

# Cisco Webex Video

## Mesh

Product: Cisco Webex Video

CVE-2021-

Summary: Remote Denial of Service

1500

Published: 2021-11-03 16:00

Version: 1.0 : Final

CVSS Score: 5.4

Workarounds: No workarounds available

### Summary

Cisco Webex Video

Mesh is a cloud-based video conferencing solution that allows users to join meetings from various devices and locations.

The vulnerability in Mesh allows an attacker to perform a Denial of Service (DoS) attack by sending a specially crafted request to the service.

This attack can be performed against the Mesh service, which is used by many organizations for video conferencing.

The vulnerability is caused by a buffer overflow in the Mesh service, which can be triggered by a specially crafted request.

For more information, please refer to the following link: <https://sec.cloudapps.cisco.com/security/center/content/CiscoSecurityAdvisory/cisco-sa-vmesh-openred-AGNRmf5>

### Impact

The impact of this vulnerability is a Denial of Service (DoS) attack.

This attack can be performed against the Mesh service, which is used by many organizations for video conferencing. The impact is a Denial of Service (DoS) attack, which can cause the service to become unavailable.

The vulnerability is caused by a buffer overflow in the Mesh service, which can be triggered by a specially crafted request.

This attack can be performed against the Mesh service, which is used by many organizations for video conferencing. The impact is a Denial of Service (DoS) attack, which can cause the service to become unavailable.

The impact of this vulnerability is a Denial of Service (DoS) attack.

This attack can be performed against the Mesh service, which is used by many organizations for video conferencing. The impact is a Denial of Service (DoS) attack, which can cause the service to become unavailable.
