[Verifica](#)

[Risoluzione dei problemi](#)

[Informazioni correlate](#)

## [Introduzione](#)

In questo documento viene fornita una configurazione di esempio per il tunnel IPsec da LAN a LAN (da sito a sito) tra Cisco Security Appliance (ASA/PIX) e Adaptive Security Appliance (ASA) 5505.

## [Prerequisiti](#)

### [Requisiti](#)

Nessun requisito specifico previsto per questo documento.

### [Componenti usati](#)

Le informazioni fornite in questo documento si basano sulle seguenti versioni software e hardware:

- Cisco serie 5500 ASA con software versione 7.x e successive
- Cisco 5505 ASA con software versione 7.x e successive

Le informazioni discusse in questo documento fanno riferimento a dispositivi usati in uno specifico ambiente di emulazione. Su tutti i dispositivi menzionati nel documento la configurazione è stata ripristinata ai valori predefiniti. Se la rete è operativa, valutare attentamente eventuali conseguenze derivanti dall'uso dei comandi.

## [Prodotti correlati](#)

Questa configurazione può essere utilizzata anche con le seguenti versioni hardware e software:

- Cisco serie 500 PIX Security Appliance con software versione 7.x e successive
- Cisco 5505 ASA con software versione 7.x e successive

## [Convenzioni](#)

Fare riferimento a [Cisco Technical Tips Conventions per ulteriori informazioni sulle convenzioni dei documenti](#).

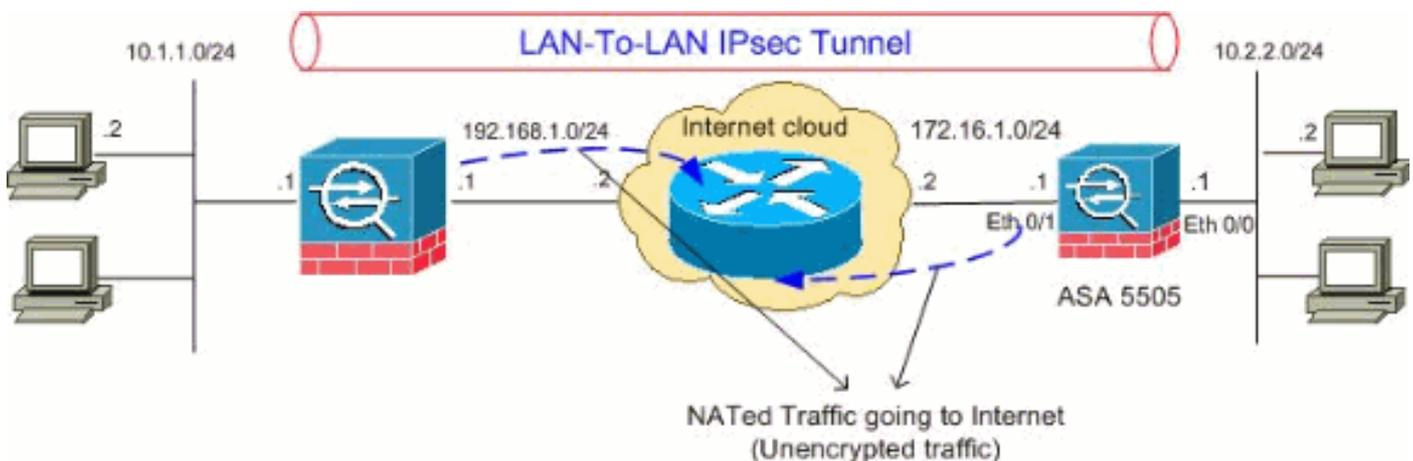

## [Configurazione](#)

In questa sezione vengono presentate le informazioni necessarie per configurare le funzionalità descritte più avanti nel documento.

**Nota:** per ulteriori informazioni sui comandi menzionati in questa sezione, usare lo [strumento di ricerca](#) dei comandi (solo utenti [registrati](#)).

## [Esempio di rete](#)

Nel documento viene usata questa impostazione di rete:

## [Configurazioni](#)

Nel documento vengono usate queste configurazioni:

- [Configurazione Cisco 5505 ASA](#)
- [Configurazione Cisco 5510 ASA](#)

## Verifica

Per verificare che la configurazione funzioni correttamente, consultare questa sezione.

Lo [strumento Output Interpreter](#) (solo utenti [registrati](#)) (OIT) supporta alcuni comandi **show**. Usare l'OIT per visualizzare un'analisi dell'output del comando **show**.

- **show crypto isakmp sa**: visualizza tutte le associazioni di sicurezza IKE correnti in un peer.
- **show crypto ipsec sa**: visualizza tutte le SA IPsec correnti.

In questa sezione vengono illustrati esempi di configurazioni di verifica per:

- [Cisco 5505 ASA](#)
- [Cisco 5510 ASA](#)

### Configurazione Cisco 5505 ASA

```

ASA5505#show crypto isakmp sa

## Risoluzione dei problemi

Le informazioni contenute in questa sezione permettono di risolvere i problemi relativi alla configurazione.

Utilizzare i seguenti comandi come illustrato:

- **clear crypto isakmp sa:** cancella le SA della fase 1. **Attenzione:** il comando **clear crypto isakmp sa** è intrusivo e cancella tutti i tunnel VPN attivi. A partire dalla versione 8.0(3) del software PIX/ASA, una singola associazione di protezione IKE può essere cancellata usando il comando **clear crypto isakmp sa <indirizzo ip peer>**. Prima della versione software 8.0(3), il comando [vpn-sessiondb logoff tunnel-group <tunnel-group-name>](#) può essere usato per cancellare le associazioni di sicurezza IKE e IPsec per un singolo tunnel.  
ASA5505#**vpn-sessiondb logoff tunnel-group 192.168.1.1**

Do you want to logoff the VPN session(s)? [confirm] **Y**  
INFO: Number of sessions from TunnelGroup "192.168.1.1" logged off : 1
