## Copy/Save Configuration

All configurations that the switch is currently using are in the running configuration file which is volatile and is not retained between reboots. To retain the configuration between reboots, make sure you copy the running configuration file to the startup configuration file after you have completed all your changes.

Source File Name:	<input checked="" type="radio"/> Running configuration <input type="radio"/> Startup configuration <input type="radio"/> Backup configuration <input type="radio"/> Mirror configuration
Destination File Name:	<input checked="" type="radio"/> Running configuration <input type="radio"/> Startup configuration <input type="radio"/> Backup configuration
Sensitive Data:	<input type="radio"/> Exclude <input checked="" type="radio"/> Encrypted <input type="radio"/> Plaintext <small>Available sensitive data options are determined by the current user's SSD rules</small>
Save Icon Blinking:	Enabled

Running configuration as Source File Name, Startup configuration as the Destination File Name, Encrypted as Sensitive Data, Save Icon Blinking is Enabled.
