About Azure Marketplace

You can use an Azure image to create a virtual machine instance on Azure. Azure images for Secure Web Appliance are available in the Azure Marketplace.

The Azure Marketplace is the premier destination for all your software needs - certified and optimized to run on Azure to provide end-to-end solutions.

Secure Web Appliance Licensing

You can use your existing Secure Web appliance license for deployments on Microsoft Azure. After you deploy and launch the instance, you can install the license. You will be required to pay only the Azure infrastructure charges.

If you are a new customer, contact your Cisco partner to obtain a license.

If you are an existing customer, see [Obtain a Virtual License \(VLN\)](#) in [Best Practices for Virtual ESA, Virtual WSA, or Virtual SMA Licenses](#).
