Como eu impeço que meu ESA esteja usado como um relé aberto?

Para fixar seu ESA da utilização como um relé aberto, se certifica de que você especificou os domínios destinatários na tabela destinatária do acesso (RATO) de seus ouvintes públicos e de que "TODA A" entrada está configurada "para rejeitar". As entradas do RATO podem ser adicionadas através do GUI, na aba das políticas do correio. Está abaixo um exemplo que mostra como adicionar um domínio, "example.com" ao RATO através do CLI.

```
