error message exactly as it appears and report it to your " "technical support representative."
SYS-2-EXMEMPARAM	2-Critical	Bad parameter [dec] when calling to the allocator utility	Illegal parameter is used when called to allocator. may represent data some corruption.	-	"Copy the error message exactly as it appears and report it to your " "technical support representative."
SYS-2-EXMEMFREE	2-Critical	Free a non allocated ptr [hec] size [dec].	Trying to free a memory which not all of it marked as allocated.	-	"Copy the error message exactly as it appears and report it to your " "technical support representative."
SYS2CONFIG_DOWNFAL	2-Critical	Generated configuration not backward compatible	The router has been configured to generate nonvolatile memory using the commands of an older software version. The current configuration of the router contains a command that cannot be saved using only the older command set.	none	"Allow the router to save the configuration using the command set of " "the current software version or remove the commands that cannot be " "saved using the older command set."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS-5-OUTSETUP	5-Notice	Configuration file [chars] accepted aborting setup	A configuration was accepted over the network so the setup session will be aborted.	none	"This is a notification message only. No action is required."
SYS-3-BADLINKTYPE	3-Error	* Unexpected linktype [dec]	* A software error occurred.	udp	* "Copy the error message exactly as it appears and report it to your " * "technical support representative."
SYS-2-SIGNUM	2-Critical	Process aborted on invalid signal signum = [dec].	An attempt was made to send an invalid signal to another process.	-	"If this message occurs more than once report this message " "to your technical support representative."
SYS-3-CPUHOG	3-Error	Task is running for [dec]msecs more than [dec]msecs [dec]/[dec]	The indicated process ran too long without relinquishing the processor. Each process should run for a small amount of time and then relinquish the CPU so that other processes can run. This problem can be caused by many things like traffic or system load hardware or operational configuration a configuration change initialization of many interfaces cards or ports for example a high momentary error rate a sustained abnormal	If this error occurs in conjunction with a TIMERHOG message \n\ report the two errors together and use the component obtained \n\ for the TIMERHOG message.	"If you suspect a software error copy the error message exactly as it " "appears on the colsole or in the system log contact your technical support" "representative and provide the representative with the gathered information."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS-2-WATCHDOG	2-Critical	Process aborted on watchdog timeout process = [chars].[chars]	The indicated process ran for too long without relinquishing control. The system killed it as a runaway process.	-	-
SYS-3-TIMERHOG	3-Error	Timer callback ran long PC = [hec].	The indicated callback routine ran for too long without relinquishing the processor.	Determine the component from the callback routine address displayed in the error message. Use Topic to search for a similar DDTs. If you find none write a DDTs for this problem.	"Copy the message exactly as it appears and report it your technical " "support representative."
SYS-6-STACKLOW	6-Information	Stack for [chars] [chars] running low [dec]/[dec]	An internal software error occurred.	-	"If this messages recurs copy it exactly as it appears and report " "it to your technical support representative."
SYS4GREEDY_REGEX	4-Warning	[chars] while processing the input regular expression. Aborting processing use alternate regular expression. Input regular expression: \[chars]\	Regular expression processing limitation: Certain regular expressions require huge stack space for processing or can lead to processing timeouts. We abort processing such regular expressions and print this message to avoid stack overflow/unexpected reload.	os	"The regular expression specified leads to stack overflow/processing " "timeout of the indicated process. Recommended to use a different " "regular expression."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS-1-CUR-NGI-FRESHOLD	1-Alert	Threshold: [chars] CPU UtilizationTotal/Intr: [dec]%%/[dec]%%	The system is experiencing high CPU usage possibly from a process that is using too much CPU. This condition demands immediate attention or packets or calls may be dropped.	-	"Enter the <CmdBold>show processes CPU<NoCmdBold>" " command to determine the CPU hogging process" " that is causing this condition and if possible" " disable the activity that is causing the" " CPU hog condition so that CPU" " utilization is reduced."
SYS-1-RA-INGI-FRESHOLD	1-Alert	Threshold: [chars] CPU UtilizationTotal/Intr [dec]%%/[dec]%%.	CPU usage has returned to normal after crossing over from a threshold of high usage. Any process that was disabled during the period of high CPU use can now be enabled.	-	"No action is required."
SYS-2-INPUTQ	2-Critical	INPUTQ set but no IDB ptr=[hec]	This message is issued when an attempt is made to alter the input queue count for a packet that should not be counted.	-	-
SYS-6-BADSHAREINFO	6-Information	[chars] packet [hec] has a zero reference count freeing pid = [hec] \n\ freeing pc = [hec] [chars].	Provides additional information about original freer of packet.	-	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS-2-BADSHARE	2-Critical	Bad refcount in [chars] ptr=[hec] count=[hec]	A reference count is used to track the usage of many data structures. A function increments the count when it begins to use a structure and decrements it when it finishes. When the count becomes zero the data structure is freed. This message indicates that when the count was accessed it was found to be negative which means that the data structure will not be freed until the system is reloaded.	-	-
SYS-2-CFORKLEV	2-Critical	Process creation of [chars] failed at level [dec].	An internal software error occurred.	Determine the component from the process name displayed in the\n\ error message.	"Copy the error message exactly as it appears and report it to your " "technical support representative."
SYS-2-CFORKMEM	2-Critical	Process creation of [chars] failed no memory.	Insufficient memory was available to create a process either while trying to support additional features or due to a memory leak.	mem-suspect	"A memory leak may be the cause if the system has been running for a " "while without changing its configuration. If you suspect a leak then " "copy this message exactly as it appears and report it to your technical " "support representative. Otherwise ensure that more memory is available " "to support the additional features."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS2CFORKBADFUNCT	2-Critical	Can't create process with start address = [hec]	An internal software error occurred.	-	"Copy the error message exactly as it appears and report it to your " "technical support representative."
SYS-3-BADPROCESS	3-Error	Bad process ID [dec] when [chars] process table	An internal software error occurred.	os-scheduler	"Copy the error message exactly as it appears and report it to your " "technical support representative."
SYS-2-INSCHED	2-Critical	[chars] within scheduler	-	Determine the component from the stack trace displayed in the error message. Then use Topic to search for a similar DDTS. If you find none submit a DDTS for this problem.	-
SYS-2-NOTIOSTASK	2-Critical	[chars] from outside IOS task context	An IOS reschedule request was made from code that is not running in the context of an IOS task -- from an interrupt handler the scheduler itself or a service pthread within the IOS process.	Determine the component from the stack trace displayed in the error message. Use Topic to search for a similar DDTS. If you find none write a DDTS for this problem.	"Copy the error message exactly as it appears and report it to your " "technical support representative."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS-2-INTSCHED	2-Critical	'[chars]' at level [dec]	The scheduler was entered from an interrupt service routine ISR.	Determine the component from the stack trace and process name displayed in the error message. Then use Topic to search for a similar DDTs. If you find none submit a DDTs for this problem. If the stack trace indicates that the scheduler was called from an interrupt handler choose the DDTs component based on the interrupt handler. Otherwise use the process name to determine the DDTs component.	-
SYS-3-PROCSEMFAL	3-Error	Process semaphore creation for preemptive processes failed.	Creation of process function semaphore to protect the critical section of process create routine failed. The semaphore creation can fail if there isnt enough chunk memory to create the event structure.	os	-
SYS-2-NOBLOCK	2-Critical	[chars] with blocking disabled.	A process aattempted to relinquish control with blocking disabled.	Determine the component from the stack trace displayed in the error message. Use Topic to search for a similar DDTs. If you find none submit a DDTs for this problem. Choose the DDTs component associated with the routine that called the scheduler.	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS-2-BLOCKHUNG	2-Critical	Task hung with blocking disabled value = 0x[hec].	The indicated process has exceeded the time limit for which it may relinquish control with blocking disabled.	Determine the component from the stack trace displayed in the error message. Use Topic to search for a similar DDTS. If you find none submit a DDTS for this problem. Choose the DDTS component associated with the routine that called the scheduler.	"This message may be a result of high loads. If it recurs " "copy the text exactly as it appears and report it along " "with the associated stack trace to your technical support " "representative."
SYS-2-NOTDEAD	2-Critical	Killing process [chars] pid [dec] again	An internal software error occurred.	os-scheduler	"If this messages recurs copy it exactly as it appears and report " "it to your technical support representative."
SYS-2-NOPROCESS	2-Critical	No such process [dec]	An internal software error occurred.	-	"If this messages recurs copy it exactly as it appears and report " "it to your technical support representative."
SYS-2-IMMORTAL	2-Critical	Attempt to shut down management process [dec] [chars].	An attempt was made to shut down the specified management process. Management processes must not be shut down as long as the\n\ router remains up.	Determine the component from the stack trace displayed in the error message. Use Topic to search for a similar DDTS. If you find none submit a DDTS for this problem. Choose the DDTS component associated with the routine that called the process_kill.	-

LINK-5-SLARP	5-Notice	[chars] address [inet] resolved by [inet]	-	-	LOG_STD_ACTION
LINK-4-FDDISTAT	4-Warning	Interface [chars] FDDI state [chars] detected	There was a state change on the FDDI ring.	-	LOG_STD_ACTION
LINK-4-BRIDGECONFLICT	4-Warning	Interface [chars] encapsulated BPDU recvd from [enet]	An FCIT running in nonencapsulating transparent mode detected an FDDI\n\n bridge running in encapsulation mode on the same fiber. This is an\n\n unstable situation and should be corrected. The incoming interface is\n\n displayed along with the FDDI MAC address in standard form.	-	"Upgrade the errant interface to full transparent mode. Copy the error\n\n message exactly as it appears and report it to your Cisco\n\n technical support representative."
LINK-5-REMLOOP	5-Notice	Interface [chars] remote loop [chars] [chars]	The interface entered or exited a remote loopback.	-	LOG_STD_ACTION
LINK-5-LOOPSTATUS	5-Notice	Interface [chars] [chars]	The interface entered or exited loopback.	-	LOG_STD_ACTION
LINK-6-BERTSTATUS	6-Information	Interface [chars] [chars]	BERT is completed for this interface.	-	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
LINK-6-BERTMSGS	6-Information	[chars]	BERT related information messages.	-	LOG_STD_ACTION
LINK-3-COMPREG	3-Error	Interface [chars] non-existent decompression registry.	A software or hardware error occurred.	-	LOG_STD_ACTION
LINK-3-BOGUSENCAP	3-Error	msgtxt_badencap	A serial interface has been configured with an unknown\n\ encapsulation.	-	LOG_STD_ACTION
LINK-4-BADQID	4-Warning	Interface [chars] bad output queue ID specified [dec].	This message indicates an internal software error.	-	LOG_STD_ACTION
LINK-3-IDBLISINS	3-Error	Not able to insert interface [chars] into [chars] list	This message indicates an internal software error.	-	LOG_STD_ACTION
LINK-3-IDBLISCRE	3-Error	Unable to create [chars] interface list	This message indicates an internal software error.	-	LOG_STD_ACTION
LINK-3-LINK_FAULT	3-Error	[chars] [chars] [chars] [chars]	The link state for the port is down	-	LOG_STD_ACTION
LINK-3-FCS_ERROR	3-Error	[chars] [chars] [chars] [chars]	The FCS Error rate exceeds the configured threshold	-	LOG_STD_ACTION
CRSRYUNQIDUEN	4-Warning	GBIC interface [dec]/[dec] has the same serial number as another GBIC interface	The GBIC was identified as a Cisco GBIC but its serial number matches that of another interface on the system.	firmware	"Cisco GBICs are assigned unique serial numbers. Verify that the GBIC " "was obtained from Cisco or a supported vendor"
CRSRYUNQIDUEN	3-Error	GBIC interface [dec]/[dec] is a duplicate of GBIC interface [dec]/[dec]	The GBIC was identified as a Cisco GBIC but its vendor ID and serial number match that of another interface on the system.	firmware	"Cisco GBICs are assigned unique serial numbers. Verify that the GBIC " "was obtained from Cisco or a supported vendor"

