<u>SADVBS</u> <u>SN</u> <u>NCNE</u> <u>ERR</u>	3-Error	[chars] [chars] - An error on the data bus has occurred.	In normal situation transitions from the Data Burst state to payload control or idle control are possible only on integer multiples of 8 cycles or upon end of packet. This error could happen if the MW bit flips on the bus with coincidental good dip4 or due to a misbehaving source.	spa-infra	"Power down and reseal the card. " SPI4_STD_ACTION
<u>SADVBS</u> <u>SN</u> <u>NCNE</u> <u>PRY</u>	3-Error	[chars] [chars] - A single DIP4 parity error has occurred on the data bus.	A single parity error has occurred on the data bus between the SPA and the SIP. When this condition is occurring a short duration of packet loss and/or symptoms resulting from data corruption may occur. This condition may indicate a developing hardware failure. This error should occur very infrequently during normal operation and should not occur when no changes are made to the configuration.	spa-infra	"Power down and reseal the interface card. " SPI4_STD_ACTION
<u>SADVBS</u> <u>SN</u> <u>OC</u> <u>FRME</u>	3-Error	[chars] [chars] - A data bus out of frame error condition has occurred	An error has occurred on the data bus between the SPA and the SIP. When this condition is occurring the interface will be down and/or not forward any traffic.	spa-infra	"Power down and reseal the card. " SPI4_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SPA_DAB_SSP_SEQUENCE	3-Error	[chars] [chars] - A sequence error has occurred.	A sequence error has occurred on the data bus between the SPA and the SIP. When this condition is occurring a short duration of packet loss may be noticed. This condition may indicate a developing hardware failure. This error should occur very infrequently during normal operation and should not occur when no changes are made to the configuration.	spa-infra	SPI4_STD_ACTION
SPA_DAB_SPKGT_GAP_ERROR	3-Error	[chars] [chars] - A packet gap error has occurred	The data bus interface on this line card is experiencing a hardware-related issue. No loss of data or data corruption should occur. Packets should continue to be forwarded.	spa-infra	SPI4_STD_ACTION
SPA_DAB_SSP_SINGLE_DIP2_PARITY	3-Error	[chars] [chars] - A single DIP 2 parity error on the FIFO status bus has occurred.	The data bus interface on this line card is experiencing a hardware-related issue. Some packets may be dropped.	spa-infra	SPI4_STD_ACTION
SPA_DAB_SSP_FIFO_STATUS	3-Error	[chars] [chars] - FIFO status bus out of frame condition has occurred.	The data bus interface on this line card is experiencing a hardware-related issue. When this condition is occurring the interface will be down and/or not forward any traffic.	spa-infra	SPI4_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SADVBSMBCFNUM	3-Error	[chars] [chars] - An error condition on the SPA data bus has occurred.	An error condition on the SPA data bus has occurred. This condition can be caused by a software fault only.	spa-infra	SPI4_BUGKIT_ACTION
SADVBSMCAENDREN	3-Error	[chars] [chars] - An error condition on the data bus between the SPA and the SIP has occurred.	An error condition on the data bus between the SPA and the SIP has occurred. This condition results from a software fault.	spa-infra	SPI4_BUGKIT_ACTION
SADVBSMCRWDNOM	3-Error	[chars] [chars] - An error condition on the data bus between the SPA and the SIP has occurred.	This message points to an error condition on the SPA data bus. Symptoms of this error include data corruption and/or a short duration of data loss.	spa-infra	SPI4_STD_ACTION
SADVBSMBCNRWOD	3-Error	[chars] [chars] - An error condition on the data bus between the SPA and the SIP has occurred.	An error condition on the data bus between the SPA and the SIP has occurred. Symptoms of this error include data corruption and/or a short duration of data loss. In addition the interface may lock up.	spa-infra	SPI4_STD_ACTION
SADVBSMCKCMBLOW	3-Error	[chars] [chars] - An error condition on the data bus between the SPA and the SIP has occurred.	An error condition on the data bus between the SPA and the SIP has occurred. Possible causes include misconfiguration of Maxburst parameters incorrect FIFO sizing or FIFO threshold settings.	spa-infra	SPI4_BUGKIT_ACTION

CMISLIC3WORKING_NAD	3-Error	Working linecard [dec]/[dec] has higher license than the configured protect	Working linecard has higher license than the protect so HCCP configuration is now invalid for the working linecard	ubr10000	"Upgrade the license on the protect or downgrade" " the license on the working"

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
CMISIC3PROTECTNAD	3-Error	Protect linecard [dec]/[dec] has lower license than the configured working	Protect linecard has lower license than the working so HCCP configuration is now invalid for the protect linecard	ubr10000	"Upgrade the license on the protect"
CMISIC3WORKINGPARIAL	3-Error	Working Linecard [dec]/[dec] License has been restricted. Please upgrade Protect Linecard License first and then reload working for complete fulfillment	The working linecard license is now reduced because the working linecard license is higher than the protect linecard license	ubr10000	"Please upgrade the license on the protect and then reload the working linecard"
CMISIC3LCDPROCSRAEAL	3-Error	Could not create Update LCD process on Linecard [dec]/[dec]	The Line card license LCD update process create failed	ubr10000	ICGSIDDDISTACDEALS
CMISIC4LICENSEPNDNG	4-Warning	License enforcement pending for Linecard [dec]/[dec]	The linecard license enforcement will be delayed until the linecard transitions to active	ubr10000	"No action required"
LCINFO-3-CRASH	3-Error	Line card in slot [dec]/[dec] crashed	The line card in the slot indicated crashed and sent a CRASH_START message to the PRE. The PRE is now waiting for the rest of the crash information from the line card to be sent via the BPE stack trace context version etc.. This should	ubr10k-sw	"Report this defect with as much information about the line card " "in question including the output of show context summary show " "context slot N and show tech-support N as well as the usual show " "tech-support from the PRE."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
LCINFO-3-NOPROCESS	3-Error	Failed creating line card complete process	When creating the crash complete process for the crash information subsystem the create_process call failed. This should not happen. It is probably due to a software defect or hardware failure. This failure should only happen during initialization.	ubr10k-sw	"Rebooting the system should fix this. If the condition persists " "on subsequent reloads of the system a bug should be filed and " "the system should be reloaded with a different image."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
LCINFO-3-TIMEOUT	3-Error	Timeout waiting for crash info from slot [dec]/[dec]	The crash information complete timer expired. When a line card crashes it sends information to the PRE for debugging and analysis. When the START OF CRASH message is received a timer is set for approx 10 seconds. The line card has 10 seconds to send all the crash information to the PRE. This is not a crash dump -- this is a small amount of information that usually includes context stack trace etc. It is less than 8K bytes of information. If an END OF CRASH information message is not received before the timer goes off the crash information record is closed contains partial information this message is	ubr10k-sw	"No action is required specifically because this message was " "displayed. Because the line card was crashing there might be " "other defects to report. If this message is seen without a line " "card crashing report this defect with the output of the usual " "commands including show tech-support on the PRE *AND* on the line " "card that didn't crash but was mentioned in this error " "message."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
LCINFO-3-INVDEV	3-Error	Invalid line card number in BPE callback LC=[dec]/[dec]	The line card crash information subsystem on the PRE was called from the BPE subsystem with an invalid slot/subslot. The slot or subslot number is out of range. This indicates a software defect in the system.	ubr10k-sw	"Report this defect with as much information about the BPE " "subsystem as possible. There is no adverse effect to the PRE -- " "it ignores the bad callback and continues. If the problem " "persists reboot the router. It is unlikely but possible that " "the problem is due to bad BPE hardware somewhere in the system."
LCINFO-3-INVSTATE	3-Error	Line card crash server in bad state LC=[dec]/[dec]state=[dec]	-	-	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
LCINFO-4-UNXMSG	4-Warning	Unexpected crash info msg type [chars] in state [chars] LC=[dec]/[dec]	The line card crash information subsystem received an unexpected message for the state it is in. The state and message type are given in the error message. This does not have any adverse effect on the PRE since it ignores and/or recovers from this occurrence. Because the sender of these messages is a line card that is crashing it is not completely unbelievable that this might happen. The source of the crash on the line card is more interesting. If this occurs without a line card crashing it is due to a stray/errant BPE message that should be pursued. This could also be due to a dropped BPE message.	ubr10k-sw	"Find the source of the crash on the line card if one was crashing " "when the message occurred. If no line card was crashing report " "this defect with as much information about the BPE subsystem and " "the line card crash information subsystem as possible. If this " "message persists rebooting the router might help remove this " "message."
LCINFO-3-NOBUFLC	3-Error	Could not malloc line card crash info buffer on PRE bufnum=[dec]size=[dec]	-	-	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
LCINFO-3-NOBUF	3-Error	Could not malloc line card crash structures on PRE size=[dec]	The PRE could not malloc data structures for line card crash data structures at startup time. This is not in and of itself a Serious problem but the underlying memory shortage at startup time will probably prevent the router from running well if at all.	ubr10k-sw	"Add more memory and/or debug the memory shortage problem."
LCINFO-4-TRUNC	4-Warning	Crash record [dec]=[chars] truncated expected=[dec]actual=[dec]	A line card crashed an was sending crash information to the PRE. The PRE received a CRASH RECORD START message that indicated the data would be \expected\ bytes long. Before that many bytes were received the PRE received another CRASH RECORD START message indicating the start of another record. The current record is marked as truncated and the next record is received but the anomaly is noted in this error message. This is a problem but because what started this process was a line card crashing this might only be a symptom of another underlying problem.	ubr10k-sw	"Report this defect with as much information about the BPE subsystem " "and the line card crash information subsystem possible."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
LCINFO-3-LCHANGROC	3-Error	Failed creating line card hang cure process	When creating the LC hang cure process for checking prolonged CLC down states the create_process call failed. This should not happen. It is probably due to a software defect or hardware failure. This failure should only happen during initialization.	ubr10k-sw	"Rebooting the system should fix this. If the condition persists " "on subsequent reloads of the system a bug should be filed and " "the system should be reloaded with a different image."
LCINFO-4-LCHUNG	4-Warning	Slot [[dec]/[dec]] down on last [dec] checks. HW RESET # [dec] ...	A line card can get hung in some IOS operation and is not able to recover or when rommon can get stuck while initiating tftp bootload. This is the time when an external monitoring process on RP checks for health of each line card. And if the line card is found stuck for more than 150 seconds a hardware reset is issued for that subslot. AND while issuing a hard reset this error message is displayed onto the console.	ubr10k-sw	"Report this LC defect with as much information about the LC"
LCINFO-6-LCRESET	6-Information	PRE switchover. Reset empty slot [[dec]/[dec]]	When the standby PRE becomes active it resets all the slots which it thinks is empty. This prevents any linecards which was coming up during the PRE switchover from getting stuck	ubr10k-sw	""

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action

Forward the file the " "output from a show tech command and the NPE console log to Cisco."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
IPCOIR-6-LCWAITINFO	6-Information	CLC [dec]/[dec]> [chars]	The NPE OIR handler received a console error message from a distributed line card while in the crashwait state. The handler enters this state when it detects a Keepalive timeout on a distributed line card. During the crash wait period the LC is expected to collect and store crash information. At the end of the wait period the NPE will reload the LC. During this time it's possible that the LC will try to send error messages to it's console. Normally these would be sent to the NPE via the logger. However during the wait period the IPC link between the NPE and the LC is down so the OIR debug code provides a rudimentary method of collecting and displaying these messages	ubr7200-sw	"Report the problem to Cisco. Include the log messages along with the " "output of the show tech command and crashinfo file from the LC."
IPCOIR-3-LC4MS	3-Error	The watchdog timer on slot [dec]/0 has stopped.	The line card has stopped servicing it's watchdog timer.	ubr7200-sw	"The condition may be temporary or may be caused by a crash. " "Check the LC's bootflash for crashinfo files and monitor " "the LC for a watchdog timeout."

