1: Cisco will apply a standard lead time to your requested start date based on the selected product. Cisco may not be able to honor the requested start date (RSD). In some cases, our systems may require additional lead-time to provision your services. Submitting a RSD that is too early could cause customer subscription billing issues. Verify the requested start date with your implementation team that aligns with customer deployment readiness. (C0742)

2: Your subscription will start and be eligible to be invoiced: i) 30 days or less (7 days for A-FLEX/A-FLEX-3) after Cisco notifies you that any portion of the subscription is ready for you to provision OR, ii) the day any portion of the subscription is provisioned by Cisco, whichever of the two events happens first.