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SFF8472-INTERNAL_ERROR	3-Error	[chars]	The SFF8472 floating point subsystem encountered an internal\n\ software error. The error message contains text which can be used\n\ to help identify the nature of the problem.	-	LOGS_IDSHTTECH_ACTION
FEC_ISSU-3- INIT	3-Error	FEC ISSU client initialization failed at [chars] error [chars]	FEC ISSU client could not be initialized this will cause catastrophic failure when ISSU upgrade or downgrade is performed.	L2	LOGS_IDSHTTECH_ACTION
FEC_ISSU-3- TRANSFORM	3-Error	FEC ISSU client [chars] transform failed error [chars]	FEC ISSU client could not transform the message. If the transmit transformation failed it means that the checkpoint message can not be sent to the standby unit. If the receive transformation failed it means that the checkpoint message can not be applied on the standby unit. In both cases the FEC state will not be identical with the active unit.	L2	"show issu session <client_id> and " "show issu negotiated version <session_id>"

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
FEC_ISSU-3-MSG_NOT_OK	3-Error	FEC ISSU client message [dec] is not compatible	FEC ISSU client received an incompatible message from the peer unit. Since the message is not compatible it can be processed by this unit	L2	"show issu message group <client_id> and " "show issu session <client_id> and " "show issu negotiated version <session_id>"
FEC_ISSU-3-MSG_SIZE	3-Error	FEC ISSU client failed to get the message size for message [dec]	FEC ISSU client failed to calculate message size for the message specified. The OIR ISSU client will not be able to send message to the standby unit.	L2	"show issu message group <client_id> and " "show issu session <client_id> and " "show issu negotiated version <session_id>"
FEC_ISSU-3-SESSION	3-Error	FEC ISSU client [chars]	FEC ISSU client observed an error during a session negotiation with the peer unit. When there is a problem with the session the standby unit can not be brought up.	L2	"show issu capability entries <client_id> and " "show issu session <client_id> and " "show issu negotiated capability <session_id>"
FEC_ISSU-3-SESSION_UNREGISTRY	3-Error	FEC ISSU client failed to unregister session information. Error: [dec] [chars]	The FEC ISSU client failed to unregister session information.	L2	"show issu session <client_id> and " "show issu negotiated capability <session_id>"
FEC_ISSU-3-SEND_FAILED	3-Error	FEC ISSU client failed to send a negotiation message error [dec]	FEC ISSU client could not send a session negotiation message to the peer. When there is a problem in the negotiation the standby unit can not be brought up.	L2	"show logging and show checkpoint client"

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
FEC_ISSU-3-BUFFER	3-Error	FEC ISSU client failed to get buffer for message error [dec]	FEC ISSU client failed to get buffer for building a negotiation message. Hence it can send the negotiation message to the standby unit. When there is a problem in the negotiaiton the standby unit can not be brought up.	L2	"show logging and show checkpoint client"
FEC_ISSU-3-CAPABILITY	3-Error	FEC ISSU client [chars]	FEC SWITCH ISSU client observed an error during capability negotiaiton. When this error happens there is a mismatch between the client capability between the active and standby unit.	L2	"show issu capability entries <client_id> and " "show issu session <client_id> and " "show issu negotiated capability <session_id>"
FEC_ISSU-3-POLICY	3-Error	FEC ISSU client message type [dec] is [chars]	FEC ISSU client received an message type which it does not support. The policy is applied to make the session compatible.	L2	"show issu session <client_id>"
TEMPLE3IEMFLAIEAL	3-Error	[chars] template [chars] binding to [chars] failed due to [chars] CLI failure.	Template binding failed due to failure status returned by binding.	-	-
VDSL_DAEMON3NPROC	3-Error	VDSL Daemon [chars] SM create event process failed	The router does not have enough memory run this VDSL/ADSL feature	-	LOG_STD_ACTION
VDSL_DAEMON3NMEM	3-Error	VDSL Daemon [chars] malloc failed : out of memory	The router does not have enough memory installed to run this \n\VDSL/ADSL feature	-	LOG_STD_ACTION

IP_SNMP-4-TOOBIG	4-Warning	Oversize message from [inet] datagram size [dec] udp length [dec]	An incoming SNMP packet had a length field so large that the system had to assume it was in error. This system made a correct reaction to bad external data. Since SNMP packets should originate from systems under the same administration this may indicate that the network host used to originate the SNMP request had a problem in its networking layer. Alternatively if the SNMP packet originated from outside the local administrative domain it could indicate a failed attempt at security penetration and that site should be watched more closely.	-	"If the origin is local no action is required. If the origin is determined to be malicious either contact the administrator of the originating site or install filters to prevent access by that site as circumstances warrant."

MSM6MFD_COUNT_ERR	6-Information	MFD Count error : [inet][inet][dec] first mfd: [dec]vlan extra RPF-MFD	This message happens when there are multiple MFD in hardware switched state.	cat6000-mmls	"This is just a informative message. If there are to many packets going to CPU the MTU on the interfaces should be changed appropriately to take advantage of hardware replication."
MSM6NMICUSUPRED	6-Information	Outgoing interfaces with MTU less than the RPF interface will be multicast replicated to in software	-	cat6000-mmls	"This is just a informative message. If there are to many packets going to CPU the MTU on the interfaces should be changed appropriately to take advantage of hardware replication."
MSM6SMINSIAL_FAILURE	6-Information	interface/mask entry installation failed on [inet]/[dec] vlan[dec]	This message happens when Interface/mask entry to punt directly connected sources to the router could not be installed in HW-CEF table. This happens system is running out of available CEF entries. In this situation there might be blackholing of traffic for the directly connected sources on this interface	cat6000-mmls	"Modify the network config such that hardware resource limitation is not hit and ensure that interface/mask entry is installed."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
MSM6VLAN_FAIL	6-Information	Unable to locate secondary-vlan for [inet][inet][dec]	This message happens when RP was not able to determine the secondary vlan for the source in secondary vlan. After finite retries RP gives up installing the shortcut in hardware. This can happen when a new flow is installed or when there is a RPF change. In such situations flow will be software switched.	cat6000-mmls	"Make sure ARP table is populated for sources in secondary vlan by explicitly 'ping'ing the source and the ARP table should contain the primary as well as secondary vlan information. To enable creation of hardware shortcut do a 'clear ip mroute <group> <source>' for the specific flow."
MSM6LC_SCP_FAILURE	6-Information	NMP encountered internal communication failure for [inet][inet][dec]	This message happens SP was not able to update CEF tables on at least one of the EARLs on Linecards.	cat6000-mmls	"Under some condition SP was not able to communicate with Linecard to update the multicast-CEF table. And this causes inconsistency in the CEF table among different line cards. This shortcut is deleted so that inconsistent state is purged. And this flow will get software forwarded."
MSM6CONG_MISMATCH	6-Information	Multicast hardware switching config mis-match between RP and NMP. It is likely to be disabled on the NMP	MLS multicast hardware switching has been enabled on the RP but likely disabled on the NMP	cat6000	"Correct the mis-config by enabling IGMP snooping and MMLS on the NMP"

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
MSMCONF_MISMATCH	6-Information	Multicast hardware switching mismatch recovered from earlier config mis-match	MMLS Config mismatch between RP and SP recovered from mismatch. The MMLS multicast hardware switching is likely to be enabled on the NMP	cat6000-mmls	"Modify the network config such that hardware resource limitation is not hit and ensure that sg or *g entry is installed."
MSMMSIG_CYSERR	6-Information	MMLS: Legacy Linecard Inserted Egress Replication Mode will be disabled	Egress Replication is not supported with Legacy Cards system will transition to Ingress Mode please note that the transition will cause temporary loss of traffic	cat6000	"If the system is required to operate in Egress Replication Mode the Legacy lincard should be removed"
MSMMSM_MODE_CHG	6-Information	MMLS: Replication Mode Changed to [chars] mode [chars]	When auto detection of replication mode is enabled the system will transition to ingress mode when an egress incapable linecard is inserted. The system will transition back to egress mode when the last egress incapable linecard is removed	cat6000	"Transition between ingress and egress mode will cause temporary loss of traffic to prevent this use the command mls ip replication-mode ingress"
MSMMSOCS_CANGES	6-Information	MMLS: Egress Local feature is NOT applicable in Ingress mode	When the system transitions from Egress replication mode to ingress the Egress Local feature will become non-applicable even if the Egress Local feature is enabled.	cat6000	"This is only to inform the user that Egress Local feature is not applicable in Ingress mode. If the Egress Local feature is required actions need to be taken to restore the system replication mode to egress"

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
MMSLSEGRESSNO	6-Information	MMLS: Please make sure no multicast traffic is going through egress incapable line cards when system is operating in egress mode	This message is to remind the user that there should be no multicast traffic going through egress incapable line cards while the system is operating in egress replication mode.	cat6000	"Check to see if there are any egress incapable line cards in the system. If there are egress incapable line cards make sure that there is no multicast traffic going through these cards"
MLSM-6-MLSM_PMS	6-Information	MMLS: MLSM is suspending the caller process [chars]	This message is to remind the user that MLSM is suspending the caller process. This happens when the MLSM routines are called from PIM/Mwheel context and MLSM routines does an process suspend	cat6000-mmls	"When MLSM suspends the caller process there is a possibility of data corruption for the data handled by the caller process"
IPMUX3V4_CACHE_FULL	3-Error	IPMux V4 Cache full - replacing active entry	The IPMux V4 cache is full and has replaced a current cache entry. \n\ IP Multiplexing performance may be impacted if this continues.	ipmux	"Increase the size of the cache using the \n\ 'ip mux cache' configuration command."
IPMUX3V6_CACHE_FULL	3-Error	IPMux V6 Cache full - replacing active entry	The IPMux V6 cache is full and has replaced a current cache entry. \n\ IP Multiplexing performance may be impacted if this continues.	ipmux	"Increase the size of the cache using the \n\ 'ipv6 mux cache' configuration command."

