csrf-xrTkDu3H

[34773](#)

Published: 2021-11-03 16:00

Version: 1.0 : Final

CVSS Score: [6.5](#)

Workarounds: No workarounds available

Cisco ID : [CSCvy86674](#) [CSCvz73888](#)

Summary: A vulnerability in Cisco Unified Communications Manager (UCM) allows an attacker to perform a CSRF attack and execute arbitrary code via a specially crafted request.

Details

Cisco Unified Communications Manager (Unified CM) Session Management Edition (Unified CM SME) and Cisco Unified Communications Manager IM & Presence Service (Unified CM

IM&P) WebRTC services are affected. An attacker can exploit this vulnerability to execute arbitrary code on the affected device.

The vulnerability exists because the affected services do not properly validate the origin of the request, allowing an attacker to perform a CSRF attack.

Attackers can exploit this vulnerability to execute arbitrary code on the affected device.
