

Cisco Wide Area Application

Services(WAAS)TCP/IP Stack, 0.0.0.0, 1.1.1.1

Product: Cisco Wide Area Application Services (WAAS)

CVE-2017-

20170621-waas

6721

Published: 2017-06-21 16:00

Version: 1.0 : Final

CVSS Score: 5.8

Workarounds: No workarounds available

Cisco ID: [CSCvc57428](#)

Medium severity: A remote attacker can cause a denial of service (DoS) by sending a specially crafted packet to the affected device.

Summary

Cisco Wide Area Application

Services (WAAS) is a Cisco product that provides wide area network (WAN) optimization. It is used to improve network performance by compressing and caching data.

The vulnerability exists in the TCP/IP stack of the affected device. A remote attacker can exploit this vulnerability by sending a specially crafted packet to the affected device.

The vulnerability is caused by a buffer overflow in the TCP/IP stack. A remote attacker can exploit this vulnerability by sending a specially crafted packet to the affected device.