CP REDUNPCMCIA_TEST	3-Error	Alarm: [chars] [chars] [chars] [chars] [chars]	The alarm appears when the processor has failed the online diagnostic internal PCMCIA slot test.	-	LOG_STD_ACTION
CP REDUNPCISAUSREG	3-Error	Parity Error on PCI Bus from PCI Device	A Parity error on PCI bus has occurred while validating the GT64120 PCI device hanging off the PCI bus	ons155xx-cpu	"Check whether it is a GT64120 device.\n" LOG_STD_ACTION
CP REDUNPCISAUSREG	3-Error	Status error in PCI device [dec]	A PCI Status registry error in PCI device has been detected when validating the PCI device hanging off the PCI bus	ons155xx-cpu	"Check whether it is a valid PCI device Manhattan." "\n" LOG_STD_ACTION
CP REDUNPCIDM MACH	3-Error	Error/Mismatch in reading Vendor ID for PCI device [dec]	The PCI Vendor ID error/mismatch has been detected when validating the PCI device hanging off the PCI bus	ons155xx-cpu	"Check the vendor ID of the PCI device attached it should of a macro value like: CLPD679_VENDOR_ID' "\n" LOG_STD_ACTION
CP REDUNMICADACES	3-Error	Alarm: [chars] [chars] [chars] [chars] [chars]	The alarm appears when the processor has failed the linecard access test for multiple linecards.	-	LOG_STD_ACTION
CP REDUNICIDPROM MACH	3-Error	Alarm: [chars] [chars] [chars] [chars] [chars]	The alarm appears when the slot ID read from the backplane IDPROM does not match the slot ID read from the SRC.	-	LOG_STD_ACTION
CP REDUNIDPROMACES	3-Error	Alarm: [chars] [chars] [chars] [chars] [chars]	The alarm appears when the processor can not access its backplane IDPROM.	-	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
CUREDUNCONSISAL	3-Error	Alarm: [chars] [chars] [chars] [chars] [chars]	The alarm appears when the processor redundancy state is either not consistent with the peer state or the software state is not consistent with the hardware state.	-	LOG_STD_ACTION
CUREDUNERRSRCRC	3-Error	Alarm: [chars] [chars] [chars] [chars] [chars]	The alarm appears when the active processor is detecting bad parity on the active/standby bits read from the standby processor.	-	LOG_STD_ACTION
CUREDUNERRMISSG	3-Error	Alarm: [chars] [chars] [chars] [chars] [chars]	The alarm appears when the peer processor is either missing or can not be detected. The active processor currently is not being protected.	-	LOG_STD_ACTION
CUREDUNERRCOMM	3-Error	Alarm: [chars] [chars] [chars] [chars] [chars]	The alarm appears when the peer processor is present but not responding or sending keepalives.	-	LOG_STD_ACTION
CUREDUNCAPBLIES	3-Error	Alarm: [chars] [chars] [chars] [chars] [chars]	The alarm appears when the capabilities reported by the standby processor are less than the active processor. The processors are conditionally redundant which means that a switchover could result in a partial loss of system control.	-	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
CPURDN UNKNOWNERR	3-Error	Alarm: [chars] [chars] [chars] [chars] [chars]	If the alarm appears when this is asserted for a standby processor with a different software image it indicates an alarm condition on the peer that the active processor can not decode. If this is asserted for the active processor it indicates a software error condition.	-	LOG_STD_ACTION
CPURDN UARTFAILURE	3-Error	Alarm: [chars] [chars] [chars] [chars] [chars]	This alarm appears when the processor can't transmit characters on the console UART. It indicates a probable equipment failure	-	"If the symptom persists following a reload " "remove and replace the processor module."
CPURDN BOOTHASACME	6-Information	After returning to ROM by [chars]	Informational message notifying about a system startup with no switchover.	-	LOG_SID_NO_ACTION
CPURDN SWICHOVER	5-Notice	Switchover occurred. Reason: [chars]	A CPU switchover took place. The reported reason is listed in the error message text.	-	LOG_SID_NO_ACTION
CPURDN STARTUPCONMSG	4-Warning	Non-volatile configuration memory is not present	The startup-config is missing. This may be due to either a manual user erase command or an interrupted write to the startup-config.	-	"Do a copy running-config startup-config to save" "current system configuration. " LOG_SID_RECUR_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
CP-RED-INFO-MACTCP	4-Warning	Active CPU FPGA has been \nreprogrammed. Please remove and re-insert the CPU in slot [dec] or\npower-cycle the box for the new FPGA to take effect.	Active CPU FPGA has been reprogrammed. This CPU is now running with old FPGA and it needs to be hot-swapped or the system needs to be power-cycled for the new FPGA to take effect.	-	LOG_STD_NO_ACTION
RF-4-SYSTEM_INTEGRITY	1-Alert	[chars]	An automatic switch of activity occurred when it had been disabled.	CPU	LOG_STD_ACTION
RF-3-STANDBY_RELOAD	3-Error	The standby CPU is being reset because [chars]	See the reported error message for the reason that the peer CPU was reset. This allows recovery from an indeterminate Standby state.	CPU	LOG_STD_ACTION
RF-3-SIMPLEX_MODE	3-Error	The peer CPU has been lost	The peer CPU absence has been detected	CPU	LOG_STD_ACTION
RF-6-DUPLEX_MODE	6-Information	The peer CPU has been detected	The peer CPU has been detected	CPU	LOG_STD_ACTION
RF-3-COMMUNICATION	3-Error	Communication with the peer CPU has been [chars]	The status of the peer CPU communication path has changed	CPU	LOG_STD_ACTION
RF-6-INHIBIT_SWITCH	6-Information	Redundancy client [chars] [chars] manual switchover	A redundancy client has changed the ability to manually cause a switch of activity.	CPU	LOG_NO_ACTION
RF-3-IPC_PORT	3-Error	Unable to [chars] [chars] <[chars]>	Not able to initialize the RF IPC port to the peer CPU.	CPU	LOG_NO_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
ODM3-LC_TEST_FAIL	3-Error	Slot [dec] [chars] [chars] Failed	Online diagnostic test failed for the card	-	LOG_STD_ACTION
ODM3-SC_TEST_FAIL	3-Error	Slot [dec] Subcard [dec][chars] [chars] Failed	Online diagnostic test failed for the subcard	-	LOG_STD_ACTION
ODM3-CPU_TEST_FAIL	3-Error	CPU card[chars] [chars] Failed	Online diagnostic test failed for this CPU	-	LOG_STD_ACTION
ODM3-LC_DIAGS_DISABLED	3-Error	Slot [dec] after [dec] Failures	Online diagnostic tests were disabled because of \n\ multiple failures	-	LOG_STD_ACTION
ODM3-SC_DIAGS_DISABLED	3-Error	Slot [dec] Subcard [dec] after [dec] Failures	Online diagnostic tests were disabled because of \n\ multiple failures	-	LOG_STD_ACTION
ODM3-DIAG_DISABLE	3-Error	Online Diags disabled for all slots without specific config	Online Diagnostic tests were disabled for all slots except those with specific config	-	LOG_STD_ACTION
ODM3-DIAG_ENABLE	3-Error	Online Diags enabled for all slots without specific config	Online Diagnostic tests were enabled for all slots except those with specific config	-	LOG_STD_ACTION
ODM3-PEER_INCOMPATIBLE	3-Error	Online Diags Peer Version is different	Version of the peer Online Diagnostics Manager is different	-	LOG_STD_ACTION
APS -2-INITSYS	2-Critical	[chars]	A software error occurred during initialization of\n\ the APS subsystem	-	"Check for sufficient processor memory." LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
APS-3-PORT_FAIL	3-Error	[chars] Port Fail On [chars]	This message is posted when APS subsystem receives a port fail indication from the driver subsystem. This message indicates that the specified interface has detected a failure condition e.g. Loss Of Light.	-	"Isolate the cause of the failure and restore the interface to normal operational condition."
APS-1-NO_ACTIVE	1-Alert	No Active Port In Group [chars]	After an active interface failure the system switches over to the standby interface if APS has been enabled. This message is posted if after a switchover the system finds no active interface i.e. both working and protection interfaces are found to be nonoperational.	-	"Isolate the cause of failure on both working and protection interfaces."
APS-6-AUTOFOVER	6-Information	Auto-Failover - Group [chars]	This message is posted if APS hardware successfully switched over to the standby interface after the failure of the active interface. This is informational only.	-	"Isolate the cause of failure of the previous active interface and restore it to a working condition."
APS-2-INTRNLERR	2-Critical	[chars] [dec]	APS software detected an internal error	-	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
APS-6-ENAUTOFOVR	6-Information	Enable Auto-Failover On [chars]	This message is posted when APS software enables hardware to perform APS actions for failures detected by the hardware. This is informational only.	-	LOG_SID_NO_ACTION
APS-6-DISAUTOFOV	6-Information	Disable Auto-Failover On [chars]	APS has disabled auto-failover for the indicated group	-	show aps group <name>
APS-6-ADJUSTMODE	6-Information	Group [chars]: Mode Mismatch - [chars]	This message is posted by the local network element if the local APS group has been configured for bidirectional operation but the associated remote APS group has been configured for unidirectional operation. This message is posted after the local network element detects the mismatch and changes the operation to unidirectional.	-	"Configure the remote APS group for bidirectional operation."
APS-6-BIDIRSWCH	6-Information	Group [chars]: Remote Request - [chars]	This message is posted by the local network element after an APS switchover that is triggered by an APS request from the remote network element. This is informational only.	-	LOG_SID_NO_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
APS-2-CHNLCFGMM	2-Critical	Group [chars]: Channel Config Mismatch	Working and Protection interfaces do not point to the\n\ same path on local and remote network elements	-	"Configure working and protection interfaces\n\ to point to the same path on local and remote\n\ network elements"
APS-2-PSBF	2-Critical	Group [chars]: Prot Switch Byte Failure - [chars]	-	-	"Check for failures on the APS communication\n\ channel. Isolate the cause for such failures\n\ and restore the communication channel to\n\ working condition"
APS2MODEMISMATCH	2-Critical	Group [chars]: Mode Mismatch - [chars]	-	-	"Configure the remote APS group for\n\ bidirectional operation."
APS2CHNLMISMATCH	2-Critical	Group [chars]: Channel Mismatch - [chars]	-	-	"Check for any failures on the APS communication\n\ channel. If APS communication channel is\n\ operational contact Cisco TAC."
APS-2-FEPF	2-Critical	Group [chars]: Far End Prot Failure - [chars]	-	-	"Isolate the cause of failure on the protection\n\ channel on the remote network element."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
APS-2-NOSOCKET	2-Critical	Failed To Open Socket	This message is posted when the APS subsystem fails to create a UDP socket for exchanging APS channel protocol messages over APS message channel configured for IP. This usually is due to a low memory condition in the system	-	LOG_SID_REDUCE_ACTION
APS-6-CHNLACTIVE	6-Information	Group [chars] - [chars] channel is now ACTIVE	This message is posted when a previously standby channel becomes the active channel. This is informational only.	-	LOG_SID_NO_ACTION
OSCP-4-BADPACKET	4-Warning	Invalid pkt: [chars] [dec] [dec]	An invalid packet was received from a network peer.	-	"Check the originating device for a cause of the corrupted packets."
OSCP-3-INTERNAL_ERROR	3-Error	[chars] [hec]	An internal software error occurred. The message contains more information that can be used to identify the problem.	-	LOG_STD_ACTION
OSCP-4-CONFIG_ERROR	4-Warning	Configuration Error: [chars]	This message indicates a configuration error in the OSCP subsystem. The message will display more specific information about the cause of problem.	-	"Change the configuration to correct the error."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
OSCP-7-DEBUG	7-Debug	[chars]	This is an informational message only. It is used by Cisco\n\ for testing.	-	"Informational messages can be disabled by changing logging level."
INTF_SYNC-2-INITSYS	2-Critical	[chars]	A software error occurred during initialization of the Interface Sync RF subsystem	-	"Check for sufficient processor memory." LOG_STD_ACTION
NIF_SYNC3TRANSMIT_ERR	3-Error	Unable to transmit message type [dec] from [chars]	A transmit error occurred while sending msg to other CPU due to msg translation	-	LOG_STD_ACTION
NIF_SYNC3NO_BUFFER	3-Error	Unable to transmit message type [dec] from [chars]	A transmit error occurred while sending msg to other CPU due to non-availability of buffer	-	LOG_STD_ACTION
NIF_SYNC3UNKNOWN_MG	3-Error	Unknown message type 0x[hec] received by [chars]	An unknown message type was received from the peer CPU possibly due to an incompatible image version.	-	LOG_STD_ACTION
NIF_SYNC3INVALID_MG	3-Error	Incorrectly formatted message 0x[hec] 0x[hec] received by [chars]	Inconsistent message data was received from the peer CPU possibly due to an incompatible image version.	-	LOG_STD_ACTION
NIF_SYNC3UNSUPPORTED_MG	5-Notice	Msgtype [chars] sent by [chars] unsupported by peer.	Peer responded that it didn't recognize a message sent by this CPU possibly due to a different image version.	-	"May require a software upgrade on the Standby CPU. " LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
MEIOPT2-NOMEMORY	2-Critical	No memory available for [chars]	An attempt at memory allocation failed.	-	"Try these actions to remedy the problem:\n\n Add memory.\n\n Disable some features.\n\n Apply filtering to decrease the size of system data structures - the\n\n routing table for example.\n\n In general reduce other system activities to ease memory demands. If\n\n conditions warrant upgrade to a larger memory configuration."
MEIOPT2-NOPAKBUFR	2-Critical	No packet buffer available for [chars] interface to send this packet to higher layer	An attempt to allocate packet buffer failed.	-	"Try these actions to remedy the problem:\n\n Reload the system.\n\n Perform a CPU switchover if you\n\n have a redundant CPU system"
METOPT-3-NOMAC	3-Error	Can't allocate MAC address for interface [dec]/[dec]	MAC address allocation failed because of an incorrect slot and port combination which exceeds the maximum available hardware	man-optical-sw	"Check whether all the available MAC addresses for the system have been allocated" "Make sure that this address is unique or specify MAC addresses for commands such as novell routing that allow the use of this address as a default.\n\n LOG_STD_ACTION"