GGASACKNOLOOPDETECT	1-Alert	The link neighbor of link [dec] of Gigastack GBIC in [chars] did not respond to the loop detection request. If loop topology is deployed make sure all switches in the stack are running the latest software.\n	No acknowledgement for Gigastack loop detection request is received from one of the links on a Gigastack GBIC. Either the neighboring switch does not support Gigastack Loop breaking algorithm or the link between the two Gigastack GBICs is broken. Under this condition a Gigastack loop topology will not be automatically detected and the connectivity between switches in the stack could be lost.	-	"If loop topology is used in the Gigastack make sure the latest software is running on all switches in the stack. Check the Gigastack GBICs involved to make sure they are functioning."
GBICSERIAL_NVDVA	6-Information	Unrecognizable GBIC found in [chars] serial data 0x%02x	The GBIC presented data to the system which did not correctly identify the type of the GBIC. It will be handled as a 'generic' GBIC.	firmware	"If the GBIC fails to become operational " "carefully reinsert it in the slot. If it " "continues to fail after reinsertion " "the GBIC may be defective or incompatible " "with the switch."
GBICSMODULE_UNKNOWN	6-Information	Unrecognizable GBIC found in [chars] module mask 0x%02x	The GBIC presented data to the system which did not correctly identify the type of the GBIC. It will be handled as a 'generic' GBIC.	firmware	"If the GBIC fails to become operational " "carefully reinsert it in the slot. If it " "continues to fail after reinsertion " "the GBIC may be defective or incompatible " "with the switch."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
GBIC4NOREAD_VSDATA	4-Warning	Unable to read vendor-specific data for GBIC interface [chars]	The GBIC was identified as a Cisco GBIC but the system was unable to read identifying vendor-specific information to verify its authenticity.	firmware	"Remove and reinsert the GBIC. If it fails " "again in the same way the GBIC may be defective."
GBIC4NOREAD_EXTTYPE	4-Warning	GBIC interface [chars] has unrecognized extended type	The GBIC was identified as a Cisco GBIC but the system does not recognize its reported extended type code.	firmware	"Check the list of supported GBICs for this version " "of the system software. An upgrade may be required " "for newer GBICs. Even if unrecognized the GBIC " "may still operate properly perhaps with limited " "functionality."
GBIC4NOREAD_VNAME	4-Warning	Unable to read vendor name for GBIC interface [chars]	The GBIC was identified as a Cisco GBIC but the system was unable to read the name of the GBIC's vendor.	firmware	"Remove and reinsert the GBIC. If it fails " "again in the same way the GBIC may be defective."
GBIC4NOREAD_VSRNUM	4-Warning	Unable to read serial number for GBIC interface [chars]	The GBIC was identified as a Cisco GBIC but the system was unable to read the GBIC's serial number.	firmware	"Remove and reinsert the GBIC. If it fails " "again in the same way the GBIC may be defective."
GBIC4XCVR_INTERR	4-Warning	Internal error occurred in setup for GBIC interface [chars]	The system could not allocate resources or had some other problem in the setup for the specified GBIC interface.	firmware	"Reload the system. If the problem persists " "contact TAC."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
GBICCHECKSUMFAILED	4-Warning	GBIC EEPROM data check sum failed for GBIC interface [chars]	The GBIC was identified as a Cisco GBIC but the system was unable to read vendor-data information to verify its correctness.	firmware	"Remove and reinsert the GBIC. If it fails " "again in the same way the GBIC may be defective."
PAORMCASSICFAILURE	3-Error	\nAsic driver initialization has failed\n	One of the ASIC initialization steps has failed. This could be a failure in the PCI configuration setup I2C initialization Build-in self test on the internal chip memories or other miscellaneous initialization steps due to a hardware defect.	-	LOG_STD_ACTION
PAORMCASSICFAILURE	3-Error	\n The board information could not be read correctlyinitialization failed	During switch driver initialization there was a failure to read the system board information. This could be a hardware problem.	-	LOG_STD_ACTION
PAORMCASSICFAILURE	3-Error	\n The switch memory resources could not be allocated for [chars] initialization failed	During the switch driver initialization driver-related memory resources could not be allocated. This could be a hardware defect.	-	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
PA1CRM_C2950_BIST_FAIL	3-Error	\n The number of asics expected were [dec] PCI bus scan found [dec]\n	During the switch driver initialization incorrect number of ASICs were found on the PCI bus or no ASICs with a correct PCI value was found. This could be caused by a system PCI bus defect or incompatible software version running on the switch.	-	LOG_STD_ACTION
PA1CRM_C2950_BIST_FAIL	3-Error	\n The PCI address space initialization failed	During the switch driver initialization the PCI address space for the ASIC could not be initialized. This could be a system PCI-bus-related issue.	-	LOG_STD_ACTION
PA1CRM_C2950_BIST_FAIL	3-Error	\n PCI address space test failed Wrote 0x[hec] read 0x[hec] re-read 0x[hec]\n	During the Power-On Self Test it is found that the PCI address space for the ASIC has not been mapped correctly. This could be a system PCI-bus-related issue.	-	LOG_STD_ACTION
PA1CRM_C2950_BIST_FAIL	3-Error	\n C2950 BIST failed for memory [chars] count [dec]\n	During the Power-On Self Test the Built-In memory test on the internal chip memories has failed. This could be due to an ASIC defect.	-	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
PACM_CASB_FAILURE	3-Error	\n GBP currently FULL or UNAVAILABLE.	During the switch driver initialization an error has been detected in the external packet memory. This could be a defect in the ASIC or in the external SDRAM.	-	LOG_STD_ACTION
PACM_CSM_READ_FAILURE	3-Error	\n Read memory failed for memory [chars] at index [dec]\n	An attempt to read a valid location in the internal chip memory was failed. This could be due to a hardware defect.	-	LOG_SID_RECUR_ACTION
PACM_CSM_WRITE_FAILURE	3-Error	\n Write memory failed for memory [chars] at index [dec]\n	An attempt to write to a location in the internal chip memory was failed. This might be cause by writing to a invalid memory location or a defect in the hardware.	-	LOG_SID_RECUR_ACTION
PACM_CSM_OPCODE_FAILURE	3-Error	\n S-channel operation timeout for opcode [chars]\n	This message means that there was a failure to read or write to an ASIC register or a memory location because of an ASIC internal bus failure.	-	LOG_SID_RECUR_ACTION
PACM_CSM_READ_FAILURE	3-Error	\n S-channel operation read register failure at addr [hec]\n	This message means that there was a failure to read a ASIC register which might be caused by an invalid register address or an internal bus failure.	-	LOG_SID_RECUR_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
PA1CRMCABMCPAUE	3-Error	\n Unable to read PHY register at addr [hec] for phy id [hec]\n	This message means that there was a failure to read from or write to a PHY register on the switch. This could be caused by a defect in the MII/GMII interface of the switch.	-	LOG_SID_RECUR_ACTION
PA1CRMCABMCPAUE	3-Error	\n Unable to initialize the external packet memory \n	During the switch driver initialization there was an error in the external packet memory initialization. This could be a defect in the ASIC or in the external SDRAM.	-	LOG_STD_ACTION
PA1CRMCABMCPAUE	3-Error	\n Invalid copy [dec] for table [chars]\n	This message means that there was an attempt to read or write an invalid copy of the switch internal memory. This is a recoverable error but should not happen.	-	LOG_SID_RECUR_ACTION
PA1CRMCABMCPAUE	3-Error	\n Invalid index [dec] for table [chars]\n	This message means that there was an attempt to access an invalid index of the switch internal memory. This is a recoverable error but should not happen.	-	LOG_SID_RECUR_ACTION
PA1CRMCABMCPAUE	3-Error	\n Register read failed for register [chars] in [chars]\n	An attempt to read a valid location in the internal chip register failed. This could be due to a hardware defect.	-	LOG_SID_RECUR_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
IPACMCA3RCWRFAUE	3-Error	\n Register write failed for register [chars] in [chars]\n	An attempt to write to a location in the internal chip register failed. This might be caused by writing to an invalid register location or a defect in the hardware.	-	LOG_SID_RECUR_ACTION
SCRMCONRSHUDAN	2-Critical	Storm control shutdown [chars]	Excessive traffic has been detected on a port that has been configured to be shutdown if a storm event is detected.	-	"Once the source of the packet storm has been fixed reenable " "the port using port configuration command."
CMDEMODUKWRM	3-Error	Unknown trap type:[dec] received in emt_call function.	Unknown trap type. Some feature requires this trap type to be handled	-	-
ENROMENEFANFAULT	2-Critical	System Fault: FAN FAULT is detected.	-	-	-
ENROMENRNGOBIEMP	4-Warning	[chars] [chars] [chars] [chars]	The chassis inside temperature exceeds the configured threshold but less or equal to the max inside temperature	-	-

IRE_CPE3UNKNOWNMDEL	3-Error	\nCPE has unrecognizable model number [chars] on interface [chars]	The model number string in the CPE does not match a known CPE model number.	fw-hawaii	"Use the \"show controllers lre cpe mfg\" command " "to examine the Model Number of the CPE. " "Verify that the Model Number is a Cisco-supported " "one. Use the interface configuration command " "\"shutdown\" followed by a \"no shutdown\" to " "force the switch to re-read the CPE Model Number. " "If the error message persists record the output " "of the previously used show command and report the " "problem to your technical support representative."
IRE_CPE3WRONGPATCH	3-Error	\nCPE on interface [chars] has wrong patch version [hec]. \nPatch version [hec] or higher is needed for this CPE.	Each CPE requires a currently-supported patch version for it to function. This CPE has a patch version that predates the earliest supported version. This condition might occur because the switch was upgraded with the latest Cisco IOS Software image but the CPE firmware has not been upgraded.	fw-hawaii	"Upgrade the patch on the CPE to the latest " "supported version by using the command " "\"hw-module slot <slot> upgrade lre remote\""

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
IRE_CPE3INVALIDFW	3-Error	\nCPE on interface [chars] has invalid LRE firmware.	The LRE firmware header does not have a valid signature or the header information on the specified firmware is inconsistent with the contents of the firmware	fw-hawaii	"Upgrade the firmware on the CPE to the latest " "supported one by using the command " "\hw-module slot <slot> upgrade lre remote\"."
IRE_CPE3INVALIDPHY	3-Error	\nCPE on interface [chars] has an unsupported Ethernet PHY.	The Ethernet PHY device on the CPE attached to the interface specified in the error message is not supported. This error occurs when the switch cannot recognize the PHY identifier of the PHY devices	fw-hawaii	"Verify that the CPE is a Cisco-supported one. " "Use the command \"show controllers lre cpe " "mfg\" to verify that the CPE Model Number " "string is correctly set. If the IOS version and " "CPE model number look correct issue the interface " "configuration command \"shutdown\" followed by " \"no shutdown\" to force the switch to read the " "PHY identifier again. As a last resort power cycle " "the CPE. If the error persists contact your " "technical support representative."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
IRE_CPE3INVALIDMODE	3-Error	\nCPE on interface [chars] is in invalid mode [chars].	-	fw-hawaii	<p>"Use the command \"show controllers lre cpe mfg \" \" to verify that the CPE Model Number string is \" correct. Use the command \"hw-module slot <slot> \" lre upgrade remote \" to ensure that the CPE has \" the latest supported firmware. If the CPE's Model \" Number and firmware are correct use the interface \" configuration command \"shutdown\" followed \" \"by \"no shutdown\" to force the switch to re-read \" CPE information. If the problem persists contact \" your technical support representative."</p>

Family-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
IRECHEMIRONBOOIMR	3-Error	\nCPE on interface [chars] reported unsupported version of bootloader firmware [chars].\nMinimum bootloader firmware version needed [chars]	Each CPE requires a currently-supported bootloader firmware version for it to function correctly. This CPE has a bootloader firmware version that predates the earliest supported version.	fw-hawaii	"Upgrade the bootloader firmware on the CPE to " "a recent version that supports the current " "requirements by using the command \"hw-module " "slot <slot> lre upgrade remote\". If the " "CPE firmware upgrade does not solve the problem " "force the switch to re-read the bootloader " "firmware version by issuing the interface " "configuration command \"shutdown\" followed " "by the command \"no shutdown\". As a last " "resort power cycle the CPE. If the problem " "persists contact your technical support " "representative."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
LRE_CPE3NOVERCKSUM	3-Error	\nCould not fetch CPE firmware version and checksum on interface [chars].	The system could not obtain the CPE firmware version and checksum. If the CPE has the latest firmware and the CPE Model Number is correct the most likely cause for this error is that the LRE link between the switch and the CPE is of poor quality.	fw-hawaii	"Use the command \"show controllers lre cpe mfg \" \" to verify that the CPE Model Number string is \" \" correctly set for this CPE. Use the command \" \" \"hw-module slot <slot> lre upgrade remote\" to \" ensure that the CPE has the latest firmware. \" \" Use the interface configuration command \"shutdown\" \" \" followed by \"no shutdown\" to force the switch \" \" to re-fetch the CPE firmware version and checksum. \" \" As a last resort power cycle the CPE. If the \" \" problem persists contact your technical support \" \" representative."
LRE_CPE3WRONGAPVER	3-Error	\nCPE on interface [chars] reported unsupported version of application firmware [chars].\nMinimum application firmware version needed [chars]	Each CPE requires a currently-supported application firmware version for it to function correctly. This CPE has a application firmware version that predates the earliest supported version.	fw-hawaii	"Application firmware is not currently used \" \" on the CPE. This error message is for future use."
LRE_CPE5SSNCHANGED	5-Notice	\nCPE unit on interface [chars] changed.	The CPE system serial number changed. This condition usually means that the CPE unit on this interface was replaced.	fw-hawaii	"No action is required."

HARDWAREASCTNUMERROR	3-Error	port number [dec] is invalid	Each interface in a given Port-ASIC is identified using an index value. The port-number used is not valid out of range	firmware	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
ACLMGR-2-NOVMR	2-Critical	Cannot generate hardware representation of access list [chars]	There were insufficient resources available for generating a hardware representation of the access list. Either lack of available logical operation units or lack of memory can cause this problem. Logical operation units are needed when a match on TCP flags is specified or when any test other than eq that is: ne gt lt or range is	firmware	"Modify the ACL configuration to use fewer resources."
ACLMGR-2-NOMAP	2-Critical	Cannot create ACL Manager data structures for VLAN Map [chars]	The ACL Manager could not allocate the data structures needed to describe a VLAN Map in a form that can be loaded into hardware. Probably caused by lack of free memory.	firmware	LOGSIDREDUCEACTION
ACLMGR-2-NOVLB	2-Critical	Cannot create memory block for VLAN [dec]	The ACL Manager was unable to save per-VLAN information needed for its correct operation. Some per-interface features such as access groups or VLAN maps will not be configured correctly.	firmware	"Use a less complicated configuration that "requires less memory."

