

Cisco Common Services Platform

Collector (CSPC) SQL Injection Vulnerability

Severity: Medium
Product: Cisco Common Services Platform
Version: 1.1 (Final)
CVSS: 4.9
Workarounds: No workarounds available
Cisco ID: CSCvx76422

[CVE-2021-40129](#)

Summary: The Collector (CSPC) component in Cisco Common Services Platform is vulnerable to a SQL injection attack.

Details

Cisco Common Services Platform

Collector (CSPC) is a component of the Cisco Common Services Platform (CSPC) that provides a central location for storing and managing configuration data.

The vulnerability exists in the Collector (CSPC) component, which is used to manage configuration data. An attacker can exploit this vulnerability by injecting a malicious SQL query into the Collector (CSPC) interface.

The vulnerability is caused by the lack of input validation in the Collector (CSPC) component. This allows an attacker to inject a malicious SQL query into the Collector (CSPC) interface.