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
METOPT-4-COOKIE	4-Warning	Corrupt or missing MAC address cookie using random base [enet]\n	The contents of MAC address EEPROM are invalid. The system is providing random MAC addresses	man-optical-sw	"show rpm eeprom" "\n" LOG_SID_RECUR_ACTION
METOPT-4-NOCPUVER	4-Warning	Invalid CPU ID assuming revision 1	The CPU ID could not be read from EEPROM.\n\n This is probably due to a hardware failure.	-	LOG_STD_ACTION
METOPT-6-DI_ASSERTED	6-Information	CDL Defect Indication: [chars] Asserted on interface [chars]\n	This message indicates some CDL Defect \n\n Indication bits were Asserted on this interface \n	-	"Closely monitor CDL Defect Indication Status \n\n if Defect Indication was asserted"
METOPT-6-DI_CLEARED	6-Information	CDL Defect Indication: [chars] cleared on interface [chars]\n	This message indicates CDL Defect \n\n Indication Status Changed\n	-	LOG_SID_NO_ACTION
MEIOPI-2-FABRC_CRITICAL	2-Critical	Port Fail event received from [chars] switch card on fabric port associated with interface [chars]\n	Fabric Port Failed due to some problem\n	-	LOG_STD_ACTION
MEIOPI-2-ZEROLEN_MSG	2-Critical	Zero length while [chars] linecard. Datalen [dec]\n	Due to some internal error a zero length transaction is being made from/to the Line card	-	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
MEIOPT3UNEXP_INIR	3-Error	Interrupt [chars] not expected masking off	An interrupt of a certain type was signalled but the \n\ interrupt handler for this type of interrupt is not yet installed.	-	"This problem should be self-correcting but indicates either\n\ a hardware or a software defect. If it's a hardware defect\n\ further problems are to be expected. If it's a software\n\ problem certain types of error and alarm conditions may be\n\ left undetected. \n\ Copy the error message exactly as it appears and report it to your\n\ technical support representative."
ENVM-3-NOFORK	3-Error	Could not start environment polling process	The software could not spawn the enviromental monitoring\n\ process possibly because of low memory - no monitoring\n\ will be performed.	-	LOG_SIDREDUCE_ACTION
ENVM-3-LASTENV	3-Error	[chars]	Non volatile EEPROM storage of environmental statistics failed.\n\ This may be due to an EEPROM hardware failure.	-	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
ENVM-3-NOACK	3-Error	Access to [chars] failed	One of the temperature sensors was not ready for \n\ the initiation of temperature environmental monitoring.\n\ Software is attempting to restart the sensor.	-	LOG_SID_RECUR_ACTION
ENVM-4-ENVWARN	4-Warning	[chars] measured at [chars]	One of the measured environmental test points exceeds the warning \n\ threshold.	-	"Closely monitor the condition and correct if possible. " LOG_SID_RECUR_ACTION
ENVM-2-ENVCRIT	2-Critical	[chars] measured at [chars]	One of the measured environmental test points exceeds an extreme \n\ threshold.	-	"Correct the specified condition or the system may shut itself down\n\ as a preventive measure.\n\ This condition could cause the system to fail to operate properly. " LOG_SID_RECUR_ACTION
ENVM-6-PSCHANGE	6-Information	[chars] changed from [chars] to [chars]	This message indicates the absence or detection\n\ of a new type of power supply in the system.\n\ This can be expected when hot-swappable power supplies are swapped.\n\ This is an informational message only.	-	LOG_SID_NO_ACTION
ENVM-6-PSLEV	6-Information	[chars] state changed from [chars] to [chars]	One of the power supply test points underwent a state change.	-	"Closely monitor the condition and correct if possible. " LOG_SID_RECUR_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
ENVM-3-BLOWER	3-Error	[chars] may have failed	One of the router's cooling fans may be close to failure.	-	"Replace the fan as soon as possible or the system may shut itself down or fail to operate properly."
ENVM-0-SHUT	0-Emergency	Environmental Monitor initiated shutdown	The environmental monitor has initiated a system shutdown.	-	"Look at previous environmental messages to determine cause of shutdown and correct if possible. " LOG_STD_ACTION
OIR-3-BADIDPROM	3-Error	IDPROM in slot [dec] not properly programmed	IDPROM is not programmed correctly	-	"Contact customer support."
OIR-3-BADFPGAIMG	3-Error	Controller in slot [dec] does not have a valid FPGA image	Invalid FPGA image in slot\n	-	"Contact customer support."
OIR-3-DETECT	3-Error	Detected [chars] in slot [dec]	Type of card detected in slot\n	-	""
OIR-3-REMOVE	3-Error	Removed [chars] in slot [dec]	Type of card removed from slot	-	""
OIR-3-SUBCARDDETECT	3-Error	Slot [dec] [chars] [dec]: subcard [dec] inserted	Type of card detected in slot\n	-	""
OIR-3-SUBCARDREMOVE	3-Error	Slot [dec] [chars] [dec]: subcard [dec] removed	Type of card removed from slot	-	""
OIR-3-SUBCARD_BAD_IDPROM	3-Error	Slot [dec] [chars] [dec]: subcard [dec] IDPROM not programmed correctly	IDPROM is not programmed correctly	-	"Contact customer support."
OIR-3-SUBCARD_BAD	3-Error	Slot [dec] [chars] [dec]: subcard [dec] does not meet operating specifications	Subcard does not meet operating specifications	-	"Contact customer support."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SIGSM-1-EVENT_ERR	1-Alert	Unexpected event	An error in the signalling state machine	as	LOG_STD_ACTION
SIGSM-1-BAD_VAR_ERR	1-Alert	Out of range variable index [dec] [chars]	There is a fault in a default template or the user has provided a custom template that refers to a variable that is outside the range of cas-custom variables	as	LOG_STD_ACTION
SIGSM-3-NOMEMORY	3-Error	MGIRCBACKMGPROCS	-	-	-
NAT64-3-EINVAL	3-Error	NULL	An unexpected input value to a function was incorrect	nat64	LOG_STD_ACTION
NAT64-3-UNINITIALIZED	3-Error	NAT64 feature is not properly initialized	A function call was made when the system was not properly\n\ninitialized.	nat64	LOG_STD_ACTION
NAT64-3-INT_FAILED	3-Error	An initialization failed rc[chars]	-	-	-
NAT64-3-ENOENT	3-Error	NULL	A lookup failed unexpectedly.	nat64	LOG_STD_ACTION
NAT64-3-EEXIST	3-Error	NULL	An item unexpectedly exists already.	nat64	LOG_STD_ACTION
NAT64-3-ENOMEM	3-Error	Memory allocation failed	A attempt to allocae memory has failed.	nat64	LOG_STD_ACTION
NAT64-3-REGSIR_RC	3-Error	A NAT64 registry call failed with rc[chars]	The return code from a NAT64 registry call indicates an\n\nerror.	nat64	LOG_STD_ACTION
NAT64-3-BAD_MAGIC	3-Error	Invalid magic number%#10x	An internal data structure is corrupt.	nat64	LOG_STD_ACTION
NAT64-3-API_FAILED	3-Error	NULL	A call to the API of another component has indicated an\n\nerror.	nat64	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
NAT64-3-RUNAWAY_LOOP	3-Error	NULL	A loop has exceeded the expected number of iterations.	nat64	LOG_STD_ACTION
NAT64-5-ALIAS_NOT_FOUND	5-Notice	Unable to find alias address[inet] table_id[dec]	An attempt was made to remove an IP alias for a NAT64 address and the alias does not exist. This is a notification that such an event happened and should not have any functional impact. This could happen under heavy load if for example a previous best effort message to add the alias was dropped.	nat64	LOG_STD_ACTION
NAT64-6-HA_RELOAD	6-Information	Reloading [chars] reason[chars]	A synchronization attempt between the active and standby RP peers has failed with the reason indicated. The standby peer is reloaded in an attempt to resynchronize when operating in a stateful redundant mode.	nat64	LOG_STD_ACTION
NAT64-6-HA_RELOAD_DISABLED	6-Information	Standby reload has been disabled NAT64 RP state is out of sync and the standby should be reloaded manually	The active and standby RPs are out of sync and the standby RP would have been reloaded but this reload was suppressed based on the configured environment.	nat64	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
NAT64-HA_PEER_READY	6-Information	NULL	The synchronization attempt for the message has determined that the transport has lost communication with its peer. This is a normal situation which indicates that the standby route-processor is currently out of service implying a simplex redundancy mode.	-	-
NAT64-FLOW_CTRL_TIMEOUT	6-Information	Bulk sync is flow controlled by [chars]	The bulk synchronization of the NAT64 configuration to the standby RP has encountered a flow control condition which has effected a timeout awaiting the condition to clear. This will result in a reload of the standby RP to allow the bulk synchronization to restart.	nat64	LOG_STD_ACTION
NAT64-6-MAP_E	6-Information	NULL	An unexpected input value to a function was incorrect	nat64	LOG_STD_ACTION
NAT66-3-EINVAL	3-Error	NULL	An unexpected input value to a function was incorrect	nat66	LOG_STD_ACTION
NAT66-3-UNINITIALIZED	3-Error	NAT66 feature is not properly initialized	A function call was made when the system was not properly\n\ninitialized.	nat66	LOG_STD_ACTION
NAT66-3-INIT_FAILED	3-Error	An initialization failed rc[chars]	-	-	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
NAT66-3-ENOENT	3-Error	NULL	A lookup failed unexpectedly.	nat66	LOG_STD_ACTION
NAT66-3-EEXIST	3-Error	NULL	An item unexpectedly exists already.	nat66	LOG_STD_ACTION
NAT66-3-ENOMEM	3-Error	Memory allocation failed	A attempt to allocae memory has failed.	nat66	LOG_STD_ACTION
NAT66-3-REGISTRY_RC	3-Error	A NAT66 registry call failed with rc[chars]	The return code from a NAT66 registry call indicates an\n\n error.	nat66	LOG_STD_ACTION
NAT66-3-BAD_MAGIC	3-Error	Invalid magic number%#10x	An internal data structure is corrupt.	nat66	LOG_STD_ACTION
NAT66-3-API_FAILED	3-Error	NULL	A call to the API of another component has indicated an\n\n error.	nat66	LOG_STD_ACTION
NAT66-3-RUNAWAY_LOOP	3-Error	NULL	A loop has exceeded the expected number of iterations.	nat66	LOG_STD_ACTION
NAT66-3-CRDNMCLK	4-Warning	Active network clock source [chars] priority [dec] failure	This warning message indicates that there has been a failure of active clock source	PI-netclk	"No action required"
NAT66-3-CRDNMCLK	6-Information	Active network clock source is [chars] priority [dec]	This indicates the presence of an active network clock along with its priority	PI-netclk	"This is an informational message only no action required."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
NP-3-WARNING	4-Warning	Netflow-Lite monitor configuration is not compatible with connector type on interface [chars] [chars]	A new interface connector type has been detected it is not\n compatible with the netflow-lite monitor configuration on the\n original interface. The conflicting netflow-lite monitor\n configuration will be removed no user action is required.	netflow-lite	LOG_STD_NO_ACTION
NP-3-NOTMSGID	3-Error	Message Id [hec] not supported.	The Nextport does not supported this control message id.	as	"Copy the error message exactly as it appears and report it to your\n technical support representative."
NP-3-MODNOTEXIST	3-Error	Slot [dec] DFC [dec] Module [dec] not exist.	No Virtual Console opens for this module.	as	"Copy the error message exactly as it appears and report it to your\n technical support representative."
NP-3-QUEUEFULL	3-Error	[chars] queue is full for Slot [dec] DFC [dec] Module [dec].	TX queue is full for this module.	as	"Copy the error message exactly as it appears and report it to your\n technical support representative."
NP-3-NAKRSP	3-Error	NAK Response Received - command 0x[hec] result code 0x[hec] msg id 0x[hec] session id 0x[hec] msg tag 0x[hec]	A NAK response was sent by the NextPort module.	as	"Copy the error message exactly as it appears and report it to your\n technical support representative."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
NP_CTL_POOL_CREATION_FAIL	3-Error	Control buffer pool could not be created	NextPort driver could not create the control buffer pool required for tx and rx of NP control messages	as	LOG_STD_ACTION
NP_MM3INVALID_ADDRESS	3-Error	Invalid NP_ADDRESS [dec]/[dec]/[dec]/[dec] - [chars]	NextPort Module Manager detected invalid NP_ADDRESS	-	LOG_STD_ACTION
NP_MM3MEM_ERR	3-Error	Failed to allocate control message buffer for NP module [dec]/[dec]/[dec] - [chars]	NextPort Module Manager failed to allocate control message buffer	-	LOG_STD_ACTION
NP_MM3SEND_FAILED	3-Error	Failed to send [chars] message to NP module [dec]/[dec]/[dec]	NextPort Module Manager failed to send control message	-	LOG_STD_ACTION
NP_MM3DATA_Q_FAILED	3-Error	Failed to create Data Q for NP module [dec]/[dec]/[dec]	NextPort Module Manager failed to create Data Queue	-	LOG_STD_ACTION