Family-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
ACLMGR3NOLABEL	3-Error	Cannot allocate [chars] label for vlan-id [dec]	The ACL Manager was unable to allocate a label for the features on this interface. This means that the hardware cannot be programmed to implement the features and packets for this interface will be filtered in software. There is a limit of 256 labels per direction.	firmware	"Allocate more space to the relevant section " "of the TCAM and reboot or else use a simpler " "configuration. Use the same ACLs on multiple " "interfaces if possible."
ACLMGR4UNLOADING	4-Warning	Unloading [chars] [chars] label [dec] [chars] [chars]feature	The ACL Manager was unable to fit the complete configuration into the hardware so some features will have to be applied in software. This prevents some or all of the packets in a VLAN/port from being forwarded in hardware and requires them to be forwarded by the CPU. Multicast packets may be dropped entirely instead of being forwarded.	firmware	"Allocate more space to the relevant section " "of the TCAM and reboot or else use a simpler " "configuration. Use the same ACLs on multiple " "interfaces if possible."
ACLMGR4RELOADED	4-Warning	Reloading [chars] [chars] label [dec] [chars] [chars]feature	The ACL Manager was able to fit more of the configured features on this label into the hardware. One or more features had previously been unloaded because of lack of space.	firmware	LOG_STD_NO_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
ACLMGR3MERGEFAIL	3-Error	[chars] ACL merge error [dec] [chars] on [chars] label [dec]	The ACL Manager was unable to complete the merge of the configured features into a form suitable for loading into the hardware. Packets potentially affected by this feature will be sent to the CPU for processing instead. The most likely cause is specifying an ACL that is too large or too complex for the system to handle.	firmware	"Try specifying a smaller and less complicated "configuration."
ACLMGR3INSERTFAIL	3-Error	Insert of access-map [chars] #[dec] into [chars] label [dec] failed	The system ran out of CPU DRAM when trying to merge sections of an access map.	firmware	LOG_SID_REDUCE_ACTION
ACLMGR3AUGMENTFAIL	3-Error	Augmenting of access-map [chars] on [chars] label [dec] failed	The system ran out of CPU DRAM when attempting to merge internally required elements with the configured access maps.	firmware	LOG_SID_REDUCE_ACTION
ACLMGR3INTTABLE	3-Error	Not in truth table: VLMAP [dec] RACL [dec] Rtprot [dec] Mcb [dec] Feat [dec]	An unrecoverable software error occurred while trying to merge the configured input features.	firmware	"show running-config"
ACLMGR3OUTTABLE	3-Error	Not in truth table: RACL [dec] VLMAP [dec]	An unrecoverable software error occurred while trying to merge the configured output features.	firmware	"show running-config"

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
ACLMGR3PACLTABLE	3-Error	Not in truth table: IPSrcGrd [dec] PACL [dec] Rtprot [dec]	An unrecoverable software error occurred while trying to merge the configured port acl features.	firmware	"show running-config"
ACLMGR3QOSTTABLE	3-Error	Not in truth table: ACL [dec] in map action [dec]	A software error occurred while trying to merge a QoS Policy Map	firmware	"show running-config"
ACLMGR3MAXRECURSN	3-Error	Too many [dec] levels of recursion while merging ACLs code [dec].	The configuration is too complicated for the platform specific ACL merge code to support. Most likely cause is including too many separate access lists in a single VLAN map or policy map.	firmware	"Reduce the number IP or MAC access lists" " considered separately in any one VLAN or policy"
ACLMGR4ACLTCAMFUL	4-Warning	[chars]ACL TCAM Full. Software Forwarding packets on [chars] label [dec] on [chars] [chars]	The ACL configuration is too large to fit in the platform -specific ACL TCAM table.	firmware	"Simplify the ACLs applied to interfaces or reduce" " their number."
ACLMGR4ACLTCAMFUL	4-Warning	ACL TCAM Full. [chars] [chars] [chars] [chars]	The ACL configuration is too large to fit in the platform -specific ACL TCAM table.	firmware	"Simplify the ACLs applied to interfaces or reduce" " their number."
ACLMGR3UNKNWNACTION	3-Error	Unknown VMR access group action 0x[hec]	An internal software error has occurred.	firmware	LOG_STD_ACTION
ACLMGR3UNKNWNACTION	3-Error	Unknown L4 operation 0x[hec]	ACL Manager module received invalid value for L4 operation. The problem can be due to memory corruption or bad system memory.	firmware	NACL_LAOP_ERROR

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
ACL MGR INVALID L4 INDEX	3-Error	Invalid L4 port array index while processing [chars]	ACL Manager module received invalid value for L4 port array index. The problem can be due to memory corruption or bad system memory.	firmware	NACL_L4OP_ERROR
ACL MGR CRITICAL LABEL	3-Error	ACL labels are out-of-sync on interface [chars] label [dec] is not available on asic [dec]	An internal software error has occurred.	firmware	LOG_STD_ACTION
ACL MGR FEATURE MISMATCH	3-Error	[chars] can not be supported with the image running on switch-[dec]	A feature has been configured on the stack but can not be supported on one or more switches in the stack. This feature will continue to work on the rest of the switches that support it but will not be applied to the switches that can not support it. All other features continue to work as expected on the stack.	firmware	"Upgrade the software running on switches that "can not support this feature. Upgrade to a "software version that supports this feature."
ACL MGR INVALID PARAM	3-Error	Invalid [chars] [dec] encountered	ACL Manager has encountered an invalid parameter value.	firmware	"show running-config"

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
ACL MGR UNLOAD SPAN	4-Warning	Unloading [chars] session [dec] [chars] feature	The ACL Manager was unable to fit the complete Flow based SPAN configuration into the hardware so this feature has been temporarily disabled for the given session.	firmware	"Allocate more space to the ACL section of the " "TCAM by choosing an SDM template with more ACL " "TCAM space and reboot the switch. You may also " "use a simpler ACL configuration and/or use the " "same ACLs on multiple interfaces if possible."
ACL MGR RELOAD SPAN	4-Warning	Reloading [chars] session [dec] [chars] feature	The ACL Manager was able to fit more of the configured Flow based SPAN features on this session into the hardware. One or more features had previously been unloaded because of lack of space.	firmware	LOG_SID_NO_ACTION
PLATFORM CONFIGURE	3-Error	Creation of [chars] exceeds the exceeds the maximum limit for the number of interfaces of type [chars] [dec]	The system supports a limited number of interfaces for each interface type. The user created more than the supported number of interfaces of this type	firmware	LOG_STD_ACTION
PLATFORM CONFIGURE	3-Error	Unable to configure hardware to [chars] host access on [chars]. Port may not behave as expected.	The system was unable to configure the hardware to set the requested host access policy. There may be insufficient TCAM resources available.	firmware	"Stop all traffic issue clear mac-address-table " "dynamic and remove and re-issue the command that failed."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
FM4EXCESSSECONDARY	4-Warning	More than [dec] secondary IP addresses configured on interface [chars]	When secondary IP addresses are configured on an interface the hardware is usually programmed so that the ICMP redirect functionality on the CPU is not notified of packets sent between two subnets configured on the same interface. If many secondary IP addresses are configured on the same interface it becomes impractical to program the hardware in this manner this message is logged and the CPU will be notified of every packet sent between two subnets on this interface. No ICMP redirects will be sent in error but the CPU usage may increase because of the additional notifications. The user may wish to configure \no ip redirects\ on the interface to reduce the CPU load on the system.	firmware	"configure the \"no ip redirects\" command on \"this interface"
FM3UNKNOWNACTION	3-Error	Unknown VMR access group action 0x[hec]	An internal software error has occurred.	firmware	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
NETWORKSHELLMACLUP	6-Information	Transmit lock up is detected in [chars]. This port is administratively down.	When the PHY is powered on and off the MAC cycles from Gigabit to 100 and the port might lock up and stop sending packets. The PHY refers to the physical layer device on the switch which sends and receives optical signals and provides framing and line integrity.	hardware	"Shut down the port by using the shutdown interface configuration " "command and bring it back up by using the no shutdown interface " "configuration command"
NETWORKSHELLPHYCUP	3-Error	Repeated phy lockup seen on [chars]. Interface will be shut down.	Phy lockup was detected too many times in a row. Interface is shutdown to avoid continuous link flapping.	firmware	"To re-enable interface issue 'shutdown' followed " "by 'no shutdown' command in interface " "configuration mode."
CPU_NETWORK_QUEUE_STUCK	0-Emergency	The interface between the CPU and the switch has\n become stuck. The switch must now reset to clear this condition\n. Retrieval queue [dec].\n	The CPU can no longer communicate with the network.	-	"Reload the system."
GIGASTACK3NT_FAILURE	3-Error	Gigastack GBIC in [chars] initialization failed.	Gigastack GBIC failed POST.	firmware	"Remove the Gigastack GBIC and re-insert it into the GBIC slot."
GIGASTACK_LOOP_DETECTED	6-Information	Gigastack GBIC in [chars] is selected as Master Loop Breaker. \nLink 2 of the Gigastack GBIC is disabled to break the loop.	Loop is detected in the Gigastack and this Gigastack GBIC is selected as the Master Loop Breaker. Link 2 of this Gigastack GBIC is disabled to break the loop.	-	LOG_SID_NO_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
GGASTACKLOOPBROKEN	6-Information	Link loss is detected in the Gigastack loop \nLink 2 of the Gigastack GBIC in [chars] is re-enabled.	Loop formed by Gigastack modules is broken because of link loss. Link 2 of the Master Loop Breaker is re-enabled to replace the broken link	-	LOG_SID_NO_ACTION
GGASTACKNOLOOPDETECT	1-Alert	The link neighbor of link [dec] of Gigastack GBIC in [chars] did not respond to the loop detection request. If loop topology is deployed make sure all switches in the stack are running the latest software.\n	No acknowledgement for Gigastack loop detection request is received from one of the links on a Gigastack GBIC. Either the neighboring switch does not support Gigastack Loop breaking algorithm or the link between the two Gigastack GBICs is broken. Under this condition a Gigastack loop topology will not be automatically detected and the connectivity between switches in the stack could be lost.	-	"If loop topology is used in the Gigastack make sure the latest software is running on all switches in the stack. Check the Gigastack GBICs involved to make sure they are functioning."
QM4NOT_SUPPORTED	4-Warning	Action '[chars]' is not supported for a policymap attached to output side.	This message means that a set or trust policy-map class configuration command was configured in a policy map and attached to an egress interface. A warning message is logged and the actions do not take affect. This is a hardware limitation.	hardware	"Do not configure a set or trust policy-map class configuration command in a " "policy map and attach it to an egress interface. These policy-map actions " "are supported only on ingress interfaces."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
QM ACTION_NOT_SUPPORTED	4-Warning	Action is not supported in policymap [chars]	This message means that an action other than the set trust and police policy-map class configuration commands was configured in a policy map. This is a hardware limitation.	hardware	"Configure only the supported actions of set trust and police when in " "policy-map class configuration mode."
QM MATCH_NOT_SUPPORTED	4-Warning	Match type is not supported in classmap [chars]	match ACL match ip dscp and match ip precedence are the match types that are supported	firmware	-
QM CLASS_NOT_SUPPORTED	4-Warning	Classification is not supported in classmap [chars]	This message means the an unsupported match class-map configuration command was configured in a policy map and attached to an egress interface or that more than one match command was configured. This is a hardware limitation.	hardware	"Reconfigure the class map or the policy map. Use only the match ip dscp dscp-list " "class-map configuration command in a policy map that is attached to an egress " "interface. Only one match per class map is supported."
QM HWRENCESURED	4-Warning	Hardware limitation has reached for policymap [chars]	The policy map configuration has exceeded the limitation of the hardware. You configured more QoS ACL entries than the number specified in the Switch Database Management sdm template.	hardware	"Reconfigure the class map or the policy map and reduce the number of QoS ACLs."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
QPOLICRNTS_EXCEED	4-Warning	Number of policers has exceeded hardware limitation for policymap [chars]	The policy map configuration has exceeded the limitation of the hardware. You configured more policers in a policy map by using the police or police aggregate policy-map class configuration command	hardware	"Reconfigure the class map or the policy map and reduce the number of policers."
QPOLICRATE_EXCEED	4-Warning	Policer configuration has exceeded hardware limitation for policymap [chars]	The policy map configuration has exceeded the limitation of the hardware. You configured a larger policing rate or burst size in a policy map by using the police or police aggregate policy-map class configuration command than supported.	hardware	"Reconfigure the class map or the policy map and reduce the policing rate or "burst size."
QPOLICERRM_QOS_CDN	4-Warning	Unexpected internal QoS condition.	This message means that an unexpected internal QoS condition has occurred. QoS debug may be enabled to obtain more information in case the condition recurs.	firmware	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
L3TCAMSIZE_CONFLICT	3-Error	[chars] requires enabling extended routing	In order to support this feature TCAM entry needs to be configured to extended routing enable.	firmware	"Modify the Switch Database Management SDM " "template to enable the switch to support the " "144-bit Layer 3 TCAM. Use the sdm prefer " "extended-match sdm prefer access extended-match " "or sdm prefer routing extended-match global " "configuration command and then reload the switch " "by using the reload privileged EXEC command."
L3TCAMSIZE_MANY_VRF	3-Error	Exceed the maximum number of VRF allowed	The number of VPN exceeds the maximum number of allowed VPN routing/forwarding table on this hardware platform.	firmware	"Reconfigure your switch to limit the number " "of VRFs. Do not define name more than seven "
PBR-2-NO_RMAP	2-Critical	Cannot create PBR data structures for route-map [chars]	The PBR manager could not allocate the data structures needed to describe a route-map being used for policy routing. Probably caused by lack of available memory.	firmware	"Use a less complicated configuration that " "requires less memory."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
PBR-3-NO_LABEL	3-Error	Cannot allocate label for route-map [chars]	The PBR manager could not allocate a label for this route-map. This means that the hardware cannot be programmed to implement policy routing. There is a limit of 247 labels for policy routing	firmware	"Use a less complicated configuration that " "allows label sharing. Use the same route-maps on multiple interfaces if possible"
PBR-3-MERGE_FAIL	3-Error	[chars] ACL merge error [dec] on route-map [chars]	The PBR manager could not complete the merge of the configured route-map into a form suitable for loading into the hardware. The most likely cause is specifying an ACL that is too large or too complex for the system to handle.	firmware	"Try specifying a smaller and less complicated " "configuration."
PBR-3-UNSUPPORTED_MAP	3-Error	Route-map [chars] not supported for Policy-Based Routing	The route-map attached to an interface for policy routing contains an action that is not supported on this platform. This is a hardware limitation.	hardware	"Reconfigure the route-map. Use only 'permit' " "entries and 'set ip next-hop' action in the " "route-map."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
HCPU5_PBR1EDACION	4-Warning	Set action in sequence [dec] of route-map [chars] supported by forwarding to CPU	The route-map attached to an interface for policy routing contains an action that is not supported in hardware since it contains a 'set interface' 'set ip default next-hop' 'set default interface' or 'set ip df' actions. This requires the packets to be forwarded by the CPU.	firmware	"Reconfigure the route-map. Use only 'set ip " "next-hop' in the route-map if possible."
PBR-3-INSTALL_FAIL	3-Error	Policy route-map [chars] not installed in hardware	The PBR manager was unable to install the complete route-map in the hardware so this will have to be applied in software. This requires the packets to be forwarded by the CPU.	firmware	"Reconfigure the route-map to use a simpler " " configuration. Use the same route-map on " "multiple interfaces if possible"
PBR-4-RETRY_INSTALL	4-Warning	Route-map [chars] installed in hardware upon retry	The PBR manager was able to fit the complete configuration into the hardware. One or more route-maps had previously not been loaded because of lack of space.	firmware	LOG_SID_NO_ACTION
GBIC5_SSW1N/DIA	6-Information	Unrecognizable GBIC found in [chars] serial data 0x%02x	The GBIC presented data to the system which did not correctly identify the type of the GBIC. It will be handled as a 'generic' GBIC.	firmware	"If the GBIC fails to become operational " "carefully reinsert it in the slot. If it " "continues to fail after reinsertion " "the GBIC may be defective or incompatible " "with the switch."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
GBIC4NOREAD_UNKNOWN	6-Information	Unrecognizable GBIC found in [chars] module mask 0x%02x	The GBIC presented data to the system which did not correctly identify the type of the GBIC. It will be handled as a 'generic' GBIC.	firmware	"If the GBIC fails to become operational " "carefully reinsert it in the slot. If it " "continues to fail after reinsertion " "the GBIC may be defective or incompatible " "with the switch."
GBIC4NOREAD_VSDATA	4-Warning	Unable to read vendor-specific data for GBIC interface [chars]	The GBIC was identified as a Cisco GBIC but the system was unable to read identifying vendor-specific information to verify its authenticity.	firmware	"Remove and reinsert the GBIC. If it fails " "again in the same way the GBIC may be defective."
GBIC4NOREAD_EXTIME	4-Warning	GBIC interface [chars] has unrecognized extended type	The GBIC was identified as a Cisco GBIC but the system does not recognize its reported extended type code.	firmware	"Check the list of supported GBICs for this version " "of the system software. An upgrade may be required " "for newer GBICs. Even if unrecognized the GBIC " "may still operate properly perhaps with limited " "functionality."
GBIC4NOREAD_VNAME	4-Warning	Unable to read vendor name for GBIC interface [chars]	The GBIC was identified as a Cisco GBIC but the system was unable to read the name of the GBIC's vendor.	firmware	"Remove and reinsert the GBIC. If it fails " "again in the same way the GBIC may be defective."
GBIC4NOREAD_VSRNUM	4-Warning	Unable to read serial number for GBIC interface [chars]	The GBIC was identified as a Cisco GBIC but the system was unable to read the GBIC's serial number.	firmware	"Remove and reinsert the GBIC. If it fails " "again in the same way the GBIC may be defective."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
GBIC4XCVR_INTERR	4-Warning	Internal error occurred in setup for GBIC interface [chars]	The system could not allocate resources or had some other problem in the setup for the specified GBIC interface.	firmware	"Reload the system. If the problem persists " "contact TAC."
GBIC4CHECKSUMFAILED	4-Warning	GBIC EEPROM data check sum failed for GBIC interface [chars]	The GBIC was identified as a Cisco GBIC but the system was unable to read vendor-data information to verify its correctness.	firmware	"Remove and reinsert the GBIC. If it fails " "again in the same way the GBIC may be defective."
ETHNICINTERNALERROR	3-Error	Internal Error [chars]	An internal error occurred.	firmware	LOG_SID_RECUR_ACTION
ETHNICUNEXPECTEDEVENT	3-Error	Request 0x%08x encountered event [dec] in state [dec]	An unexpected event occurred for a ram access request.	firmware	LOG_SID_RECUR_ACTION
HCNICONFDDUPLEXERR	3-Error	Flowcontrol will not take effect until duplex is set to auto.	-	firmware	"Configure duplex auto"
ETHNICRAMREPLYERR	3-Error	Invalid reply to RAM Access [chars] request 0x%08x from satellite [dec]	A request to read/write RAM on satellite access produced unexpected reply.	firmware	LOG_SID_RECUR_ACTION
ETHNICRAMALLOCERR	3-Error	RAM Access [chars] [chars] memory allocation failure	A request to read/write RAM failed memory allocation	firmware	LOG_SID_RECUR_ACTION
HCNICRAMGROWING	7-Debug	Ethernet Controller: Growing RAM Access [chars] Command	The command buffer for RAM Access is being grown dynamically because the original buffer was not big enough	firmware	LOG_SID_RECUR_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
EH0NIR3LOOPBACKDETECTED	3-Error	Keepalive packet loop-back detected on [chars].	Loop-back may be caused by accidentally plugging a balun cable into the port or there may be a misconfiguration in the network.	firmware	"Correct the problem causing the loopback condition. Then " "bring the port up by entering the shutdown then no shutdown " "interface configuration commands. The port will be " "automatically restarted after a timeout if errdisable " "recovery cause loopback is configured."
EH0NIR3HALFDUPLEXCOLLISIONTHRESHOLDEXCEEDED	3-Error	Half-duplex loopback detected collision threshold exceeded on [chars].	The collisions on a half-duplex port exceeded the threshold with no valid data packets. The port is considered to be in a loopback condition. This may be caused by accidentally plugging a balun cable into the port	firmware	"Correct the problem causing the loopback condition. Then " "bring the port up by entering the shutdown then no shutdown " "interface configuration commands. The port will be " "automatically restarted after a timeout if errdisable " "recovery cause loopback is configured."
EIH0NIR3INVALIDMAP	3-Error	Invalid map [dec] for address [enet]	An attempt to bridge a packet in software obtained an invalid result.	firmware	LOG_SID_RECUR_ACTION
EIH0NIR3MOLESENDINT	3-Error	Molecule send from interrupt handler	An interrupt handler is accessing the hardware in a manner that is not permissible in an interrupt handler.	firmware	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
EHCNTRMOLSEN DMOUT	2-Critical	Molecule send timeout queue [dec] molecule 0x[hec] 0x[hec]	An attempt to read or write one or more of the hardware settings failed.	firmware	LOG_STD_ACTION

