

Cisco Unified Communications Manager

Medium

Product: Cisco Unified Communications Manager
ID : [cisco-sa-ucm-CVE-2020-3135](#)

Component: csrf-NbhZTxL

Published: 2020-01-22 16:00

Version: Cisco Unified Communications Manager 11.5(1) SR1

CVSS Score: 6.5

Workarounds: No workarounds available

Cisco Bug ID: [CSCuy76946](#)

Summary

Details

[CVE-2020-3135_su]

Cisco Unified Communications Manager

The vulnerability exists in the `ucm` component of Cisco Unified Communications Manager (CUCM) versions 11.5(1) SR1 through 11.5(1) SR10. The vulnerability is a CSRF attack that can be used to impersonate an administrator and perform actions on behalf of the administrator.

The vulnerability is a CSRF attack that can be used to impersonate an administrator and perform actions on behalf of the administrator.

The vulnerability is a CSRF attack that can be used to impersonate an administrator and perform actions on behalf of the administrator.

The vulnerability is a CSRF attack that can be used to impersonate an administrator and perform actions on behalf of the administrator.

The vulnerability is a CSRF attack that can be used to impersonate an administrator and perform actions on behalf of the administrator.

The vulnerability is a CSRF attack that can be used to impersonate an administrator and perform actions on behalf of the administrator.

The vulnerability is a CSRF attack that can be used to impersonate an administrator and perform actions on behalf of the administrator.

The vulnerability is a CSRF attack that can be used to impersonate an administrator and perform actions on behalf of the administrator.

The vulnerability is a CSRF attack that can be used to impersonate an administrator and perform actions on behalf of the administrator.

The vulnerability is a CSRF attack that can be used to impersonate an administrator and perform actions on behalf of the administrator.