NP_MM3INVALID_STATE	3-Error	Invalid NP module state [chars] [dec]/[dec]/[dec] - [chars]	NextPort Module Manager detected invalid NP module state	-	LOG_STD_ACTION
NP_MM3RUNTIME_ERR	3-Error	Module Run Time Error [dec]/[dec]/[dec] : recovery = 0x[hec] error = 0x[hec]	NextPort Module Manager received a module run time error	-	LOG_STD_ACTION
NP_MM3INVALID_RSP	3-Error	Unsupported module response [dec]/[dec]/[dec]: msg len = [dec] session ID = [dec] msg tag = [dec] msg ID = [dec]	NextPort Module Manager received an unsupported message response	-	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
NPM3-INVALID_ACK_RSP	3-Error	Unsupported module ACK response [dec]/[dec]/[dec]: msg len = [dec] session ID = [dec] msg tag = [dec] msg ID = [dec] cmd msg ID = [dec] result code = [dec]	NextPort Module Manager received an unsupported message response	-	LOG_STD_ACTION
NPM3-MODULE_CRASH	3-Error	Module Crash detected [dec]/[dec]/[dec]: state = [dec] cause code = [dec]	NextPort Module Manager detected a crashed module	-	LOG_STD_ACTION
NPM3-RESTART_EXHDD	3-Error	Module exceeded restart threshold [dec]/[dec]/[dec]	NextPort Module exceeded the restart threshold	-	LOG_STD_ACTION
NPM3-COUNTRY_CODE_FAILURE	3-Error	Module country code failure [dec]/[dec]/[dec]	NextPort Module Manager failed to set the country code	-	LOG_STD_ACTION
NP-3-RESET_DFC	3-Error	DFC Reset-Cleared Failed - DFC [dec]	DFC Reset-Cleared Failed	as	LOG_STD_ACTION
NP_MD6-SLOT_INSERTED	6-Information	Slot [dec] [dec] ports max inserted	NextPort Modem driver detected a slot being inserted in the system.\n\n During the startup all slots that are present in the system are treated\n\n as being inserted	-	LOG_SID_NO_ACTION
NP_MD6-SLOT_REMOVED	6-Information	Slot [dec] removed	Slot has been removed from the system	-	LOG_SID_NO_ACTION
NP_MD6-MODULE_UP	6-Information	NextPort module [dec]/[dec]/[dec] up	NextPort Modem Driver detected a module coming up	-	LOG_SID_NO_ACTION
NP_MD6-MODULE_DOWN	6-Information	NextPort module [dec]/[dec]/[dec] down	NextPort Modem Driver detected a module going down	-	LOG_SID_NO_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
NP_MD000CLEARADYPRESENT	0-Emergency	Slot [dec] is already present in the system	An internal software error occurred that possibly resulted in corrupted\n\n slot database.	as	LOG_STD_ACTION
NP_MD000NOSUCHSLOT	0-Emergency	Slot [dec] is not present in the system	An internal software error occurred that possibly resulted in corrupted\n\n slot database.	as	LOG_STD_ACTION
NP_MD000NOSUCHMODEM	0-Emergency	Attempt to [chars] a data channel on the unexisting modem [dec]/[dec]	An internal software error occurred that probably resulted in corrupted\n\n modem database	as	LOG_STD_ACTION
NP_MD000NOSUCHLINE	0-Emergency	Attempt to [chars] a data channel on the unexisting line [dec]/[dec]	An internal software error occurred that probably resulted in corrupted\n\n modem database	as	LOG_STD_ACTION
NP_MD003BADENCAP	3-Error	Unknown encapsulation [dec] on interface [chars]	A software error occurred resulting in an unknown encapsulation\n\n type on the interface specified by the error message.	as	LOG_STD_ACTION
NP_MD000NOMEMORY	0-Emergency	Cannot allocate [dec] bytes of memory for [chars]	The system failed to allocate an important data structure due\n\n to the lack of memory	as	"show mem"
NP_MD000NOTTYS	0-Emergency	Cannot allocate TTY[dec] [dec]/%02d	Allocation of TTY structure failed. Either there is not enough memory\n\n or the TTY number is too big	as	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
NP_MD-0-NOHWIDBS	0-Emergency	Cannot allocate interface Async[dec]/%02d	Allocation of interface structure failed. Either there is not\n\ enough memory or the maximum number of interfaces was exceeded	as	LOG_STD_ACTION
NP_MD-0-NOPAKS	0-Emergency	TTY [chars]: Cannot allocate [chars]	An important buffer cannot be allocated due to the shortage of packet\n\ memory.	as	LOG_STD_ACTION
NP_MD-3-QUEUE_EMPTY	3-Error	TTY [chars]: No buffers available to set up the transmit queue	A software error occurred resulting in an invalid state for the\n\ RTS modem signal	as	LOG_STD_ACTION
NP_MD-3-UNKNOWN_BAND	3-Error	TTY [chars]: Unknown NextPort in-band message msg_id %04x received	NextPort Modem driver received an unknown message from a NextPort module.\n\This can happen if new firmware is used with an obsolete version of IOS	as	LOG_STD_ACTION
NP_MD-1-UNKNOWN_SCHPR	1-Alert	TTY [chars]: Attempt to set an unknown special character type [dec]	NextPort Modem Driver received a request for hardware detection of an\n\ unknown type of a special character due to an internal software error	as	LOG_STD_ACTION
NP_MD-3-CONTIGUOUS	3-Error	Contiguous packet sent for transmit	A software error occurred resulting in an unexpected packet being\n\ set up for transmission and the packet was dropped by the NextPort\n\ Modem Driver	as	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
NP_MD-3-NOTXPAK	3-Error	Static transmit paktype unavailable	A software structure was found in an unexpected state during\n\n run-time for the indicated modem.	as	LOG_STD_ACTION
NPMDSEBUHR	3-Error	No buffer to seed data queue for module [dec]/[dec]/[dec]	NextPort Modem Driver could not obtain a buffer whilst trying to\n\n seed the module data queue. Due to packet memory shortage	as	LOG_STD_ACTION
NPMDSEBUHRAL	3-Error	Could not seed data queue for module [dec]/[dec]/[dec]	NextPort Modem Driver could not seed the data queue with buffers	as	LOG_STD_ACTION
NPMDQUEHEMNS	0-Emergency	Cannot bring up the module [dec]/[dec]/[dec] due to lack of module elements	NextPort Modem Driver cannot allocate an important data structure called\n\n module element which is necessary to bring up the module. This should\n\n not normally happen and possibly indicates an error condition	async_drivers	LOG_STD_ACTION
NPMDAQUEENDAL	3-Error	Could not send to data queue for port [dec] inflight tx buffers [dec]	NextPort Modem Driver could not send buffer to Interface driver	as	LOG_STD_ACTION
NPMDAQUEBLOW	3-Error	Too many buffers [dec] rxd for port [dec]	NextPort Module sent more buffers than is allowed for this channel	as	LOG_STD_ACTION
NPMDREURABIFAL	3-Error	Failed to return data buffer for port [dec]	Call to NextPort Interface Driver to replenish data buffer for this channel failed	as	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
NP_MD3-ERR NP_MD3-ERR	3-Error	Modem slot structure for slot [dec] could not be created	NextPort modem driver could not create the modem slot structure which is required for modem services of this card	as	LOG_STD_ACTION
NP_MD3-ERR NP_MD3-ERR	3-Error	Failed to send inband message for TTY [chars]	Call to send inband message on data queue failed	as	LOG_STD_ACTION
NP_MD3-NULL_PTR	3-Error	[chars] is NULL in [chars] for port [dec]	Unexpected NULL pointer at specified location	as	LOG_STD_ACTION
NP_SSM6-NULL_SSM_INF NP_SSM6-NULL_SSM_INF	6-Information	NULL SSM Info Handle for slot [dec] port [dec]	NextPort Session and Service Manager failed to obtain a control information handle for the indicated slot and port numbers	-	LOG_STD_ACTION
NP_SSM6-NULL_VDEV_COMMON NP_SSM6-NULL_VDEV_COMMON	6-Information	NULL Vdev Common Handle for slot [dec] port [dec]	NextPort Session and Service Manager failed to obtain a Voice Device Information handle for the indicated slot and port numbers	-	LOG_STD_ACTION
NP_EST6-ERR NP_EST6-ERR	6-Information	[chars]	EST Run-time Error Notification is sent to IOS to convey additional debug data that may help to identify the cause of the error	-	LOG_SID_NO_ACTION
NP_EST6-DIAG_POST NP_EST6-DIAG_POST	6-Information	[chars]	EST Diagnostic/POST Notification is sent to IOS to convey additional information about the power-on self-test or a diagnostic test result	-	LOG_SID_NO_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
NP_EST-6CIRL_NAK_RSP	6-Information	[chars]	EST Control No-Acknowledge Notification is sent to IOS to convey additional debug data regarding a NAK that occurred on the Control Queue	-	LOG_SID_NO_ACTION
NP_EST-3-MSG_ERR	3-Error	[chars]	EST detected an internal error	-	LOG_SID_NO_ACTION
NP_BS-3-INITSYS	3-Error	[chars]	Failed NextPort BootStrap and Crash Monitor Initialization.	-	LOG_STD_ACTION
NP_BS-3-NOIRSEN NP_BS-3-NOIRSEN	2-Critical	DFC in slot [dec] does not have three NP108s!	DFC does not have three NP108s which is an illegal configuration	-	LOG_STD_ACTION
NP_BS-3-MEM_TEST_FAIL	3-Error	NextPort Module [dec]/[dec]/[dec] memory test failed	NextPort BootStrap and Crash Monitor detected a failed NextPort module memory test	-	LOG_STD_ACTION
NP_BS-3-NULL_FW_PIR	3-Error	NULL NextPort Firmware pointer for [dec]/[dec]/[dec]	NextPort BootStrap and Crash Monitor detected a NULL NextPort firmware pointer	-	LOG_STD_ACTION
NP_BS-3-INVALID_FW	3-Error	Invalid NextPort Firmware for [dec]/[dec]/[dec]	NextPort BootStrap and Crash Monitor detected an invalid NextPort firmware	-	LOG_STD_ACTION
NP_BS-3-CRC_FAIL	3-Error	NextPort Module [dec]/[dec]/[dec] failed firmware image validation	NextPort BootStrap and Crash Monitor detected an a failed NextPort firmware CRC validation	-	LOG_STD_ACTION
NP_BS-3-INVALID_IDT	3-Error	NextPort Module [dec]/[dec]/[dec] detected an invalid IDT	NextPort BootStrap and Crash Monitor detected an invalid IDT	-	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
NP_BS3INVALID_MODULE_POST	3-Error	NextPort Module [dec]/[dec]/[dec] detected a module POST failure 0x[hec]	NextPort BootStrap and Crash Monitor detected an a module POST failure	-	LOG_STD_ACTION
NP_BS3-Q_FAILURE	3-Error	NextPort Module [dec]/[dec]/[dec] control queue creation failure	NextPort BootStrap and Crash Monitor detected an control queue creation failure	-	LOG_STD_ACTION
NP_BS3MODULE_STARTED	6-Information	NextPort module [dec]/[dec]/[dec] Started - [dec].[dec].[dec].[dec]	NextPort BootStrap and Crash Monitor successfully started module	-	LOG_SID_NO_ACTION
NP_BS3NOSUCHMODULE	3-Error	[chars] nonexistent NP module [dec]/[dec]/[dec]	NextPort BootStrap and Crash Monitor detected an internal database error	-	LOG_SID_NO_ACTION
NP_BS3-3-NOMEM	3-Error	[chars]	NextPort BootStrap and Crash Monitor Could not allocate memory \n\ for internal module database	-	LOG_SID_NO_ACTION
NP_BS3MODULE_STOPPED	6-Information	NextPort module [dec]/[dec]/[dec] Stopped	NextPort BootStrap and Crash Monitor stopped module	-	LOG_SID_NO_ACTION
NP_BS3NO_KEEPALIVE	3-Error	NextPort module [dec]/[dec]/[dec] failed to respond to keepalive message	NextPort BootStrap and Crash Monitor detected a module failed to\n\ respond to keepalive message	-	LOG_SID_NO_ACTION
NP_BS3MODULE_ACCESS_ERR	3-Error	Failed to access NextPort module [dec]/[dec]/[dec] crash info	NextPort BootStrap and Crash Monitor failed to access\n\ crash information	-	LOG_SID_NO_ACTION
NP_SSM3RUNTIME_ERROR	3-Error	SSM[dec]/[dec]: Session Runtime Error Code = [dec] Recovery Action = [dec]	Session and Service Manager Received a Runtime Error for the slot\n\ and port	-	LOG_SID_NO_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
NP_SSM3INVALID_MSG	3-Error	SSM: Invalid Session/Service Message ID = 0x[hec]	Session and Service Manager Received an invalid message from the\n\n NextPort Message Dispatcher	-	LOG_SID_NO_ACTION
NP_SSM6INVALIDHANDLE	3-Error	SSM[dec]/[dec]: Invalid Session/Service Instance Handle	Session and Service Manager Received failed to obtain its instance\n\n handle for the slot/port	-	LOG_SID_NO_ACTION
NP_SSM0NOMEMORY	0-Emergency	Cannot allocate [dec] bytes of memory for [chars]	The system failed to allocate an important data structure due\n\n to the lack of memory	as	"show mem"
NP_SIB3PONEFORMATTAL	3-Error	Format of cp tone failed for tone-id [dec] port [dec]/[dec]	Formatting of the call processing tone message to the nextport module\n\n failed	-	LOG_STD_ACTION
NP_SPE3SPEINDNFAL	3-Error	[chars]	SPE download code failed to initialise - SPE download will fail	-	LOG_SID_NO_ACTION
NP_SPE_DS3SPEINDNFAL	3-Error	SPE [dec]/[dec]/[dec]/[dec]: [chars]	SPE download code failed - download aborted	-	LOG_SID_NO_ACTION
NP_SPE_DS3NOMEMORY	3-Error	Cannot allocate [dec] bytes of memory for [chars]	The system failed to allocate an important data structure due\n\n to the lack of memory	-	"show mem"
NP_UCODE3INVALID_FILE	3-Error	NP microcode [chars] for device [chars] is invalid [chars]	The file containing the microcode for an NP is not specified\n\n or not accessible. This could be due to an invalid configuration\n\n or because the microcode is missing in this image.	vsp-mid	LOG_SID_SH_TECH_ACTION