VINES-2-BADTIMER	2-Critical	RTP timer for [chars] was found disabled and was reset	An internal interface timer is not running. This condition usually occurs after an interface is reset.	vines	"No action is required. The system automatically restarts the timer."
VINES6IPCNRoutine	6-Information	IPC port [dec] registered without an upcall [chars]	There is an inconsistency in the active VINES data structure for handling IPC data messages. A message was received for a port that should have a listener but the listener routine cannot be found.	vines	"Examine the IPC ports currently supported on the router by issuing the show vines ipc command and see whether the reported IPC port is indeed not active. Copy the message exactly as it appears and report it to your technical support representative along with the output of the debug vines ipc command."
VINES6RPCNOSERVICE	6-Information	IPC port [dec] registered without a service	There is an inconsistency in the active VINES data structure for handling Net RPC messages. A message was received for a port that should have a service description but that service description cannot be found.	vines	"Enter the show vines ipc command and see whether the reported IPC port has a registered service. Copy the message exactly as it appears and report it to your technical support representative if possible along with output of the debug vines netrpc command."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
VINES6RINNOTFOUND	6-Information	[chars] service [chars] routine not found while [chars]	There is an inconsistency in the active VINES service description data structures. A service handler routine cannot find the description of its own service.	vines	"Copy the message exactly as it appears and report it your technical support representative. In addition provide the output of the show vines service command and debug vines service traces for the service reported in the error message."
VINES6FNNOTFOUND	6-Information	[chars] service [chars] routine missing [chars] vector	There is an inconsistency in the static VINES data structures for handling application-layer packets.	vines	"Turn on VINES service level debugging for the service reported in the error message and copy the debug traces and the error message exactly as they appear and report them to your technical support representative."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
VINES-2-NOVENCAP	2-Critical	Encapsulation failed on [chars] for address [v-name]	The VINES code tried to send a packet on an interface that does not have a new encapsulation routine for outbound packets.	vines	"Toggle the problematic interface by issuing the interface shut and no shut commands and then issue the no vines metric and vines metric command see if the problem goes away. If the problem persists copy the message exactly as it appears and report it your technical support representative. If possible turn on and provide interface-specific debug traces particularly for VINES activities."
VLAN-5-PRIMARY-NO-INC	5-Notice	Warning: VLAN [dec]'s main interface is not the channel group of primary [chars] Pe-VLAN manual load-balancing will not take effect until channel-group is configured under the primary interface.	The interface configured as primary is not a memberlink in the port channel.	vlan	"Verify the configuration."
VLAN-5-SECONDARY-NO-INC	5-Notice	Warning: VLAN [dec]'s main interface is not the channel group of secondary [chars] Pe-VLAN manual load-balancing will not take effect until channel-group is configured under the secondary interface.	The interface configured as secondary is not a memberlink in the port channel.	vlan	"Verify the configuration."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
VLAN-IFACE-UNRESNT	3-Error	The [chars] link [chars] does not exist. Sub-interface: [chars] VLAN-Id: [dec]	This message appears when the below command is issued under port-channel sub-interface with the unknown	vlan	"Verify if the interface shows up using the "command - show ip int brief. \n Please insert " "the card in case it is removed and run " "the command again once the card comes up."
VLAN-3-XDRLEN	3-Error	Invalid XDR length. Type [dec] [chars]. XDR/buffer len [dec]/[dec]	-	-	-
VPDN-6-CLOSED	6-Information	[chars] [chars][chars] closed [chars] [chars] [chars][chars][chars]	The remote server typically the HGW/LNS closed this session. The reason for the closure is encoded in a hexadecimal format and corresponds to the particular protocol descriptions i.e. for L2F the values are documented in section 4.4.5 of the Internet Draft. A description string may also be present which describes the closure reason.	vpdn	"Check configuration on the NAS/LAC or HGW/LNS"

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
VPDN-6-DOWN	6-Information	[chars] [chars][chars] changed state to down [chars] [chars] [chars][chars][chars]	The remote server typically the HGW/LNS closed this tunnel. The\n\n reason for the closure is encoded in a decimal format which\n\n corresponds to the particular protocol descriptions i.e. for L2F\n\n the values are documented in section 4.4.5 of the Internet Draft.\n\n A description string may also be present which describes the\n\n closure reason.	vpdn	"Check configuration on the NAS/LAC or HGW/LNS"
VPDN-6-AUTHENERR	6-Information	[chars] [chars][chars] cannot authenticate for [chars] [chars] [chars][chars][chars]	The NAS/LAC or HGW/LNS is unable to locate a AAA server for the purposes of authenticating the user or tunnel. An error of this type indicates that the router was unable to establish a network connection with the designated/configured server. A reason string may also be present to provide further information.	vpdn	"Check AAA configuration on the NAS/LAC or HGW/LNS and network " "connectivity to the AAA servers."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
X25-4-BADMBIT	4-Warning	Interface [chars] VC [dec] partial data packet has M-bit set	This message occurs when a virtual circuit is set up using the default\n\n maximum packet sizes but the DTE and DCE are not configured with the\n\n same default values. A packet was received that had the M-bit set\n\n signifying that more data follows but the packet did not carry the\n\n maximum number of bytes allowed. Such partial data packets must have\n\n the M-bit cleared. The resulting loss of a message boundary might cause\n\n problems for the data recipient.	-	"Verify the default flow control parameters of the DTE and the DCE. If\n\n this message recurs call your technical support representative for\n\n assistance."
X25-3-ADDRESSBAD	3-Error	Interface [chars] x25 address [chars] subaddress [chars] is too long	This message occurs when a subaddress is configured. When this\n\n subaddress is combined with the interface's X.121 address the total\n\n address exceeds the limit of 15 characters.	-	"Reconfigure the subaddress so that this does not happen."
X25-3-SUBXOTDNSDEST	3-Error	Error substituting regular expression for XOT DNS destination pattern	This message occurs when the regular expression substitute utility fails to arrive at X.25 hostname pattern to be sent to DNS for address resolution	-	"Correct the X.25 route command's DNS substitution pattern"
X25-3-TRUNCXOTDNSDEST	3-Error	Truncating excess XOT addresses [dec] returned by DNS	-	-	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
X254XOIPVCDUPLICATE	4-Warning	Duplicated remote PVC data for {[chars] pvc [dec]} and {[chars] pvc [dec]}	This message identifies two local XOT PVCs that are defined using\n\n duplicate specifications for the connecting remote XOT PVC.	-	-
X25-4-BFEIP	4-Warning	Warning: IP address is missing or incompatible with BFE mode	An interface configured for X.25 BFE mode does not have an\n\n IP address configured or the IP address does not conform to \n\n BFE requirements so cannot be mapped to an X.121 address.	-	"Please configure a valid Class A IP address for the interface \n\n or remove the 'bfe' option from the 'encapsulation x25' command \n\n for the interface."
X25-3-X25INT	3-Error	Interface [chars] X.25 internal error [chars]	This is a general message covering numerous internal X25\n\n error conditions. The message text contains additional\n\n details that can be used to identify the problem.	-	LOG_SID_RECUR_ACTION
X25-3-XOTINT	3-Error	XOT internal error [chars]	This is a general message covering numerous internal error\n\n conditions related to XOT. The message text contains additional\n\n details that can be used to identify the problem.	-	-
X25-3-PROFILENO	3-Error	profile [chars] does not exist	This message occurs when an X.25 interface is configured to use\n\n an X.25 profile that does not exist	-	"Create and configure the x25 profile using x25 profile <name>\n\n global subcommand before referencing the profile."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
X25-3-X25NOCFG	3-Error	Profile is not configured	This message occurs when an X.25 interface is configured to use\n\n an X.25 profile that isn't configured	-	"Configure the x25 profile using x25 profile <name>\n\n global subcommand before referencing the profile."
X25-3-X25ENCINV	3-Error	[chars]	This message occurs when configuring an X.25 service.	-	LOG_STD_ACTION
X25-3-X25DEENCINV	3-Error	[chars]	This message occurs when deconfiguring X.25 service.	-	LOG_STD_ACTION
X25-3-INVCFGID	3-Error	[dec] is not a valid X.25 configuration ID	This message occurs when an invalid configuration id is used	-	LOG_STD_ACTION
X25-5-UPDOWN	5-Notice	Interface [chars] - DLCI [dec] X.25 packet layer state changed to [chars]	The state of the X.25 context associated with the DLCI changed	fr	"Notification message only. No action required"
X25-7-DIAGEVENT	7-Debug	Interface [chars] X.25 diagnostic event [chars] lci [dec][chars]	-	-	-
X25-7-DIAGRX	7-Debug	Interface [chars] X.25 Diagnostic received [chars][chars]	-	-	-
X25-5-CALL_RECORD	5-Notice	[chars]	This message contains X.25 call record information.	x25	LOG_SID_NO_ACTION
PAD-3-GETLINE	3-Error	Tty[t-line] bad return code [dec] from x3_getline	An internal software error occurred.	-	"If this message recurs copy the error message exactly as it\n\n appears and report it to your technical support representative."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
PAD-2-PUTSETUP	2-Critical	Tty[t-line] buffer already setup	An internal software error occurred.	-	"If this message recurs copy the error message exactly as it\n\ appears and report it to your technical support representative."
PAD-2-INTR	2-Critical	[chars] called at interrupt level [hec]	An internal software error occurred.	-	"If this message recurs copy the error message exactly as it\n\ appears and report it to your technical support representative."
SWMGR3INVALIDHANDLE	3-Error	Segment Manager Error - Invalid [chars] handle - [dec].	A Connection Manager error occurred due to a invalid handle.	-	LOG_STD_ACTION
SWMGR3INVALIDSEGMENT	3-Error	Segment Switch Manager Error - Invalid segment - [chars].	A Segment Switch Manager error occurred due to a invalid segment.	-	LOG_STD_ACTION
SWMGR3CMERRORCLASS	3-Error	Connection Manager Error: Class [chars]: - [chars].	A Segment Switch Connection Manager error occurred.	-	LOG_STD_ACTION
SW_MGR3CM_ERROR	3-Error	Connection Manager Error - [chars].	A Segment Switch Connection Manager error occurred.	-	LOG_STD_ACTION
SW_MGR3SM_ERROR	3-Error	Segment Manager Error - [chars].	A Segment Manager error occurred.	-	LOG_STD_ACTION
SW_MGR3FHM_ERROR	3-Error	SSM Feature Handler Manager Error - [chars].	A Feature Handler Manager error occurred.	-	LOG_STD_ACTION
SWMGR3CMERRORCLASS	3-Error	Connection Manager Feature Error: Class [chars]: [chars] - [chars].	-	-	-
SWMGR3CMERRORFEATURE	3-Error	Connection Manager Feature Error: [chars] - [chars].	-	-	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SW_MGR-3-SSM_SEG_ISSU	3-Error	SSM Segment ISSU: [chars] not supported.	ISSU of this SSM Segment is not supported.	-	LOG_SID_NO_ACTION
SW_MGR-3-XDR_REGISTRATION	3-Error	XDR failed to register [chars] client due to [chars]	Failure to register the said XDR client.	-	LOG_SID_NO_ACTION
GRIP-3-BADPATHS	3-Error	Invalid number of paths [dec] for %q	An internal inconsistency was detected in the XNS routing table\n\ structure.	-	"Note the parameters associated with this message and call your\n\ technical support representative for assistance."
GRIP-2-BADROUTE	2-Critical	Error [chars] route - null table	A hardware or software error occurred.	-	"Copy the error message exactly as it appears and report it to your\n\ technical support representative."
ZONE-4-API	4-Warning	Zone [chars] [chars][chars] [chars] failed to notify the data plane	The notification of a zone operation has failed to update the data\n\ plane and as such the application of the zone information within the\n\ object will not be applied to the data plane. It is also possible\n\ that the common classification may fail to locate and bind to the\n\ zone rendering the configuration inconsistent in terms of\n\ application.	zone	show memory
ZONE-6-CONFIG	6-Information	Zone security [chars] is removed due to VRF config change on interface [chars]	The notification of a zone is removed from an interface\n\ due to a vrf is removed from the interface	zone	show running

