CISCO

Unpacking the Router

This section includes instructions about how to unpack the Cisco 1240 Connected Grid Router and describes the items that ship with the router.

These topics are discussed:

- Unpacking the Router, page 1

- Router Package Contents, page 1

Unpacking the Router

Tip: When you unpack the router, do not remove the foam blocks attached to antennas and antenna connectors. The foam protects the antennas and connectors during installation.

To unpack the router:

1. Open the shipping container and carefully remove the contents.

2. Return all packing material to the shipping container, and save it.

3. Ensure that all items listed in the Router Package Contents, page 1 are included in the shipment. If any item is damaged or missing, notify your authorized Cisco sales representative.

Router Package Contents

Your router kit contains the items listed in Table 1 on page 2.

Note: Some items are optional and might not be included with the router if they were not ordered with the router.

Table 1   Cisco 1240 Connected Grid Router Package Contents
