CVE-2023-20078i¼šCisco IP Phone

IP Phone 6800, 7800, 8800, and 9800

Cisco	CVE-2023-20078	
Cisco Unified IP Conference Phone 8831 and Cisco Unified IP Phone 8831	Cisco Unified IP Phone 7900 and Cisco Unified IP Phone 9800	
11.3.7SR1 and 12.0.1	11.3.7SR1	

Product Security Incident Response Team (PSIRT); Cisco Unified IP Phone 8831 and Cisco Unified IP Phone 8831, Cisco Unified IP Phone 7900 and Cisco Unified IP Phone 9800. This vulnerability affects the SIP proxy module in the Cisco Unified IP Phone software.

### Impact

Cisco PSIRT: This vulnerability allows a remote attacker to bypass authentication and access the SIP proxy module. This may lead to unauthorized access of the device and its resources.

### Workaround

Cisco PSIRT: Cisco does not have a workaround for this vulnerability. Cisco is working on a software update to address this issue. In the meantime, Cisco recommends that users of affected devices should contact their Cisco representative for more information.
