Configurer les périphériques d'amorçage et non d'amorçage NDAC TrustSec

Contenu

Introduction

Ce document décrit comment configurer les périphériques de démarrage et non de démarrage lors de l'utilisation de trustsec avec ISE (Identity Services Engine).

Trustsec utilise NDAC (Network Device Admission Control) pour authentifier un nouveau périphérique avant de l'autoriser à rejoindre le domaine trustsec. Cela empêche les périphériques non autorisés de participer à l'échange d'informations de confiance. Les périphériques/authentificateurs de démarrage, dans ce cas le commutateur 6500, doivent être configurés manuellement et utiliser RADIUS sur IP pour se connecter à ISE. Les périphériques/supplicants non amorçables, dans ce cas le 3560X, n'ont pas de connectivité IP directe à ISE et exigent que les périphériques de démarrage s'inscrivent et les authentifient sur le réseau à l'aide de la norme 802.1X. Une fois le périphérique demandeur non amorcé authentifié, un PAC (Protected Access Credential) sera provisionné à partir de ISE et les informations du serveur seront téléchargées. Le PAC contient une clé partagée et un jeton chiffré pour fournir un

contact sécurisé à ISE dans le futur.

Conditions préalables

Serveur d'authentification ISE

Périphérique/authentificateur de démarrage compatible Trustsec

Dispositif/demandeur non amortisseur compatible Trustsec

Veuillez vous reporter à la dernière matrice de compatibilité trustsec :

http://www.cisco.com/c/en/us/solutions/enterprise-networks/trustsec/solution-overview-listing.html

Vérification de l'interface

```
Seed (6500)
6500#show cts interface gi6/1
Global Dot1x feature is Enabled
Interface GigabitEthernet6/1:
    CTS is enabled, mode:    DOT1X
    IFC state:               OPEN
    Interface Active for 00:38:50.744
    Authentication Status:   SUCCEEDED
        Peer identity:       "3560X"
        Peer's advertised capabilities: "sap"
        802.1X role:         Authenticator
    Authorization Status:    SUCCEEDED
```

```
      Peer SGT:               2:TrustSec_Devices
      Peer SGT assignment: Trusted
   SAP Status:               SUCCEEDED
Dot1x Info for GigabitEthernet6/1
----------------------------------
PAE                        = AUTHENTICATOR
```

Non-Seed (3560X)
```
3560X#show cts interface gi0/24
Global Dot1x feature is Enabled
Interface GigabitEthernet0/24:
   CTS is enabled, mode:    DOT1X
   IFC state:               OPEN
   Interface Active for 00:08:51.317
   Authentication Status:   SUCCEEDED
      Peer identity:        "6500"
      Peer's advertised capabilities: "sap"
      802.1X role:          Supplicant
      Reauth period applied to link:  Not applicable to Supplicant role
   Authorization Status:    SUCCEEDED
      Peer SGT:             2:TrustSec_Devices
      Peer SGT assignment: Trusted
   SAP Status:              SUCCEEDED
      Version:              2
Dot1x Info for GigabitEthernet0/24
----------------------------------
PAE                        = SUPPLICANT
```
