[Cenário 3: Segredo compartilhado incorreto inserido durante o registro do domínio UCS.](#)

[Cenário 4 : O UCS Central não pode se comunicar com o UCS Manager durante o registro](#)

## Introduction

Este documento descreve as etapas para registrar os domínios Cisco Unified Computing System - UCS com o UCS Central. Antes da versão 1.5 do UCS Central, o registro só poderia ocorrer a partir do UCS Manager. A versão 1.5 em diante, o registro pode ser feito do UCS Central e do UCS Manager.

## Componentes Utilizados

UCS Central 2.0(1a)

UCS Manager 3.1(3a)

Todos os dispositivos usados são dispositivos de laboratório

## Procedimento

**Processo de registro do UCS Domain:**

Inicie o UCS Manager e clique em **Admin-> Communication Management-> UCS Central**.

Selecione **Registrar no UCS Central** .

Insira o nome do host/endereço IP e o segredo compartilhado da UCS Central (sempre é uma prática recomendada para registrar a UCS central usando o nome do host, pois o endereço IP pode ser alterado usando a entrada DNS, enquanto o domínio está registrado) e clique em **Ok** para iniciar o registro.

O controle de resolução de política pode ser definido durante o registro. Também pode ser alterado após o registro.

### Register With UCS Central

Hostname/IP Address :

Shared Secret :

All Global

Policy Resolution Control	
Infrastructure & Catalog Firmware :	<input checked="" type="radio"/> Local <input type="radio"/> Global <p>Determines whether the Capability Catalog and infrastructure firmware policy are defined locally or come from Cisco UCS Central.</p>
Time Zone Management :	<input checked="" type="radio"/> Local <input type="radio"/> Global <p>Determines whether the time zone and NTP server settings are defined locally or comes from Cisco UCS Central.</p>
Communication Services :	<input checked="" type="radio"/> Local <input type="radio"/> Global <p>Determines whether HTTP, CIM XML, Telnet, SNMP, web session limits, and Management Interfaces Monitoring Policy settings are defined locally or in Cisco UCS Central.</p>
Global Fault Policy :	<input checked="" type="radio"/> Local <input type="radio"/> Global <p>Determines whether the Global Fault Policy is defined locally or in Cisco UCS Central.</p>
User Management :	<input checked="" type="radio"/> Local <input type="radio"/> Global <p>Determines whether authentication and native domains, LDAP, RADIUS, TACACS+, trusted points, locales, and user roles are defined locally or in Cisco UCS Central.</p>
DNS Management :	<input checked="" type="radio"/> Local <input type="radio"/> Global <p>Determines whether DNS servers are defined locally or in Cisco UCS Central.</p>

**Processo de registro do UCS Central:**

Inicie o UCS Central e clique em **Ferramentas do sistema** e vá para **Gerenciamento de domínio**.

Clique em **Register Domain (Registrar domínio)** no canto direito.

Insira o **nome de host/endereço IP** do domínio UCS e o **nome de usuário** administrativo e a **senha**. Selecione o **nome de host/endereço IP** do UCS Central e clique em **Registrar**. (Sempre uma prática recomendada para registrar o UCS central usando o nome do host como endereço IP pode ser alterada usando a entrada DNS, enquanto o domínio está registrado).

## UCS Central System Profile - Date & Time

In addition, if HTTPS is supported on the Domain, it must be enabled in order to register with UCS Central.

UCS Domain Hostname/IP Address \*

ucsdomain.cisco.com

UCS Domain User Name \*

UCS Domain Password

\*\*\*\*\*

Registration Hostname/IP address from UCS Central

hk-central-2

Cisco best practice is to register UCS Domains to UCS Central using the Fully Qualified Domain Name (FQDN). If you register the UCS Domain to UCS Central using an IP address and later change the IP address of UCS Central, you will need to unregister and re-register the UCS Domain to UCS Central.

## Solução de problemas comuns de registro:

**Cenário 1:** A senha do administrador para o domínio UCS está incorreta ao registrar o domínio do UCS Central.

**Reparar:** Corrija a senha do administrador e tente o registro novamente.

## Cenário 2: A hora do UCS Central e do UCS Domain não é sincronizada.

**Reparar:** Sincronize a hora no UCS Central e no UCS Domain e tente a região novamente.

Consulte **Sincronização forçada no UCS Manager** no link abaixo para corrigir a hora.