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
ZONE-4-LICENSE	4-Warning	License smart enable and zone-license enable should be enabled first	The notification indicates that zone smart license\n\n should be enabled	zone	show running
-	-	-	-	-	-
AAAA-3-BADSTR	3-Error	Bad accounting data: [chars]	During AAA accounting operations the internal database of accounting information for a user was found to be corrupt. In all cases this indicates an internal software error and that accounting information for a particular user session has been lost.	aaa	"Copy the error message exactly as it appears and report it to your " "technical support representative."
AAAA-3-ACCTDUMP	3-Error	dump of accounting data:	The data buffer overflowed while building the accounting packet as the total length of the attributes exceed the buffer size. Last 128 bytes of buffer data is dumped.	AAA	LOG_SID_ACTIONCollect the logs with these debugs by" " using commands #debug aaa api#debug aaa attr#debug aaa accounting"
AAAA-3-ACCTATTR	3-Error	last accounting attribute:	The data buffer overflowed while building the accounting packet. The accounting attribute that was being written to the buffer while the buffer overflow occurred was logged.	AAA	LOG_SID_ACTIONCollect the logs with these debugs by" " using commands #debug aaa api#debug aaa attr#debug aaa accounting"

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
AAAA3BADAUTHENSIR	3-Error	Bad authentication data: [chars]	The data buffer overflowed while building the authentication packet as the total length of the attributes exceeded the buffer size.	AAA	LOG_SID_ACTION could not be added to the logs with these debugs" " by using the commands #debug aaa api#debug aaa attr#debug aaa" " authentication"
AAAA-3-NULUSR	3-Error	accounting for null user	This message indicates an internal software error. During shutdown of a line or interface the system tried to send accounting information via AAA but could not find the user to which the accounting information belonged. The most likely reason for this error is trying to do accounting twice for the same event. This error message can occur without any loss of accounting information.	aaa	"Copy the error message exactly as it appears and report it to your " "technical support representative."
AAAA-3-NULPORT	3-Error	Could not establish port information	This message indicates an internal software error. AAA could not determine a valid port string based on the information provided to it via a client.	aaa	"Copy the error message exactly as it appears and report it to your " "technical support representative."
AAAA-3-RELOGIN	3-Error	sanity check in re-login [chars] to [chars]	A software or hardware error occurred.	aaa	"Copy the error message exactly as it appears and report it to your " "technical support representative."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
AAAADROPACCSNDL	3-Error	Accounting record dropped send to server failed: [chars]-[chars] [chars] [chars]	An attempt to send an accounting record to a server failed.	aaa	"Check that the server TACACS+ or RADIUS is operational. Next "
AAAADROPACCIOWMEM	3-Error	Accounting record dropped due to low memory: [chars]-[chars] [chars] [chars]	An accounting record dropped due to low memory.	aaa	"Disable periodic accounting if it is on. Try to reduce the load " "on the router."
AAAADROPACCIFULLQ	3-Error	Accounting record dropped due to a full aaa accounting queue: [chars]-[chars] [chars] [chars]	An accounting record was dropped because there are too many accounting packets enqueued.	aaa	"Disable periodic accounting if it is on. The accounting queue may " "have grown to be large which is usually due to a non-responsive " "AAA server. Use 'show radius statistics' or 'show tacacs' to see " "if the number of timeouts is increasing or if the response delay is " "unusually high."
AAAADROPACQUEXCD	3-Error	accounting record dropped output record queue full: [chars]-[chars] [chars] [chars]\n	An accounting record was dropped. The record could not be enqueued because the number of records in the output queue has exceeded the system limit.	aaa	"Disable periodic accounting if it is on. " "<CmdBold>[no] aaa accounting update newinfo " "periodic <interval><NoCmdBold>"
AAAAD3MKTIMERFAIL	3-Error	Failed to create periodic accounting timer for user [chars]. This user may not generate periodic accounting records.	Failed to malloc a timer struct for periodic accounting.	aaa	"Free up some memory and have user re-authenticate."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
AAA3MKTIMERINVALID	3-Error	Invalid request to create periodic accounting timer for user [chars]. Timer already exists.	Invalid client usage of timer struct for periodic accounting.	aaa	"Copy the error message exactly as it appears and report it to your " "technical support representative."
AAA3PROCIFORKFAIL	3-Error	Failed to start periodic accounting process. Periodic accounting records may not be sent.	Failed to create the periodic accounting process.	aaa	"Free up some memory."
AAA3ACCTIFORKFAIL	3-Error	Failed to start accounting process. Accounting records may not be sent.	Failed to create the accounting process.	aaa	"Free up some memory."
AAA3AAAFORKFAIL	3-Error	Failed to start AAA process. AAA requests may not be processed.	Failed to create the AAA process.	aaa	"Free up some memory."
AAA4BADMETHNAME	4-Warning	Bad [chars] method-list name \[chars]\ this is only a warning	A method-list name should not be the same as a method name. Please choose a different name for the method list.	aaa	"Pick a different method-list name that is not also a method-name."
AAA3ILLEGALNAME	3-Error	Illegal [chars] [chars] name \[chars]\ rejected	A method-list name should not be the same as a method name. Please choose a different name for the method list.	aaa	"Pick a different method-list name that is not also a method-name."
AAA-3-BADLIST	3-Error	%% AAA: bad [chars] list [chars]	One of the AAA methods does not seem to have a list associated with it.	aaa	LOG_STD_ACTION
AAA4UNSUPWAITSTART	4-Warning	%% AAA: Unsupported option wait-start mapped to start-stop.	wait-start accounting is not supported. It is being mapped to start-stop	aaa	"wait-start accounting is not supported. It is being mapped to start-stop"