RSVP-3-CONSISTENCY	3-Error	[chars]: [chars] [chars] [chars]	An action attempted by the rsvp implementation encountered an unexpected condition	rsvp	"Copy the error message exactly as it appears on the console or in the system log. Issue the show tech-support rsvp command to gather data which may help identify the nature of the error. Then send this information to your Cisco technical support representative."
RSVP-3-CONSISTENCY	3-Error	[chars] message from [inet] discarded: no security association for [inet] - no RSVP security key configured or no memory left.	The router received an RSVP message that contained a secure hash but dropped the message because the router was not able to create a security association for the sending system.	rsvp	"Check the configuration on the router to make sure that RSVP has access to a security key for the sending system. If such a key is configured then check to see if the router has run out of memory."
RSVP-3-CONSISTENCY	3-Error	[chars] message from [inet] discarded - incorrect message digest	The router received an RSVP message that contained a different secure hash from the one computed by the router. RSVP discarded the message because the message may have come from an untrusted source.	rsvp	"Check the configuration on the router and the sending system to make sure they are using the correct security key and secure hash algorithm."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
RSVP RSVP	3-Error	[chars] message from [inet] discarded - seq #%llu outside authentication window	The router received an RSVP message whose authentication sequence number\n is less than the lower limit of the out-of-order window. RSVP discarded\n the message because an untrusted source may be\n using the same It is possible that a trusted source is sending a burst of reordered\n RSVP messages that is too large for the authentication window size. If\n you can verify that the source is trusted and its messages are being sent\n in large reordered bursts	-	-
RSVP RSVP	3-Error	[chars] message from [inet] discarded - authentication seq #%llu is a duplicate	The router received an RSVP message with an authentication sequence\n number that has already been seen. RSVP discarded the message because an\n untrusted source may be unsuccessfully attempting an RSVP\n message If you can verify that the source is trusted	-	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
RSVP RSVP	3-Error	[chars] message from [inet] discarded - challenge failed for key ID %*s	The router sent an RSVP message to challenge the untrusted source to\n\n compute a secure hash on a random piece of data and return the hash\n\n with the same data but the source did not return the expected data.\n\n RSVP discarded the response because the untrusted source may be\n\n unsuccessfully attempting an RSVP challenge response replay attack.	rsvp	-
RSVP RSVP	3-Error	No response to challenge issued to [inet] for key ID %*s	The router sent an RSVP message to challenge the untrusted source to\n\n compute a secure hash on a random piece of data and return the hash\n\n with the same data but the source did not reply. The source may\n\n have crashed or lost its network connection. However it is also\n\n possible that the source was unsuccessfully attempting to\n\n If you can verify that the source is trusted	-	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
RSVP MSG CHAIN MISMATCH	3-Error	[chars] message from [inet] discarded - authentication algorithm mismatch	The router received an RSVP message from a source that required\n\n authentication but the received message was using the wrong\n\n authentication algorithm.	rsvp	"Issue a <CmdBold>show ip rsvp authentication detail <source><NoCmdBold>\n\n command on the router to display the expected algorithm type. Then find\n\n the source and change its configuration to match."
RSVP UPDATE KEY EXPIRED	5-Notice	Key ID [dec] in chain [chars] has expired	-	-	-
RSVP UPDATE KEY EXPIRED	2-Critical	All the keys in chain [chars] have expired - please update the key chain now	The router attempted to use a key in an RSVP key chain but discovered\n\n that all the keys in the chain have expired. The router will attempt to\n\n to find another suitable key. If no other suitable per-neighbor key can\n\n be found the router will attempt to use key chain configured for <chainid>\n\n Update the key chain by updating the text and expiration time	-	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
RSVP_AUTH_NO_KEYS_LEFT	1-Alert	No valid keys left for [inet]	The router attempted to use a key in an RSVP key chain but discovered that all the keys in the chain have expired and no other per-neighbor or per-interface keys are available for the specified neighbor. The router will continue to use the last key in the chain rather than revert to an unauthentication condition. However the specified neighbor router may start discarding RSVP messages at that point and reservations with that neighbor may eventually time out.	rsvp	-
RSVP_AUTH_DUPE_KEY	4-Warning	Key chains [chars] and [chars] contain duplicate key ID [dec]	An attempt is being made to add a new key identifier to a key chain in the router configuration but RSVP detected that this identifier is found in another key chain already assigned to RSVP. Since key identifiers must be unique across all the key chains used by RSVP RSVP will not use the keys with this identifier in all such key chains. This could cause RSVP authentication to fail in some cases.	rsvp	"Update the listed key chains so they use different key identifiers."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
RSVP <u>UP</u> <u>KEY</u> <u>ACL</u> <u>CHG</u> <u>NE</u>	5-Notice	Key chain [chars] [chars] for [inet] because ACL \[chars]\ [chars]		rsvp	"If the ACL change unexpectedly caused authentication to be disabled\n\ or enabled for one or more RSVP neighbors undo the ACL change so that\n\ RSVP authentication is not impacted."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
			<p>The ACL specified in the message text associates the key chain specified in the message text with a set of RSVP neighbors. RSVP uses the specified key chain to authenticate each RSVP message exchanged with that set of RSVP neighbors after the association is configured. Subsequently the specified ACL has been reconfigured such that the key chain association is no longer valid for one or more RSVP neighbors in the set. This causes RSVP to search the configuration for another suitable key chain to use with those neighbors. If no such key chain is found RSVP will no longer be able to provide authentication for messages exchanged with those RSVP neighbors. This causes RSVP to discard RSVP messages from that set of neighbors. Because this may ultimately lead to loss of RSVP functionality with those neighbors RSVP generates this</p>		

