

About This Guide

The following topics explain how to use this guide.

- Document Objectives, on page i
- Related Documentation, on page i
- Document Conventions, on page i
- Communications, Services, and Additional Information, on page ii

Document Objectives

The purpose of this guide is to help you configure VPN on the Secure Firewall ASA using the Adaptive Security Device Manager (ASDM), a web based GUI application. This guide does not cover every feature, but describes only the most common configuration scenarios.

This guide applies to the ASA series. Throughout this guide, the term "ASA" applies generically to supported models, unless specified otherwise.

Related Documentation

For more information, see Navigating the Cisco ASA Series Documentation at http://www.cisco.com/go/asadocs.

Document Conventions

This document adheres to the following text, display, and alert conventions.

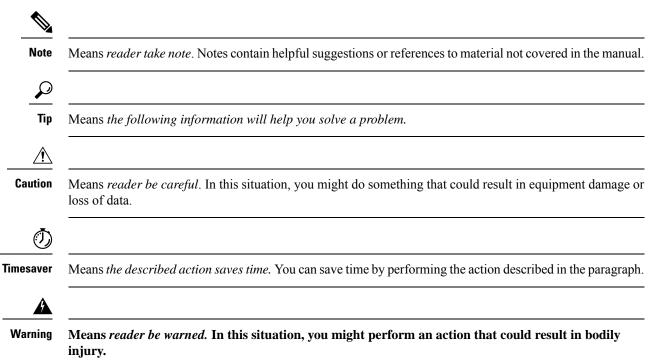

Text Conventions

Convention	Indication
boldface	Commands, keywords, button labels, field names, and user-entered text appear in boldface . For menu-based commands, the full path to the command is shown.
italic	Variables, for which you supply values, are presented in an <i>italic</i> typeface.Italic type is also used for document titles, and for general emphasis.

Convention	Indication
monospace	Terminal sessions and information that the system displays appear in monospace type.
$\{x \mid y \mid z\}$	Required alternative keywords are grouped in braces and separated by vertical bars.
[]	Elements in square brackets are optional.
[x y z]	Optional alternative keywords are grouped in square brackets and separated by vertical bars.
[]	Default responses to system prompts are also in square brackets.
<>	Non-printing characters such as passwords are in angle brackets.
!, #	An exclamation point (!) or a number sign (#) at the beginning of a line of code indicates a comment line.

Reader Alerts

This document uses the following for reader alerts:

Communications, Services, and Additional Information