SWITCH_L2M_ALLOC_FAILD	3-Error	Allocation of [chars] memory failed for SWITCH_L2M feature in QFP	Allocation of memory by the QFP SWITCH_L2M feature microcode failed. The name of the memory chunk is specified in the message. This indicates a software failure	qfp-switch-infra	LOG_STD_ACTION
SWITCH_L2M_PKT_REP_FAILD	3-Error	Failed to register with generic packet replication for SWITCH_L2M feature in QFP	SWITCH_L2M initialization of packet replication registration failed.	qfp-switch-infra	LOG_STD_ACTION
QFP_MLP_BQS_SCRATCH_TOO_SMALL	2-Critical	QFP BQS Scratch area too small for MLP feature usage size: [dec] need: [dec].	Cisco internal software error. QFP MLP initialization detected that the BQS scratch memory area is insufficient for MLP usage. The MLP Bundle interfaces will not be functional while this condition exists.	qfp-mlppp keyword:none	LOG_STD_ACTION
QFP_MLP_PROXY_IPC_INIT_FAILD	2-Critical	QFP MLP Proxy IPC interface initialization failure result: [dec].	Cisco internal software error. QFP MLP initialization detected that the Proxy IPC interface initialization failed. The MLP Bundle interfaces will not be functional while this condition exists.	qfp-mlppp keyword:none	LOG_STD_ACTION
QFP_MLP_PROXY_RECV_INVALID_MSG	3-Error	QFP MLP Proxy received invalid Message ID [dec]	Cisco internal software error. QFP MLP Proxy received an invalid Message ID. This message will be ignored.	qfp-mlppp keyword:none	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
QFPMLP PROXY INVALID	3-Error	QFP MLP Proxy [chars] [chars] invalid Rx/Tx interface value [dec] for	Cisco internal software error. QFP MLP Proxy was unable to complete the requested MLP Bundle state change or configuration update due to an invalid interface Rx/Tx designation in the proxy request. The associated MLP Bundle interface may not be fully functional as a result of this condition.	qfp-mlppp keyword:none	LOG_STD_ACTION
QFPMLP PROXY NULL BUNDLE	3-Error	QFP MLP Proxy [chars] [chars] NULL Bundle sub-block for interface [dec]	Cisco internal software error. QFP MLP Proxy was unable to complete the requested MLP Bundle state change or configuration update due to an invalid or uninitialized Bundle sub-block. The associated MLP Bundle interface may not be fully functional as a result of this condition.	qfp-mlppp keyword:none	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
QPM PROXYNULLINK	3-Error	QFP MLP Proxy [chars] [chars] NULL Member Link sub-block for	Cisco internal software error. QFP MLP Proxy was unable to complete the requested MLP Member Link state change or configuration update due to an invalid or uninitialized Member Link sub-block. The associated MLP Member Link interface may not be fully functional as a result of this condition.	qfp-mlppp keyword:none	LOG_STD_ACTION
QPM PROXYBUNDLESAE	3-Error	QFP MLP Proxy [chars] [chars] invalid Bundle state [chars] [dec] for	Cisco internal software error. QFP MLP Proxy message could not be processed due to the MLP Bundle being in an incorrect state to accept the message. The associated MLP Bundle interface may not be fully functional as a result of this condition.	qfp-mlppp keyword:none	LOG_STD_ACTION
QPM PROXYLINKSAE	3-Error	QFP MLP Proxy [chars] [chars] invalid Link state [chars] [dec] for	Cisco internal software error. QFP MLP Proxy message could not be processed due to the MLP Link being in an incorrect state to accept the message. The associated MLP Bundle interface may not be fully functional as a result of this condition.	qfp-mlppp keyword:none	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
QFPMLP_PROXY_INVALID_SUBDEV	3-Error	QFP MLP Proxy [chars] [chars] invalid Sub-Device ID [dec] for interface [chars]	Cisco internal software error. QFP MLP Proxy message Bundle Add could not be processed for the indicated interface due to an invalid Sub-Device ID. The associated MLP Bundle interface may not be fully functional as a result of this condition.	qfp-mlppp keyword:none	LOG_STD_ACTION
QFPMLP_PROXY_INVALID_LINKID	3-Error	QFP MLP Proxy [chars] [chars] invalid Link ID [dec] for interface [chars]	Cisco internal software error. QFP MLP Proxy message Link Add could not be processed for the indicated interface due to an invalid Link ID. The associated MLP Bundle interface may not be fully functional as a result of this condition.	qfp-mlppp keyword:none	LOG_STD_ACTION
QFPMLP_PROXY_DUPLICATE_LINKID	3-Error	QFP MLP Proxy [chars] [chars] duplicate Link ID [dec] for interface [chars]	Cisco internal software error. QFP MLP Proxy message Link Add could not be processed for the indicated interface due use of a given Link ID on multiple member links within the same MLP Bundle. The associated MLP Bundle interface may not be fully functional as a result of this condition.	qfp-mlppp keyword:none	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
QFPMLP_PROXY_INVALID_CLASSNO	3-Error	QFP MLP Proxy [chars] [chars] invalid Class Info Base: 0x%08x Num: [dec]	Cisco internal software error. QFP MLP Proxy message contained invalid MLP Class information. The associated MLP Bundle interface may not be fully functional as a result of this condition.	qfp-mlppp keyword:none	LOG_STD_ACTION
QFPMLP_PROXY_INVALID_MRRU	3-Error	QFP MLP Proxy [chars] [chars] invalid MRRU [dec] for interface [chars]	Cisco internal software error. QFP MLP Proxy message contained an invalid MLP Bundle MRRU. The associated MLP Bundle interface may not be fully functional as a result of this condition. Possible workaround is to reduce the interface mtu on the Multilink bundle interface on both ends of the connection to 9216 or less and then shut/no shut the Multilink bundle interface to force renegotiation of the MLP MRRU.	qfp-mlppp keyword:none	LOG_STD_ACTION
QFPMLP_PROXY_INVALID_FRGID	3-Error	QFP MLP Proxy [chars] [chars] indicated an invalid lost fragment	Cisco internal software error. QFP MLP was provided a invalid lost fragment timeout value. The associated MLP Bundle interface may not be fully functional as a result of this condition.	qfp-mlppp keyword:none	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
QFMPROXYNBUFFERLIMIT	3-Error	QFP MLP Proxy [chars] [chars] indicated an invalid Rx buffer limit	Cisco internal software error. QFP MLP was provided a invalid Rx buffer limit value. The associated MLP Bundle interface may not be fully functional as a result of this condition.	qfp-mlppp keyword:none	LOG_STD_ACTION
QFMPROXYLINKWEIGHT	3-Error	QFP MLP Proxy [chars] [chars] indicated an invalid Tx Link weight	Cisco internal software error. QFP MLP Proxy message contained invalid Tx Link weight information. The associated MLP Member Link and/or Bundle interface may not be fully functional as a result of this condition.	qfp-mlppp keyword:none	LOG_STD_ACTION
QFMPROXYLINKOPTIMAL	3-Error	QFP MLP Proxy [chars] [chars] indicated an invalid Tx Link optimal	Cisco internal software error. QFP MLP Proxy message contained invalid Tx Link optimal fragment size information. The associated MLP Member Link and/or Bundle interface may not be fully functional as a result of this condition.	qfp-mlppp keyword:none	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
QFPMLPXYIAIDLELINKRSDN	3-Error	QFP MLP Proxy [chars] [chars] invalid Bundle state [chars] [dec] for	Cisco internal software error. Multilink Idle-Link transition could not be made due invalid Bundle state at the time of the request. The associated MLP Bundle interface may not be fully functional as a result of this condition.	qfp-mlppp keyword:none	LOG_STD_ACTION
QFPMLPXYIAIDLELINKRSDN	3-Error	QFP MLP Proxy [chars] [chars] invalid Link state [chars] [dec] for	Cisco internal software error. Multilink Idle-Link transition could not be made due invalid Link state at the time of the request to convert the link to an Idle-Link. The associated MLP Bundle interface may not be fully functional as a result of this condition.	qfp-mlppp keyword:none	LOG_STD_ACTION
QFPMLPXYIAIDLELINKRSDN	3-Error	QFP MLP Proxy [chars] [chars] invalid Link state [chars] [dec] for	Cisco internal software error. Multilink Idle-Link transition could not be made due invalid Link state at the time of the request to convert the Idle-Link to an active link. The associated MLP Bundle interface may not be fully functional as a result of this condition.	qfp-mlppp keyword:none	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
QFP_MLP4PROXY_SYNC	4-Warning	QFP MLP Proxy [chars] [chars] Bundle/Link sync issue with interface [chars]	Cisco internal software error. QFP MLP Proxy message processing detected a Bundle-Link state synchronization abnormality. This condition should be cosmetic. Full context of the message will aid in problem isolation.	qfp-mlppp keyword:none	LOG_STD_ACTION
QFP_MLP4PROXY_SYNC	3-Error	QFP MLP Proxy [chars] response lost due to buffer allocation	Cisco internal software error. QFP MLP Proxy message processing detected a IPC buffer allocation failure during response processing. The associated MLP interface may not be fully functional as a result of this condition.	qfp-mlppp keyword:none	LOG_STD_ACTION
QFP_MLP4PROXY_SYNC	4-Warning	QFP MLP Proxy [chars] response lost due to buffer allocation	Cisco internal software error. QFP MLP Proxy message processing detected a IPC buffer allocation failure during proxy response processing. The associated MLP functionality may not be fully functional as a result of this condition.	qfp-mlppp keyword:none	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
QF_MLP_PROXY_UPDATE_LOCK_ERROR	3-Error	QFP MLP Proxy [chars] Multiple SID Update Locks to same interface	Cisco internal software error. QFP MLP Proxy message processing detected a Bundle Schedule SID update sequence error. One or more interface schedules could have been affected.	qfp-mlppp keyword:none	LOG_STD_ACTION
QF_MLP_PROXY_UPDATE_COMPLETE_WO_PRECEDING_LOCK_ERROR	3-Error	QFP MLP Proxy [chars] SID Update Complete w/o Preceding Lock	Cisco internal software error. QFP MLP Proxy message processing detected a Bundle Schedule SID update sequence error. One or more interface schedules could have been affected.	qfp-mlppp keyword:none	LOG_STD_ACTION
QF_MLP_EARLY_RX_INIT_ERROR	3-Error	QFP MLP Early Receive initialization error [chars]	Cisco internal software error. Multilink Early Receive initialization could not be performed due to indicated error. This could cause possible lost MLP encapsulated packets during member link/bundle bringup and possibly cause the failure to complete member link/bundle initialization.	qfp-mlppp keyword:none	LOG_STD_ACTION
QF_MLP_EARLY_RX_CLEANUP_ERROR	3-Error	QFP MLP Early Receive cleanup error [chars]	Cisco internal software error. Multilink Early Receive cleanup could not be performed due to indicated error. This could cause possible QFP memory leak.	qfp-mlppp keyword:none	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
QFMBMPPNADRCQERR	3-Error	MLP QoS encap-sequence [dec] must be less than the number	User software configuration mismatch with PPP Multilink Multiclass MCMP. User needs to either reduce the highest encap-sequence in	qfp-mlppp keyword:none	LOG_STD_ACTION
QFMBMPPNADRCCLAS	3-Error	MLP MCMP suspension class ID [dec] received from the peer	Possible error on the peer device with PPP Multilink Multiclass MCMP. Received MLP packet contained a MCMP suspension class ID	qfp-mlppp keyword:none	LOG_STD_ACTION
QFMPXBNDEHLOWDOF	4-Warning	QFP MLP Tx Bundle [chars] flowed OFF for an abnormal duration due to one or more congested member links Ticks: [dec]	Possible Cisco internal software or hardware error. QFP MLP Tx processing detected that a MLP Bundle interface was flowed off for an extended period of time due to a congested member link queue. The associated MLP Bundle interface may not be fully functional as a result of this condition.	qfp-mlppp keyword:none	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
QFMP4XBUNDLEFLOWEDON	4-Warning	QFP MLP Tx Bundle [chars] flowed ON after being flowed OFF for an abnormal duration Ticks: [dec]	Possible Cisco internal software or hardware error. QFP MLP Tx processing detected that a MLP Bundle interface was flowed off for an extended period of time due to a congested member link queue. The associated MLP Bundle interface may not be fully functional as a result of this condition.	qfp-mlppp keyword:none	LOG_STD_ACTION
QFMBMEMINVALIDNSAE	3-Error	MLP Link Add/Update received with invalid EVSI indication for Member Link: [chars] Bundle: [chars]	Either the user attempted to mix broadband and non-broadband member links on the same bundle or an internal error has occurred processing a configuration update.	qfp-mlppp keyword:none	LOG_STD_ACTION
QFMP4XBUNDLELOOP	4-Warning	QFP detected re-entry into MLP Tx Bundle [chars].	-	-	-
MCWRMDCASHTHROTHER	2-Critical	Allocation of ipv4 throttle [chars] memory failed	Allocation of memory resource use by ipv4 throttle fail	cpp-ucode	LOG_STD_ACTION
MCWRMDCASHTKTYPR	3-Error	Unsupported link type - linktype = [dec] dropping packet	Link type is unsupported at the current time.	cpp-ucode	LOG_STD_ACTION
MCWRMDCASHTKSMR	4-Warning	Checksum buffer walk failed	Internal problem occurred during calculating segmented packet checksum.	cpp-ucode	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
P4_CWFLNG TABLE_SIZE	3-Error	Table ID size configured incorrectly: [dec]	Table ID size must be less than or equal to 16 or 32 bits.	cpp-ucode	LOG_STD_ACTION
P4_CWFLNG FR_IDX	3-Error	Traffic index invalid value: [dec] Buckets allocated: [dec]	Traffic index is greater than or equal to the buckets allocated	cpp-ucode	LOG_STD_ACTION
P4_MR4INY_FRAGMENTS	4-Warning	Dropping [chars] from [chars] due to tiny fragment.	This message indicates that the router is receiving tiny fragments - meaning the initial fragment does not have complete layer 4 header	qfp-ipucast	"This is an informational message"
P4_MR4OVLAP FRAGMENTS	4-Warning	Dropping [chars] from [chars] due to overlap fragment.	This message is logged whenever the router encounters overlap fragments. Overlap fragment means offset of one fragment overlaps the offset of another fragment. For example if first fragment's offset is 0 and length is 800 then the second fragments offset must be 800. If second fragment's offset is less than 800 that means the second fragment overlaps the first fragment.	qfp-ipucast	"This could possibly be an attack configure a static ACL to prevent " further overlap fragments from the sender"

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
IPV4_FRAGMENTATION	4-Warning	Dropping [chars] from [chars] due to fragment table overflow.	This means the number of datagrams reassembled at a time reached its maximum limit increase the value of max-reassemblies using ip virtual-reassembly max-reassemblies <number>	qfp-ipucast	-
IPV4_FRAGMENTS	4-Warning	Dropping [chars] from [chars] due to too many fragments for the datagram.	This message indicates the datagram being reassembled has received more fragments than its threshold value	qfp-ipucast	"Check if the fragments received are from a genuine source if so " "increase the value of max-fragments using the CLI " "ip virtual-reassembly max-fragments <number>"
IPV4_INVALID_LENGTH	4-Warning	Dropping [chars] from [chars] due to invalid fragment length.	This message indicates that the router has encountered a fragment with invalid packet length	qfp-ipucast	"To prevent further attacks its highly recommended that an ACL " "be configured to drop any traffic from the sender"
IPV4_VFR4-TIMEOUT	4-Warning	Dropping [chars] from [chars] due to virtual reassembly timeout.	This message indicates that the router is trying to do virtual-reassembly for fragments but got timeout before receiving all the fragments for a datagram	qfp-ipucast	"This is an informational message"
IPV4_VFR4-CONFIG	4-Warning	Dropping [chars] from [chars] due to system config.	This message indicates that the router drops fragment packet due to ip virtual-reassembly drop-fragments	qfp-ipucast	"This is an informational message"

MCU MCU_CASE_FRAGMENTER	2-Critical	Allocation of ipv6 throttle [chars] memory failed	Allocation of memory resource use by ipv6 throttle fail	cpp-ucode	LOG_STD_ACTION
MCU MCU_CASE_LINK_PARSER	3-Error	Unsupported link type [chars] dropping packet	Link type is unsupported at the current time.	cpp-ucode	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
P6CWARDINGCHECKSUMERR	4-Warning	Checksum buffer walk failed	Internal problem occurred during calculating segmented packet checksum.	cpp-ucode	LOG_STD_ACTION
P6CWARDINGTABLESZERR	3-Error	Table ID size configured incorrectly: [dec]	Table ID size must be less than or equal to 16 or 32 bits.	cpp-ucode	LOG_STD_ACTION
P6VIR4IN_TINY_FRAGMENTS	4-Warning	Dropping [chars] from [chars] due to tiny fragment.	This message indicates that the router is receiving tiny fragments - meaning the initial fragment does not have complete layer 4 header	qfp-ipucast	"This is an informational message"
P6VIR4OVLAP_FRAGMENTS	4-Warning	Dropping [chars] from [chars] due to overlap fragment.	This message is logged whenever the router encounters overlap fragments. Overlap fragment means offset of one fragment overlaps the offset of another fragment. For example if first fragment's offset is 0 and length is 800 then the second fragments offset must be 800. If second fragment's offset is less than 800 that means the second fragment overlaps the first fragment.	qfp-ipucast	"This could possibly be an attack configure a static ACL to prevent " "further overlap fragments from the sender"

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
IPV6_FRAG_TABLE_OVERFLOW	4-Warning	Dropping [chars] from [chars] due to fragment table overflow.	This means the number of datagrams reassembled at a time reached its maximum limit increase the value of max-reassemblies using ipv6 virtual-reassembly in/out max-reassemblies <number>	qfp-ipucast	-
IPV6_FRAGMENT_THRESHOLD	4-Warning	Dropping [chars] from [chars] due to too many fragments for the datagram.	This message indicates the datagram being reassembled has received more fragments than its threshold value	qfp-ipucast	"Check if the fragments received are from a genuine source if so " "increase the value of max-fragments using the CLI " "ipv6 virtual-reassembly in/out max-fragments <number>"
IPV6_INVALID_FRAGMENT_LENGTH	4-Warning	Dropping [chars] from [chars] due to invalid fragment length.	This message indicates that the router has encountered a fragment with invalid packet length	qfp-ipucast	"To prevent further attacks its highly recommended that an ACL " "be configured to drop any traffic from the sender"
IPV6_VFR4TIMEOUT	4-Warning	Dropping [chars] from [chars] due to virtual reassembly timeout.	This message indicates that the router is trying to do virtual-reassembly for fragments but got timeout before receiving all the fragments for a datagram	qfp-ipucast	"This is an informational message"

