

# **ASA/PIX 7.x e versioni successive: Esempio di configurazione della stessa interfaccia che termina i tunnel IPsec da LAN a LAN e EasyVPN**

## **Sommario**

[Introduzione](#)

[Prerequisiti](#)

[Requisiti](#)

[Componenti usati](#)

[Convenzioni](#)

[Configurazione](#)

[Esempio di rete](#)

[Configurazioni](#)

[Verifica](#)

[Risoluzione dei problemi](#)

[Comandi per la risoluzione dei problemi](#)

[Informazioni correlate](#)

## **Introduzione**

In questo documento viene fornita una configurazione di esempio per abilitare l'appliance ASA HUB ad accettare il tunnel da sito a sito e le connessioni IPsec Easy VPN alla stessa interfaccia. L'IPsec tra Cisco ASA 5520 e Cisco Adaptive Security Appliance (ASA) 5505 utilizza Easy VPN con Network Extension Mode (NEM).

## **Prerequisiti**

### **Requisiti**

Nessun requisito specifico previsto per questo documento.

### **Componenti usati**

Le informazioni fornite in questo documento si basano sulle seguenti versioni software e hardware:

- ASA serie 5500 con versione 7.x e successive (Hub)**Nota:** la configurazione HUB ASA può essere utilizzata anche con PIX Security Appliance 515, 515E, 525 e 535 con versione 7.x e successive
- Easy VPN ASA 5505 con versione 7.x e successive

- PIX Security Appliance 515, 515E, 525 e 535 con versione 7.x e successive

Le informazioni discusse in questo documento fanno riferimento a dispositivi usati in uno specifico ambiente di emulazione. Su tutti i dispositivi menzionati nel documento la configurazione è stata ripristinata ai valori predefiniti. Se la rete è operativa, valutare attentamente eventuali conseguenze derivanti dall'uso dei comandi.

## Convenzioni

Fare riferimento a [Cisco Technical Tips Conventions](#) per ulteriori informazioni sulle convenzioni dei documenti.

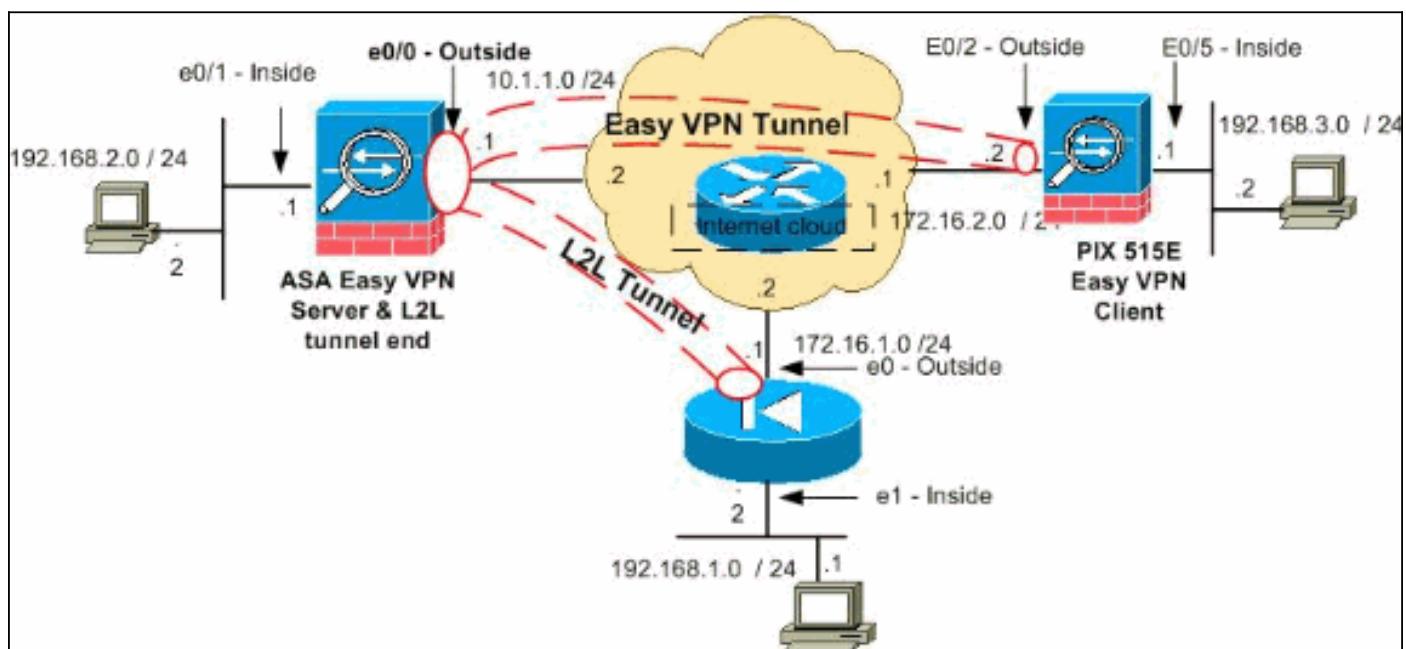

## Configurazione

In questa sezione vengono presentate le informazioni che è possibile utilizzare per configurare le funzionalità descritte nel documento.

**Nota:** per ulteriori informazioni sui comandi menzionati in questa sezione, usare lo [strumento di ricerca](#) dei comandi (solo utenti [registrati](#)).

## Esempio di rete

Nel documento viene usata questa impostazione di rete:

**Nota:** gli schemi di indirizzamento IP utilizzati in questa configurazione non sono legalmente instradabili su Internet. Si tratta degli indirizzi [RFC 1918](#) utilizzati in un ambiente lab.

## Configurazioni

Nel documento vengono usate queste configurazioni:

- [ASA HUB](#)
- [Easy VPN Client ASA 5505](#)

- [PIX](#)

## Verifica

Le informazioni contenute in questa sezione permettono di verificare che la configurazione funzioni correttamente.

Lo [strumento Output Interpreter](#) (solo utenti [registriati](#)) (OIT) supporta alcuni comandi **show**. Usare l'OIT per visualizzare un'analisi dell'output del comando **show**.

- **show crypto isakmp sa**: visualizza tutte le associazioni di sicurezza IKE correnti in un peer.
- **show crypto ipsec sa**: visualizza tutte le SA correnti.

In questa sezione vengono illustrati esempi di configurazioni di verifica per:

- [ASA HUB](#)
- [Easy VPN Client ASA 5505](#)
- [PIX](#)

### ASA HUB

## Risoluzione dei problemi

Le informazioni contenute in questa sezione permettono di risolvere i problemi relativi alla configurazione.

### Comandi per la risoluzione dei problemi

Alcuni comandi **show** sono supportati dallo [strumento Output Interpreter](#) (solo utenti registrati); lo [strumento permette di visualizzare un'analisi dell'output del comando show](#).

**Nota:** consultare le [informazioni importanti sui comandi di debug](#) prima di usare i comandi di debug.

Utilizzare i comandi PIX in modalità di configurazione:

- **clear crypto isakmp sa**: cancella le SA della fase 1
- **clear crypto ipsec sa**: cancella le SA di fase 2

I comandi di **debug** per i tunnel VPN:

- **debug crypto isakmp sa**: esegue il debug delle negoziazioni della SA ISAKMP
- **debug crypto ipsec sa**: esegue il debug delle negoziazioni della SA IPSec
