Authentication Bypass in Cisco Data Center Network Manager (DCNM) Web Interface

Summary

Cisco Data Center Network

Manager (DCNM) Web Interface Authentication Bypass

This advisory describes a vulnerability in Cisco Data Center Network Manager (DCNM) Web Interface that allows an attacker to bypass authentication and access sensitive information.

The vulnerability is caused by a flaw in the authentication process, which does not properly validate the user's credentials.

For more information, please refer to the [Cisco Security Advisory](#).