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
IPV6_VFR-4-CONFIG	4-Warning	Dropping [chars] from [chars] due to system config.	This message indicates that the router drops fragment packet due to ipv6 virtual-reassembly drop-fragments	qfp-ipucast	"This is an informational message"
IPV6_VFR-4-CONFIG	4-Warning	Dropping [chars] from [chars]. Invalid drop log type [dec]	Unsupported drop log type	qfp-ipucast	LOG_STD_ACTION
MSCV_MCAST_FH_OIERR	2-Critical	Allocation of mpls throttle [chars] memory failed	Allocation of memory resource use by mpls throttle fail	cpp-ucode	LOG_STD_ACTION
GENERIC-3-COMMERR	3-Error	FO overwritten detected: magic [hec] table_id [hec] next_hop [hec]	Cisco internal software error. The dataplane was unable to complete enqueueing a packet. This is likely due to a data initialization error	cpp-ucode keyword:cent	LOG_STD_ACTION
IPV6_UDP-6-SUMFRAG	6-Information	source IP %Ci dest IP %Ci source port [dec] dest port [dec]	A first fragment of an IPv4 UDP packet with 0 checksum has been dropped	cpp-ucode	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
NAT64-FAULT-MAX-ENTRIES	6-Information	default max entries value [dec]	This is an information message which occurs when NAT is configured and a frame is dropped due to the default maximum entries limit. Starting with release 5 XNE NAT will use a default max-entries in the data plane based on the ESP type. This will not show in the configuration and is overridden by any user configuration of 'ip nat trans max-entries <value>'. The purpose of the default data plane limit is to protect the box from memory exhaustion which could occur if no limit is enforced.	cpp-ucode	-
NAT64-CLEAR-TRAN-USE	3-Error	-	The requested clear failed because the transaction was in use. Some clear commands support a 'forced' keyword which allows you to override this.	cpp-ucode	LOG_STD_ACTION
NAT64-EMPTY_CHUNK	3-Error	id [dec]	The memory provided by the client to the datapath initialization is NULL	cpp-ucode	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
NAT64-3-CHUNK_ID_MISMATCH	3-Error	id [dec] not found	The chunk ID provided by the client doesn't match any of the available chunk IDs. Hence a valid chunk could not be found for the given chunk ID.	cpp-ucode	LOG_STD_ACTION
NAT64-4-STATIC_MAP_ADD_FAIL	4-Warning	[chars] v4 addr %Ci v6 addr [ipv6_addr] [chars]	An add of a static NAT64 mapping failed due to listed reason.\n This mapping will be in the IOS configuration but is not active\n in the data plane. It is recommended to remove the mapping \n from the configuration\n	cpp-ucode	LOG_STD_ACTION
NAT64-6-SHOW_TRANS_FAIL	6-Information	unable to show [dec] entries from bucket %	Unable to show some entries from session/bind database. If using verbose try using non-verbose. Otherwise situation is likely to be temporary. Or it may be wise to do 'clear ip nat trans *' as a very odd session distribution has occurred.\n	cpp-ucode	LOG_STD_ACTION
NAT64-6-LOOPV6	6-Information	src IP [ipv6_addr] dest IP [ipv6_addr]	IPv6 packet has been dropped due to looping inside of NAT64. See recommended action	cpp-ucode	"There are 2 most likely items that should be checked for this error:\n" "1 check that none of the NAT64 interfaces are shutdown "

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
NAT64-6-LOOPV4	6-Information	src IP %Ci dest IP %Ci	IPv4 packet has been dropped due to looping inside of NAT64. See recommended action	cpp-ucode	"There are 2 most likely items that should be checked for this error:\n" "1 check that none of the NAT64 interfaces are disabled\n"
NAT64-3-POOL_ADD_FAIL	3-Error	pool-id [dec] rc [dec]	This message indicates that an address could not be allocated from a pool because there were no free addresses in the pool at that time.	cpp-ucode	LOG_STD_ACTION
NAT64-3-REFCOUNT_FAIL	3-Error	refcount [dec]	A request from the active to process a clear translation failed.\n Please retry.\n	cpp-ucode	LOG_STD_ACTION
NAT64-3-HA_INVALID_OPCODE	3-Error	invalid value [dec] opcode 0x[hec] version 0x[hec]	Standby received an invalid NAT64 HA message	cpp-ucode	LOG_STD_ACTION
NAT64-3-HA_BULK_SYNC_FAIL	3-Error	flags 0x[hec] rg [dec]	There was a failure such that NAT64 Bulk Sync did not occur	cpp-ucode	LOG_STD_ACTION
NAT64-3-HA_INVALID_STATE	3-Error	state [dec]	An invalid HA state was received from the HA infrastructure.	cpp-ucode	LOG_STD_ACTION
TCP3-TCP_REG_FAILED	3-Error	QFP TCP registers failed	Cisco internal software error. QFP TCP feature initialization detected that registration failed. QFP TCP will not be functional while this condition exists.	qfp-tcp keyword:tcp	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
CSSXCONDHRCRFEAL	3-Error	[chars]	Failure occurred when attempting to Register/Initialize conditional debugging.	qfp-ucode	LOG_STD_ACTION
POP3CHUNKCREAFAL	3-Error	-	POP3 code has detected a cleartext logon attempt in the inspected POP3 connection while secure-login is configured. This command has been rejected.	cpp-ucode	"This message is for informational purposed only but may indicate" "a security problem."
HTTPACHUNKCREAFAL	3-Error	-	This message indicates detection of an HTTP Java applet in a response	cpp-ucode	"This message is for informational purposed only but may indicate" "a security problem."
GIPACHUNKCREAFAL	3-Error	-	This message indicates that the packet is dropped by GTP AIC.	cpp-ucode	"This message is for informational purposed only but may indicate" "a security problem."
MPACHUNKCREAFAL	3-Error	-	IMAP code has detected a cleartext logon attempt in the inspected IMAP connection while secure-login is configured. This command has been rejected.	cpp-ucode	"This message is for informational purposed only but may indicate" "a security problem."
SMTPACHUNKCREAFAL	3-Error	-	Triggers on an invalid SMTP command in the SMTP connection. This message indicates that a suspicious violation was detected that may be an attack to the mail server system.	cpp-ucode	"This is unusual traffic and may warrant investigation."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
QOS QOS_CLASSIFY_FAIL	3-Error	dataplane classification error for interface [chars]	Cisco internal software error. The dataplane was unable to complete processing of a service policy due to a classification failure. This is likely due to a data initialization error	cpp-ucode keyword:qos	LOG_STD_ACTION
QOS QOS_CLASSIFY_CHDN	3-Error	child dataplane classification error for input interface [chars]	Cisco internal software error. The dataplane was unable to complete processing of a service policy due to a classification failure. This is likely due to a data initialization error	cpp-ucode keyword:qos	LOG_STD_ACTION
QOS QOS_CLASSIFY_CHDOT	3-Error	child dataplane classification error for output interface [chars]	Cisco internal software error. The dataplane was unable to complete processing of a service policy due to a classification failure. This is likely due to a data initialization error	cpp-ucode keyword:qos	LOG_STD_ACTION
QOS QOS_CLASSIFY_AL_CEN	3-Error	dataplane classification error for input interface [chars] [hec] [hec] [hec] [hec]	Cisco internal software error. The dataplane was unable to complete processing of a service policy due to a classification failure. This is likely due to a data initialization error	cpp-ucode keyword:qos	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
QOSCLASSIFYALCEOUT	3-Error	dataplane classification error for output interface [chars] [hec] [hec] [hec] [hec]	Cisco internal software error. The dataplane was unable to complete processing of a service policy due to a classification failure. This is likely due to a data initialization error	cpp-ucode keyword:qos	LOG_STD_ACTION
QOSPOLICEALADDRESSN	3-Error	dataplane policer error for input interface [chars] [hec] [hec] [hec] [hec] [hec]	Cisco internal software error. The dataplane was unable to complete processing of a service policy due to a policer failure. This is likely due to a data initialization error	cpp-ucode keyword:qos	LOG_STD_ACTION
QOSPOLICEALADDRESSOUT	3-Error	dataplane policer error for output interface [chars] [hec] [hec] [hec] [hec] [hec]	Cisco internal software error. The dataplane was unable to complete processing of a service policy due to a policer failure. This is likely due to a data initialization error	cpp-ucode keyword:qos	LOG_STD_ACTION
QOSPOLICECLASSIFYAL	3-Error	Color aware policer classification error for interface [chars]	Cisco internal software error. The dataplane was unable to complete processing of a service policy due to a classification failure on a color aware policer class. This is likely due to a data initialization error	cpp-ucode keyword:qos	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
QOS3-INVALID_QID	3-Error	Queuing error for interface [chars] qid [dec] wred [hec]	Cisco internal software error. The dataplane was unable to complete enqueueing a packet. This is likely due to a data initialization error	cpp-ucode keyword:qos	LOG_STD_ACTION
QOS3INVALID_CLASS_QD	3-Error	Class Queuing error for interface [chars] qid [dec]	Cisco internal software error. The dataplane was unable to complete enqueueing a packet. This is likely due to a data initialization error	cpp-ucode keyword:qos	LOG_STD_ACTION
QOS3INVALID_STAT_QD	3-Error	Stat Queuing error for interface [chars] qid [dec]	Cisco internal software error. The dataplane was unable to complete enqueueing a packet. This is likely due to a data initialization error	cpp-ucode keyword:qos	LOG_STD_ACTION
QOS3INVALID_DEFAULT_QD	3-Error	Default Queuing error for interface [chars] qid [dec]	Cisco internal software error. The dataplane was unable to complete enqueueing a packet. This is likely due to a data initialization error	cpp-ucode keyword:qos	LOG_STD_ACTION
QOS3INVALID_DEFAULT_QD	3-Error	Using Default Queue for interface [chars] qid [dec]	Cisco internal software error. The dataplane was unable to complete enqueueing a packet. This is likely due to a data initialization error	cpp-ucode keyword:qos	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
QOS3INVALID_Q_ADDRESS	3-Error	Invalid Queue address for interface [chars] qaddr [hec]	Cisco internal software error. The dataplane was unable to complete enqueueing a packet. This is likely due to a data initialization error	cpp-ucode keyword:qos	LOG_STD_ACTION
QOS3INVALID_STATS_NO	3-Error	Invalid address [hec] detected	Cisco internal software error. The dataplane was unable to complete enqueueing a packet. This is likely due to a data initialization error	cpp-ucode keyword:qos	LOG_STD_ACTION
QOS3INVALID_STATS_NO	3-Error	Invalid address [hec] detected	Cisco internal software error. The dataplane was unable to complete a statistics update on a packet. This is likely due to a data initialization error	cpp-ucode keyword:qos	LOG_STD_ACTION
QOS3INVALID_WRED_THRSH_ADDR	3-Error	Wred threshold address is invalid addr [dec]	Cisco internal software error. The dataplane was unable to complete enqueueing a packet. This is likely due to a data initialization error	cpp-ucode keyword:qos	LOG_STD_ACTION
QOS3INVALID_QUEUE_NO	3-Error	Drop policy given an invalid scheduling queue/wred [dec]/[dec]	Cisco internal software error. The dataplane was unable to complete enqueueing a packet. This is likely due to a data initialization error	cpp-ucode keyword:qos	LOG_STD_ACTION