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
			<p>system message.</p> <p>This system message may also be generated if the ACL is subsequently changed so that it re-associates RSVP neighbors with the specified key chain. If RSVP is not using another key chain for the set of RSVP neighbors specified by the ACL RSVP will begin using the specified key chain to exchange authenticated RSVP messages with that set of RSVP neighbors potentially restoring RSVP functionality with those neighbors.</p>		
RSVP_MH_RECOVERY	3-Error	RSVP calculated Recovery Time is longer than TE Rewrite Hold-Time registered with LSD. Some LSPs may not be recovered.	TE registered a maximum cutover time with the LSD that is less than the time it may actually take to recover all LSPs. As a result more than usual traffic loss may occur on some LSPs during recovery	rsvp	<p>"Make note of the number of Checkpointed LSPs in the RSVP HA database by issuing the command show ip rsvp high-availability database internal. This number likely exceeds the hard defined limit of the number of recoverable LSPs. Provide this information to Cisco technical support representative."</p>

SYS-5-CONFIG_I	5-Notice	Configured from [chars] by [chars]	The write of the system running configuration failed.	-	"If this messages recurs copy it exactly as it appears and report " "it to your technical support representative."
SYS-5-CONFIG_FAILURE	4-Warning	System config parse from [chars] failed	The configuration file from the URL specified in the error message could not be read.	-	"Enter the <CmdBold>no service config<NoCmdBold> " "command to disable autoloading of configuration files " "OR investigate why the tftp load is failing."
SYS-5-CONFIG_NV	5-Notice	Nonvolatile storage configured from [chars]	The configuration was written successfully.	none	"This is a notification message only. No action is required."
SYS-5-CONFIG_NV_I	5-Notice	Nonvolatile storage configured from [chars] by [chars]	The write of the nonvolatile configuration failed.	-	"If this messages recurs copy it exactly as it appears and report " "it to your technical support representative."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS3CONFIG_NV_DATA	3-Error	Variable [chars] not set properly in the routine [chars].	The write of the nonvolatile configuration failed because an internal variable was not set properly.	-	"If this messages occurs copy it exactly as it appears and report " "it to your technical support representative."
SYS4CONFIG_NEWER	4-Warning	Configuration from version [dec].[dec] may not be correctly understood	The software detected that the configuration saved in memory was written by a newer version of software. There might be commands saved in memory that are not implemented by the older software version.	none	"Examine all the messages printed while the router was " "booting. For each message about an unknown command determine " "whether that feature is required. If so upgrade to a " "newer version of software that supports that feature."
SYS4CONFIG_NOLOCK	4-Warning	The configuration could not be locked	A software error occurred.	-	"Copy the error message exactly as it appears and report it " "to your technical support representative."
SYS3CONFIG_NO_PRIVATE	3-Error	No space remaining to save private config	A software or hardware error occurred.	-	"Copy the error message exactly as it appears and report it to your " "technical support representative."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYSCONFIGN_OVRUN	4-Warning	Non config data present at the end of nvram is corrupted	The software detected that the configuration saved into nvram has overlaid a part of the nvram occupied by non config data files. Typically these files are used by snmp to store and retrieve non config persistent data across system reload.	-	"Compress the configuration and store or copy to flash as appropriate"
SYSCONFIGN_TRUNCAE	4-Warning	Truncated configuration to %ld bytes from %ld bytes	The software detected that the configuration saved into nvram has been truncated. There was not enough space to save the compressed configuration.	-	"Save the configuration to flash if the platform supports " "\boot config\" command."
SYSCONFIGN_NEED_OVRUN	4-Warning	Non config data present at the end of nvram needs to be overwritten to fit the configuration into nvram	The software detected that the non config data files occupying the end of nvram need to be overwritten to fit the configuration. Typically these files are used by snmp to store and retrieve non config persistent data across system reload.	-	"Compress the configuration and store or copy to flash as appropriate"
SYSCONFIGN_NEED_TRUNCAE	4-Warning	Configuration needs to be truncated to fit into nvram	The software detected that the configuration is to be truncated to fit in the nvram. There was not enough space to save the compressed configuration	-	"Save the configuration to flash if the platform supports " "\boot config nvbypass\" command."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS4-NV_BLOCK_INIT_FAIL	4-Warning	Unable to initialize the geometry of nvram	The software detected that it failed to initialize the nvram block geometry a part of the nvram to host non config data files. Typically these files are used by snmp to store and retrieve non config persistent data accross system reload. This may happen when the entire nvram is packed with the configuration and the newer version of software which supports this feature could not find the minimum room in the nvram to initialize block file system.	-	"Reduce the configurations in the nvram atleast by 2K"
SYS7-NV_BLOCK_INIT	7-Debug	Initialized the geometry of nvram	Initialized the nvram block geometry a part of the nvram to host non config data files. Typically these files are used by snmp to store and retrieve non config persistent data accross system reload.	-	""
SYS4-NV_CHKSUM	4-Warning	An nvram checksum is already in progress	An interrupt service routine attempted to perform a checksum on the nvram contents and found the resource in use.	nvram	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS4EXMALLOCFAIL	4-Warning	External memory allocation of [dec] bytes failed from EXMEM [dec]	The requested memory allocation is not available from the specified memory pool. The current system configuration network environment or possibly a software error might have exhausted or fragmented the router's memory.	-	"Copy the error message exactly as it appears and report it to your " "technical support representative."
SYS-2-EXMEMINIT	2-Critical	EXMEM [dec]: [chars]	The requested external memory allocator failed to be initialized. reasons are not clear.	-	"Copy the error message exactly as it appears and report it to your " "technical support representative."
SYS2-EXMEMPARAM	2-Critical	Bad parameter [dec] when calling to the allocator utility	Illegal parameter is used when called to allocator. may represent data some corruption.	-	"Copy the error message exactly as it appears and report it to your " "technical support representative."
SYS-2-EXMEMFREE	2-Critical	Free a non allocated ptr [hec] size [dec].	Trying to free a memory which not all of it marked as allocated.	-	"Copy the error message exactly as it appears and report it to your " "technical support representative."
SYS2CONFG_DOWNFAIL	2-Critical	Generated configuration not backward compatible	The router has been configured to generate nonvolatile memory using the commands of an older software version. The current configuration of the router contains a command that cannot be saved using only the older command set.	none	"Allow the router to save the configuration using the command set of " "the current software version or remove the commands that cannot be " "saved using the older command set."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS-5-OUTSETUP	5-Notice	Configuration file [chars] accepted aborting setup	A configuration was accepted over the network so the setup session will be aborted.	none	"This is a notification message only. No action is required."
SYS-3-BADLINKTYPE	3-Error	* Unexpected linktype [dec]	* A software error occurred.	udp	* "Copy the error message exactly as it appears and report it to your " * "technical support representative."
SYS-2-SIGNAL	2-Critical	Process aborted on invalid signal signum = [dec].	An attempt was made to send an invalid signal to another process.	-	"If this message occurs more than once report this message " "to your technical support representative."
SYS-3-CPUHOG	3-Error	Task is running for [dec]msecs more than [dec]msecs [dec]/[dec]	The indicated process ran too long without relinquishing the processor. Each process should run for a small amount of time and then relinquish the CPU so that other processes can run. This problem can be caused by many things like traffic or system load hardware or operational configuration a configuration change initialization of many interfaces cards or ports for example a high momentary error rate a sustained abnormal	If this error occurs in conjunction with a TIMERHOG message \n\ report the two errors together and use the component obtained \n\ for the TIMERHOG message.	"If you suspect a software error copy the error message exactly as it " "appears on the colsole or in the system log contact your technical support" "representative and provide the representative with the gathered information."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS-2-WATCHDOG	2-Critical	Process aborted on watchdog timeout process = [chars].[chars]	The indicated process ran for too long without relinquishing control. The system killed it as a runaway process.	-	-
SYS-3-TIMERHOG	3-Error	Timer callback ran long PC = [hec].	The indicated callback routine ran for too long without relinquishing the processor.	Determine the component from the callback routine address displayed in the error message. Use Topic to search for a similar DDTs. If you find none write a DDTs for this problem.	"Copy the message exactly as it appears and report it your technical " "support representative."
SYS-6-STACKLOW	6-Information	Stack for [chars] [chars] running low [dec]/[dec]	An internal software error occurred.	-	"If this messages recurs copy it exactly as it appears and report " "it to your technical support representative."
SYS4GREEDY_REGEXP	4-Warning	[chars] while processing the input regular expression. Aborting processing use alternate regular expression. Input regular expression: \[chars]\	Regular expression processing limitation: Certain regular expressions require huge stack space for processing or can lead to processing timeouts. We abort processing such regular expressions and print this message to avoid stack overflow/unexpected reload.	os	"The regular expression specified leads to stack overflow/processing " "timeout of the indicated process. Recommended to use a different " "regular expression."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SSICURSI NGIRESHOD	1-Alert	Threshold: [chars] CPU UtilizationTotal/Intr: [dec]%%/[dec]%%	The system is experiencing high CPU usage possibly from a process that is using too much CPU. This condition demands immediate attention or packets or calls may be dropped.	-	"Enter the <CmdBold>show processes CPU<NoCmdBold>" " command to determine the CPU hogging process" " that is causing this condition and if possible" " disable the activity that is causing the" " CPU hog condition so that CPU" " utilization is reduced."
SSICURSI NGIRESHOD	1-Alert	Threshold: [chars] CPU UtilizationTotal/Intr [dec]%%/[dec]%%.	CPU usage has returned to normal after crossing over from a threshold of high usage. Any process that was disabled during the period of high CPU use can now be enabled.	-	"No action is required."
SYS-2-INPUTQ	2-Critical	INPUTQ set but no IDB ptr=[hec]	This message is issued when an attempt is made to alter the input queue count for a packet that should not be counted.	-	-
SYS6BADSHAREINFO	6-Information	[chars] packet [hec] has a zero reference count freeing pid = [hec] \n\ freeing pc = [hec] [chars].	Provides additional information about original freer of packet.	-	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS-2-BADSHARE	2-Critical	Bad refcount in [chars] ptr=[hec] count=[hec]	A reference count is used to track the usage of many data structures. A function increments the count when it begins to use a structure and decrements it when it finishes. When the count becomes zero the data structure is freed. This message indicates that when the count was accessed it was found to be negative which means that the data structure will not be freed until the system is reloaded.	-	-
SYS-2-CFORKLEV	2-Critical	Process creation of [chars] failed at level [dec].	An internal software error occurred.	Determine the component from the process name displayed in the error message.	"Copy the error message exactly as it appears and report it to your technical support representative."
SYS-2-CFORKMEM	2-Critical	Process creation of [chars] failed no memory.	Insufficient memory was available to create a process either while trying to support additional features or due to a memory leak.	mem-suspect	"A memory leak may be the cause if the system has been running for a while without changing its configuration. If you suspect a leak then copy this message exactly as it appears and report it to your technical support representative. Otherwise ensure that more memory is available to support the additional features."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS2CFORKBADFUNCT	2-Critical	Can't create process with start address = [hec]	An internal software error occurred.	-	"Copy the error message exactly as it appears and report it to your " "technical support representative."
SYS-3-BADPROCESS	3-Error	Bad process ID [dec] when [chars] process table	An internal software error occurred.	os-scheduler	"Copy the error message exactly as it appears and report it to your " "technical support representative."
SYS-2-INSCHED	2-Critical	[chars] within scheduler	-	Determine the component from the stack trace displayed in the error message. Then use Topic to search for a similar DDTS. If you find none submit a DDTS for this problem.	-
SYS-2-NOTIOTASK	2-Critical	[chars] from outside IOS task context	An IOS reschedule request was made from code that is not running in the context of an IOS task -- from an interrupt handler the scheduler itself or a service pthread within the IOS process.	Determine the component from the stack trace displayed in the error message. Use Topic to search for a similar DDTS. If you find none write a DDTS for this problem.	"Copy the error message exactly as it appears and report it to your " "technical support representative."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS-2-INTSCHED	2-Critical	'[chars]' at level [dec]	The scheduler was entered from an interrupt service routine ISR.	Determine the component from the stack trace and process name displayed in the error message. Then use Topic to search for a similar DDTS. If you find none submit a DDTS for this problem. If the stack trace indicates that the scheduler was called from an interrupt handler choose the DDTS component based on the interrupt handler. Otherwise use the process name to determine the DDTS component.	-
SYS-3-PROCSEMFAL	3-Error	Process semaphore creation for preemptive processes failed.	Creation of process function semaphore to protect the critical section of process create routine failed. The semaphore creation can fail if there isnt enough chunk memory to create the event structure.	os	-
SYS-2-NOBLOCK	2-Critical	[chars] with blocking disabled.	A process aattempted to relinquish control with blocking disabled.	Determine the component from the stack trace displayed in the error message. Use Topic to search for a similar DDTS. If you find none submit a DDTS for this problem. Choose the DDTS component associated with the routine that called the scheduler.	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SYS-2-BLOCKHUNG	2-Critical	Task hung with blocking disabled value = 0x[hec].	The indicated process has exceeded the time limit for which it may relinquish control with blocking disabled.	Determine the component from the stack trace displayed in the error message. Use Topic to search for a similar DDTS. If you find none submit a DDTS for this problem. Choose the DDTS component associated with the routine that called the scheduler.	"This message may be a result of high loads. If it recurs " "copy the text exactly as it appears and report it along " "with the associated stack trace to your technical support " "representative."
SYS-2-NOTDEAD	2-Critical	Killing process [chars] pid [dec] again	An internal software error occurred.	os-scheduler	"If this messages recurs copy it exactly as it appears and report " "it to your technical support representative."
SYS-2-NOPROCESS	2-Critical	No such process [dec]	An internal software error occurred.	-	"If this messages recurs copy it exactly as it appears and report " "it to your technical support representative."
SYS-2-IMMORTAL	2-Critical	Attempt to shut down management process [dec] [chars].	An attempt was made to shut down the specified management process. Management processes must not be shut down as long as the\n\ router remains up.	Determine the component from the stack trace displayed in the error message. Use Topic to search for a similar DDTS. If you find none submit a DDTS for this problem. Choose the DDTS component associated with the routine that called the process_kill.	-

<u>SPA_OIR3</u> <u>UNEXPECTED</u> <u>EVENT</u>	3-Error	[chars]: SPA OIR unexpected event[dec]	An unexpected SPA OIR event was detected for the SPA in the slot or subslot specified in the error message. The SPA OIR state machines may not reflect the state of the hardware for this SPA. This condition could be caused by software or hardware problem but a software problem is more likely. For distributed platforms SPA OIR messages are transported over different media depending on the platform for example c12000 uses the MBUS. An unlikely cause of this error is that an event message	spa-infra	<u>SPA_OIR3</u> <u>UNEXPECTED</u> <u>EVENT</u>
<u>SPA_OIR3</u> <u>INVALID</u> <u>EVENT</u>	3-Error	[chars]: Invalid [chars] event received when SPA is undergoing Minimal Disruptive Restart	An unexpected event was detected when the SPA was undergoing Minimal Disruptive Restart. This condition is most likely a software problem. The SPA will be reset as normal and this will impact traffic.	spa-infra	<u>SPA_OIR3</u> <u>INVALID</u> <u>EVENT</u>

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SPA_OIR_EVENT_DATA_ERRCR	3-Error	SPA OIR event data error - [chars][dec]	Invalid data was detected within a SPA OIR event. The SPA OIR state machines may not reflect the state of the hardware. The problem only affects one SPA but the SPA cannot be determined from the context where the error was detected. This condition could be caused by software or hardware problem but a software problem is more likely. For distributed platforms SPA OIR messages are transported over different media depending on the platform for example c12000 uses the MBUS. An unlikely cause of this error is that an event message	spa-infra	"Check the system log for other messages that may help determine " "which SPA is affected. " SPA_OIR_EVENT_DATA_ERRCR
SPA_OIR_EVENT_ERRCR	3-Error	[chars]: event [dec]	A SPA OIR event message was not enqueued for the SPA in the slot or subslot specified in the error message. The SPA OIR state machines may not reflect the state of the hardware for this SPA. This condition is most likely due to a software problem.	spa-infra	SPA_OIR_EVENT_ERRCR

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SPA_FAILURE/CDN	3-Error	[chars]: SPA [chars] unexpected recovery action[dec] for fail code 0x[hec]	An error occurred while processing a failure message for the SPA in the slot or subslot number specified in the error message. The recovery action to be taken after a SPA failure is determined by calling a SPA driver function. This message indicates that the SPA driver function returned an invalid recovery action. After this message was issued the SPA was reloaded in an attempt to recover. The SPA driver most likely returned an invalid recovery action because of a software problem.	-	SPA_OIR_COMB/CDN
SPA_OIR_EVENT_HANDLING	3-Error	[chars]: [chars]0x[hec]	A data structure error was detected when handling a SPA OIR event for the SPA in the slot or subslot specified in the error message. The SPA OIR state machines may not reflect the state of the hardware. This condition is most likely due to a software problem.	spa-infra	SPA_OIR_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SPA_OIR-3-CMD_ATTR	3-Error	[chars]: Unexpected command identifier [dec]	An unexpected command identifier was detected when processing command related to a SPA OIR. The command was not processed. This is most likely due to a software problem.	spa-infra	SPA_OIR_STD_ACTION
SPA_OIR-2-INITFAIL	2-Critical	SPA OIR initialization error	A failure occurred during the SPA OIR subsystem startup. SPA OIR is not functional for the RP or line card that generated the message.	-	LOG_SID_REDUCE_ACTION
SPA_OIR-2-SUBSLOTINITFAIL	2-Critical	SPA OIR initialization error for [chars]	A failure occurred during the SPA OIR subsystem startup. SPA OIR is not functional for the slot or subslot specified in the error message	-	LOG_SID_REDUCE_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SPA_OIR3EVENT_TIMEOUT	3-Error	[chars]: Timeout waiting for SPA OIR event	A timeout occurred for the subslot specified in the error message while waiting for a SPA OIR event. The SPA did not complete initialization. When this error occurs the system attempts automatic recovery by reloading the SPA. This condition could be caused by software or hardware problem but a software problem is more likely. For distributed platforms SPA OIR event are transported over different media depending on the platform for example c12000 uses the MBUS. An unlikely cause of this error is that an event message	-	SACRAUIORCOMB/ADN

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SPA_OR3SWNI_TIMEOUT	3-Error	[chars]: SPA initialization not completed	A timeout occurred for the subslot specified in the error message while waiting for SPA software driver to initialize the SPA. The SPA did not complete initialization. When this error occurs the system attempts automatic recovery by reloading the SPA. This condition could be caused by software firmware or hardware problem but a software or firmware problem is more likely.	-	"Check for other messages reported for further insight. " "Hardware replacement should not occur first occurrence. " "Before requesting hardware replacement review troubleshooting logs " "with a Cisco technical support representative. " <u>SACRAUORCOMRYACDN</u>
SPA_OR3HWNI_TIMEOUT	3-Error	[chars]	A timeout occurred for the subslot specified in the error message while waiting for SPA hardware to initialize. The SPA did not complete initialization. When this error occurs the system attempts automatic recovery by reloading the SPA. This condition could be caused by a software firmware or hardware problem but a firmware or hardware problem is more likely.	-	<u>SACRAUORCOMRYACDN</u>

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SPA_OIR-3-OUT_OF_SYNC	3-Error	[chars]: failure code 0x[hex]	The software SPA OIR state did not match the hardware state for the subslot in the error message. When this error occurs the system attempts automatic recovery by reloading the SPA. This condition is expected if a SPA is reloading when an RP switchover occurs. Otherwise this condition could be caused by a software firmware or hardware problem but a firmware or software problem is more likely. This condition could also be caused by a rare interaction between SPA and its SIP.	-	SPA_OIR-3-OUT_OF_SYNC
SPA_HW-3-ADMIN_DOWN	3-Error	[chars]	The SPA was not brought up because the SPA bay is in an admin down state. The SPA bay will appear as <CmdBold>no hw-module-no <target spa> <CmdBold> in the running configuration.	-	"Use the <CmdBold>no hw-module-no <target spa> " <CmdBold> command to administratively enable " "the SPA bay."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SPA_OR3CONGM_MACH	6-Information	[chars]: Inserted SPA type does not match preconfigured SPA type. Configuration updated	This message reports a mismatch between the inserted SPA type and the preconfigured SPA type on platforms that support pre-configuration. The inserted SPA replaces the preconfigured SPA.	-	"Check the configuration with the <CmdBold>show run<NoCmdBold> command. " "If you would like to revert to the preconfigured type remove the SPA " "and then update the configuration from a backup"
SPA_OR3SPA_POWREDCF	3-Error	[chars]: SPA [chars] powered off after [dec] failures within [dec] seconds	The SPA was powered off because it failed too often. This condition may be caused by a software firmware or hardware error.	-	"Look for other error messages related to this SPA subslot to " "determine root cause of the failure. " SPA_OR3ENR3COMB_Y_ACDN
SPA_OR3CORRUPT_EVENT	3-Error	[chars]	Corruption was detected within a SPA OIR event for the subslot specified in the error message. When this error occurs the system attempts automatic recovery by reloading the SPA. This condition could be caused by a software firmware or hardware problem but a firmware or software problem is more likely. For distributed platforms SPA OIR events are transported over different media depending on the platform for example c12000 uses the MBUS. An unlikely cause of this error is that an event message	-	SPA_OR3AUCORCOMB_Y_ACDN