CELBRNFPGA	2-Critical	CELBRNFPGA Multi Bit Error in RAM memory for slot/bay [dec]/[dec] Fatal failure. Reloading the IM	Soft errors are unintended changes to the values stored in SRAM,Âs configuration memory of FPGA caused by ionizing radiation. Please refer ,ÂSoft Error Mitigation Controller,Â product guide PG036 for more information. Please contact Cisco's Technical Assistance Center for more information.	spa-infra	LOG_STD_ACTION
SA_HDIMG_CORRUPTION	6-Information	[chars]: FPD image corruption detected for \[chars]\ ID=[dec] forcing upgrade	The software detected corruption on a FPD image and it is triggering the FPD automatic upgrade mechanism to correct the problem.	spa-infra-fpd	"No Action is required."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SPA_FPD_UPGRADE_ABORTED	4-Warning	[chars]: Upgrade aborted for \[chars]\ ID=[dec] - [chars]	The upgrade operation for the FPD image was aborted because the provided image cannot be used by the driver to perform the image programming operation.	spa-infra-fpd	"Make sure that the provide FPD image package for " "the FPD upgrade operation is a valid one for the Cisco IOS release in " "use. This can be verified with the <CmdBold>show upgrade fpd package " "default<NoCmdBold> command to display the required FPD image package " "version for the IOS image."
SPA_FPD3GE1VER_FAILED	3-Error	[chars]: Failed to get FPD version for \[chars]\ ID=[dec]: [chars].	Failed to get FPD version due to either IPC problem or operation error. The card will be disabled.	spa-infra-fpd	"Check SPA seating and SPA status. " "Ensure compatibility among FPD IOS and possible SPA " "firmware by comparing output of command " "<CmdBold>show hw-module subslot fpd<NoCmdBold> with IOS " "Release Notes. Obtain IOS version by command " "<CmdBold>show version<NoCmdBold>."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SPA_HD3URGRADE_FAILED	3-Error	[chars]: Failed to upgrade FPD [chars].	The FPD image upgrade operation failed. This error is specific to the SPA. The cause could be a wrong image file error in accessing fpga storage physical interrupt such as power failure or card removal. Depending on SPA type and error cause the card could be in an unusable status. Normally the system automatically reattempts the upgrade and shuts the card after repeated failures.	spa-infra-fpd	"Do not interrupt the system while an FPD " "upgrade is in progress. Obtain the matching FPD package. Refer " "to IOS Release Notes for more information on obtaining the correct " "FPD package for the SPA. Review the output of the RP FPD logs."
SPA_FPD-3JTAG_ERR	3-Error	[chars]: Failed to program a [chars] FPD image file. Error code 0x%02x.	While attempting to program a SPA FPGA via JTAG bus an error occurs. It could be caused by an outdated carrier card FPGA or SPA connection. It may also flag an internal software error.	spa-infra-fpd	"Retry the upgrade after reseating SPA. " "Verify carrier card FPGA is current. Copy exact the error " "message and report to TAC."
SPA_FPD-3SW_ERROR	3-Error	NULL	-	spa-infra-fpd	LOG_STD_ACTION
SPA_HD3PWRCH_FAILED	3-Error	Failed to power-off [chars] in [chars] for FPD offline upgrade within [dec] seconds.	The power-off operation of the indicated SPA failed within the number of specified seconds. This might indicate that the time used to wait for SPA to power-off is not long enough which can happen if the SPA has a lot of interfaces configured.	spa-infra-fpd	"Retry the upgrade operation again later. If the " "problem persists remove the configuration of the SPA before trying " "again the upgrade operation."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SPA_SMM665_CFG_WRITE_ERR	3-Error	[chars]: Failed to write new configuration into SMM665 device.	The write operation to SMM665 is performed through C2W serial interface from SPA carrier card the indicated failure might be caused by busy C2W serial interface.	spa-infra-fpd	"Retry the upgrade operation again later. If the " "problem persists remove the configuration of the SPA before trying " "again the upgrade operation."
SPA_ADM106X_READ_ERR	3-Error	[chars]: Failed to read version info from ADM106x device - [chars]	The read operation to ADM106x is performed through C2W serial interface from SPA carrier card the indicated failure might be caused by busy C2W serial interface.	spa-infra-fpd	"Try to reload the SPA with <CmdBold>hw-module subslot<NoCmdBold> " " <CmdBold>#<NoCmdBold> <CmdBold>#<NoCmdBold> command " "to correct the failure. If problem persists move the SPA to another " "bay of the carrier card."
SPA_HD_HEX_PARSE_ERR	3-Error	NULL	-	spa-infra-fpd	LOG_STD_ACTION
SPA_ADM106X_READ_ERR	3-Error	[chars]: Failed to read the content of ADM106x [chars] EEPROM section - [chars]	The read operation to ADM106x is performed through C2W serial interface from SPA carrier card the indicated failure might be caused by busy C2W serial interface.	spa-infra-fpd	"Retry the same operation again later. If the " "problem persists remove the configuration of the SPA before trying " "again the operation."
SPA_ADM106X_WRITE_ERR	3-Error	[chars]: Failed to write new configuration into ADM106x [chars] EEPROM section - [chars]	The write operation to ADM106x is performed through C2W serial interface from SPA carrier card the indicated failure might be caused by busy C2W serial interface.	spa-infra-fpd	"Retry the upgrade operation again later. If the " "problem persists remove the configuration of the SPA before trying " "again the upgrade operation."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SPA_D106EPRM_VERIFY_ERROR	3-Error	[chars]: Verification of write operation failed in ADM106x [chars] EEPROM section for address 0x[hec] - read value '0x[hec]' expected value '0x[hec]'.	The verification of the write operation has found a mismatch on the EEPROM data. The problem might be an indication of aging effect on the device that cannot longer hold written data.	spa-infra-fpd	"Retry the upgrade operation again later. If the " "problem persists replace the SPA."
SPA_FPD2PWR_NO_OK	2-Critical	SPA POWER OK signal is not asserted for [chars] in [chars] for FPD upgrade.	The check for SPA POWER OK signal assertion failed. This might indicate a HW problem with the SPA.	spa-infra-fpd	"Contact your Cisco technical support " "representative to have the SPA replaced."

SISF-4-IP_THEFT	4-Warning	IP Theft [chars]	A duplicate IP address has been detected IP theft and blocked	sisf	"If the existing entry is REACHABLE in the binding table \n\ and it moved to a new port \n\ consider reducing the REACHABLE timer \n\ otherwise it is either an attack or a configuration \n\ issue that must be resolved"
SISF-4-MAC_THEFT	4-Warning	MAC Theft [chars]	A duplicate MAC address has been detected MAC theft and blocked	sisf	"If the existing entry is REACHABLE in the binding table \n\ and it moved to a new port \n\ consider reducing the REACHABLE timer \n\ otherwise it is either an attack or a configuration \n\ issue that must be resolved"
SISF-4-BT_TIMER	4-Warning	BT Timer [chars]	Configured timer value is out of range defined for \n Wireless SISF	sisf	"Configure BT stale lifetimer between 300 and 86400 seconds \n\ and for other timers between 1 - 86400 seconds"
SISF-4-MAC_AND_IP_THEFT	4-Warning	MAC_AND_IP Theft [chars]	A duplicate MAC and IP address has been detected MAC_AND_IP theft and blocked	sisf	"If the existing entry is REACHABLE in the binding table \n\ and it moved to a new port \n\ consider reducing the REACHABLE timer \n\ otherwise it is either an attack or a configuration \n\ issue that must be resolved"

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
SISF-4-PAK_DROP	4-Warning	Message dropped [chars]	A message was dropped because one of the IPv6 first-hop \n\ security features said so	sisf	"Look at the reason. It can either be a valid drop and that \n\ could go up to disconnect the host attached to the interface \n\ or the policy configured on this interface is too severed \n\ and should be amended"
SISF-4-DATA_GLEAN_NOTIFICATION	4-Warning	No binding for [chars]	A data packet notification has been received because a snooping policy with the data glean option is configured and the Source address of the packet is not currently in the Binding Table.	sisf	-
SISF-4-RESOLUTION_VETO	4-Warning	Resolution vetoed [chars]	-	ipv6	"A low rate of vetoed resolutions is not serious. \n\ If there is a high rate of vetos this might suggest that \n\ the link is under attack. Investigate the source of the \n\ packets driving these resolution requests"
DC-FILE_OPEN_WARNING	4-Warning	Not able to open [chars]	The device classifier did not find the default profile file or it may be corrupted. DC is working using built-in profiles.	dc	" Perform archive download using the tar bundle image to install " " the profile file in the flash. " " Reload the switch with the image to see the warning message is gone. "

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
DC3PATTERN_NOT_FOUND	3-Error	[chars]	The device profiles file parsing failed. This indicates that the file may be corrupt. The device classifier will be operationally down if failure occurred for the Embedded profiles.	dc	"Reload the Device Profiles database file to the flash and re-enable the device classifier"
DC3COMPATIBLEVERSION	3-Error	Incompatible version of Profile detected in [chars]. Expected version:[dec] Version found:[dec]	An incompatible profile version is detected. The device classifier feature will be operationally down.	dc	"Reload the expected version of device profiles file to the "system and re-enable the device classifier "
DC3BUILTIN_INIT_FAIL	3-Error	[chars]	Initialization of Device classifier Built-in database failed. So the device classifier will be operationally down.	dc	LOG_STD_ACTION
DC6DEFAULT_INIT_INFO	6-Information	[chars]	The default profiles are not loaded and those devices will not be classified. Device classifier will continue to work with built-in profiles.	dc	LOG_STD_ACTION
DC3-SM_INIT_FAIL	3-Error	Device Classifier disabled. [chars] initialization failed	Registration of Device classifier with SM failed. So the device classifier will be operationally down.	dc	LOG_STD_ACTION
DC3-OUI_INIT_FAIL	3-Error	OUI Table initialization failed for [chars]	Loading of the OUI database in Device classifier failed.	dc	LOG_STD_ACTION
DC3-CHECK_INIT_FAIL	3-Error	[chars]	Loading of the Checks database in Device classifier failed.	dc	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
DC-3-DB_INIT_FAIL	3-Error	Device Classifier disabled. [chars] initialization failed	Initilization of Device classifier Internal database failed So the device classifier will be operationally down.	dc	LOG_STD_ACTION
DCMAXRULESEXCEED	3-Error	[chars].	The maximum number of rules that can be defined in device profiles exceeded the maximum limit. The device classifier will be operationally down if failure occured for the Embedded profiles.	dc	"Reduce the number of rules in the device profiles file and" "reload it into the " "system and re-enable the device classifier"
DCMAXPROFILESXCEED	3-Error	[chars].	The maximum number of profiles that can be defined in device profiles exceeded the maximum limit. The device classifier will be operationally down if failure occured for the Embedded profiles.	dc	"Reduce the number of rules in the device profiles file and" "reload it into the " "system and re-enable the device classifier"
DC3MAXOUISEXCEED	3-Error	[chars].	The maximum number of OUI codes that can be defined in device profiles exceeded the maximum limit. The device classifier will be operationally down if failure occured for the Embedded profiles.	dc	"Reduce the number of rules in the device profiles file and" "reload it into the " "system and re-enable the device classifier"

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
DC-3-NO_MEM	3-Error	[chars].	There is no memory left to allocate in the system The device classifier will be operationally down if failure occurred for the Embedded profiles.	dc	"Increase the memory size in the system and " "re-enable the device classifier"
DC-3-DC_DISABLED	3-Error	[chars].	The device classifier is disabled due to an error condition encountered during initialization or parsing the profiles	dc	"The specified error message is logged." "After the error condition is resolved" "re-enable the device classifier"
DC-3-SM_UPDATE	3-Error	Failed to update [chars].	Internal error occurred during device classification . This may cause the device to be unknown.	dc	-
DC-3-SM_API	3-Error	[chars] return [chars].	Internal error returned by Session Manager api.	dc	-
DC3FILE_READ_ERROR	3-Error	Error [chars] the profile file: [chars]	There was an error reading the profile file contents. The profiles in the errored file cannot be loaded into the device classifier.	dc	-
DC-3FILE_CHECKSUM	3-Error	Checksum [chars] failed for the profile file: [chars]	Checksum computation or verification failed for the profiles file. The profiles in the errored file cannot be loaded into the device classifier.	dc	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
DC-3-SM_GET	3-Error	Failed to get [chars].	Internal error occurred during communication with Session Manager. This may cause the show command not to display the device classification results.	dc	-
DC-3-DISABLE_FAIL	3-Error	Failed to disable DC.	Internal error occurred trying to disable Device Classifier.	dc	"Please run the command: show macro auto monitor clients and try disabling" "the clients"
DC-3-ENABLE_FAIL	3-Error	Failed to enable DC.	Internal error occurred trying to enable Device Classifier.	dc	"Please check the previous DC error messages and take the relevant action"
DC-3-HRPC_SYNC	3-Error	Error on member switch [dec] error_code = [dec]	Internal error occurred while trying to sync Device Classifier.state	dc	"Please check the state of the stack members"
KSCREACKESELFTESTPASS	6-Information	Keystore pass power on self test	keystore pass power on self test for both SHA1 and HMAC-SHA1	-	-
KSCREACKESELFTESTFAILURE	3-Error	Keystore power on self test failure. [chars]	keystore pass power on self test failure for SHA1 or HMAC-SHA1. The chips is not usable in this state.	-	"Report this error to your Cisco technical support representative " "and arrange to have the hardware keystore on the supervisor " "card replaced."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
KEYSTORE3-RANDOM	6-Information	A pseudo-random number was generated twice in succession[dec].	A pseudo-random number generator produced the same number twice\n\n in succession.	-	"Under normal circumstances a pseudo-random number generator will\n\n occasionally produce the same number twice in succession and this\n\n is not a problem. However if this message occurs frequently the \n\n system should be manually reloaded. If the message is persistent \n\n across reloads copy the error message exactly as it appears and \n\n report it to your technical support representative."
KEYSTORE3-IFS_OPEN_W	3-Error	Failed to open file \[chars]\ for writing software keystore. [chars]	An error occurred while opening a file for persistent storage. CTS keys could not be saved to persistent storage.	-	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
CIS3ROOT_CA_STORE_FAIL	3-Error	Could not install the CTS trusted-root certificate.	An error occurred while installing the CTS trusted-root certificate. This means that CTS cannot validate AAA servers' certificates received during EAP-FAST exchanges.	-	-
CIS3ROOT_CA_STORE_DONE	5-Notice	A trusted-root certificate to be used for CTS has been installed.	A CTS trusted-root certificate was received from a AAA server during an EAP-FAST enrollment. This certificate will be used for validating all AAA servers' certificates received from here on.	-	-
CIS3LSC_STORE_FAIL	3-Error	Failed to install newly-provisioned locally-significant certificate.	An error occurred while installing our locally significant certificate to be used for CTS. This means that we cannot be authenticated using a certificate. If a CTS password is available we will continue to authenticate using the password.	-	-
CIS3LSC_CA_STORE_FAIL	3-Error	Failed to install certificate of CA that issued our locally-significant certificate	An error occurred while installing the certificate of our issuing CA. When this error occurs the locally-significant certificate will be discarded and CTS will continue to use its password credentials for authentication.	-	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
CIS3LSC_ENROLL_FAIL	3-Error	Failed to set re-enrollment attributes for CTS locally-significant certificate.	An error occurred while setting the re-enrollment attributes for the new CTS certificate. When this error occurs the new certificate will be discarded and CTS will continue to use its password credentials for authentication.	-	-
CIS3PASSWORD_CHANGE_ONE	5-Notice	CTS password in the keystore has been renamed \[chars]\.	An MSCHAPv2 change-password sequence has been successfully executed and the old password is being renamed for fallback use. This is the first of a 2-part operation. Next the new password will be renamed to become the active password.	-	-
CIS3PASSWORD_CHANGE_TWO	5-Notice	A new CTS password has been installed as \[chars]\ in the keystore.	A new CTS password has been installed in the keystore following a successful MSCHAPv2 change-password sequence. The old password has been saved for fallback use.	-	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message Explanation	Component	Recommended Action
CIS4NO_PROV_SECRET	4-Warning	No shared secret available for provisioning PAC from server [inet].	We are unable to provision or reprovision a CTS PAC because we do not have a configured RADIUS shared secret for the server and there are no valid unexpired PACs that can be used to secure the re-provisioning exchange.	-	-
CISCSCRED_ACIU_NEEDED	1-Alert	CTS credentials are missing or inconsistent in the redundant keystore. Please re-configure cts credentials or execute cts change-password.	A redundant keystore was detected as either not containing any CTS credentials or having a different set of credentials as contained in the active keystore. This means that CTS authentication will fail upon switchover unless remedial action is taken before then. Either use the \cts credentials ... \CLI to re-configure the CTS device-id and password or use the \cts change-password ... \CLI to initiate a password change with the AAA server. Either of these actions will cause the device-id and password to be inserted in both the active and redundant keystores.	-	-
